

Federal Register

1-17-01

Vol. 66 No. 11

Pages 3853-4074

Wednesday

Jan. 17, 2001

The **FEDERAL REGISTER** is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see <http://www.nara.gov/fedreg>.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and it includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

GPO Access users can choose to retrieve online **Federal Register** documents as TEXT (ASCII text, graphics omitted), PDF (Adobe Portable Document Format, including full text and all graphics), or SUMMARY (abbreviated text) files. Users should carefully check retrieved material to ensure that documents were properly downloaded.

On the World Wide Web, connect to the **Federal Register** at <http://www.access.gpo.gov/nara>. Those without World Wide Web access can also connect with a local WAIS client, by Telnet to swais.access.gpo.gov, or by dialing (202) 512-1661 with a computer and modem. When using Telnet or modem, type swais, then log in as guest with no password.

For more information about GPO Access, contact the GPO Access User Support Team by E-mail at gpoaccess@gpo.gov; by fax at (202) 512-1262; or call (202) 512-1530 or 1-888-293-6498 (toll free) between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is \$638, or \$697 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is \$253. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is \$9.00 for each issue, or \$9.00 for each group of pages as actually bound; or \$2.00 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 66 FR 12345.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

- FOR:** Any person who uses the Federal Register and Code of Federal Regulations.
- WHO:** Sponsored by the Office of the Federal Register.
- WHAT:** Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
 2. The relationship between the Federal Register and Code of Federal Regulations.
 3. The important elements of typical Federal Register documents.
 4. An introduction to the finding aids of the FR/CFR system.
- WHY:** To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: January 24, 2001, from 9:00 a.m. to Noon (E.S.T.)

WHERE: Office of the Federal Register
Conference Room
800 North Capitol Street, NW.
Washington, DC
(3 blocks north of Union Station Metro)

RESERVATIONS: 202-523-4538

Printed on recycled paper.

Presidential Documents

Title 3—

Executive Order 13186 of January 10, 2001

The President

Responsibilities of Federal Agencies To Protect Migratory Birds

By the authority vested in me as President by the Constitution and the laws of the United States of America, and in furtherance of the purposes of the migratory bird conventions, the Migratory Bird Treaty Act (16 U.S.C. 703–711), the Bald and Golden Eagle Protection Acts (16 U.S.C. 668–668d), the Fish and Wildlife Coordination Act (16 U.S.C. 661–666c), the Endangered Species Act of 1973 (16 U.S.C. 1531–1544), the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4347), and other pertinent statutes, it is hereby ordered as follows:

Section 1. Policy. Migratory birds are of great ecological and economic value to this country and to other countries. They contribute to biological diversity and bring tremendous enjoyment to millions of Americans who study, watch, feed, or hunt these birds throughout the United States and other countries. The United States has recognized the critical importance of this shared resource by ratifying international, bilateral conventions for the conservation of migratory birds. Such conventions include the Convention for the Protection of Migratory Birds with Great Britain on behalf of Canada 1916, the Convention for the Protection of Migratory Birds and Game Mammals-Mexico 1936, the Convention for the Protection of Birds and Their Environment-Japan 1972, and the Convention for the Conservation of Migratory Birds and Their Environment-Union of Soviet Socialist Republics 1978.

These migratory bird conventions impose substantive obligations on the United States for the conservation of migratory birds and their habitats, and through the Migratory Bird Treaty Act (Act), the United States has implemented these migratory bird conventions with respect to the United States. This Executive Order directs executive departments and agencies to take certain actions to further implement the Act.

Sec. 2. Definitions. For purposes of this order:

(a) “Take” means take as defined in 50 C.F.R. 10.12, and includes both “intentional” and “unintentional” take.

(b) “Intentional take” means take that is the purpose of the activity in question.

(c) “Unintentional take” means take that results from, but is not the purpose of, the activity in question.

(d) “Migratory bird” means any bird listed in 50 C.F.R. 10.13.

(e) “Migratory bird resources” means migratory birds and the habitats upon which they depend.

(f) “Migratory bird convention” means, collectively, the bilateral conventions (with Great Britain/Canada, Mexico, Japan, and Russia) for the conservation of migratory bird resources.

(g) “Federal agency” means an executive department or agency, but does not include independent establishments as defined by 5 U.S.C. 104.

(h) “Action” means a program, activity, project, official policy (such as a rule or regulation), or formal plan directly carried out by a Federal agency. Each Federal agency will further define what the term “action” means with respect to its own authorities and what programs should be included

in the agency-specific Memoranda of Understanding required by this order. Actions delegated to or assumed by nonfederal entities, or carried out by nonfederal entities with Federal assistance, are not subject to this order. Such actions, however, continue to be subject to the Migratory Bird Treaty Act.

(i) "Species of concern" refers to those species listed in the periodic report "Migratory Nongame Birds of Management Concern in the United States," priority migratory bird species as documented by established plans (such as Bird Conservation Regions in the North American Bird Conservation Initiative or Partners in Flight physiographic areas), and those species listed in 50 C.F.R. 17.11.

Sec. 3. Federal Agency Responsibilities. (a) Each Federal agency taking actions that have, or are likely to have, a measurable negative effect on migratory bird populations is directed to develop and implement, within 2 years, a Memorandum of Understanding (MOU) with the Fish and Wildlife Service (Service) that shall promote the conservation of migratory bird populations.

(b) In coordination with affected Federal agencies, the Service shall develop a schedule for completion of the MOUs within 180 days of the date of this order. The schedule shall give priority to completing the MOUs with agencies having the most substantive impacts on migratory birds.

(c) Each MOU shall establish protocols for implementation of the MOU and for reporting accomplishments. These protocols may be incorporated into existing actions; however, the MOU shall recognize that the agency may not be able to implement some elements of the MOU until such time as the agency has successfully included them in each agency's formal planning processes (such as revision of agency land management plans, land use compatibility guidelines, integrated resource management plans, and fishery management plans), including public participation and NEPA analysis, as appropriate. This order and the MOUs to be developed by the agencies are intended to be implemented when new actions or renewal of contracts, permits, delegations, or other third party agreements are initiated as well as during the initiation of new, or revisions to, land management plans.

(d) Each MOU shall include an elevation process to resolve any dispute between the signatory agencies regarding a particular practice or activity.

(e) Pursuant to its MOU, each agency shall, to the extent permitted by law and subject to the availability of appropriations and within Administration budgetary limits, and in harmony with agency missions:

(1) support the conservation intent of the migratory bird conventions by integrating bird conservation principles, measures, and practices into agency activities and by avoiding or minimizing, to the extent practicable, adverse impacts on migratory bird resources when conducting agency actions;

(2) restore and enhance the habitat of migratory birds, as practicable;

(3) prevent or abate the pollution or detrimental alteration of the environment for the benefit of migratory birds, as practicable;

(4) design migratory bird habitat and population conservation principles, measures, and practices, into agency plans and planning processes (natural resource, land management, and environmental quality planning, including, but not limited to, forest and rangeland planning, coastal management planning, watershed planning, etc.) as practicable, and coordinate with other agencies and nonfederal partners in planning efforts;

(5) within established authorities and in conjunction with the adoption, amendment, or revision of agency management plans and guidance, ensure that agency plans and actions promote programs and recommendations of comprehensive migratory bird planning efforts such as Partners-in-Flight, U.S. National Shorebird Plan, North American Waterfowl Management Plan, North American Colonial Waterbird Plan, and other planning efforts, as well as guidance from other sources, including the Food and Agricultural

Organization's International Plan of Action for Reducing Incidental Catch of Seabirds in Longline Fisheries;

(6) ensure that environmental analyses of Federal actions required by the NEPA or other established environmental review processes evaluate the effects of actions and agency plans on migratory birds, with emphasis on species of concern;

(7) provide notice to the Service in advance of conducting an action that is intended to take migratory birds, or annually report to the Service on the number of individuals of each species of migratory birds intentionally taken during the conduct of any agency action, including but not limited to banding or marking, scientific collecting, taxidermy, and depredation control;

(8) minimize the intentional take of species of concern by: (i) delineating standards and procedures for such take; and (ii) developing procedures for the review and evaluation of take actions. With respect to intentional take, the MOU shall be consistent with the appropriate sections of 50 C.F.R. parts 10, 21, and 22;

(9) identify where unintentional take reasonably attributable to agency actions is having, or is likely to have, a measurable negative effect on migratory bird populations, focusing first on species of concern, priority habitats, and key risk factors. With respect to those actions so identified, the agency shall develop and use principles, standards, and practices that will lessen the amount of unintentional take, developing any such conservation efforts in cooperation with the Service. These principles, standards, and practices shall be regularly evaluated and revised to ensure that they are effective in lessening the detrimental effect of agency actions on migratory bird populations. The agency also shall inventory and monitor bird habitat and populations within the agency's capabilities and authorities to the extent feasible to facilitate decisions about the need for, and effectiveness of, conservation efforts;

(10) within the scope of its statutorily-designated authorities, control the import, export, and establishment in the wild of live exotic animals and plants that may be harmful to migratory bird resources;

(11) promote research and information exchange related to the conservation of migratory bird resources, including coordinated inventorying and monitoring and the collection and assessment of information on environmental contaminants and other physical or biological stressors having potential relevance to migratory bird conservation. Where such information is collected in the course of agency actions or supported through Federal financial assistance, reasonable efforts shall be made to share such information with the Service, the Biological Resources Division of the U.S. Geological Survey, and other appropriate repositories of such data (e.g., the Cornell Laboratory of Ornithology);

(12) provide training and information to appropriate employees on methods and means of avoiding or minimizing the take of migratory birds and conserving and restoring migratory bird habitat;

(13) promote migratory bird conservation in international activities and with other countries and international partners, in consultation with the Department of State, as appropriate or relevant to the agency's authorities;

(14) recognize and promote economic and recreational values of birds, as appropriate; and

(15) develop partnerships with non-Federal entities to further bird conservation.

(f) Notwithstanding the requirement to finalize an MOU within 2 years, each agency is encouraged to immediately begin implementing the conservation measures set forth above in subparagraphs (1) through (15) of this section, as appropriate and practicable.

(g) Each agency shall advise the public of the availability of its MOU through a notice published in the **Federal Register**.

Sec. 4. Council for the Conservation of Migratory Birds. (a) The Secretary of Interior shall establish an interagency Council for the Conservation of Migratory Birds (Council) to oversee the implementation of this order. The Council's duties shall include the following: (1) sharing the latest resource information to assist in the conservation and management of migratory birds; (2) developing an annual report of accomplishments and recommendations related to this order; (3) fostering partnerships to further the goals of this order; and (4) selecting an annual recipient of a Presidential Migratory Bird Federal Stewardship Award for contributions to the protection of migratory birds.

(b) The Council shall include representation, at the bureau director/administrator level, from the Departments of the Interior, State, Commerce, Agriculture, Transportation, Energy, Defense, and the Environmental Protection Agency and from such other agencies as appropriate.

Sec. 5. Application and Judicial Review. (a) This order and the MOU to be developed by the agencies do not require changes to current contracts, permits, or other third party agreements.

(b) This order is intended only to improve the internal management of the executive branch and does not create any right or benefit, substantive or procedural, separately enforceable at law or equity by a party against the United States, its agencies or instrumentalities, its officers or employees, or any other person.

THE WHITE HOUSE,
January 10, 2001.

Presidential Documents

Executive Order 13187 of January 10, 2001

The President's Disability Employment Partnership Board

By the authority vested in me as President by the Constitution and the laws of the United States of America, including the Federal Advisory Committee Act, as amended (5 U.S.C. App.), and in order to promote the employment of people with disabilities, it is hereby ordered as follows:

Section 1. *Establishment and Composition of the Board.* (a) There is hereby established the President's Disability Employment Partnership Board (Board).

(b) The Board shall be composed of not more than 15 members who shall be appointed by the President for terms of 2 years. The membership shall include individuals who are representatives of business (including small business), labor organizations, State or local government, disabled veterans, people with disabilities, organizations serving people with disabilities, and researchers or academicians focusing on issues relating to the employment of people with disabilities, and may include other individuals representing entities involved in issues relating to the employment of people with disabilities as the President finds appropriate.

(c) The President shall designate a Chairperson from among the members of the Board to serve a term of two years.

(d) Members and the Chairperson may be reappointed for subsequent terms and may continue to serve until their successors have been appointed.

Sec. 2. *Functions.* (a) The Board shall provide advice and information to the President, the Vice President, the Secretary of Labor, and other appropriate Federal officials with respect to facilitating the employment of people with disabilities, and shall assist in other activities that promote the formation of public-private partnerships, the use of economic incentives, the provision of technical assistance regarding entrepreneurship, and other actions that may enhance employment opportunities for people with disabilities.

(b) In carrying out paragraph (a) of this section, the Board shall:

(i) develop and submit to the Office of Disability Employment Policy in the Department of Labor a comprehensive written plan for joint public-private efforts to promote employment opportunities for people with disabilities and improve their access to financial institutions and commercial and business enterprises;

(ii) identify strategies that may be used by employers, labor unions, national and international organizations, and Federal, State, and local officials to increase employment opportunities for people with disabilities; and

(iii) coordinate with the Office of Disability Employment Policy in the Department of Labor in promoting the collaborative use of public and private resources to assist people with disabilities in forming and expanding small business concerns and in enhancing their access to Federal procurement and other relevant business opportunities. Public resources include those of the Department of Labor, the Small Business Administration, the Department of Commerce, the Department of Education, the Department of Defense, the Department of Treasury, the Department of Veterans Affairs, the Federal Communications Commission, and of executive departments and agency offices responsible for small, disadvantaged businesses utilization.

(c) The Board shall submit annual written reports to the President, who may apprise the Congress and other interested organizations and individuals

on its activities, progress, and problems relating to maximizing employment opportunities for people with disabilities.

(d) The Chairperson of the Board shall serve as a member and Vice Chair of the National Task Force on Employment of Adults with Disabilities established under Executive Order 13078 of March 13, 1998.

Sec. 3. Administration. (a) The Board shall meet when called by the Chairperson, at a time and place designated by the Chairperson. The Chairperson shall call at least two meetings per calendar year. The Chairperson may form subcommittees or working groups within the Board to address particular matters.

(b) The Chairperson may from time to time prescribe such rules, procedures, and policies relating to the activities of the Board as are not inconsistent with law or with the provisions of this order.

(c) Members of the Board shall serve without compensation but shall be allowed travel expenses, including per diem in lieu of subsistence, as authorized by law for persons serving intermittently in Federal service (5 U.S.C. 5701–5707).

(d) The Department of Labor shall provide funding and appropriate support to assist the Board in carrying out the activities described in section 2 of this order, including necessary office space, equipment, supplies, services, and staff. The functions of the President under the Federal Advisory Committee Act, as amended, except that of reporting to the Congress, that are applicable to the Commission, shall be performed by the Department of Labor in accordance with guidelines that have been issued by the Administrator of General Services.

(e) The heads of executive departments and agencies shall, to the extent permitted by law, provide the Board such information as it may need for purposes of carrying out the functions described in section 2 of this order.

Sec. 4. Prior Orders and Transition. (a) Executive Order 12640 of May 10, 1988, as amended, relating to the establishment of the President's Committee on Employment of People with Disabilities, is hereby revoked. The employees, records, property, and funds of the Committee shall become the employees, records, property, and funds of the Department of Labor.

(b) Executive Order 13078 of March 13, 1998, is amended in sections 1(a) and (b) by striking "Chair of the President's Committee on Employment of People with Disabilities" and inserting "Chairperson of the President's Disability Employment Partnership Board."

THE WHITE HOUSE,
January 10, 2001.

Rules and Regulations

Federal Register

Vol. 66, No. 11

Wednesday, January 17, 2001

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 99–CE–83–AD; Amendment 39–12072; AD 2001–01–02]

RIN 2120–AA64

Airworthiness Directives; British Aerospace HP137 Mk1, Jetstream Series 200, and Jetstream Models 3101 and 3201 Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that applies to certain British Aerospace HP137 Mk1, Jetstream series 200, and Jetstream Models 3101 and 3201 airplanes that are equipped with certain nose landing gear units. This AD requires you to inspect the steering jack assembly to assure proper clearance between the bush heads on the steering plates and the shim on the steering jack trunnions and to assure that there is adequate lubrication at both trunnions and the eye end fitting. This AD also requires you to adjust the clearance and provide adequate lubrication, as necessary. This AD is the result of mandatory continuing airworthiness information (MCAI) issued by the airworthiness authority for the United Kingdom. The actions specified by this AD are intended to prevent cracked steering jack piston rods caused by inadequate clearance or inadequate lubrication of the steering jack pivot points. The condition could result in failure of the nose wheel steering system with consequent loss of airplane control.

DATES: This AD becomes effective on March 5, 2001.

The Director of the **Federal Register** approved the incorporation by reference of certain publications listed in the regulations as of March 5, 2001.

ADDRESSES: You may get the service information referenced in this AD from British Aerospace Regional Aircraft, Prestwick International Airport, Ayrshire, KA9 2RW, Scotland; telephone: (01292) 479888; facsimile: (01292) 479703. You may examine this information at the Federal Aviation Administration (FAA), Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 99–CE–83–AD, 901 Locust, Room 506, Kansas City, Missouri 64106; or at the Office of the Federal Register, 800 North Capitol Street, NW, suite 700, Washington, DC. **FOR FURTHER INFORMATION CONTACT:** Mr. Doug Rudolph, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4059; facsimile: (816) 329–4090.

SUPPLEMENTARY INFORMATION:

Discussion

What events have caused this AD?

The Civil Aviation Authority (CAA), which is the airworthiness authority for the United Kingdom, recently notified the FAA that an unsafe condition may exist on certain British Aerospace HP137 Mk1, Jetstream series 200, and Jetstream Models 3101 and 3201 airplanes. The CAA reports incidents where cracking has occurred at the base of the thread in the steering jack piston rod, part number 618212, in the nose landing gear unit. The condition could occur on the referenced airplanes that are equipped with nose landing gear unit 1873, B00A702852A, B00A703064A, or B00A703056A.

Inadequate clearance or inadequate lubrication of the steering jack pivot points can result in unusually high operational loads. These loads could result in such cracks in the steering jack piston rod.

What are the consequences if the condition is not corrected?

A cracked steering jack piston rod could result in failure of the nose wheel steering system with consequent loss of airplane control.

Has FAA taken any action to this point?

We issued a proposal to amend part 39 of the Federal Aviation Regulations

(14 CFR part 39) to include an AD that would apply to certain British Aerospace HP137 Mk1, Jetstream series 200, and Jetstream Models 3101 and 3201 airplanes that are equipped with certain nose landing gear units. This proposal was published in the **Federal Register** as a notice of proposed rulemaking (NPRM) on October 24, 2000 (65 FR 63553). The NPRM proposed to require you to inspect the steering jack assembly to assure proper clearance between the bush heads on the steering plates and the shim on the steering jack trunnions and to assure that there is adequate lubrication at both trunnions and the eye end fitting. The NPRM also proposed to require you to adjust the clearance and provide adequate lubrication, as necessary.

Accomplishment of the proposed action would be in accordance with APPH Ltd. Service Newsletter, Issue 2, Jetstream 31 Steering Jack Part Number 618200, as referenced in British Aerospace Mandatory Service Bulletin 32–JA 981043, dated March 5, 1999.

Was the public invited to comment?

Interested persons were afforded an opportunity to participate in the making of this amendment. No comments were received on the proposed rule or the FAA's determination of the cost to the public.

The FAA's Determination

What is FAA's Final Determination on this Issue?

After careful review of all available information related to the subject presented above, we have determined that air safety and the public interest require the adoption of the rule as proposed except for minor editorial corrections. We determined that these minor corrections:

- Will not change the meaning of the AD; and
- Will not add any additional burden upon the public than was already proposed.

Cost Impact

How many airplanes does this AD impact?

We estimate that this AD affects 300 airplanes in the U.S. registry.

What is the cost impact of this AD on owners/operators of the affected airplanes?

We estimate the following costs to accomplish the inspection:

| Labor cost | Parts cost | Total cost per airplane | Total cost on U.S. operators |
|----------------------------------|---|-------------------------|------------------------------|
| 1 workhour × \$60 per hour | No parts required to accomplish the inspection. | \$60 | \$18,000 |

We estimate the following costs to accomplish any necessary adjustments

that are required based on the results of the inspections. We have no way of

determining the number of airplanes that may need such adjustments:

| Labor cost | Parts cost | Total cost per airplane |
|----------------------------------|---|-------------------------|
| 1 workhour × \$60 per hour. | No parts necessary for adjustment | \$60 |

Regulatory Impact

Does this AD impact various entities?

The regulations adopted herein will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this final rule does not have federalism implications under Executive Order 13132.

Does this AD involve a significant rule or regulatory action?

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory

Flexibility Act. A copy of the final evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. FAA amends § 39.13 by adding a new AD to read as follows:

2001-01-02 British Aerospace: Amendment 39-12072; Docket No. 99-CE-83-AD.

(a) *What airplanes are affected by this AD?* This AD affects Models HP137 Mk1, Jetstream series 200, and Jetstream Models 3101 and 3201 airplanes, all serial numbers, that are:

(1) equipped with a nose landing gear unit 1873, B00A702852A, B00A703064A, or B00A703056A; and

(2) certificated in any category.

(b) *Who must comply with this AD?* Anyone who wishes to operate any of the above airplanes must comply with this AD.

(c) *What problem does this AD address?* The actions specified by this AD are intended to prevent cracked steering jack piston rods caused by inadequate clearance or inadequate lubrication of the steering jack pivot points. The condition could result in failure of the nose wheel steering system with consequent loss of airplane control.

(d) *What actions must I accomplish to address this problem?* To address this problem, you must accomplish the following:

| Action | Compliance time | Procedures |
|---|--|--|
| (1) Inspect the steering jack assembly to assure proper clearance between the bush heads on the steering plates and the shim on the steering jack trunnions and to assure that there is adequate lubrication at both trunnions and the eye end fitting. | Within the next 200 hours time-in-service (TIS) after March 5, 2001, the effective date of this AD, unless already accomplished. | Accomplish in accordance with the instructions in APPH Ltd. Service Newsletter, Issue 2, Jetstream 31 Steering Jack Part Number 618200, as referenced in British Aerospace Mandatory Service Bulletin 32-JA 981043, dated March 5, 1999. |
| (2) Adjust the clearance and provide adequate lubrication, as necessary. | Prior to further flight after the inspection required by paragraph (d)(1) of this AD. | Accomplish in accordance with the instructions in APPH Ltd. Service Newsletter, Issue 2, Jetstream 31 Steering Jack Part Number 618200, as referenced in British Aerospace Mandatory Service Bulletin 32-JA 981043, dated March 5, 1999. |

(e) *Can I comply with this AD in any other way?* You may use an alternative method of compliance or adjust the compliance time if:

(1) Your alternative method of compliance provides an equivalent level of safety; and

(2) The Manager, Small Airplane Directorate, approves your alternative. Submit your request through an FAA

Principal Maintenance Inspector, who may add comments and then send it to the Manager, Small Airplane Directorate.

Note 1: This AD applies to each airplane identified in paragraph (a) of this AD, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (e) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if you have not eliminated the unsafe condition, specific actions you propose to address it.

(f) *Where can I get information about any already-approved alternative methods of compliance?* Contact Mr. Doug Rudolph, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329-4059; facsimile: (816) 329-4090.

(g) *What if I need to fly the airplane to another location to comply with this AD?* The FAA can issue a special flight permit under sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate your airplane to a location where you can accomplish the requirements of this AD.

(h) *Are any service bulletins incorporated into this AD by reference?* Actions required by this AD must be done in accordance with APPH Ltd. Service Newsletter, Issue 2, Jetstream 31 Steering Jack Part Number 618200, as referenced in British Aerospace Mandatory Service Bulletin 32-JA 981043, dated March 5, 1999. The Director of the Federal Register approved this incorporation by reference under 5 U.S.C. 552(a) and 1 CFR part 51. You can get copies from British Aerospace Regional Aircraft, Prestwick International Airport, Ayrshire, KA9 2RW, Scotland. You can look at copies at the FAA, Central Region, Office of the Regional Counsel, 901 Locust, Room 506, Kansas City, Missouri, or at the Office of the Federal Register, 800 North Capitol Street, NW, suite 700, Washington, DC.

(i) *When does this amendment become effective?* This amendment becomes effective on March 5, 2001.

Note 2: The subject of this AD is addressed in British AD 012-03-99.

Issued in Kansas City, Missouri, on January 4, 2001.

Michael Gallagher,
Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-U

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 2000-NM-48-AD; Amendment 39-12052; AD 2000-26-03]

RIN 2120-AA64

Airworthiness Directives; Airbus Model A310, and Model A300 B4-600, A300 B4-600R, and A300 F4-600R (A300-600) Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; correction.

SUMMARY: This document corrects a typographical error that appeared in airworthiness directive (AD) 2000-26-03, which was published in the **Federal Register** on December 28, 2000 (65 FR 82262). The typographical error resulted in the misidentification of affected airplanes. This AD is applicable to Airbus Model A310, and Model A300 B4-600, A300 B4-600R, and A300 F4-600R (A300-600) series airplanes. This AD requires new wiring modifications for the engine and the fire detection system of the auxiliary power unit.

EFFECTIVE DATE: Effective February 1, 2001.

FOR FURTHER INFORMATION CONTACT:

Norman B. Martenson, Manager, International Branch, ANM-116, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055-4056; telephone (425) 227-2110; fax (425) 227-1149.

SUPPLEMENTARY INFORMATION:

Airworthiness Directive (AD) 2000-26-03, amendment 39-12052, was published in the **Federal Register** on December 28, 2000 (65 FR 82262). The AD requires new wiring modifications for the engine and auxiliary power unit (APU) fire detection system.

As published, AD 2000-26-03 incorrectly substituted a nonaffected group of airplanes for an affected group. Specifically, the AD substituted Model A300 B2 and B4 series airplanes for Model A310 series airplanes. The NPRM for this AD correctly identified the affected airplanes.

Since no other part of the regulatory information has been changed, the final rule is not being republished in the **Federal Register**.

The effective date of this AD remains February 1, 2001.

In AD 2000-26-03, amendment 39-12052, make the following corrections:

1. On page 82262, in the first column, the subject heading should read

“Airworthiness Directives; Airbus Model A310 Series Airplanes, and Model A300 B4-600, A300 B4-600R, and A300 F4-600R (A300-600) Series Airplanes.”

2. On page 82262, in the first column, under the heading **Summary**, in the fourth line, “A300 B2 and B4” should read “A310.”

3. On page 82262, in the second column, under the heading **Cost Impact**, in the second line of the first paragraph, “A300 B2 and B4” should read “A310.”

§ 39.13 [Corrected]

4. On page 82262, in the third column, the applicability of AD 2000-26-03 is corrected to read as follows:

* * * * *

Applicability: Model A310 series airplanes, and Model A300 B4-600, A300 B4-600R, and A300 F4-600R (A300-600) series airplanes; certificated in any category; except those on which Airbus Modifications 06267 and 07340 have been accomplished during production.

* * * * *

Issued in Renton, Washington, on January 8, 2001.

Donald L. Riggins,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 01-1231 Filed 1-16-01; 8:45 am]

BILLING CODE 4910-13-U

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

25 CFR Part 103

RIN 1076-AD73

Loan Guaranty, Insurance, and Interest Subsidy

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Final rule.

SUMMARY: The Department of the Interior (DOI), Bureau of Indian Affairs (BIA) is revising the regulations that implement the Loan Guaranty, Insurance, and Interest Subsidy Program. This Program authorizes the Secretary of DOI to guaranty or insure loans made by private lenders to individual Indians and to organizations of Indians, and to assist qualified borrowers with a portion of their interest payments. The new regulations clarify prior regulatory language, in keeping with the “plain language” standard required by Executive Order 12866. They also reflect evolved BIA policies, and address several issues that prior regulations did not cover.

EFFECTIVE DATE: These regulations take effect on February 16, 2001. They do not govern pre-existing loan guarantees. However, a lender may elect to have its pre-existing loan guarantees governed by the new regulations after the effective date by entering into a new loan guaranty agreement with BIA.

FOR FURTHER INFORMATION CONTACT: David B. Johnson, Division of Indian Affairs, Office of the Solicitor, 202-208-3401.

SUPPLEMENTARY INFORMATION: The Loan Guaranty, Insurance, and Interest Subsidy Program (Program) was established in the Act of April 12, 1974, as amended, 88 Stat. 79, 25 U.S.C. 1481 *et seq.* and 25 U.S.C. 1511 *et seq.* The Program has existed since 1974, and the regulations implementing it have existed since 1975. Until now, there has never been any extensive or significant revision of these regulations. The new regulations clarify part 103, reflect evolved BIA policies, address issues that have emerged over the years, and enhance some features of the Program. For example, BIA has overhauled the loan insurance feature of the Program to encourage lenders to reconsider its many advantages.

BIA published a proposed rule in the **Federal Register** on September 6, 2000 (65 FR 53948). BIA considered all comments received during the comment period, September 6, 2000 through November 6, 2000, in drafting this final rule.

Review of Public Comments

BIA received 133 comments during the comment period. Commenters generally liked the organization and approach of the proposed rule much better than the prior rule, and sought only to influence the effect or wording of particular sections. Nonetheless, while most comments were rather specific, some raised issues of greater impact than was apparently envisioned. Correspondingly, in some cases BIA had to rethink sections of the proposed rule other than the one cited by the commenter. Here is a detailed breakdown of the comments, and how they impacted the proposed rule:

Subpart A—General Provisions

Section 103.1 *What does this part do?* There were no comments on this section.

Section 103.2 *Who does the Program help?* One commenter felt that the second sentence of proposed Section 103.2 was superfluous. BIA agrees. The final rule omits the sentence.

Section 103.3 *Who administers the Program?* Two commenters made three comments on this section, to the effect that BIA regional offices cannot and

should not be the first point of contact for all applicants. BIA agrees. The final rule now has applicants contact “the BIA office serving the borrower’s location.”

Section 103.4 *What kinds of loans will BIA guarantee or insure?* Three commenters made five comments on this section, two of which were subsequently withdrawn. One comment stated that paragraph (a) should require a business to contribute to the economy of an Indian reservation, instead of to “an Indian tribe or its members.” BIA agrees in part, and has changed the phrase in the final rule to “an Indian reservation or tribal service area recognized by BIA.”

Another commenter stated that qualified loans should include individual housing loans, but should not include loans for refinancing. BIA disagrees with both of these comments. Individual housing loans are outside the apparent scope of statutory authority for the Program, whereas loans for refinancing Indian businesses are not. In BIA’s experience, refinancing loans is occasionally required to meet Program objectives.

Section 103.5 *What size loan will BIA guarantee or insure?* Four commenters made five comments on this section. They generally questioned the concept of an “acceptable Indian business entity,” and warned of the potential abuse of small partnerships seeking big loans. BIA disagrees with these comments. It is BIA’s duty to determine when there is a reasonable prospect of loan repayment. No regulatory ceiling on the amount an Indian business entity can borrow, especially one dependent on the organizational structure of the borrower, is an acceptable substitute for BIA’s exercise of its reasonable discretion on a case-by-case basis.

A comment on Section 103.6, however, resulted in a change to Section 103.5. The commenter pointed out that the proposed rule appeared to allow an individual Indian to apply for more than one loan in a manner that would enable the borrower to exceed the statutory limitation of \$500,000 for an individual Indian. BIA agrees, and has added language to Section 103.5 to resolve this potential concern.

Section 103.6 *To what extent will BIA guarantee or insure a loan?* Two commenters made three comments on this section, one of which was subsequently withdrawn and one of which was actually addressed in Section 103.5. The remaining comment was to the effect that BIA should allow only one guaranteed loan at a time between a particular borrower and lender. BIA disagrees, and believes that

the proposed rule offers a more workable balance between reasonable limits and flexibility.

Section 103.7 *Must the borrower have equity in the business being financed?* Two commenters made comments on this section. One comment was subsequently withdrawn, and the other merely expressed confusion over the proposed language. Upon review, BIA does not find any need to change this section.

Section 103.8 *Is there any cost for a BIA guaranty or insurance coverage?* There were no comments on this section.

Subpart B—How a Lender Obtains a Loan Guaranty or Insurance Coverage

Section 103.9 *Who applies to BIA under the Program?* Three commenters made four comments on this section, one of which was subsequently withdrawn. The remaining comments were to the effect that the last sentence of the proposed section was partly redundant, and partly unnecessary. BIA agrees, and has deleted it in the final rule.

Section 103.10 *What lenders are eligible under the Program?* Three commenters made five comments on this section. Two commenters felt that tribes should not qualify as lenders. BIA disagrees with this comment, but notes that paragraph (b) of the proposed rule is superfluous, and eliminating it would satisfy these commenters, at least in part. BIA has removed the former paragraph (b) in the final rule, and re-lettered the remaining provisions accordingly.

Another commenter suggested that BIA establish minimum ownership interests for those lenders who sell off portions of their guaranteed loans; the commenter suggested 25 percent. BIA agrees in part, and has established a minimum ownership interest of 10 percent. The final rule reflects this change in Section 103.28(a), not Section 103.10.

A commenter suggested that BIA insert a new section, between proposed §§ 103.10 and 103.11, to explain how a lender applies to BIA to become an approved lender under the Program. BIA disagrees. Historically, lenders interested in the Program have expressed no trouble getting channeled to BIA Regional Credit Officers, who in turn make the application process simple and expeditious in the vast majority of cases. BIA also has new, OMB-approved Loan Guaranty Agreement and Loan Insurance Agreement forms (BIA forms 5-4753

and 5-4754) that are designed to answer a number of questions and circumstances that prior forms bearing those numbers did not. In summary, the process is simple and is adequately explained in standard forms. There is no need to put the procedure in the rule itself.

A final comment was unclear to BIA, and did not result in any change in the final rule.

Section 103.11 How does BIA approve lenders for the Program? Six commenters made fifteen comments on this section. Five comments were directed at the need for three different levels of guaranteed lender approval, and how those levels are defined. BIA did not change the final rule as a result of these comments. The three levels of guaranteed lender approval are fully explained in BIA's new form 5-4753, Loan Guaranty Agreement.

Four comments noted a typographical error repeated in paragraphs (b) and (c), which previously used the phrase "loan agreement." BIA has corrected the phrase, which is now "loan guaranty agreement."

Four comments addressed the concern that a lender might think the suspension of its loan guaranty agreement and/or loan insurance agreement had an adverse impact on loan guarantees or insurance coverage already in effect. BIA has added a new paragraph (e) to clarify its intent.

One comment requested a grace period prior to the suspension of a lender's loan guaranty agreement and/or loan insurance agreement following a change in corporate structure or merger. BIA disagrees with this request. Suspension affects only the lender's ability to issue new guaranteed or insured loans, and can be quickly remedied when and if the lender has a new qualified loan to present.

One comment focused on the precise nature of the corporate changes that would trigger a suspension under this section. BIA agrees with the general comment, and has made changes in the final rule to clarify its intent. The changes appear in § 103.11(b)(2), and in the new paragraph (c). Correspondingly, BIA has renumbered the former paragraph (c) as paragraph (d). BIA also has added a new paragraph (g) in § 103.33, to conform with these changes.

Section 103.12 How does a lender apply for a loan guaranty? Four commenters made thirteen comments on this section, two of which were subsequently withdrawn. One comment suggested specifying that a lender should submit its application to the BIA Superintendent where the business is located. BIA's response to this comment

already is incorporated in the changes made to Section 103.3.

One comment raised a question about the lender's role in providing a borrower with technical assistance, or even in evaluating the borrower's need for technical assistance. BIA agrees with this concern. BIA has reworded proposed paragraph (c) of this section—paragraph (d) in the final rule—to relieve the lender of these duties. BIA will bear primary responsibility for questions of technical assistance, to the extent it is able.

One comment suggested that in some cases obtaining a credit report on a natural person other than the borrower might violate the Fair Credit Reporting Act. BIA agrees that the law is not entirely clear. Accordingly, it has reworded proposed paragraph (d) of this section—paragraph (e) in the final rule.

One comment suggested that credit reports be more current than 90 days at the time of the application. BIA disagrees. The loan process can be lengthy, and BIA does not want to cause a borrower any unnecessary expense or a high number of credit report "inquiries," when the reason for a stale credit report may not even be the borrower's fault. Lenders still may require a more recent credit report if that is their ordinary procedure.

One comment said that lenders should not have to issue a commitment letter to a borrower until after BIA has approved the loan under the Program. BIA disagrees. A lender can avoid potential exposure by issuing its commitment letter subject to BIA approval under the Program. BIA, on the other hand, has no substitute for having before it the lender's blueprint for how it thinks a given loan will work.

One comment requested a stylistic change in proposed paragraph (f) of this section. Upon reflection, BIA slightly reworded paragraph (f), but in a manner different from the suggested wording. The meaning remains the same.

One comment recommended establishing a standard for the maximum interest rate BIA would find acceptable. BIA disagrees, noting the historic volatility of interest rates.

Two comments noted that proposed paragraphs (e) and (h) of this section would require a borrower to make a substantial investment of time and money, very early in the overall application process. This investment may prove unwarranted, since some projects do not get even tentative approval before denial. BIA agrees. BIA has removed the requirements described in these proposed paragraphs, and made them conditions of closing in § 103.17 instead.

One comment displayed confusion over whether the proposed paragraph (h)—now, paragraph (d) in § 103.17—required each of the items in subparagraphs 1 through 4, or merely listed the items for convenience, should they apply in a given transaction. BIA has reworded the final rule to reduce the likelihood of confusion, and also to clarify the process for establishing that a proposed business will not be located in a special flood hazard area.

One comment stated that proposed §§ 103.12 and 103.26 are redundant. BIA agrees in part. BIA has eliminated the redundant features of these sections and placed their common components in § 103.17.

Section 103.13 How does a lender apply for loan insurance coverage? One commenter felt that lenders should always have to ask for BIA's approval, even to obtain loan insurance for a loan of under \$100,000. BIA disagrees, noting the apparent intent of Congress in 25 U.S.C. 1484.

Section 103.14 Can BIA request additional information? There were no comments on this section.

Section 103.15 Are there any prohibited loan terms? Five commenters made seven comments on this section, one of which was subsequently withdrawn. One commenter felt that BIA should be flexible concerning balloon payments, with the understanding that BIA would normally avoid them in determining whether there was a reasonable prospect of loan repayment. BIA agrees, and has deleted proposed paragraph (e).

Two commenters recommended establishing a standard for the maximum interest rate BIA would find acceptable. BIA disagrees, noting the historic volatility of interest rates.

One commenter suggested that BIA limit interest rate adjustments to quarterly. BIA disagrees. BIA has no compelling reason to force lenders to use special interest rate change dates, which could be viewed by lenders as a disincentive to use the Program.

Two commenters questioned the late fee limitations in proposed paragraph (j)(3), now paragraph (i)(3). BIA agrees in part. It has removed the \$100 cap on late fees.

Section 103.16 How does BIA approve or reject a loan guaranty or insurance application? One commenter made a comment on this section, then withdrew it.

Section 103.17 Must the lender follow any special procedures to close the loan? Three commenters made seven comments on this section, four of which were withdrawn. One commenter suggested that BIA require lenders to

submit three copies of all loan closing documents. BIA disagrees. It has no compelling reason to force lenders to undertake large amounts of photocopying for BIA's convenience.

One commenter questioned whether BIA really needs copies of construction contracts and plans and specifications. BIA disagrees. BIA has experience with loans in which the absence of such documents has been disruptive.

One commenter felt that a lender should be given 90 days, not 60, within which to close a loan that BIA has approved under the Program. BIA agrees and correspondingly has changed proposed paragraph (c) of this section, which is paragraph (f) of this section in the final rule.

In addition, due to comments received with respect to proposed §§ 103.12 and 103.26, in the final rule BIA has taken requirements from those locations and placed them in § 103.17, specifically at paragraphs (c) and (d).

Section 103.18 How does BIA issue a loan guaranty certificate or confirm loan insurance? There were no comments on this section.

Section 103.19 When must the lender pay BIA the loan guaranty or insurance premium? One commenter made a comment on this section, then withdrew it.

Subpart C—Interest Subsidy

Section 103.20 What is interest subsidy? BIA received two comments on this section. One commenter asked BIA to adopt Robert Morris Associates as its standard for establishing industry norms for earnings. BIA disagrees. No single private source for such figures covers every circumstance that BIA encounters, and BIA typically avoids tying regulatory requirements to standards that are in the hands of a single private source.

A second commenter wanted BIA to delete the second sentence, effectively throwing interest subsidy open to every eligible borrower, regardless of their projected or historical earnings. BIA disagrees. The purpose and role of interest subsidy has evolved somewhat over the years, but at present policy considerations suggest that it should be available only in the limited circumstances BIA has proposed.

Section 103.21 Who applies for interest subsidy payments, and what is the application procedure? BIA received two comments on this section, one of which was subsequently withdrawn. One comment said that lenders should be required to submit interest subsidy applications at the same time they submit loan guaranty or loan insurance coverage applications. BIA disagrees.

Prior regulations contained this requirement, and BIA found it too inflexible to adequately address the legitimate needs of borrowers.

Section 103.22 How does BIA determine the amount of interest subsidy? BIA received two comments on this section. One commenter requested that this section identify a more specific source of the "rate determined by the Secretary of the Treasury in accordance with 25 U.S.C. 1464." BIA disagrees. Periodically issued source documents have been known to change, whereas the underlying statute can be expected to remain more stable. Lenders are of course free at any time to consult BIA on the current source document in use.

Another comment suggested that BIA fix the interest subsidy amount as of the date of BIA approval. BIA agrees, and has modified the section accordingly.

Section 103.23 How does BIA make interest subsidy payments? There were no comments on this section.

Section 103.24 How long will BIA make interest subsidy payments? One commenter suggested that BIA offer interest subsidy payments for three years only, with no extensions. BIA disagrees. Experience shows that in many cases the fourth and fifth years of a loan are the critical years in which a borrower first becomes profitable. Absent interest subsidy payments, some borrowers would not survive to see that happen.

Subpart D—Provisions Relating to Borrowers

Section 103.25 What kind of borrower is eligible under the Program? Three commenters made six comments, two of which were withdrawn. One comment asked BIA to specify that its guaranty would automatically be revoked in the event a borrower's business entity became less than 51 percent Indian-owned. BIA disagrees. While that interpretation may arguably apply to prior regulatory language, BIA specifically intends that the final rule preserve for a lender the option of either pursuing default remedies under the Program, or else ignoring the default (thereby allowing BIA's loan guaranty or insurance to become void) and simply carrying the loan on the lender's books without the benefit of Program coverage. In other words, prior regulatory language suggests that a reduction in the borrower's ownership to less than 51 percent Indian would automatically void BIA's guaranty or insurance of the lender's loan—through no fault of the lender, and without giving the lender any time to react. The new rule at least gives the lender the option of pursuing a claim under its loan guaranty or

insurance coverage, should such an event occur.

One comment requested that a lender have at least 45 days within which to exercise its remedies, should there be a default under the 51 percent Indian ownership requirement. BIA disagrees. A default under the 51 percent Indian ownership requirement triggers the same procedures, and the same deadlines, that apply for any other kind of default. See §§ 103.35 and 103.36. Those deadlines already provide 60 days for the lender to notify BIA of the default, and 90 days from the date of the default for the lender to elect a Program remedy.

One comment suggested that BIA define any ineligible businesses there may be, such as business activities involving gaming, currently made ineligible due to BIA policy. BIA disagrees. Policy considerations can change more rapidly than BIA can revise its regulations, and at present there is no other sort of business activity specifically prohibited under the Program.

One comment suggested that, in the event a borrower's business becomes less than 51 percent Indian owned, and the lender decides not to pursue a claim against BIA under the Program, the lender should be required at least to notify BIA of the default under the 51 percent Indian ownership requirement. This notification would permit BIA to remove the loan from its active recordkeeping system. BIA agrees. BIA has not modified this section to reflect the comment, however; it has instead made an addition to § 103.33.

Section 103.26 What must the borrower supply the lender in its loan application? Four commenters made thirteen comments on this section, one of which was subsequently withdrawn. Three comments suggested that a borrower should provide balance sheets and operating statements for the preceding three years, instead of two. BIA agrees, and has made the change in the final rule.

Two comments suggested that a borrower should provide three or more years of financial projections. BIA agrees, and the final rule reflects a requirement of three years.

Four comments pointed out that the borrower was being required to provide appraisals and proof of compliance with applicable law too early in the lending process, and that a borrower could unnecessarily suffer wasted time and expense pursuing these requirements for a loan without even tentative approval from a lender or BIA. BIA agrees. It has changed these requirements into conditions for closing, at § 103.17.

One comment displayed confusion over whether or not the borrower was required to supply the kinds of evidence outlined in proposed § 103.26(l), or whether the items listed at § 103.26(l)(1)–(4) were simply examples, to be used when applicable. BIA has slightly re-worded the language (now moved to § 103.17(d)) to reduce the likelihood of confusion.

One comment suggested that BIA establish standards for appraisals. BIA disagrees. In most cases, existing law or lender policy already establishes adequate appraisal standards, and BIA has no compelling need to add another system of requirements to what already is in place. Any BIA appraisal standards should in any event be designed for applicability far beyond the boundaries of the Program; it would be inappropriate to establish them for use solely within the Program.

One comment suggested that parts of § 103.12 and 103.26 are redundant. BIA agrees, and has removed the principal redundancies. The affected provisions have been combined and added to § 103.17.

Section 103.27 Can the borrower get help preparing its loan application or putting its loan funds to use? There were two comments on this section, both of which suggested revising the procedures for referring borrowers in need of technical assistance. One comment suggested that BIA refer borrowers to tribal business information centers. BIA disagrees. While tribal business information centers may be one potential source of help, they are not uniformly available and may not in some cases be the best available resource.

One comment noted that BIA does not always have technical assistance funding. It suggested revising the proposed regulation to eliminate the inference that BIA is obliged to provide free technical assistance to a borrower, when BIA has no funds for that purpose. BIA agrees, and has removed the last sentence of the proposed section in the final rule.

Changes to proposed §§ 103.17 and 103.26 also necessitated a conforming change in this section.

Subpart E—Loan Transfers

Section 103.28 What if the lender transfers part of the loan to another person? There were three comments on this section. One comment wanted BIA to permit the transfer of insured loans, in addition to guaranteed loans. BIA disagrees, due to the statutory prohibition implied by 25 U.S.C. 1485.

Two comments expressed confusion over transfers brought about through

merger, and on the distinction between a lender's right to make new guaranteed loans or insured loans under a loan guaranty agreement or loan insurance agreement, and a lender's right to guarantee or insurance coverage on the asset transferred. BIA has clarified this section and Section 103.29 in response to these comments.

In addition, a comment on § 103.10 caused BIA to insert in this section a requirement that lenders maintain at least a 10 percent ownership interest in loans they maintain under the Program.

Section 103.29 What if the lender transfers the entire loan? BIA received four comments on this section. One comment suggested that BIA restrict transfers to eligible BIA lenders. BIA disagrees. Congress specifically expanded the universe of potential transferees when it enacted the current 25 U.S.C. 1485.

One comment wanted BIA to permit the transfer of insured loans, in addition to guaranteed loans. BIA disagrees, due to the statutory prohibition implied by 25 U.S.C. 1485.

Two comments expressed confusion over transfers brought about through merger, and on the distinction between a lender's right to make new guaranteed loans or insured loans under a loan guaranty agreement or loan insurance agreement, and a lender's right to guarantee or insurance coverage on the asset transferred. BIA has clarified this section and Section 103.28 in response to these comments.

Subpart F—Loan Servicing Requirements

Section 103.30 What standard of care must a lender meet? BIA received two comments on this section. One comment requested deleting the requirement of automatic bank account debiting. BIA disagrees. The requirement is a reasonable and prudent use of modern technology, and in any event is required only when feasible.

One comment suggested an additional place within BIA for recording lien instruments. BIA disagrees. The proposed wording covers all necessary contingencies, and does not require lenders to file any instrument with BIA more than once.

Section 103.31 What loan servicing requirements apply to BIA? BIA received one comment on this section. The commenter suggested deleting proposed paragraph (b), as unnecessary. BIA agrees. It has deleted the paragraph, and correspondingly re-designated the paragraphs of this section in the final rule.

Section 103.32 What sort of loan documentation does BIA expect the

lender to maintain? There were no comments on this section.

Section 103.33 Are there reporting requirements? BIA received two comments on this section, one of which was subsequently withdrawn. The other commenter asked to reduce the number of lender's reports to once per annum. BIA disagrees. It needs quarterly updates to prepare accurate reports for the Department of the Treasury.

Also, due to comments received on §§ 103.11 and 103.25, BIA expanded this section to reflect two additional notices that a lender may be obliged to send BIA.

Section 103.34 What if the lender and the borrower decide to change the terms of the loan? There were no comments to this section. However, BIA made a minor change in paragraph (a)(7), to conform with a change in § 103.4.

Subpart G—Default and Payment by BIA

Section 103.35 What must the lender do if the borrower defaults on the loan? Three commenters made four comments on this section, one of which was subsequently withdrawn. One comment suggested a stylistic change in the standard for when a lender is required to send a borrower notice of its default. BIA disagrees, finding its proposed language more appropriate.

One comment wanted BIA to keep its former requirement of having lenders notify BIA of a borrower's default within 45 days. BIA disagrees. BIA has determined that giving lenders an additional 15 days, as in the final rule, can be of significant benefit to lenders without exposing BIA to any significant risk of an overall increase of Program losses.

One comment suggested that BIA accept service by overnight delivery service. BIA agrees, and has changed the final rule accordingly.

Section 103.36 What options and remedies does the lender have if the borrower defaults on the loan? Four commenters made five comments on this section, one of which was subsequently withdrawn. Two comments sought additional time for a lender that elects to negotiate a loan modification agreement with a borrower. BIA agrees in part. Rather than give an automatic 60 days, as one commenter suggested, BIA has added language enabling it to extend the 45 day period specified in the proposed rule.

One comment suggested that BIA accept service by overnight delivery

service. BIA agrees, and has changed the final rule accordingly.

One comment suggested requiring lenders to liquidate collateral before submitting a claim for loss on a loan guaranty. BIA disagrees. Congress apparently wants lenders to have the option of making an immediate claim for loss without any prior efforts to enforce its other default remedies. See 25 U.S.C. 1491 and 1492.

Section 103.37 *What must the lender do to collect payment under its loan guaranty certificate or loan insurance coverage?* One commenter made three comments on this section. One comment suggested requiring lenders to submit claims for loss within 45 days of the borrower's default. BIA disagrees. Prior regulations gave the lender 60 days, and several lenders have had trouble complying with Program requirements within even that time period. BIA has determined that extending the required submission date for a claim for loss to 90 days will afford lenders the additional time they sometimes need, without unduly increasing BIA's potential exposure for overall Program losses.

One comment suggested requiring lenders to liquidate collateral before submitting a claim for loss on a loan guaranty. BIA disagrees. Congress apparently wants lenders to have the option of making an immediate claim for loss without any prior efforts to enforce its other default remedies. See 25 U.S.C. 1491 and 1492.

One comment observed an apparent inconsistency between allowing a lender up to 180 days following default to accrue interest while pursuing foreclosure remedies, and laws that require BIA to transfer a debt to the Department of the Treasury once it has been delinquent for 180 days. BIA disagrees. BIA is not obliged to send a debt to the Department of the Treasury until BIA has held the debt for at least 180 days, and in any event it need not forward any debt to Treasury that is in the process of foreclosure.

BIA made a change to paragraph (e) of this section, however, on the basis of a comment to Section 103.38. BIA has introduced a 90 day deadline for rendering a decision on a claim for loss.

Section 103.38 *Is there anything else for BIA or the lender to do after BIA makes payment?* BIA received two comments on this section, one of which was subsequently withdrawn. One comment asked BIA to adopt a 60 day deadline for making payment on a claim for loss. BIA agrees in part. It has added a 90 day deadline for rendering decision on a claim for loss. The change has been made in § 103.37(e).

Section 103.39 *When will BIA refuse to pay all or part of a lender's claim?* BIA did not receive any comments on this section.

Section 103.40 *Will BIA make exceptions to its criteria for denying payment?* BIA did not receive any comments on this section.

Section 103.41 *What happens if a lender violates provisions of this part?* BIA did not receive any comments on this section.

Section 103.42 *How long must a lender comply with Program requirements?* One commenter made two comments on this section. One comment suggested that BIA require either a shorter retention period, or else permit electronic data storage. BIA agrees. It has added appropriate language to the final rule.

One comment observed an apparent inconsistency between BIA's reservation of rights and applicable statutes of limitations. BIA disagrees. The final rule does not and cannot supercede Federal statutes of limitations.

Section 103.43 *What must the lender do after repayment in full?* BIA did not receive any comments on this section.

Subpart H—Definitions and Miscellaneous Provisions

Section 103.44 *What certain terms mean in this part.* Two commenters made four comments on this section, one of which was subsequently withdrawn. One comment suggested eliminating the phrase "when used as a noun," in the definition of "mortgage." BIA agrees. The change is in the final rule.

One comment suggested further restricting the definition of the word "Tribe" to those tribes recognized by the Federal government as eligible for services from BIA. BIA agrees. The change is in the final rule.

One comment suggested putting the definitions section at the beginning of the rule, rather than at the end. BIA disagrees. Current regulatory drafting theories suggest placing substantive provisions prominently at the beginning of a rule, and leaving reference materials towards the end.

Section 103.45 *Information collection.* BIA did not receive any comments on this section.

Other changes. In addition to the above comments, the final rule reflects a limited number of non-substantive, stylistic changes from the proposed rule. BIA added these for enhanced clarity, and in the case of a deletion in proposed § 103.30(e), to allow for conformity with another anticipated rulemaking. BIA also made a small number of conforming changes in definitions and

paragraph designations, required due to the change, addition, or deletion of rule provisions based on public comments.

Regulatory Planning and Review

This document is not a significant rule and is not subject to review by the Office of Management and Budget (OMB) under Executive Order 12866.

This rule will not have an effect of \$100 million or more on the economy. Current and foreseeable funding levels for the Program will permit at most \$82 million in new loans per annum. The rule will not adversely affect in a material way the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities. The Program is designed to enhance, not hinder, productivity, competition, jobs, and the overall economy, and there is nothing inherent about the Program or the rule that will lead to adverse effects on the environment, public health or safety, or State, local, or tribal governments or communities.

This rule will not create a serious inconsistency or otherwise interfere with an action taken or planned by another agency. There is nothing in the rule to limit other efforts to encourage Indian economic development.

This rule does not alter the budgetary effects or entitlements, grants, user fees, or loan programs or the rights or obligations of their recipients. The Program does not create or limit any entitlement, has nothing to do with other grant or loan programs, and establishes no user fees.

This rule does not raise novel legal or policy issues. Part 103 has caused minimal legal review since 1975, and the new rule is in substance very similar to the existing rule.

Regulatory Flexibility Act

DOI certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The number of lenders who might be impacted by the changes in this document is limited by the relatively modest number of individual Indians and organizations of Indians whose loans can be guaranteed or insured under the Program.

Small Business Regulatory Enforcement Fairness Act (SBREFA)

This rule is not a major rule under 5 U.S.C. 804(2), the Small Business Regulatory Enforcement Fairness Act. This rule:

(a) Does not have an annual effect on the economy of \$100 million or more. Current and foreseeable funding levels

for the Program will permit at most \$82 million in new loans per annum.

(b) Will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions. The rule is designed to clarify the roles and duties of the persons it may impact, and should in fact result in administrative savings. Any additional requirements imposed by the rule are either very limited in scope, or else in the nature of assembling information that lenders typically gather anyway.

(c) Does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises. To the contrary, the rule implements the Program in order to encourage investment in new Indian businesses, and thereby increase U.S.-based competition, employment, productivity, and innovation.

Unfunded Mandates Reform Act

This rule does not impose an unfunded mandate on State, local, or tribal governments or the private sector of more than \$100 million per year. It does not impose any mandates at all. The rule does not have a significant or unique effect on State, local, or tribal governments or the private sector. Only a small segment of the private sector—the lending community—is directly affected by the rule, and the rule (1) is functionally very similar to existing law, and (2) relates to a Program that will permit at most \$82 million in new loans per annum, based on current and foreseeable funding levels. A statement containing the information required by the Unfunded Mandates Reform Act (2 U.S.C. 1531, *et seq.*) is not required.

Takings

In accordance with Executive Order 12630, the rule does not have significant takings implications. The Program enhances the security available to lenders, and does not inherently involve any action that could deprive anyone of property without just compensation. A takings implication assessment is not required.

Federalism

In accordance with Executive Order 13132, this rule does not have federalism implications. This rule does not substantially and directly affect the relationship between the Federal and State governments. The rule is directed at the relationship between lenders and the Federal Government, and does not impact States at all. This rule does not

impose costs on States or localities, for the same reason.

Civil Justice Reform

In accordance with Executive Order 12988, the Office of the Solicitor has determined that this rule does not unduly burden the judicial system and meets the requirements of sections 3(a) and 3(b)(2) of the Order.

Paperwork Reduction Act

The Office of Management and Budget has reviewed and approved the information collections contained in this rule and assigned them number 1076-0020. The proposed rule was published on September 6, 2000 (65 FR 53948) and solicited comments on the information collection. OMB expressed no concerns with the information collection, and no comments were received from the public.

The information collection is required to obtain or retain a benefit. Information covered by the Privacy Act will be kept confidential as required by law. Please note that a Federal agency may not collect or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

National Environmental Policy Act

This rule does not constitute a major Federal action significantly affecting the quality of the human environment. A detailed statement under the National Environmental Policy Act of 1969 is not required.

List of Subjects in 25 CFR Part 103

Indians—Insurance, Interest subsidy, and Loan guaranty.

For the reasons given in the preamble, BIA is revising part 103 in chapter I of title 25 of the Code of Federal Regulations as set forth below.

PART 103—LOAN GUARANTY, INSURANCE, AND INTEREST SUBSIDY

Subpart A—General Provisions

Sec.

- 103.1 What does this part do?
- 103.2 Who does the Program help?
- 103.3 Who administers the Program?
- 103.4 What kinds of loans will BIA guarantee or insure?
- 103.5 What size loan will BIA guarantee or insure?
- 103.6 To what extent will BIA guarantee or insure a loan?
- 103.7 Must the borrower have equity in the business being financed?
- 103.8 Is there any cost for a BIA guaranty or insurance coverage?

Subpart B—How a Lender Obtains a Loan Guaranty or Insurance Coverage

- 103.9 Who applies to BIA under the Program?
- 103.10 What lenders are eligible under the Program?
- 103.11 How does BIA approve lenders for the Program?
- 103.12 How does a lender apply for a loan guaranty?
- 103.13 How does a lender apply for loan insurance coverage?
- 103.14 Can BIA request additional information?
- 103.15 Are there any prohibited loan terms?
- 103.16 How does BIA approve or reject a loan guaranty or insurance application?
- 103.17 Must the lender follow any special procedures to close the loan?
- 103.18 How does BIA issue a loan guaranty or confirm loan insurance?
- 103.19 When must the lender pay BIA the loan guaranty or insurance premium?

Subpart C—Interest Subsidy

- 103.20 What is interest subsidy?
- 103.21 Who applies for interest subsidy payments, and what is the application procedure?
- 103.22 How does BIA determine the amount of interest subsidy?
- 103.23 How does BIA make interest subsidy payments?
- 103.24 How long will BIA make interest subsidy payments?

Subpart D—Provisions Relating to Borrowers

- 103.25 What kind of borrower is eligible under the Program?
- 103.26 What must the borrower supply the lender in its loan application?
- 103.27 Can the borrower get help preparing its loan application or putting its loan funds to use?

Subpart E—Loan Transfers

- 103.28 What if the lender transfers part of the loan to another person?
- 103.29 What if the lender transfers the entire loan?

Subpart F—Loan Servicing Requirements

- 103.30 What standard of care must a lender meet?
- 103.31 What loan servicing requirements apply to BIA?
- 103.32 What sort of loan documentation does BIA expect the lender to maintain?
- 103.33 Are there reporting requirements?
- 103.34 What if the lender and borrower decide to change the terms of the loan?

Subpart G—Default and Payment by BIA

- 103.35 What must the lender do if the borrower defaults on the loan?
- 103.36 What options and remedies does the lender have if the borrower defaults on the loan?
- 103.37 What must the lender do to collect payment under its loan guaranty certificate or loan insurance coverage?
- 103.38 Is there anything else for BIA or the lender to do after BIA makes payment?
- 103.39 When will BIA refuse to pay all or part of a lender's claim?

- 103.40 Will BIA make exceptions to its criteria for denying payment?
- 103.41 What happens if a lender violates provisions of this part?
- 103.42 How long must a lender comply with Program requirements?
- 103.43 What must the lender do after repayment in full?

Subpart H—Definitions and Miscellaneous Provisions

- 103.44 What certain terms mean in this part.
- 103.45 Information collection.

Authority: 25 U.S.C. 1498, 1511.

Subpart A—General Provisions

§ 103.1 What does this part do?

This part explains how to obtain and use a BIA loan guaranty or loan insurance agreement under the Program, and who may do so. It also describes how to obtain and use interest subsidy payments under the Program, and who may do so.

§ 103.2 Who does the Program help?

The purpose of the Program is to encourage eligible borrowers to develop viable Indian businesses through conventional lender financing. The direct function of the Program is to help lenders reduce excessive risks on loans they make. That function in turn helps borrowers secure conventional financing that might otherwise be unavailable.

§ 103.3 Who administers the Program?

Authority for administering the Program ultimately rests with the Secretary, who may exercise that authority directly at any time. Absent a direct exercise of authority, however, the Secretary delegates Program authority to BIA officials through the U.S. Department of Interior Departmental Manual. A lender should submit all applications and correspondence to the BIA office serving the borrower's location.

§ 103.4 What kinds of loans will BIA guarantee or insure?

In general, BIA may guarantee or insure any loan made by an eligible lender to an eligible borrower to conduct a lawful business organized for profit. There are several important exceptions:

- (a) The business must contribute to the economy of an Indian reservation or tribal service area recognized by BIA;
- (b) The borrower may not use the loan for relending purposes;
- (c) If any portion of the loan is used to refinance an existing loan, the borrower must be current on the existing loan; and

(d) BIA may not guarantee or insure a loan if it believes the lender would be willing to extend the requested financing without a BIA guaranty or insurance coverage.

§ 103.5 What size loan will BIA guarantee or insure?

BIA can guarantee or insure a loan or combination of loans of up to \$500,000 for an individual Indian, or more for an acceptable Indian business entity, Tribe, or tribal enterprise involving two or more persons. No individual Indian may have an outstanding principal balance of more than \$500,000 in guaranteed or insured loans at any time. BIA can limit the size of loans it will guarantee or insure, depending on the resources BIA has available.

§ 103.6 To what extent will BIA guarantee or insure a loan?

(a) BIA can guarantee up to 90 percent of the unpaid principal and accrued interest due on a loan.

(b) BIA can insure up to the lesser of:

- (1) 90 percent of the unpaid principal and accrued interest due on a loan; or
- (2) 15 percent of the aggregate outstanding principal amount of all loans the lender has insured under the Program as of the date the lender makes a claim under its insurance coverage.

(c) BIA's guaranty certificate or loan insurance agreement should reflect the lowest guaranty or insurance percentage rate that satisfies the lender's risk management requirements.

(d) Absent exceptional circumstances, BIA will allow no more than:

- (1) Two simultaneous guarantees under the Program covering outstanding loans from the same lender to the same borrower; or
- (2) One loan guaranty under the Program when the lender simultaneously has one or more outstanding loans insured under the Program to the same borrower.

§ 103.7 Must the borrower have equity in the business being financed?

The borrower must be projected to have at least 20 percent equity in the business being financed, immediately after the loan is funded. If a substantial portion of the loan is for construction or renovation, the borrower's equity may be calculated based upon the reasonable estimated value of the borrower's assets after completion of the construction or renovation.

§ 103.8 Is there any cost for a BIA guaranty or insurance coverage?

BIA charges the lender a premium for a guaranty or insurance coverage.

- (a) The premium is:

(1) Two percent of the portion of the original loan principal amount that BIA guarantees; or

(2) One percent of the portion of the original loan principal amount that BIA insures, without considering the 15 percent aggregate outstanding principal limitation on the lender's insured loans.

(b) Lenders may pass the cost of the premium on to the borrower, either by charging a one-time fee or by adding the cost to the principal amount of the borrower's loan. Adding the premium to the principal amount of the loan will not make any further premium due. BIA will guarantee or insure the additional principal to the same extent as the original approved principal amount.

Subpart B—How a Lender Obtains a Loan Guaranty or Insurance Coverage

§ 103.9 Who applies to BIA under the Program?

The lender is responsible for determining whether it will require a BIA guaranty or insurance coverage, based upon the loan application it receives from an eligible borrower. If the lender requires a BIA guaranty or insurance coverage, the lender is responsible for completing and submitting a guaranty application or complying with a loan insurance agreement under the Program.

§ 103.10 What lenders are eligible under the Program?

(a) Except as specified in paragraph (b) of this section, a lender is eligible under the Program, and may be considered for BIA approval, if the lender is:

- (1) Regularly engaged in the business of making loans;
- (2) Capable of evaluating and servicing loans in accordance with reasonable and prudent industry standards; and
- (3) Otherwise reasonably acceptable to BIA.

(b) The following lenders are not qualified to issue loans under the Program:

- (1) An agency or instrumentality of the Federal Government;
- (2) A lender that borrows money from any Federal Government source, other than the Federal Reserve Bank System, for purposes of relending;
- (3) A lender that does not include the interest on loans it makes in gross income, for purposes of chapter 1, title 26 of the United States Code; and
- (4) A lender that does not keep any ownership interest in loans it originates.

§ 103.11 How does BIA approve lenders for the Program?

(a) BIA approves each lender by entering into a loan guaranty agreement and/or a loan insurance agreement with it. BIA may provide up to three different levels of approval for a lender making guaranteed loans, depending on factors such as:

- (1) The number of loans the lender makes under the Program;
- (2) The total principal balance of the lender's Program loans;
- (3) The number of years the lender has been involved with the Program;
- (4) The relative benefits and opportunities the lender has given to Indian business efforts through the Program; and
- (5) The lender's historical compliance with Program requirements.

(b) BIA will consider a lender's loan guaranty agreement and/or loan insurance agreement suspended as of:

- (1) The effective date of a change in the lender's corporate structure;
- (2) The effective date of a merger between the lender and any other entity, when the lender is not the surviving entity; or
- (3) The start of any legal proceeding in which substantially all of the lender's assets may be subject to disposition through laws governing bankruptcy, insolvency, or receivership.

(c) A change in a lender's name, without any other change specified under paragraph (b) of this section, will not cause a suspension of the lender's loan guaranty agreement and/or loan insurance agreement. The lender should notify BIA of its name change as soon as possible.

(d) If a lender's loan guaranty agreement and/or loan insurance agreement is suspended under paragraph (b) of this section, the lender, or its successor in interest, must enter into a new loan guaranty agreement and/or loan insurance agreement with BIA in order to secure any new BIA loan guarantees or insurance coverage.

(e) The suspension of a loan guaranty agreement and/or loan insurance agreement does not affect the validity of any guaranty certificate or insurance coverage in effect before the date of the suspension. Any such certificate or insurance coverage will remain governed by applicable terms of the suspended loan guaranty agreement and/or loan insurance agreement.

§ 103.12 How does a lender apply for a loan guaranty?

To apply for a loan guaranty, a BIA-approved lender must submit to BIA a loan guaranty application request form, together with each of the following:

(a) A written explanation from the lender indicating why it needs a BIA guaranty for the loan, and the minimum loan guarantee percentage it will accept;

(b) A copy of the borrower's complete loan application;

(c) A description of the borrower's equity in the business being financed;

(d) A copy of the lender's independent credit analysis of the borrower's business, repayment ability, and loan collateral (including insurance);

(e) An original report from a nationally-recognized credit bureau, dated within 90 days of the date of the lender's loan guaranty application package, outlining the credit history of the borrower, and to the extent permitted by law, each co-maker or guarantor of the loan (if any);

(f) A copy of the lender's loan commitment letter to the borrower, showing at a minimum the proposed loan amount, purpose, interest rate, schedule of payments, and security (including insurance requirements), and the lender's terms and conditions for funding;

(g) The lender's good faith estimate of any loan-related fees and costs it will charge the borrower, as authorized under this part;

(h) If any significant portion of the loan will be used to finance construction, renovation, or demolition work, the lender's:

- (1) Insurance and bonding requirements for the work;
- (2) Proposed draw requirements; and
- (3) Proposed work inspection procedures;

(i) If any significant portion of the loan will be used to refinance or otherwise retire existing indebtedness:

- (1) A clear description of all loans being paid off, including the names of all makers, cosigners and guarantors, maturity dates, payment schedules, uncured delinquencies, collateral, and payoff amounts as of a specific date; and
- (2) A comparison of the terms of the loan or loans being paid off and the terms of the new loan, identifying the advantages of the new loan over the loan being paid off.

§ 103.13 How does a lender apply for loan insurance coverage?

BIA-approved lenders can make loans insured under the Program in two ways, depending on the size of the loan:

(a) For loans in an original principal amount of up to \$100,000 per borrower, the lender can make each loan in accordance with the lender's loan insurance agreement, without specific prior approval from BIA.

(b) For loans in an original principal amount of over \$100,000, the lender

must seek BIA's specific prior approval in each case. The lender must submit a loan insurance coverage application request form, together with the same information required for a loan guaranty under § 103.12, except for the information required by § 103.12(a).

(c) The lender must submit a loan insurance application package even for a loan of less than \$100,000 if:

- (1) The total outstanding balance of all insured loans the lender is extending to the borrower under the Program exceeds \$100,000; or
- (2) The lender makes a request for interest subsidy, pursuant to § 103.21.

§ 103.14 Can BIA request additional information?

BIA may require the lender to provide additional information, whenever BIA believes it needs the information to properly evaluate a new lender, guaranty application, or insurance application. After BIA issues a loan guaranty or insurance coverage, the lender must let BIA inspect the lender's records at any reasonable time for information concerning the Program.

§ 103.15 Are there any prohibited loan terms?

A loan agreement guaranteed or insured under the Program may not contain:

(a) Charges by the lender styled as "points," loan origination fees, or any similar fees (however named), except that if authorized in the loan agreement, the lender may charge the borrower a reasonable annual loan servicing fee that:

- (1) Is not included as part of the loan principal; and
- (2) Does not bear interest;

(b) Charges of any kind by the lender or by any third party except for the reasonable and customary cost of legal and architectural services, broker commissions, surveys, compliance inspections, title inspection and/or insurance, lien searches, appraisals, recording costs, premiums for required hazard, liability, key man life, and other kinds of insurance, and such other charges as BIA may approve in writing;

(c) A loan repayment term of over 30 years;

(d) Payments scheduled less frequently than annually;

(e) A prepayment penalty, unless the terms of the penalty are clearly specified in BIA's loan guaranty or loan insurance conditions;

(f) An interest rate greater than what BIA considers reasonable, taking into account the range of rates prevailing in the private market for similar loans;

(g) A variable interest rate, unless the rate is tied to a specific prime rate

published from time to time by a nationally recognized financial institution or news source;

(h) An increased rate of interest based on default;

(i) A fee imposed for the late repayment of any installment due, except for a late fee that:

(1) Is imposed only after the borrower is at least 30 days late with payment;

(2) Does not bear interest; and

(3) Equals no more than 5 percent of the late installment;

(j) An "insecurity" clause, or any similar provision permitting the lender to declare a loan default solely on the basis of its subjective view of the borrower's changed repayment prospects;

(k) A requirement that the borrower take title to any real or personal property purchased with loan proceeds by a title instrument containing restrictions on alienation, control or use of the property, unless otherwise required by applicable law; or

(l) A requirement that a borrower which is a tribe provide as security a general assignment of the tribe's trust income. If otherwise lawful, a tribe may provide as loan security an assignment of trust income from a specific source.

§ 103.16 How does BIA approve or reject a loan guaranty or insurance application?

(a) BIA reviews each guaranty or insurance application, and may evaluate each loan application independently from the lender. BIA bases its loan guaranty or insurance decisions on many factors, including compliance with this part, and whether there is a reasonable prospect of loan repayment from business cash flow, or if necessary, from liquidating loan collateral. Lenders are expected to obtain a first lien security interest in enough collateral to reasonably secure repayment of each loan guaranteed or insured under the Program, to the extent that collateral is available.

(b) BIA approves applications by issuing an approval letter, followed by the procedures in § 103.18. If the guaranty or insurance application is incomplete, BIA may return the application to the lender, or hold the application while the lender submits the missing information. If BIA denies the application, it will provide the lender with a written explanation, with a copy to the borrower.

§ 103.17 Must the lender follow any special procedures to close the loan?

(a) BIA officials or their representatives may attend the closing of any loan or loan modification that BIA agrees to guarantee or insure. For

guaranteed loans, and insured loans that BIA must individually review under this part, the lender must give BIA notice of the date of closing at least 5 business days before closing occurs.

(b) At or prior to closing, the lender must obtain appropriate, satisfactory title and/or lien searches for each asset to be used as loan collateral.

(c) At or prior to closing, the lender must obtain recent appraisals for all real property and improvements to be used as collateral for the loan, to the extent required by law.

(d) At or prior to closing, the lender must document that the lender and borrower have complied with all applicable Federal, State, local, and tribal laws implicated by financing the borrower's business, for example by securing:

(1) Copies of all permits and licenses required to operate the borrower's business;

(2) Environmental studies required for construction and/or business operations under NEPA and other environmental laws;

(3) Archeological or historical studies required by law; and

(4) Certification by a registered surveyor or appropriate BIA official indicating that the proposed business will not be located in a special flood hazard area, as defined by applicable law.

(e) The lender must supply BIA with copies of all final, signed loan closing documents within 30 days following closing. To the extent applicable, loan closing documents must include the following:

(1) Promissory notes;

(2) Security agreements, including pledge and similar agreements, and related financing statements (together with BIA's written approval of any assignment of specific tribal trust assets under § 103.15(l), or of any security interest in an individual Indian money account);

(3) Mortgage instruments or deeds of trust (together with BIA's written approval, if required by 25 U.S.C. 483a, or if the mortgage is of a leasehold interest in tribal trust property);

(4) Guarantees (other than from BIA);

(5) Construction contracts, and plans and specifications;

(6) Leases related to the business (together with BIA's written approval, if required under 25 CFR part 162);

(7) Attorney opinion letters;

(8) Resolutions made by a Tribe or business entity;

(9) Waivers or partial waivers of sovereign immunity; and

(10) Similar instruments designed to document the loan, establish the basis

for a security interest in loan collateral, and comply with applicable law.

(f) Unless BIA indicates otherwise in writing, the lender must close a guaranteed or insured loan within 90 days of any approval provided under § 103.16.

§ 103.18 How does BIA issue a loan guaranty or confirm loan insurance?

(a) A loan is guaranteed under the Program when all of the following occur:

(1) BIA issues a signed loan guaranty certificate bearing a series number, an authorized signature, a guaranty percentage rate, the lender's name, the borrower's name, the original principal amount of the loan, and such other terms and conditions as BIA may require;

(2) The loan closes and funds;

(3) The lender pays BIA the applicable loan guaranty premium; and

(4) The lender meets all of the conditions listed in the loan guaranty certificate.

(b) A loan is insured under the Program when all of the following occur:

(1) The loan's purpose and terms meet the requirements of the Program and the lender's loan insurance agreement with BIA;

(2) The loan closes and funds;

(3) The lender notifies BIA of the borrower's identity and organizational structure, the amount of the loan, the interest rate, the payment schedule, and the date on which the loan closing and funding occurred;

(4) The lender pays BIA the applicable loan insurance premium;

(5) If over \$100,000 or if the loan requires interest subsidy, BIA approves the loan in writing; and

(6) If over \$100,000 or if the loan requires interest subsidy, the lender meets all of the conditions listed in BIA's written loan approval.

§ 103.19 When must the lender pay BIA the loan guaranty or insurance premium?

The premium is due within 30 calendar days of the loan closing. If not paid on time, BIA will send the lender written notice by certified mail (return receipt requested), or by a nationally-recognized overnight delivery service (signature of recipient required), stating that the premium is due immediately. If the lender fails to make the premium payment within 30 calendar days of the date of BIA's notice, BIA's guaranty certificate or insurance coverage with respect to that particular loan is void, without further action.

Subpart C—Interest Subsidy**§ 103.20 What is interest subsidy?**

Interest subsidy is a payment BIA makes for the benefit of the borrower, to reimburse part of the interest payments the borrower has made on a loan guaranteed or insured under the Program. It is available to borrowers whose projected or historical earnings before interest and taxes, after adjustment for extraordinary items, is less than the industry norm.

§ 103.21 Who applies for interest subsidy payments, and what is the application procedure?

(a) An eligible lender must request interest subsidy payments on behalf of an eligible borrower, after determining that the borrower qualifies. Typically, the lender should include a request for interest subsidy at the time it applies for a guaranty or insurance coverage under the Program. A request for interest subsidy must be supported by the information required in §§ 103.12 and 103.13 (relating to loan guaranty and insurance coverage applications). BIA approves, returns, or rejects interest subsidy requests in the same manner indicated in § 103.16, based on the factors in § 103.20 and BIA's available resources.

(b) BIA's approval of interest subsidy for an insured loan may provide for specific limitations on the manner in which the lender and borrower can modify the loan.

§ 103.22 How does BIA determine the amount of interest subsidy?

Interest subsidy payments should equal the difference between the lender's rate of interest and the rate determined by the Secretary of the Treasury in accordance with 25 U.S.C. 1464. BIA will fix the amount of interest subsidy as of the date it approves the interest subsidy request.

§ 103.23 How does BIA make interest subsidy payments?

The lender must send BIA reports at least quarterly on the borrower's loan payment history, together with a calculation of the interest subsidy then due. The lender's reports and calculation do not have to be in any specific format, but in addition to the calculation the reports must contain at least the information required by § 103.33(a). Based on the lender's reports and calculation, BIA will send interest subsidy payments to the borrower in care of the lender. The payments belong to the borrower, but the borrower and lender may agree in advance on how the borrower will use interest subsidy payments. BIA may

verify and correct interest subsidy calculations and payments at any time.

§ 103.24 How long will BIA make interest subsidy payments?

(a) BIA will issue interest subsidy payments for the term of the loan, up to 3 years. If interest subsidy payments still are justified, the lender may apply for up to two 1-year extensions of this initial term. BIA will make interest subsidy payments on a single loan for no more than 5 years.

(b) BIA will choose the date from which it calculates interest subsidy years, usually the date the lender first extends the loan funds. Interest subsidy payments will apply to all loan payments made in the calendar years following that date.

(c) Interest subsidy payments will not be due for any loan payment made after the corresponding loan guaranty or insurance coverage stops under the Program, regardless of the circumstances.

Subpart D—Provisions Relating to Borrowers**§ 103.25 What kind of borrower is eligible under the Program?**

(b) A borrower is eligible for a BIA-guaranteed or insured loan if the borrower is:

- (1) An Indian individual;
- (2) An Indian-owned business entity organized under Federal, State, or tribal law, with an organizational structure reasonably acceptable to BIA;
- (3) A tribe; or
- (4) A business enterprise established and recognized by a tribe.

(b) To be eligible for a BIA-guaranteed or insured loan, a business entity or tribal enterprise must be at least 51 percent owned by Indians. If at any time a business entity or tribal enterprise becomes less than 51 percent Indian owned, the lender either may declare a default as of the date the borrower stopped being at least 51 percent Indian owned and exercise its remedies under this part, or else continue to extend the loan to the borrower and allow BIA's guaranty or insurance coverage to become invalid.

§ 103.26 What must the borrower supply the lender in its loan application?

The lender may use any form of loan application it chooses. However, the borrower must supply the lender the information listed in this section in order for BIA to process a guaranty or insurance coverage application:

- (a) The borrower's precise legal name, address, and tax identification number or social security number;

(b) Proof of the borrower's eligibility under the Program;

(c) A statement signed by the borrower, indicating that it is not delinquent on any Federal tax or other debt obligation;

(d) The borrower's business plan, including resumes of all principals and a detailed discussion of the product or service to be offered, market factors, the borrower's marketing strategy, and any technical assistance the borrower may require;

(e) A detailed description of the borrower's equity in the business being financed, including the method(s) of valuation;

(f) The borrower's balance sheets and operating statements for the preceding 3 years, or so much of that period that the borrower has been in business;

(g) The borrower's current financial statement, and the financial statements of all co-makers and guarantors of the loan (other than BIA);

(h) At least 3 years of financial projections for the borrower's business, consisting of pro-forma balance sheets, operating statements, and cash flow statements;

(i) A detailed list of all proposed collateral for the loan, including asset values and the method(s) of valuation;

(j) A detailed list of all proposed hazard, liability, key man life, and other kinds of insurance the borrower will maintain on its business assets and operations;

(k) If any significant portion of the loan will be used to finance construction, renovation, or demolition work:

(1) Written quotes for the work from established and reputable contractors; and

(2) To the extent available, copies of all construction and architectural contracts for the work, plans and specifications, and applicable building permits;

(l) If the borrower is a tribe or a tribal enterprise, resolutions by the tribe and proof of authority under tribal law permitting the borrower to borrow the loan amount and offer the proposed loan collateral; and

(m) If the borrower is a business entity, resolutions by the appropriate governing officials and proof of authority under its organizing documents permitting the borrower to borrow the loan amount and offer the proposed loan collateral.

§ 103.27 Can the borrower get help preparing its loan application or putting its loan funds to use?

A borrower may seek BIA's assistance when preparing a loan application or

when planning business operations, including assistance identifying and complying with applicable laws as indicated by § 103.17(d). The borrower should contact the BIA field or agency office serving the area in which the borrower's business is to be located, or if there is no separate field or agency office serving the area, then the borrower should contact the BIA regional office serving the area.

Subpart E—Loan Transfers

§ 103.28 What if the lender transfers part of the loan to another person?

(a) A lender may transfer one or more interests in a guaranteed loan to another person or persons, as long as the parties have in place an agreement that designates one person to perform all of the duties required of the lender under the Program and the loan guaranty certificate. Starting on the date of the transfer, only the person designated to perform the duties of the lender will be entitled to exercise the rights conferred by BIA's loan guaranty certificate, and will from that point forward be considered the lender for purposes of the Program. A lender under the Program must both service the guaranteed loan and own at least a 10 percent interest in the guaranteed loan. BIA will not consider more than one person at any given time to be the lender with respect to any loan guaranty certificate. If the person designated to perform the duties of the lender in an agreement among loan participants is not the original lender, then the provisions of § 103.29(a) will apply (relating to sale or assignment of guaranteed loans), and the person designated to perform the duties of the lender must give BIA notice of its interest in the loan. Failure to provide notice in accordance with § 103.29(a) will void BIA's loan guaranty certificate, without further action.

(b) Transferring any interest in an insured loan to another person will void the insurance coverage for that loan, except where the transfer is effected by a merger.

§ 103.29 What if the lender transfers the entire loan?

(a) A lender may transfer all of its rights in a guaranteed loan to any other person. The acquiring person must send BIA written notice of the transfer, describing the borrower, the loan, BIA's loan guaranty certificate number, and the acquiring person's name and address. Starting on the date of the transfer, only the acquiring person will be entitled to exercise the rights conferred by BIA's loan guaranty

certificate, and will from that point forward be considered the lender for purposes of the Program. The acquiring person must service the guaranteed loan and otherwise perform all of the duties required of the lender under the Program and the loan guaranty certificate. Except when a transfer is effected by a merger, any failure by the acquiring person to send BIA proper notice of the transfer within 30 calendar days of the transfer date will void BIA's loan guaranty certificate, without further action.

(b) Transferring an insured loan to another person will void the insurance coverage for that loan, except where the transfer is effected by a merger.

(c) If a lender is not the surviving entity after a merger, the lender's successor must notify BIA in writing of the change within 30 calendar days of the merger. The lender also must re-apply to become an approved lender under the Program, as indicated in § 103.11.

Subpart F—Loan Servicing Requirements

§ 103.30 What standard of care must a lender meet?

Lenders must service all loans guaranteed or insured under the Program in a commercially reasonable manner, in accordance with standards and procedures adopted by prudent lenders in the BIA region in which the borrower's business is located, and in accordance with this part. If the lender fails to follow any of these standards, BIA may reduce or eliminate entirely the amount payable under its guaranty or insurance coverage to the extent BIA can reasonably attribute the loss to the lender's failure. BIA also may deny payment completely if the lender gets a loan guaranty or insurance coverage through fraud, or negligently allows a borrower's fraudulent loan application or use of loan funds to go undetected. In particular, and without limitation, lenders must:

(a) Check and verify information contained in the borrower's loan application, such as the borrower's eligibility, the authority of persons acting on behalf of the borrower, and the title status of any proposed collateral;

(b) Take reasonable precautions to assure that loan proceeds are used as specified in BIA's guaranty certificate or written insurance approval, or if not so specified, then in descending order of importance:

(1) BIA's written loan guaranty approval;

(2) The loan documents;

(3) The terms of the lender's final loan commitment to the borrower; or

(4) The borrower's loan application;

(c) When feasible, require the borrower to use automatic bank account debiting to make loan payments;

(d) Require the borrower to take title to real and personal property purchased with loan proceeds in the borrower's own name, except for real property to be held in trust by the United States for the benefit of a borrower that is a tribe;

(e) Promptly record all security interests and subsequently keep them in effect. Lenders must record all mortgages and other security interests in accordance with State and local law, including the laws of any tribe that may have jurisdiction. Lenders also must record any leasehold mortgages or assignments of income involving individual Indian or tribal trust land with the BIA office having responsibility for maintaining records on that trust land;

(f) Assure, to the extent reasonably practicable, that the borrower and any guarantor of the loan (other than BIA) keep current on all taxes levied on real and personal property used in the borrower's business or as collateral for the loan, and on all applicable payroll taxes;

(g) Assure, to the extent reasonably practicable, that all required insurance policies remain in effect, including hazard, liability, key man life, and other kinds of insurance, in amounts reasonably necessary to protect the interests of the borrower, the borrower's business, and the lender;

(h) Assure, to the extent reasonably practicable, that the borrower remains in compliance with all applicable Federal, State, local and tribal laws, including environmental laws and laws concerning the preservation of historical and archeological sites and data;

(i) Assure, to the extent reasonably practicable, that the borrower causes any construction, renovation, or demolition work funded by the loan to proceed in accordance with approved construction contracts and plans and specifications, which must be sufficient in scope and detail to adequately govern the work;

(j) Reserve for itself and BIA the right to inspect the borrower's business records and all loan collateral at any reasonable time;

(k) Promptly notify the borrower in writing of any material breach by the borrower of the terms of its loan, with specific instructions on how to cure the breach and a deadline for doing so;

(l) Participate in any probate, receivership, bankruptcy, or similar proceeding involving the borrower and

any guarantor or co-maker of the borrower's debt, to the extent necessary to maintain the greatest possible rights to repayment; and

(m) Otherwise seek to avoid and mitigate any potential loss arising from the loan, using at least that level of care the lender would use if it did not have a BIA loan guaranty or insurance coverage.

§ 103.31 What loan servicing requirements apply to BIA?

Once a lender extends a loan that is guaranteed or insured under the Program, BIA has no responsibility for decisions concerning it, except for:

(a) Any approvals required under this part;

(b) Any decisions reserved to BIA under conditions of BIA's guaranty certificate or insurance coverage; and

(c) Decisions concerning a loan that the lender has assigned to BIA or to which BIA is subrogated by virtue of paying a claim based on a guaranty certificate or insurance coverage.

§ 103.32 What sort of loan documentation does BIA expect the lender to maintain?

For every loan guaranteed or insured under the Program, the lender must maintain:

(a) BIA's original loan guaranty certificate or insurance coverage approval letter, if applicable;

(b) Original signed and/or certified counterparts of all final loan documents, including those listed in § 103.17 (concerning documents required for loan closing), all renewals, modifications, and additions to those documents, and signed settlement statements;

(c) Originals or copies, as appropriate, of all documents gathered by the lender under §§ 103.12, 103.13 and 103.26 (concerning information submitted by the borrower in its loan application, and information supplied to BIA in the lender's loan guaranty or insurance coverage application);

(d) Originals or copies, as appropriate, of all applicable insurance binders or certificates, including without limitation hazard, liability, key man life, and title insurance;

(e) A complete and current history of all loan transactions, including dated disbursements, payments, adjustments, and notes describing all contacts with the borrower;

(f) Originals or copies, as appropriate, of all correspondence with the borrower, including default notices and evidence of receipt;

(g) Originals or copies, as appropriate, of all correspondence, notices, news items or other information concerning

the borrower, whether gathered by the lender or furnished to it, containing material information about the borrower and its business operations;

(h) Originals or copies, as appropriate, of all advertisements, notices, title instruments, accountings, and other documentation of efforts to liquidate loan collateral; and

(i) Originals or copies, as appropriate, of all notices, pleadings, motions, orders, and other documents associated with any legal proceeding involving the lender and the borrower or its assets, including without limitation judicial or non-judicial foreclosure proceedings, suits to collect payment, bankruptcy proceedings, probate proceedings, and any settlement associated with threatened or actual litigation.

§ 103.33 Are there reporting requirements?

(a) The lender must periodically report the borrower's loan payment history so that BIA can recalculate the government's contingent liability. Loan payment history reports must be quarterly unless BIA provides otherwise for a particular loan. These reports can be in any format the lender desires, as long as they contain:

(1) The lender's name;

(2) The borrower's name;

(3) A reference to BIA's Loan Guaranty Certificate or Loan Insurance Agreement number;

(4) The lender's internal loan number; and

(5) The date and amount of all loan balance activity for the reporting period.

(b) If applicable, the lender must supply a calculation of any interest subsidy payments that are due, as indicated in § 103.23.

(c) If there is a transfer of any or all of the lender's ownership interest in the loan, the party receiving the ownership interest may be required to notify BIA, as indicated in §§ 103.28 and 103.29.

(d) If there is a default on the loan, the lender must notify BIA, as indicated in §§ 103.35 and 103.36.

(e) If the borrower ceases to qualify for a BIA-guaranteed or insured loan under § 103.25(b), the lender must promptly notify BIA even if the lender does not pursue default remedies under §§ 103.35 and 103.36. This notice allows BIA to eliminate the guaranty or insurance coverage from its active recordkeeping system.

(f) If the loan is prepaid in full, the lender must promptly notify BIA in writing so that BIA can eliminate the guaranty or insurance coverage from its active recordkeeping system.

(g) If a lender changes its name, it should notify BIA in accordance with § 103.11(c).

§ 103.34 What if the lender and borrower decide to change the terms of the loan?

(a) The lender must obtain written BIA approval before modifying a loan guaranteed or insured under the Program, if the change will:

(1) Increase the borrower's outstanding principal amount (if a term loan), or maximum available credit (if a revolving loan).

(i) BIA will approve or disapprove a loan increase based upon the lender's explanation of the borrower's need for additional funding, and updated information of the sort required under §§ 103.12, 103.13, and 103.26, as applicable.

(ii) Upon approval by BIA and payment of an additional guaranty or insurance premium in accordance with §§ 103.8 and 103.19 and this section, the entire outstanding loan amount, as modified, will be guaranteed or insured (as the case may be) to the extent BIA specifies. The lender must pay the additional premium only on the increase in the outstanding principal amount of the loan (if a term loan) or the increase in the credit limit available to the borrower (if a revolving loan).

(iii) Lenders may not increase the outstanding principal amount of a loan guaranteed or insured under the Program if a significant purpose of doing so would be to allow the borrower to pay accrued loan interest it otherwise would have difficulty paying.

(2) Permanently adjust the loan repayment schedule.

(3) Increase a fixed interest rate, convert a fixed interest rate to an adjustable interest rate, or convert an adjustable interest rate to a fixed interest rate.

(4) Allow any changes in the identity or organizational structure of the borrower.

(5) Allow any material change in the use of loan proceeds or the nature of the borrower's business.

(6) Release any collateral taken as security for the loan, except items sold in the ordinary course of business and promptly replaced by similar items of collateral, such as inventory.

(7) Allow the borrower to move any significant portion of its business operations to a location that is not on or near an Indian reservation or tribal service area recognized by BIA.

(8) Be likely to materially increase the risk of a claim on BIA's guaranty or insurance coverage, or materially reduce the aggregate value of the collateral securing the loan.

(9) Cure a default for which BIA is to receive notice under § 103.35(b).

(b) In the case of an insured loan, the amount of which will not exceed

\$100,000 when combined with all other insured loans from the lender to the borrower, the lender need not obtain BIA's prior approval to make any of the loan modifications indicated in § 103.34(a), except as provided in § 103.21(b). However, all loan modifications must remain consistent with the lender's loan insurance agreement with BIA, and in the event of an increase in the borrower's outstanding principal amount (if a term loan), or maximum available credit (if a revolving loan), the lender must send BIA an additional premium payment in accordance with §§ 103.8, 103.19 and this section. The lender must pay the additional premium only on the increase in the outstanding principal amount of the loan (if a term loan) or the increase in the credit limit available to the borrower (if a revolving loan). To the extent a loan modification changes any of the information supplied to BIA under § 103.18(b)(3), the lender also must promptly notify BIA of the new information.

(c) Subject to any applicable BIA loan guaranty or insurance coverage conditions, a lender may extend additional loans to a borrower without BIA approval, if the additional loans are not to be guaranteed or insured under the Program.

Subpart G—Default and Payment by BIA

§ 103.35 What must the lender do if the borrower defaults on the loan?

(a) The lender must send written notice of the default to the borrower, and otherwise meet the standard of care established for the lender in this part. The lender's notice to the borrower should be sent as soon as possible after the default, but in any event before the lender's notice to BIA under paragraph (b) of this section. For purposes of the Program, "default" will mean a default as defined in this part.

(b) The lender also must send written notice of the default to BIA by certified mail (return receipt requested), or by a nationally-recognized overnight delivery service (signature of recipient required) within 60 calendar days of the default, unless the default is fully cured before that deadline. This notice is required even if the lender grants the borrower a forbearance under § 103.36(a). One purpose of the notice is to give BIA the opportunity to intervene and seek assistance for the borrower, even though BIA has no duty, either to the lender or the borrower, to do so. Another purpose of the notice is to permit BIA to plan for a possible loss claim from the lender, under

§ 103.36(d). The lender's notice must clearly indicate:

- (1) The identity of the borrower;
- (2) The applicable Program guaranty certificate or insurance agreement number;
- (3) The date and nature of all bases for default;
- (4) If a monetary default, the amount of past due principal and interest, the date through which interest has been calculated, and the amount of any late fees, precautionary advances, or other amounts the lender claims;
- (5) The nature and outcome of any correspondence or other contacts with the borrower concerning the default; and
- (6) The precise nature of any action the borrower could take to cure the default.

§ 103.36 What options and remedies does the lender have if the borrower defaults on the loan?

(a) The lender may grant the borrower a temporary forbearance, even beyond any default cure periods specified in the loan documents, if doing so is likely to result in the borrower curing the default. However, BIA must approve in writing any forbearance or other agreement that:

(1) Permanently modifies the terms of the loan in any manner indicated by § 103.34(a);

(2) Would allow the borrower's default to extend beyond the deadline established in § 103.36(d) for the lender to elect a remedy; or

(3) Is not likely to result in the borrower curing the default.

(b) The lender may make precautionary advances on the borrower's behalf during the default, if doing so is reasonably necessary to ensure that loan recovery prospects do not significantly deteriorate. Items for which the lender may make precautionary advances include, for example:

(1) Hazard, liability, or key man life insurance premiums;

(2) Security measures to safeguard abandoned business assets;

(3) Real or personal property taxes;

(4) Corrective actions required by court or administrative orders; or

(5) Essential maintenance.

(c) BIA will guaranty or insure the amount of precautionary advances from the date of each advance to the same extent as other amounts due under the loan, if:

(1) The borrower has demonstrated its inability or unwillingness to make the payment or perform the duty that jeopardizes loan recovery, including by undue delay in making the payment or performing the duty;

(2) The total expense of all precautionary advances by the lender does not at the time of the advance exceed 10 percent of the outstanding principal balance of the loan;

(3) Where loan document provisions do not require the borrower to repay precautionary advances (however termed) when made by the lender, or where the total expense of all precautionary advances by the lender will exceed 10 percent of the outstanding principal balance of the loan when made, the lender secures BIA's prior written approval; and

(4) The lender properly claims and documents all precautionary advances, if and when it submits a claim for loss under § 103.37.

(d) If the default remains uncured, the lender must send BIA a written notice by certified mail (return receipt requested), or by a nationally-recognized overnight delivery service (signature of recipient required) within 90 calendar days of the default to select one of the following remedies:

(1) In the case of a guaranteed loan, the lender may submit a claim to BIA for its loss;

(2) In the case of either a guaranteed or insured loan, the lender may liquidate all collateral securing the loan, and upon completion, if it has a residual loss on the loan, it may submit a claim to BIA for that loss; or

(3) The lender may negotiate a loan modification agreement with the borrower to permanently change the terms of the loan in a manner that will cure the default. If the lender chooses this remedy, it may take no longer than 45 calendar days from the date BIA receives the notice of remedy selection to finalize a loan modification agreement and secure BIA's written approval of it, unless BIA specifically extends this deadline in writing. However, the lender may at any time before the expiration of the 45-day period (or any extension thereof) change its choice of remedy by sending BIA a notice otherwise complying with § 103.36(d)(1) or (2). If the lender fails to send BIA a notice changing its choice of remedy and does not finalize an approved loan modification agreement within the 45-day period (or any extension thereof), the lender's only permissible remedy under the Program will be to pursue the procedure specified in § 103.36(d)(2).

(e) Failure by the lender to provide BIA with notice of the lender's election of remedy within 90 calendar days of the default, as indicated in § 103.36(d), will invalidate BIA's loan guaranty certificate or insurance coverage for that particular loan, absent an express

waiver of this provision by BIA. BIA may preserve the validity of a loan guaranty certificate or insurance coverage through waiver of this provision only when BIA determines, in its discretion, that:

- (1) The lender consistently has acted in good faith, and
- (2) The lender's failure to provide timely notice either:
 - (i) Has not caused any actual or potential prejudice to BIA; or
 - (ii) Was the result of the lender relying upon specific written advice from a BIA official.

§ 103.37 What must the lender do to collect payment under its loan guaranty certificate or loan insurance coverage?

(a) For guaranteed loans, the lender must submit a claim for its loss on a form approved by BIA.

(1) If the lender makes an immediate claim under § 103.36(d)(1), it must send BIA the claim for loss within 90 calendar days of the default by certified mail (return receipt requested), or by a nationally-recognized overnight delivery service (signature of recipient required). The lender's claim for loss may include interest that has accrued on the outstanding principal amount of the loan only through the date it submits the claim.

(2) If the lender elects first to liquidate the collateral securing the loan under § 103.36(d)(2), and has a residual loss after doing so, it must send BIA the claim for loss within 30 calendar days of completing all liquidation efforts. The lender must perform collateral liquidation as expeditiously and thoroughly as is reasonably possible, within the standards established by this part. The lender's claim for loss may include interest that has accrued on the outstanding principal amount of the loan only through the earlier of:

- (i) The date it submits the claim;
- (ii) The date the lender gets a judgment of foreclosure or sale (or the non-judicial equivalent) on the principal collateral securing the loan; or
- (iii) One hundred eighty calendar days after the date of the default.

(b) For insured loans, after liquidating all loan collateral, the lender must submit a claim for its loss (if any) on a form approved by BIA. The lender must send BIA the claim for loss by certified mail (return receipt requested), or by a nationally-recognized overnight delivery service (signature of recipient required) within 30 calendar days of completing all liquidation efforts. The lender must perform collateral liquidation as expeditiously and thoroughly as is reasonably possible, within the standards established by this

part. The lender's claim for loss may include interest that has accrued on the outstanding principal amount of the loan through the earlier of:

- (1) The date it submits the claim;
- (2) The date the lender gets a judgment of foreclosure or sale (or the non-judicial equivalent) on the principal collateral securing the loan; or
- (3) One hundred eighty calendar days after the date of the default.

(c) Whenever the lender liquidates loan collateral under § 103.36(d)(2), it must vigorously pursue all reasonable methods of collection concerning the loan collateral before submitting a claim for its residual loss (if any) to BIA. Without limiting the generality of the preceding sentence, the lender must:

- (1) Foreclose, either judicially or non-judicially, all rights of redemption the borrower or any co-maker or guarantor of the loan (other than BIA) may have in collateral under any mortgage securing the loan;
- (2) Gather and dispose of all personal property pledged as collateral under the loan, in accordance with applicable law;
- (3) Exercise all set-off rights the lender may have under contract or applicable law;
- (4) Make demand for payment on the borrower, all co-makers, and all guarantors of the loan (other than BIA); and
- (5) Participate fully in all bankruptcy proceedings that may arise involving the borrower and any co-maker or guarantor of the loan. Full participation might include, for example, filing a proof of claim in the case, attending creditors' meetings, and seeking a court order releasing the automatic stay of collection efforts so that the lender can liquidate affected loan collateral.

(d) BIA may require further information, including without limitation copies of any documents the lender is to maintain under § 103.32 and all documentation of liquidation efforts, to help BIA evaluate the lender's claim for loss.

(e) BIA will pay the lender the guaranteed or insured portion of the lender's claim for loss, to the extent the claim is based upon reasonably sufficient evidence of the loss and compliance with the requirements of this part. BIA will render a decision on a claim for loss within 90 days of receiving all information it requires to properly evaluate the loss.

§ 103.38 Is there anything else for BIA or the lender to do after BIA makes payment?

When BIA pays the lender on its claim for loss, the lender must sign and deliver to BIA an assignment of rights to its loan agreement with the borrower, in

a document acceptable to BIA. Immediately upon payment, BIA is subrogated to all rights of the lender under the loan agreement with the borrower, and must pursue collection efforts against the borrower and any co-maker and guarantor, as required by law.

§ 103.39 When will BIA refuse to pay all or part of a lender's claim?

BIA may deny all or part of a lender's claim for loss when:

- (a) The loan is not guaranteed or insured as indicated in § 103.18;
- (b) The guaranty or insurance coverage has become invalid under §§ 103.28, 103.29, or 103.36(e);
- (c) The lender has not met the standard of care indicated in § 103.30;
- (d) The lender presents a claim for a residual loss after attempting to liquidate loan collateral, and:
 - (1) The lender has not made a reasonable effort to liquidate all security for the loan;
 - (2) The lender has taken an unreasonable amount of time to complete its liquidation efforts, the probable consequence of which has been to reduce overall prospects of loss recovery; or
 - (3) The lender's loss claim is inflated by unreasonable liquidation expenses or unjustifiable deductions from collateral liquidation proceeds applied to the loan balance; or
 - (e) The lender has otherwise failed in any material respect to follow the requirements of this part, and BIA can reasonably attribute some or all of the lender's loss to that failure.

§ 103.40 Will BIA make exceptions to its criteria for denying payment?

(a) BIA will not reduce or deny payment solely on the basis of §§ 103.39(c) or (e) when the lender making the claim for loss:

- (1) Is a person to whom a previous lender transferred the loan under §§ 103.28 or 103.29 before maturity for value;
- (2) Notified BIA of its acquisition of the loan interest as required by §§ 103.28 or 103.29;
- (3) Had no involvement in or knowledge of the actions or circumstances that would have allowed BIA to reduce or deny payment to a previous lender; and
- (4) Has not itself violated the standards set forth in §§ 103.39(c) or (e).

(b) If BIA makes payment to a lender under this section, it may seek reimbursement from the previous lender or lenders who contributed to the loss by violating §§ 103.39(c) or (e).

§ 103.41 What happens if a lender violates provisions of this part?

In addition to reducing or eliminating payment on a specific claim for loss, BIA may either temporarily suspend, or permanently bar, a lender from making or acquiring loans under the Program if the lender repeatedly fails to abide by the requirements of this part, or if the lender significantly violates the requirements of this part on any single occasion.

§ 103.42 How long must a lender comply with Program requirements?

(a) A lender must comply in general with Program requirements during:

(1) The effective period of its loan guaranty agreement or loan insurance agreement; and

(2) Whatever additional period is necessary to resolve any outstanding loan guaranty or insurance claims or coverage the lender may have.

(b) Except as otherwise required by law, a lender must maintain records with respect to a particular loan for 6 years after either:

(1) The loan is repaid in full; or

(2) The lender accepts payment from BIA for a loss on the loan, pursuant to a guaranty certificate or an insurance agreement.

(c) At any time 2 years or more following one of the events specified in paragraphs (b)(1) or (2) of this section, a lender may convert its records for corresponding loans to any electronic format that is readily retrievable and that provides an accurate, detailed image of the original records. Upon converting its records in this manner, the lender may dispose of its original loan records.

(d) This section does not restrict any claims BIA may have against the lender or any other party arising from the lender's participation in the Program.

§ 103.43 What must the lender do after repayment in full?

The lender must completely and promptly release of record all remaining collateral for a guaranteed or insured loan after the loan has been paid in full. The release must be at the lender's sole cost. In addition, if the loan is prepaid the lender must notify BIA in accordance with § 103.33(f).

Subpart H—Definitions and Miscellaneous Provisions**§ 103.44 What certain terms mean in this part.**

BIA means the Bureau of Indian Affairs within the United States Department of the Interior.

Default means:

(1) The borrower's failure to make a scheduled loan payment when it is due;

(2) The borrower's failure to meet a material condition of the loan agreement;

(3) The borrower's failure to comply with any other condition, covenant or obligation under the terms of the loan agreement within applicable grace or cure periods;

(4) The borrower's failure to remain at least 51 percent Indian owned, as provided in § 103.25(b);

(5) The filing of a voluntary or involuntary petition in bankruptcy listing the borrower as debtor;

(6) The imposition of a Federal, State, local, or tribal government lien on any assets of the borrower or assets otherwise used as collateral for the loan, except real property tax liens imposed by law to secure payments that are not yet due;

(7) Any default defined in the loan agreement, to the extent the definition is not inconsistent with this part.

Equity means the value, after deducting all debt, of the borrower's tangible assets in the business being financed, on which a lender can perfect a first lien security interest. It can include cash, securities, or other cash equivalent instruments, but cannot include the value of contractual options, the right to pay below market rental rates, or similar rights if those rights:

(1) Are unassignable; or

(2) Can expire before maturity of the loan.

Indian means a person who is a member of a tribe as defined in this part.

Loan agreement means the collective terms and conditions under which the lender extends a loan to a borrower, as reflected by the documents that evidence the loan.

Mortgage means a consensual lien on real or personal property in favor of the lender, given by the borrower or a co-maker or guarantor of the loan (other than BIA), to secure loan repayment. The term "mortgage" includes "deed of trust."

NEPA means the National Environmental Policy Act of 1969, 42 U.S.C. 4321 *et seq.*

Person means any individual or distinct legal entity.

Program means the BIA's Loan Guaranty, Insurance, and Interest Subsidy Program, established under 25 U.S.C. 1481 *et seq.*, 25 U.S.C. 1511 *et seq.*, and this part 103.

Reservation means any land that is an Indian reservation, California rancheria, public domain Indian allotment, pueblo, Indian colony, former Indian reservation in Oklahoma, or land held by an Alaska Native corporation under the provisions

of the Alaska Native Claims Settlement Act (85 Stat. 688), as amended.

Secretary means the Secretary of the United States Department of the Interior, or his authorized representative.

Tribe means any Indian or Alaska Native tribe, band, nation, pueblo, rancheria, village, community or corporation that the Secretary acknowledges to exist as an Indian tribe, and that is eligible for services from BIA.

§ 103.45 Information collection.

(a) The information collection requirements of §§ 103.11, 103.12, 103.13, 103.14, 103.17, 103.21, 103.23, 103.26, 103.32, 103.33, 103.34, 103.35, 103.36, 103.37, and 103.38 have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*, and assigned approval number 1076-0020. The information will be used to approve and make payments on Federal loan guarantees, insurance agreements, and interest subsidy awards. Response is required to obtain a benefit.

(b) The burden on the public to report this information is estimated to average from 15 minutes to 2 hours per response, including the time for reviewing instructions, gathering and maintaining data, and completing and reviewing the information collection. Direct comments regarding the burden estimate or any other aspect of this information collection to the Information Collection Control Officer, Bureau of Indian Affairs, MS 4613, 1849 C Street, NW., Washington, DC 20240.

Dated: December 28, 2000.

Kevin Gover,

Assistant Secretary—Indian Affairs.

RIN 2115-AF60

Salvage and Marine Firefighting Requirements; Vessel Response Plans for Oil

AGENCY: Coast Guard, DOT.

ACTION: Final rule; partial suspension of regulation.

SUMMARY: Current vessel response plan regulations require the owners or operators of vessels carrying Groups I

through V petroleum oil as a primary cargo to identify in their response plans a salvage company with expertise and equipment, and a company with firefighting capability that can be deployed to a port nearest to the vessel's operating area within 24 hours of notification (Groups I–IV) or a discovery of a discharge (Group V). On February 12, 1998, a notice of suspension was published in the **Federal Register**, suspending the 24-hour requirement scheduled to become effective on February 18, 1998, until February 12, 2001 (63 FR 7069). The Coast Guard has decided to extend this suspension period for another 3 years to allow us to complete the rulemaking that proposes to revise the salvage and marine firefighting requirements. The extension is necessary because the potential impact on small businesses from this new rulemaking requires us to prepare an initial regulatory flexibility analysis under the Small Business Regulatory Enforcement Fairness Act of 1996. This was not determined until a draft regulatory assessment was complete in November 2000. We expect to complete the analysis and publish a notice of proposed rulemaking this year. The extension of the suspension period will continue to relieve the affected industry from complying with the existing 24-hour requirements until the project is complete, and amendments to the salvage and marine firefighting requirements become final.

DATES: This extension is effective as of February 12, 2001. Termination of the suspension will be on February 12, 2004.

ADDRESSES: You may submit comments by one of the following methods:

(1) By mail to the Docket Management Facility, (USCG–1998–3417), U.S. Department of Transportation, room PL–401, 400 Seventh Street SW., Washington, DC 20590–0001.

(2) By hand delivery to room PL–401 on the Plaza level of the Nassif Building, 400 Seventh Street SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The telephone number is 202–366–9329.

(3) By fax to the Docket Management Facility at 202–493–2251.

(4) Electronically through the Web site for the Docket Management System at <http://dms.dot.gov>.

The Docket Management Facility maintains the public docket for this rulemaking. Comments and material received from the public will become part of this docket and will be available for inspection or copying at room PL–401 on the Plaza level of the Nassif

Building at the same address between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. You may also access this docket on the Internet at <http://dms.dot.gov>.

FOR FURTHER INFORMATION CONTACT: For questions on this final rule partial suspension of regulations, call Lieutenant Douglas Lincoln, Office of Response, Response Operations Division, Coast Guard Headquarters, telephone 202–267–0448, or via e-mail: dlincoln@comdt.uscg.mil. For questions on viewing, or submitting material to, the docket, call Dorothy Beard, Chief, Dockets, Department of Transportation, telephone 202–366–9329.

SUPPLEMENTARY INFORMATION:

Background and Regulatory History

Requirements for salvage and marine firefighting resources in vessel response plans have been in place since February 5, 1993 (58 FR 7424). The existing requirements are general. The Coast Guard did not originally develop specific requirements because each salvage and marine firefighting response for an individual vessel is unique, due to the vessel's size, construction, operating area and other variables. The Coast Guard's intent was to rely on the planholder to prudently identify contractor resources to meet their needs. The Coast Guard anticipated that the significant benefits of a quick and effective salvage and marine firefighting response would be sufficient incentive for industry to develop salvage and marine firefighting capability parallel to the development of oil spill removal organizations.

Early in 1997, it became apparent that there was disagreement among planholders, salvage and marine firefighting contractors, maritime associations, public agencies, and other stakeholders as to what constituted adequate salvage and marine firefighting resources. There was also concern as to whether these resources could respond to the port nearest to the vessel's operating area within 24 hours.

On June 24, 1997, a notice of meeting was published in the **Federal Register** (62 FR 34105) announcing a workshop to solicit comments from the public on potential changes to the salvage and marine firefighting requirements currently found in 33 CFR part 155.

A public workshop was held on August 5, 1997, to address issues related to salvage and marine firefighting response capabilities, including the 24-hour response time requirement, which was then scheduled to become effective on February 18, 1998. The participants uniformly identified the following three

issues that they felt the Coast Guard needed to address:

(1) Defining the salvage and marine firefighting capability that is necessary in the plans.

(2) Establishing how quickly these resources must be on-scene.

(3) Determining what constitutes an adequate salvage and marine firefighting company.

Reason for Suspension

On February 12, 1998, a notice of suspension was published in the **Federal Register**, suspending the 24-hour requirement scheduled to become effective on February 18, 1998, until February 12, 2001 (63 FR 7069) so that the Coast Guard could address the issues identified at the public workshop through a rulemaking that would revise the existing salvage and marine firefighting requirements. The Coast Guard has decided to extend the suspension period for another 3 years. The extension is necessary because the potential impact on small businesses from this new rulemaking requires us to prepare an initial regulatory flexibility analysis under the Small Business Regulatory Enforcement Fairness Act of 1996. This was not determined until a draft regulatory assessment was complete in November 2000. We expect to complete the analysis and publish a notice of proposed rulemaking this year. The extension of the suspension period will continue to relieve the affected industry from complying with the existing 24-hour requirements until the project is complete, and amendments to the salvage and marine firefighting requirements become final.

Regulatory Evaluation

Although the final rule published in 1996 was a significant regulatory action under section 3(f) of Executive Order 12866, the Office of Management and Budget (OMB) does not consider this extension as a significant action. As a result, it does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. It is not "significant" under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040, February 26, 1979).

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard considered whether this extension will have a significant economic impact on a substantial number of small entities. "Small entities" include small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their

fields, and governmental jurisdictions with populations of less than 50,000.

This action will not have a significant economic impact on a substantial number of small entities because the original requirements did not have a significant effect on a substantial number of small entities. The extension on the suspension does not change those original requirements. Any future regulatory action on this issue will address any economic impacts, including impacts on small entities.

Therefore, the Coast Guard certifies under section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) that this extension to a suspension of a final rule will not have a significant economic impact on a substantial number of small entities.

Assistance for Small Entities

The Small Business and Agriculture Regulatory Enforcement Ombudsman and 10 Regional Fairness Boards were established to receive comments from small businesses about Federal agency enforcement actions. The Ombudsman will annually evaluate the enforcement activities and rate each agency's responsiveness to small business. If you wish to comment on the enforcement actions of the Coast Guard, call 1-888-REG-FAIR (1-888-734-3247).

Collection of Information

This action does not provide for a collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Federalism

We have analyzed this action under E.O. 13132 and have determined that it does not have implications for federalism under that Order. Because this action extends a suspension of a final rule, it does not preempt any state action.

Unfunded Mandates Reform Act

This action will not result in an unfunded mandate under the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531-1538).

Taking of Private Property

This action will not effect a taking of private property or otherwise have taking implications under E.O. 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This action meets applicable standards in sections 3(a) and 3(b)(2) of E.O. 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this action under E.O. 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not concern an environmental risk to health or risk to safety that may disproportionately affect children.

Environment

We considered the environmental impact of this proposed rule and concluded that preparation of an Environmental Impact Statement is not necessary. An Environmental Assessment and a Finding of No Significant Impact are available in the docket where indicated under ADDRESSES.

List of Subjects in 33 CFR Part 155

Hazardous substances, Incorporation by reference, Oil pollution, Reporting and recordkeeping requirements.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 155 as follows:

PART 155—OIL OR HAZARDOUS MATERIAL POLLUTION PREVENTION REGULATIONS FOR VESSELS

1. The authority citation for part 155 continues to read as follows:

Authority: 33 U.S.C. 1231, 1321(j); 46 U.S.C. 3715, 3719; sec. 2, E.O. 12777, 56 FR 54757, 3 CFR, 1991 Comp., p. 351; 49 CFR 1.46, 1.46 (iii).

Sections 155.110-155.130, 155.350-155.400, 155.430, 155.440, 155.470, 155.1030(j) and (k), and 155.1065(g) also issued under 33 U.S.C. 1903(b); and §§ 155.1110-155.1150 also issued 33 U.S.C. 2735.

Note: Additional requirements for vessels carrying oil or hazardous materials appear in 46 CFR parts 30 through 36, 150, 151, and 153.

§ 155.1050 [Amended]

2. In § 155.1050, paragraph (k)(3) is suspended until February 12, 2004.

§ 155.1052 [Amended]

3. In § 155.1052, the last sentence in paragraph (f) is suspended until February 12, 2004.

Dated: January 10, 2001.

R.C. North,

Rear Admiral, U.S. Coast Guard, Assistant Commandant for Marine Safety and Environmental Protection.

[FR Doc. 01-1205 Filed 1-11-01; 2:28 pm]

BILLING CODE 4910-15-P

DEPARTMENT OF HEALTH AND HUMAN SERVICE

45 CFR Part 46

RIN 0925-AA14

Protection of Human Research Subjects

AGENCY: Department of Health and Human Services (DHHS).

ACTION: Final rule.

SUMMARY: The Department of Health and Human Services (DHHS) is amending its human subjects protection regulations. These regulations provide additional protections for pregnant women and human fetuses involved in research and pertains to human in vitro fertilization. The rule continues the special protections for pregnant women and human fetuses that have existed since 1975. The rule enhances the opportunity for participation of pregnant women in research by promoting a policy of presumed inclusion, by permitting the pregnant woman to be the sole decision maker with regard to her participation in research, and by exempting from the regulations six categories of research. The rule also provides a mechanism for the Secretary of HHS to conduct or fund research not otherwise approvable after consultation with an expert panel and public review and comment.

DATES: Effective date: March 19, 2001.

FOR FURTHER INFORMATION CONTACT: Susan Sherman, JD, Office for Human Research Protections (OHRP), 6100 Executive Blvd, Suite 3B01, Rockville, MD 20892-7507. Telephone 301-496-7005. Email: ShermanS@od.nih.gov.

SUPPLEMENTARY INFORMATION:

Background

The Department of Health and Human Services (DHHS) regulates research involving human subjects conducted or supported by the agency through regulations codified at Title 45, part 46, of the Code of Federal Regulations. Subpart B of 45 CFR part 46, promulgated on August 8, 1975, pertains to research involving fetuses, pregnant women, and human in vitro fertilization. The 1975 regulations were jointly published in the **Federal Register** with the report and recommendations of the National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research, Research on the Fetus (40 FR 33526). Subsequent changes were incorporated January 11, 1978 (43 FR 1758), November 3, 1978 (43 FR 51559), and June 1, 1994 (59 FR

28276). This preamble refers to these rules as the "1975 regulations."

Recent guidelines issued by components of DHHS have addressed the participation of women in research as follows:

- Food and Drug Administration 1993 Guideline for the Study and Evaluation of Gender Differences in the Clinical Evaluation of Drugs (58 FR 39406);
- National Institutes of Health 1994 Guidelines on the Inclusion of Women and Minorities as Subjects in Clinical Research (59 FR 14508); and
- Centers for Disease Control and Prevention 1995 Policy on the Inclusion of Women and Racial and Ethnic Minorities in Externally Awarded Research (60 FR 47947), and February 16, 1996 policy Inclusion of Women and Racial and Ethnic Minorities in Research.

These policies are all designed, in part, to improve the opportunity for women to be included as subjects in research.

A Committee on the Ethical and Legal Issues Relating to the Inclusion of Women in Clinical Studies of the Institute of Medicine issued a report in 1994 on Women and Health Research that included the recommendation that DHHS revise subpart B in accordance with the Committee's other recommendations. The Committee believed that women and men should have the opportunity to participate equally in the benefits and burdens of research, and many of the Committee's recommendations were aimed at enhancing the participation of women, including pregnant women, in clinical research.

The National Task Force on AIDS Drug Development and the Presidential Advisory Council on HIV/AIDS subsequently recommended that the lack of paternal consent should not disqualify a pregnant woman from participation in a federally funded clinical trial.

These guidelines and recommendations, and the lack of a formal review of subpart B for over two decades, led DHHS to determine that a substantive examination of subpart B was appropriate.

Based on this review the Department proposed to amend subpart B in a Notice of Proposed Rulemaking (NPRM) published on May 20, 1998 (63 FR 27794). The Department proposed that a policy of presumed opportunity for inclusion of pregnant women in research replace one of presumed exclusion. The Department also concurred with the recommendations of the National Task Force on AIDS Drug Development, the Presidential Advisory

Council on HIV/AIDS, and the IOM Committee regarding paternal consent and proposed to modify the consent requirement to remove potential barriers to research that might provide a medical benefit to a fetus.

The exemptions in 45 CFR part 46, Subpart A, Basic DHHS Policy for Protection of Human Research Subjects, were proposed to apply to subpart B. These exemptions of certain categories of research (e.g., survey research without subject identifiers) have applied since 1981 to research involving nonpregnant women.

In light of the 1993 legislative nullification of the regulatory requirement for ethical advisory board review of research involving in vitro fertilization of human ova (Public Law 103-43), the Department proposed a mechanism for the Secretary to modify or waive certain requirements of Subpart B, following consultation with experts and public input, in place of the provision that the Department have a standing ethical advisory board. Nonsubstantive technical, formatting, and clarifying changes were also proposed.

Discussion of Comments

During the public comment period that ended August 18, 1998, the Department received 13 public comments on the proposed rule from interested parties. The comments are summarized as follows:

General Comments

One commenter endorsed the NPRM in its entirety. One commenter suggested that there be three classes of research that mirror the categories in subpart D of part 46, Additional DHHS Protections for Children Involved as Subjects in Research. Those categories are: no greater than minimal risk, greater than minimal risk but presenting the prospect of direct benefit, and greater than minimal risk and no prospect of direct benefit. The Department finds that modification of the format of subpart B to parallel the categories of research in subpart D would not enhance the protection of women or fetuses and would likely cause confusion. Subpart B, since its inception in 1975 and in this final rule, requires that the risk to the fetus be the least possible risk for achieving the research objectives and any risk which is greater than minimal must hold out the prospect of direct benefit for the fetus or the woman.

One commenter objected to distinctions between "therapeutic" and "nontherapeutic" research as illogical, because, by definition, the purpose of

research is always to contribute to generalizable knowledge. The commenter noted that this distinction confuses therapy with research. The Department concurs with this comment and has modified the final rule to eliminate language implying that the purpose of research is ever therapeutic. The final rule uses the phrases "* * * interventions or procedures that hold out the prospect of direct benefit * * *" and "* * * research [that] holds out the prospect of enhancing the probability of survival * * *" to describe research from which a subject may benefit (§ 46.204(b) and § 46.205(b)(1)(i)).

Applicability (Section 46.201)

The Department proposed that the exemptions at 45 CFR 46.101(b)(1)-(6) of subpart A apply to subpart B. These exemptions of six categories of research were promulgated in 1981, subsequent to the last substantive revision of subpart B, and have applied to research with nonpregnant subjects since that time. Two commenters endorsed the incorporation of the exemptions into subpart B. One commenter noted that pregnancy should not preclude women from participating in these types of research; one stated that pregnant women are autonomous decision makers and should not be treated as vulnerable or impaired because of their condition. Consistent with these comments, the exemptions are retained in the final rule (§ 46.201(b)).

The Department has retained in the final rule language specifying that the requirements of subpart B are in addition to those imposed under the other subparts of 45 CFR part 46, for purposes of clarity (§ 46.201(d)).

Definitions (Section 46.202)

The proposed definitions were substantively the same as those in the 1975 regulations.

The Department proposed the following simplified definition of "fetus:" "fetus means the product of conception during pregnancy until a determination is made after delivery that it is viable." One commenter noted that "product of conception" is generally understood to mean the associated placenta as well. The Department intends that research with the placenta prior to delivery be governed by 45 CFR 46.204, Research involving pregnant women or fetuses prior to delivery. For purposes of clarity, the definition of "fetus" in the final rule utilizes the phrase "from implantation," which is the same phrase used in the definition of "pregnancy."

Since 1975, subpart B has included the fetus *ex utero* until such time as

viability of the fetus is determined. The Department proposed to replace the phrase "ex utero" with "after delivery." No comments were received on that proposal and the final rule retains the proposed language.

The Department also proposed the term "newborn," equating newborn with "fetus after delivery," because some persons may prefer one term to the other depending on the length of the gestation period. Two commenters found the introduction of this term confusing and inconsistent because after delivery there exists an entity that could be called either fetus or newborn. The Department concurs with these comments and has deleted the term "newborn" from the final rule.

One commenter noted that newborns can be of any species and believed that the term "child" should be used in place of "newborn." Another commenter stated that a viable fetus is generally understood to mean a fetus after the point of viability, generally at 5–6 months gestation. In response to these comments the Department has defined "viable" in the final rule and emphasized that, as it pertains to the fetus, "viable" means a fetus after delivery and the regulations at 45 CFR part 46, subpart D, are applicable (§ 46.202(h)).

Research Involving Pregnant Women or Fetuses Prior to Delivery (Section 46.204)

For purposes of clarity, the scope of § 46.204 has been narrowed in the final rule to research involving pregnant women or fetuses prior to delivery, and those provisions of proposed § 46.204 that are applicable to research involving fetuses after delivery have been repeated in section § 46.205 (see § 46.205(a)(1)–(6) and (b)(1)(i)).

The Department proposed to require, as a prerequisite to research on pregnant women or fetuses, preclinical and clinical studies, including studies on nonpregnant women, that provide data for assessing potential risks to pregnant women and fetuses. One commenter endorsed the increased specificity and noted that it would ensure that reproductive toxicity data are available. Another commenter found that to require pregnant women to wait until studies have been conducted on nonpregnant women is to neglect them as a population. The Department notes that preclinical and clinical studies are required only when scientifically appropriate. The final rule retains the proposed provision for preclinical and clinical studies (§ 46.204(a) and § 46.205(a)(1)).

To strengthen protections for the pregnant woman and fetus, the Department proposed a new informed consent provision: that the woman be fully informed regarding the reasonably foreseeable impact of the research on the fetus. No commenters objected to this provision. The final rule, at § 46.204(e), retains this requirement with the clarification that it also applies to the legally authorized representative. This provision is repeated in § 46.205(a)(2), so that the person whose informed consent is a prerequisite to participation in the research must be fully informed of the reasonably foreseeable impact of the research on the fetus.

One commenter stated that informed consent should highlight known or suspected risks and should incorporate unknown harms. The Department notes that provisions of subpart A at 45 CFR part 46.116(a)(2) and § 46.116(b)(1), respectively, also applicable to subpart B, address these concerns. The commenter further noted that researchers should work to ensure that the woman or her legally authorized representative understands the information that has been disclosed, that checks for understanding should be tailored according to the situation of particular women or representatives, and women should be encouraged to discuss research participation with their obstetrician before making a final decision about enrollment. The Department notes that ensuring that information is understood and checks for understanding tailored to particular situations are not precluded by the regulations, nor are they unique to research with pregnant women. Subpart A affords IRBs the opportunity and the authority to ensure the adequacy of informed consent and protections by imposing additional requirements or monitoring the research or the consent process. Similarly, with regard to the suggestion concerning encouragement of discussion with an obstetrician, the Department notes that the rules do not preclude encouragement to discuss participation with obstetricians or any other individuals and that subpart A requires that consent be sought only under circumstances that provide sufficient opportunity to consider participation (45 CFR 46.116).

The Department proposed to modify the consent requirements in the 1975 regulations by permitting research with pregnant women or fetuses prior to delivery based on the consent of the woman or her legally authorized representative. The Department recognizes and encourages paternal involvement in decisions affecting the

pregnant woman and fetus prior to delivery. Nonetheless, in some cases the father's consent has been a barrier to participation in research of the woman or fetus prior to delivery. The recommendations of the National Task Force on AIDS Drug Development, the Presidential Advisory Council on HIV/AIDS, and the IOM Committee were unanimous that the consent of the father should not be a condition of the participation of a pregnant woman in research.

Ten commenters endorsed or applauded the proposal to modify the parental consent requirement, many describing specific research trials in which pregnant women were unable to participate in potentially beneficial research because of the requirement that the father's consent be secured. One commenter believed the consent of the father should continue to be required and that waivers from the Secretary should be sought if the father's consent is difficult to obtain. The Department concludes that the decision making authority for research participation of the pregnant woman or fetus prior to delivery should rest with the pregnant woman and has retained this provision in the final rule (§ 46.204(d)).

One commenter indicated that the rules are unclear whether a researcher may inform a pregnant woman of nonresearch alternatives. The Department notes that subpart B does not address alternatives to research, but that subpart A, at 45 CFR part 46.116(a)(4), also applicable to subpart B, requires disclosure of appropriate alternative procedures or courses of treatment that might be advantageous to the subject.

The Department has also decided to continue the use of the word "terminate" in sections 204 and 205 instead of utilizing the proposed change to the word "abort." The Department believes that the original language is clearer.

Research Involving Fetuses After Delivery (Section 46.205)

As indicated above, those provisions proposed in § 46.204 that are applicable to research involving fetuses after delivery are reiterated in the final rule under § 46.205(a) and (b)(1)(i).

One commenter requested that the Department explain why this section is separate from subpart D. As noted above, the 1975 regulations extended the definition of fetus to include the fetus *ex utero* until such time as a fetus is determined to be viable. The final rule continues this extension because nonviable fetuses, and fetuses whose viability has not yet been determined

after delivery, require protection and are not covered by subpart D. Accordingly, subpart B permits research with fetuses of uncertain viability only if the research holds out the prospect of enhancing the probability of survival or there will be no risk resulting from the research and the purpose is the development of important biomedical knowledge that cannot be obtained by other means (§ 46.205(b)). Research with nonviable fetuses after delivery, which must be considered dying subjects, must meet the five criteria at § 46.205(c)(1)–(5), also intended to provide protection for such subjects.

Section 498(a), “Fetal Research,” of the Public Health Service Act, 42 U.S.C. 289g(a), places statutory restrictions on research involving nonviable living fetuses ex utero or living fetuses ex utero for whom viability has not been ascertained. The statute permits research under either of the following two conditions: “the research * * * (1) may enhance the well-being or meet the health needs of the fetus or enhance the probability of its survival to viability; or (2) will pose no added risk of suffering, injury, or death to the fetus and the purpose * * * is the development of important biomedical knowledge that cannot be obtained by other means.” This rule exceeds those requirements for fetuses of uncertain viability by permitting research only if it either (1) holds out the prospect of enhancing the probability of survival of the particular fetus to the point of viability, or (2) poses no risk to the fetus and the purpose is the development of important biological knowledge that cannot be obtained by other means. This rule also exceeds the statutory requirements for nonviable living fetuses ex utero by specifying that vital functions of the nonviable fetus may not be artificially maintained and the research may not terminate the heartbeat or respiration of the fetus.

The consent requirements for research involving fetuses of uncertain viability and nonviable fetuses at § 46.205(b)(2) and § 46.205(c)(5), respectively, also ensure protection of the fetus. Research involving fetuses of uncertain viability may proceed with the consent of either parent (or under certain circumstances the consent of a legally authorized representative), but the research must hold the prospect of enhancing the probability of survival of the fetus to the point of viability or pose no risk to the fetus. The Department recognizes that, in cases of uncertain viability, a decision regarding research participation must often be made very quickly, especially where the research presents the prospect of enhancing the

probability of survival of the fetus. Thus, the consent of only one parent (or legally authorized representative) is required. However, if both parents are readily available at the time when a decision is needed, reasonable efforts should be made to provide all relevant information to both parents. The Department believes that research involving the nonviable fetus should only proceed with the consent of both parents (unless one is unavailable, incompetent, or temporarily incapacitated), and the consent of a representative is expressly prohibited. The individual(s) providing consent under § 46.205(b)(2) or (c)(5) must be fully informed regarding the reasonably foreseeable impact of the research on the fetus (§ 46.205(a)(2)).

Research after delivery, involving fetuses determined to be viable, is governed by Subpart D (§ 46.205(d)).

Research Not Otherwise Approvable That Presents Certain Opportunities section 46.207)

The Department proposed to replace the 1975 regulatory authority of the Secretary to modify or waive specific requirements with the approval of an ethical advisory board, with the authority to modify or waive requirements after consultation with appropriate experts and opportunity for public review and comment. The proposal would have required the Secretary to consider whether the risks to the subjects were so outweighed by the sum of the benefits to the subjects and the importance of the knowledge to be gained as to warrant modification or waiver. One commenter noted that the proposed waiver provision did not require IRB review, as does the similar section in subpart D (45 CFR 46.407). The commenter further noted that the proposed wording appeared to require that the overarching consideration be “beneficence” based, and that adopting the language in 45 CFR 46.407 would encompass all of the ethical principles in the Belmont Report and ensure consistency between subparts B and D. The Department concurs with these comments and the final rule, at § 46.207, is consistent with 45 CFR 46.407, with conforming and clarifying changes.

Under this provision the waiver authority is limited to the requirements of § 46.204 applicable to pregnant women and fetuses prior to delivery. The other requirements of subpart B, including those in § 46.205, cannot be waived. Even though the Secretary has the authority to waive the requirements of § 46.205 that exceed the statutory requirements of section 498(a), “Fetal Research,” of the Public Health Service

Act, 42 U.S.C. 289g(a) (see discussion of § 46.205 above), it was determined that the additional protections afforded by § 46.205 are essential and should not be waived under any circumstances.

Conclusion

After considering the comments, the Department is adopting the rule as proposed except for the changes noted above and editorial changes to clarify the intent of the regulation. Distinctions between therapeutic and nontherapeutic research are eliminated. The term “newborn” is deleted in the final rule for purposes of clarity, and the definition of “viable” as it pertains to the fetus is clarified. Section 46.207, regarding approval by the Secretary of research that would not otherwise be approvable under § 46.204, is modified consistent with the similar provision in subpart D. The Department has also incorporated additional nonsubstantive editorial and clarifying revisions in the final rule.

The rule is effective 60 days after publication to give Institutional Review Boards (IRBs) time to incorporate the regulations into their review of research protocols. All initial and ongoing projects reviewed after the effective date by IRBs under Multiple Project Assurances or other Assurances with the DHHS, Office for Human Research Protections, OHRP (formerly OPRR), must be reviewed in accordance with these rules.

Executive Order 12866

Executive Order 12866 requires that all regulatory actions reflect consideration of the costs and benefits they generate and that they meet certain standards, such as avoiding the imposition of unnecessary burdens on the affected public. If an action is deemed to fall within the scope of the definition of the term “significant regulatory action” contained in § 3(f) of the Order, a pre-publication review by the Office of Management and Budget’s (OMB’s) Office of Information and Regulatory Affairs (OIRA) is necessary. OMB deemed this rule a “significant regulatory action,” as defined by Executive Order 12866. Therefore, the rule was submitted to OIRA for review prior to its publication in the **Federal Register**.

Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. Chapter 6) requires that regulatory actions be analyzed to determine whether they create a significant impact on a substantial number of small entities. This rule primarily affects individual research

subjects and institutions that receive funding from the Department of Health and Human Services for research involving human subjects. It will not have the effect of imposing significant additional costs on small research institutions that are within the definition of small entities. Therefore, the Secretary certifies that this rule will not have significant impact on a substantial number of small entities and that preparation of an initial regulatory flexibility analysis is not required.

Paperwork Reduction Act

This rule does not contain any new information collection requirements that are subject to Office of Management and Budget (OMB) approval under the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

List of Subjects in 45 CFR Part 46

Health—clinical research, medical research.

Dated: September 21, 2000.

David Satcher,

Assistant Secretary for Health and Surgeon General.

Approved: October 30, 2000.

Donna E. Shalala,

Secretary of Health and Human Services.

Accordingly, the Department of Health and Human Services amends part 46 of the Regulations for the Protection of Human Subjects (45 CFR part 46), as follows:

1. authority citation for 45 CFR part 46 is revised to read as follows:

Authority: 5 U.S.C. 301; 42 U.S.C. 289(a).

2. Subpart B of 45 CFR part 46 is revised to read as follows:

Subpart B—Additional Protections for Pregnant Women and Human Fetuses Involved in Research, and Pertaining to Human In Vitro Fertilization

Sec.

46.201 To what do these regulations apply?

46.202 Definitions.

46.203 Duties of IRBs in connection with research involving pregnant women, fetuses, and human in vitro fertilization.

46.204 Research involving pregnant women or fetuses prior to delivery.

46.205 Research involving fetuses after delivery.

46.206 Research involving, after delivery, the placenta, the dead fetus, or fetal material.

46.207 Research not otherwise approvable which presents an opportunity to understand, prevent, or alleviate a serious problem affecting the health or welfare of pregnant women or fetuses.

§ 46.201 To what do these regulations apply?

(a) Except as provided in paragraph (b) of this section, this subpart applies to all research involving pregnant women or human fetuses, and to all research involving the in vitro fertilization of human ova, conducted or supported by the Department of Health and Human Services (DHHS). This includes all research conducted in DHHS facilities by any person and all research conducted in any facility by DHHS employees.

(b) The exemptions at § 46.101(b)(1) through (6) are applicable to this subpart.

(c) The provisions of § 46.101(c) through (i) are applicable to this subpart. Reference to State or local laws in this subpart and in § 46.101(f) is intended to include the laws of federally recognized American Indian and Alaska Native Tribal Governments.

(d) The requirements of this subpart are in addition to those imposed under the other subparts of this part.

§ 46.202 Definitions.

The definitions in § 46.102 shall be applicable to this subpart as well. In addition, as used in this subpart:

(a) *Dead fetus* means a fetus after delivery that exhibits neither heartbeat, spontaneous respiratory activity, spontaneous movement of voluntary muscles, nor pulsation of the umbilical cord. Delivery means complete separation of the fetus from the woman by expulsion or extraction or any other means.

(b) *Fetus* means the product of conception from implantation until a determination is made after delivery that it is viable.

(c) *In vitro fertilization* means any fertilization of human ova which occurs outside the body of a female, either through admixture of donor human sperm and ova or by any other means.

(d) *Nonviable fetus* means a fetus after delivery that, although living, is not viable.

(e) *Pregnancy* encompasses the period of time from implantation until delivery. A woman shall be assumed to be pregnant if she exhibits any of the pertinent presumptive signs of pregnancy, such as missed menses, until the results of a pregnancy test are negative or until delivery.

(f) *Secretary* means the Secretary of Health and Human Services and any other officer or employee of the Department of Health and Human Services to whom authority has been delegated.

(g) *Viable* as it pertains to the fetus means being able, after delivery, to

survive (given the benefit of available medical therapy) to the point of independently maintaining heartbeat and respiration. The Secretary may from time to time, taking into account medical advances, publish in the **Federal Register** guidelines to assist in determining whether a fetus is viable for purposes of this subpart. If a fetus after delivery is viable then it is a child as defined by § 46.402(a), and subpart D of this part is applicable.

§ 46.203 Duties of IRBs in connection with research involving pregnant women, fetuses, and human in vitro fertilization.

In addition to other responsibilities assigned to IRBs under this part, each IRB shall review research covered by this subpart and approve only research which satisfies the conditions of all applicable sections of this subpart and the other subparts of this part.

§ 46.204 Research involving pregnant women or fetuses prior to delivery.

Pregnant women or fetuses prior to delivery may be involved in research if all of the following conditions are met:

(a) Where scientifically appropriate, preclinical studies, including studies on pregnant animals, and clinical studies, including studies on nonpregnant women, have been conducted and provide data for assessing potential risks to pregnant women and fetuses;

(b) The risk to the fetus is not greater than minimal, or any risk to the fetus which is greater than minimal is caused solely by interventions or procedures that hold out the prospect of direct benefit for the woman or the fetus;

(c) Any risk is the least possible for achieving the objectives of the research;

(d) The woman's consent or the consent of her legally authorized representative is obtained in accord with the informed consent provisions of subpart A of this part, unless altered or waived in accord with § 46.101(i) or § 46.116(c) or (d);

(e) The woman or her legally authorized representative, as appropriate, is fully informed regarding the reasonably foreseeable impact of the research on the fetus or resultant child;

(f) For children as defined in 45 CFR 46.402(a) who are pregnant, assent and permission are obtained in accord with the provisions of subpart D of this part;

(g) No inducements, monetary or otherwise, will be offered to terminate a pregnancy;

(h) Individuals engaged in the research will have no part in any decisions as to the timing, method, or procedures used to terminate a pregnancy; and

(i) Individuals engaged in the research will have no part in determining the viability of a fetus.

§ 46.205 Research involving fetuses after delivery.

(a) After delivery, fetuses may be involved in research if all of the following conditions are met:

(1) Where scientifically appropriate, preclinical and clinical studies have been conducted and provide data for assessing potential risks to fetuses.

(2) The individual(s) providing consent under paragraph (b)(2) or (c)(5) of this section is fully informed regarding the reasonably foreseeable impact of the research on the fetus or resultant child.

(3) No inducements, monetary or otherwise, will be offered to terminate a pregnancy.

(4) Individuals engaged in the research will have no part in any decisions as to the timing, method, or procedures used to terminate a pregnancy.

(5) Individuals engaged in the research will have no part in determining the viability of a fetus.

(6) The requirements of paragraph (b) or (c) of this section have been met as applicable.

(b) Fetuses of uncertain viability. After delivery, and until it has been ascertained whether or not a fetus is viable, a fetus may not be involved in research covered by this subpart unless the following additional conditions are met:

(1) The IRB determines that:

(i) The research holds out the prospect of enhancing the probability of survival of the particular fetus to the point of viability, and any risk is the least possible for achieving the objectives of the research, or

(ii) The purpose of the research is the development of important biomedical knowledge which cannot be obtained by other means and there will be no risk to the fetus resulting from the research; and

(2) The legally effective informed consent of either parent of the fetus or, if neither parent is able to consent because of unavailability, incompetence, or temporary incapacity, the legally effective informed consent of either parent's legally authorized representative is obtained in accord with subpart A of this part, unless altered or waived in accord with § 46.101(i) or § 46.116(c) or (d).

(c) Nonviable fetuses. After delivery, a nonviable fetus may not be involved in research covered by this subpart unless all of the following additional conditions are met:

(1) Vital functions of the fetus will not be artificially maintained;

(2) The research will not terminate the heartbeat or respiration of the fetus;

(3) There will be no risk to the fetus resulting from the research;

(4) The purpose of the research is the development of important biomedical knowledge that cannot be obtained by other means; and

(5) The legally effective informed consent of both parents of the fetus is obtained in accord with subpart A of this part, except that the waiver and alteration provisions of § 46.116(c) and (d) do not apply. However, if either parent is unable to consent because of unavailability, incompetence, or temporary incapacity, the informed consent of one parent of a nonviable fetus will suffice to meet the requirements of this paragraph. The consent of a legally authorized representative of either or both of the parents of a nonviable fetus will not suffice to meet the requirements of this paragraph.

(d) Viable fetuses. A fetus, after delivery, that has been determined to be viable is a child as defined by § 46.402(a) and may be included in research only to the extent permitted by and in accord with the requirements of subparts A and D of this part.

§ 46.206 Research involving, after delivery, the placenta, the dead fetus, or fetal material.

(a) Research involving, after delivery, the placenta; the dead fetus; macerated fetal material; or cells, tissue, or organs excised from a dead fetus, shall be conducted only in accord with any applicable Federal, State, or local laws and regulations regarding such activities.

(b) If information associated with material described in paragraph (a) of this section is recorded for research purposes in a manner that living individuals can be identified, directly or through identifiers linked to those individuals, those individuals are research subjects and all pertinent subparts of this part are applicable.

§ 46.207 Research not otherwise approvable which presents an opportunity to understand, prevent, or alleviate a serious problem affecting the health or welfare of pregnant women or fetuses.

The Secretary will conduct or fund research that the IRB does not believe meets the requirements of § 46.204 only if:

(a) The IRB finds that the research presents a reasonable opportunity to further the understanding, prevention, or alleviation of a serious problem

affecting the health or welfare of pregnant women or fetuses; and

(b) The Secretary, after consultation with a panel of experts in pertinent disciplines (for example: science, medicine, ethics, law) and following opportunity for public review and comment, including a public meeting announced in the **Federal Register**, has determined either:

(1) That the research in fact satisfies the conditions of § 46.204, as applicable, or

(2) The following:

(i) The research presents a reasonable opportunity to further the understanding, prevention, or alleviation of a serious problem affecting the health or welfare of pregnant women or fetuses;

(ii) The research will be conducted in accord with sound ethical principles; and

(iii) Informed consent will be obtained in accord with the informed consent provisions of subpart A and other applicable subparts of this part, unless altered or waived in accord with § 46.101(i) or § 46.116(c) or (d).

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 01-43, MM Docket No. 00-179, RM-9947]

Digital Television Broadcast Service; Arkadelphia, AR

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of Arkansas Educational Television Commission, licensee of noncommercial educational station KETG(TV), substitutes DTV *13 for DTV channel *46 at Arkadelphia. See 65 FR 59389, October 5, 2000. DTV channel *13 can be allotted to Arkadelphia in compliance with the principle community coverage requirements of Section 73.625(a) at reference coordinates (33-54-26 N. and 93-06-46 W.) with a power of 7.3, HAAT of 320.9 meters and with a DTV service population of 277 thousand. With is action, this proceeding is terminated.

DATES: Effective February 26, 2001.

FOR FURTHER INFORMATION CONTACT: Pam Blumenthal, Mass Media Bureau, (202) 418-1600.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report

and Order, MM Docket No. 00-179, adopted January 10, 2001, and released January 11, 2001. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Reference Center 445 12th Street, SW, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Services, Inc., (202) 857-3800, 1231 20th Street, NW, Washington, DC 20036.

List of Subjects in 47 CFR Part 73

Television, Digital television broadcasting.

Part 73 of Title 47 of the Code of Federal Regulations is amended as follows:

PART 73—[AMENDED]

1. The authority citation for Part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 303, 334, 336.

§ 73.622 [Amended]

2. Section 73.622(b), the Table of Digital Television Allotments under Arkansas, is amended by removing DTV channel *46 and adding DTV channel *13 at Arkadelphia.

[MM Docket No. 95-31, FCC 00-120]

Reexamination of Comparative Standards for Noncommercial Educational Applicants

AGENCY: Federal Communications Commission.

ACTION: Final rule; announcement of effective date.

SUMMARY: The Commission adopted new rules for selecting among mutually exclusive applicants for noncommercial educational broadcast stations. Certain rules contained new and modified information collection requirements and were published in the **Federal Register** on June 8, 2000. This document announces the effective date of these published rules.

DATES: Effective August 1, 2000 with respect to the amendments to §§ 73.202,

73.3527, and 77.3572 published at 65 FR 36375 (June 8, 2000).

FOR FURTHER INFORMATION CONTACT:

Irene Bleiweiss, Mass Media Bureau, Audio Services Division, (202) 418-2700.

SUPPLEMENTARY INFORMATION: On August 1, 2000, the Office of Management and Budget (OMB) approved the information collection requirements contained in Sections 73.202; 73.3527; and 73.3572 pursuant to OMB Control Nos. 3060-0948. Accordingly, the information collection requirements contained in these rules became effective on August 1, 2000.

Federal Communications Commission.

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

49 CFR Part 40

[Docket OST-99-6578]

RIN 2105-AAC49

Procedures for Transportation Workplace Drug and Alcohol Testing Programs; Correction

AGENCY: Office of the Secretary, DOT.

ACTION: Final rule; correction.

SUMMARY: In its final drug and alcohol testing rule published on December 19, 2000, the Department made an editorial error in the numbering of a section in the complete new version regulation. This document corrects this error by inserting the proper numbering. In addition, the Department inadvertently omitted one item from its amendments to the existing regulation. This document adds this item, which concerns the responsibilities of the medical review officer in reviewing chain of custody documentation.

EFFECTIVE DATES: The correction to the amendments to the current 49 CFR Part 40 (i.e., the addition of § 40.227) is effective January 18, 2001. The correction to the revised 49 CFR Part 40 (i.e., corrected designation of § 40.33(f)) is effective August 1, 2001.

FOR FURTHER INFORMATION CONTACT:

Robert C. Ashby, Deputy Assistant General Counsel for Regulation and Enforcement, Department of Transportation, 400 7th Street, SW., Room 10424, Washington, DC 20590, at (202) 366-9306 (voice), (202) 366-9313

(fax), (202) 755-7687 (TDD), or bob.ashby@ost.dot.gov (e-mail).

SUPPLEMENTARY INFORMATION: In the December 19, 2000, **Federal Register** (65 FR 79462), the Department published a comprehensive revision to its drug and alcohol procedures testing regulation (49 CFR Part 40). This complete revision becomes effective August 1, 2001. In this revision, the Department made an error in numbering § 40.33(f). Following the introductory text of paragraph (f), the Department numbered three paragraphs (i), (ii), and (iii), respectively. They should have been numbered (1), (2), and (3). We are correcting this error.

In the same **Federal Register** document, we also published amendments to the existing 49 CFR Part 40, effective January 18, 2001. We inadvertently omitted from these amendments one provision we intended to make effective on this date. This provision concerns the responsibility of the medical review officer (MRO) to review the chain of custody documentation for a drug test. In § 40.123(b)(1) and § 40.129(a)(2) of the complete revision of Part 40, the Department specifies that MROs are not required to review the laboratory internal chain of custody documentation as part of this process, and that no one is authorized to cancel a test because the MRO does not review the internal laboratory chain of custody documentation.

These provisions of the complete revision of Part 40 are fully consistent with the Department's intent in, and interpretation of, the existing regulation. However, we learned last year that some parties have been confused about this point, and one state court decision—mistakenly, in our view—determined that MROs were required to review internal laboratory chain of custody documentation. We added the cited provisions to the complete revision of Part 40 to emphasize that MRO review of this documentation is not needed.

We intended to add the substance of these provisions to the amendments to the existing Part 40 that become effective January 18, 2001, lest there be any misunderstanding of this point in the interim before August 1, 2001. However, through editorial oversight, we failed to do so. We are correcting this omission by adding a new § 40.227 to Subpart E of the existing Part 40.

The Department finds that there is good cause to issue this correction without a prior notice and opportunity for comment. The underlying regulatory provisions were part of a rulemaking that was promulgated through the

normal notice and comment provisions of the Administrative Procedure Act. The editorial correction to the numbering of § 40.33(f) has no substantive significance. The addition of a provision of the complete revision of Part 40 to the amendments to the existing Part 40 merely ensures that this restatement of the Department's understanding of MRO review responsibilities under the existing rule becomes part of the regulatory text in January as we intended, rather than in August.

The Department would not anticipate receiving any useful public comment on these matters. Therefore, the Department finds that it would be impracticable, unnecessary, and contrary to the public interest to go through a notice-and-comment process to fix a minor editorial mistake. For the same reason, we find good cause to make the correction with respect to

MRO review responsibilities effective in less than 30 days.

This is a nonsignificant rule under both Executive Order 12886 and the Department's regulatory policies and procedures. The Department certifies, under the Regulatory Flexibility Act, that the rule will not have a significant economic effect on a substantial number of small entities. This is because we anticipate that this amendment will have no economic effect on anyone. It does not have Federalism impacts sufficient to warrant consultation or the preparation of a Federalism impact statement. It does not impose information collection requirements.

Issued this 4th Day of January 2000, at Washington, DC.

Rosalind A. Knapp,

Acting General Counsel.

Accordingly, in FR Doc. 00-31251, published in 65 FR 79462, December 19, 2000, make the following corrections:

PART 40—[CORRECTED]

1. On page 79521, in the second column, add § 40.227 to Subpart E, to read as follows:

§ 40.227 Is the MRO required to review laboratory internal chain of custody documentation?

(a) As the MRO, you are not required to review laboratory internal chain of custody documentation.

(b) No one is permitted to cancel a test because you have not reviewed this documentation.

§ 40.33 [Corrected]

2. Beginning on page 79533, in the third column, in § 40.33, correctly designate paragraphs (f)(i), (f)(ii), and (f)(iii) as paragraphs (f)(1), (f)(2), and (f)(3), respectively.

Proposed Rules

Federal Register

Vol. 66, No. 11

Wednesday, January 17, 2001

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

Public Workshop on Risk-Informed Regulation—Option 2

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of workshop.

SUMMARY: The Nuclear Regulatory Commission (NRC) will host a public workshop to provide an opportunity for discussion of topics raised from the advanced notice of proposed rulemaking on this subject, of the Nuclear Energy Institute's (NEI) guidelines for this issue, and possible alternative approaches to Option 2 in risk-informed regulations. The workshop is open to the public.

DATES: The workshop will be held on Wednesday, February 21, 2001 from 1:00 p.m. to 5:00 p.m. and on Thursday, February 22, 2001 from 8:30 a.m. through 4:00 p.m.

ADDRESSES: Two White Flint North Auditorium, 11545 Rockville Pike, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Joe Golla, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone: (301) 415-1002 email: JAG2@nrc.gov.

SUPPLEMENTARY INFORMATION:

This workshop will provide an opportunity to discuss topics related to Option 2 in risk-informed regulations, as discussed in NRC documents SECY-99-256 and SECY-00-0194. The NRC is developing a rulemaking (referred to as Option 2) to revise, using a risk-informed categorization approach, the scope of structures, systems and components (SSC) that are subject to special treatment requirements. Such requirements include quality assurance, testing, qualification and other measures to provide a high degree of assurance that SSC will remain functional.

Based upon the comments received in response to the ANPR, other discussions with stakeholders, and staff views, the following presents the preliminary agenda and set of discussion topics. The discussion topics are tentative and subject to change. Anyone interested in providing a presentation on these or other related topic(s), please contact Joe Golla at (301) 415-1002.

Preliminary Agenda

- 2/21, 1:00 p.m.–1:30 p.m.; Introduction—purpose, agenda—NRC.
- 2/21, 1:30 p.m.–2 p.m.; Industry opening remarks—NEI/others?
- 2/21, 2:00 p.m.–2:30 p.m.; Keynote remarks by Frank Miraglia, Deputy Executive Director for Reactor Programs.
- 2/21, 2:30 p.m.–2:45 p.m.; Break.
- 2:45 p.m.–3:15 p.m.; Pilot activities (WOG, BWROG, CEOG).
- 3:15 p.m.–3:45 p.m.; ASME Code cases.
- 3:45 p.m.–4:15 p.m.; Industry Guidelines—NEI.
- 4:15 p.m.–5:00 p.m.; Other speakers?
- 2/22 8:30 a.m.–10:30 a.m.; SECY-00-194 topics.
- 8:30 a.m.–9:15 a.m.—Box chart (other categorization topics).
- 9:15 a.m.–9:30 a.m.—Candidate rules.
- 9:30 a.m.–10:00 a.m.—Selective implementation (systems).
- 10:00 a.m.–10:30 a.m.—Other topics as suggested by participants.
- 2/22 10:30 a.m.–10:45 a.m.; Break.
- 2/22 10:45 a.m.–12:00 noon—Detail, NRC review, change control.
- 2/22 12:00 noon–1:00 p.m.; Lunch.
- 2/22 1:00 p.m.–3:15 p.m.—Treatment requirements.
- 2/22 3:15 p.m.–3:30 p.m.; Break.
- 2/22 3:30 p.m.–4:00 p.m.; Closing Remarks/Adjourn.

Dated at Rockville, Maryland, this 7th day of January 2001.

For the Nuclear Regulatory Commission.

Cynthia A. Carpenter,
Chief, Generic Issues, Environmental,
Financial and Rulemaking Branch, Division
of Regulatory Improvement Programs, Office
of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 00-AEA-15]

Establishment of Class E Airspace; Seneca Falls, NY

AGENCY: Federal Aviation Administration [FAA], DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to establish Class E airspace at Seneca Falls, NY. An Area Navigation (RNAV) Standard Instrument Approach Procedure (SIAP) has been developed for Finger Lakes Regional Airport (0G7), Seneca Falls, NY. Controlled airspace extending upward from 700 feet Above Ground Level (AGL) is needed to contain aircraft executing the approach. This action proposes to establish Class E airspace to Finger Lakes Regional Airport to contain aircraft executing the approach. The area would be depicted on aeronautical charts for pilot reference.

EFFECTIVE DATE: Comments must be received on or before February 16, 2001.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace Branch, AEA-520, Docket No. 00-AEA-15, F.A.A. Eastern Region, 1 Aviation Plaza, Jamaica, NY 11434-4809.

The office docket may be examined in the Office of the Regional Counsel, AEA-7, F.A.A., Eastern Region, 1 Aviation Plaza, Jamaica, NY 11434-4809.

An informal docket may also be examined during normal business hours in the Airspace Branch, AEA-520, F.A.A., Eastern Region, 1 Aviation Plaza, Jamaica, NY 11434-4809.

FOR FURTHER INFORMATION CONTACT: Mr. Francis T. Jordan, Jr., Airspace Specialist, Airspace Branch, AEA-520, F.A.A. Eastern Region, 1 Aviation Plaza, Jamaica, NY 11434-4809; telephone: (718) 553-4521.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis

supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy-related aspects of the proposal. Communications should identify the airspace docket number and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 00-AEA-15". The postcard will be date/time stamped and returned to the commenter. All communications received on or before the closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with the FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Office of the Regional Counsel, AEA-7, F.A.A., Eastern Region, 1 Aviation Plaza, Jamaica, NY, 11434-4809. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2A, which describes the application procedure.

The Proposal

The FAA is considering an amendment to Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to establish Class E airspace area at Seneca Falls, NY. An Area Navigation SIAP has been developed for Finger Lakes Regional Airport, Seneca Falls, NY. Controlled airspace extending upward from 700 feet AGL is needed to accommodate the approach. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface are published in Paragraph 6005 of FAA Order 7400.9H, dated September 1, 2000, and effective September 16, 2000, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation

listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979) and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that would only affect air traffic procedures and air navigation, it is certified that this proposed rule would not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR Part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for 14 CFR Part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; EO 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration order 7400.9F dated September 1, 2000, and effective September 16, 2000, is proposed to be amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 00-AWP-12]

Proposed Modification of Class E Airspace; Molokai, HI

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to modify the Class E airspace area at Molokai, HI. The development of an Area Navigation (RNAV) Global Positioning System (GPS)-B Standard Instrument Approach Procedure (SIAP) to Kaunakakai/Molokai Airport has made this proposal necessary. Additional controlled airspace extending upward from 700 feet above the surface is needed to contain aircraft executing the RNAV (GPS)-B SIAP to Kaunakakai/Molokai Airport. The intended effect of this proposal is to provide adequate controlled airspace for Instrument Flight Rules (IFR) operations at Kaunakakai/Molokai Airport, Kaunakakai, HI.

DATES: Comments must be received on or before February 23, 2001.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Attn: Manager, Airspace Branch, AWP-520, Docket No. 00-AWP-12, Air Traffic Division, 15000 Aviation Boulevard, Lawndale, California, 90261.

The official docket may be examined in the Office of the Regional Counsel, Western-Pacific Region, Federal Aviation Administration, Room 6007, 15000 Aviation Boulevard, Lawndale, California, 90261.

An informal docket may also be examined during normal business hours at the Office of the Manager, Airspace Branch, Air Traffic Division at the above address.

FOR FURTHER INFORMATION CONTACT: Jeri Carson, Air Traffic Airspace Specialist, Airspace Branch, AWP-520, Air Traffic Division, Western-Pacific Region, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California, 90261, telephone (310) 725-6611.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis

supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify the airspace docket number and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with the comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 00-AWP-12." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available for examination in the Airspace Branch, Air Traffic Division, 15000 Aviation Boulevard, Lawndale, California 90261, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Airspace Branch, 15000 Aviation Boulevard, Lawndale, California 90261. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2A, which describes the application procedures.

The Proposal

The FAA is considering an amendment to 14 CFR part 71 by modifying the Class E airspace area at Molokai, HI. The development of an RNAV (GPS)-B SIAP at Kaunakakai/Molokai Airport has made this proposal necessary. Additional controlled airspace extending upward from 700 feet above the surface is needed to contain aircraft executing the RNAV (GPS)-B SIAP to Kaunakakai/Molokai Airport. The intended effect of this proposal is to provide adequate controlled airspace for aircraft executing the RNAV (GPS)-B SIAP at Kaunakakai/Molokai Airport, Kaunakakai, HI. Class E airspace designations are published in

paragraph 6005 of FAA Order 7400.9H dated September 1, 2000, and effective September 16, 2000, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in this Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposed to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; ROUTES; AND REPORTING POINTS

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9H, Airspace Designations and Reporting Points, dated September 1, 2000, and effective September 16, 2000, is amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

BILLING CODE 4910-13-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[REG-106446-98]

RIN 1545-AW64

Relief From Joint and Several Liability

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations relating to relief from joint and several liability under section 6015 of the Internal Revenue Code. The regulations reflect changes in the law made by the IRS Restructuring and Reform Act of 1998. The regulations provide guidance to married individuals filing joint returns who may seek relief from joint and several liability. This document also provides notice of a public hearing on these proposed regulations.

DATES: Written or electronically generated comments and requests to speak (with outlines of oral comments) at the public hearing scheduled for May 30, 2001, must be received by April 27, 2001.

ADDRESSES: Send submissions to: CC:M&SP:RU (REG-106446-98), room 5228, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand delivered Monday through Friday between the hours of 8 a.m. and 5 p.m. to: CC:M&SP:RU (REG-106446-98), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC. Alternatively, taxpayers may submit comments electronically via the Internet by selecting the "Tax Regs" option on the IRS Home Page, or by submitting comments directly to the IRS Internet site at http://www.irs.gov/tax_regs/regslst.html.

FOR FURTHER INFORMATION CONTACT:

Concerning the proposed regulations, Bridget E. Finkenaur, 202-622-4940; concerning submissions of comments, the hearing and/or to be placed on the building access list to attend the hearing, Guy Traynor, 202-622-7190 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:**Paperwork Reduction Act**

The collection of information contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507). Comments on the collection of information should be sent to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503, with copies to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, W:CAR:MP:FP:S:O, Washington, DC 20224. Comments on the collection of information should be received by March 19, 2001. Comments are specifically requested concerning:

Whether the proposed collection of information is necessary for the proper performance of the functions of the Internal Revenue Service, including whether the information will have practical utility;

The accuracy of the estimated burden associated with the proposed collection of information (see below);

How the quality, utility, and clarity of the information to be collected may be enhanced;

How the burden of complying with the proposed collection of information may be minimized, including through the application of automated collection techniques or other forms of information technology; and

Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

The collection of information in this proposed regulation is in § 1.6015-5. Individuals may request relief from joint and several liability by timely filing Form 8857, "Request for Innocent Spouse Relief (And Separation of Liability and Equitable Relief)," or a written statement that contains the information required on Form 8857, that is signed under penalties of perjury. This collection of information is required in order for an individual to request relief from joint and several liability. This information will be used to carry out the internal revenue laws. The likely respondents are individuals.

The reporting burden contained in § 1.6015-5 is reflected in the burden of Form 8857. The estimated burden is: learning about the law or the form, 17 min.; preparing the form, 17 min.; and copying, assembling, and sending the form to the IRS, 20 min. The reporting burden contained in § 1.6015-5 for the statement signed under penalties of perjury is estimated as: learning about the law, 20 min.; preparing the statement signed under penalties of perjury, 30 min.; and copying, assembling, and sending the statement to the IRS, 20 min.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by the Office of Management and Budget.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Background

Section 6013(d)(3) provides that spouses who file a joint Federal income tax return are jointly and severally liable for liabilities with respect to tax arising from that return. The term *tax* includes additions to tax, penalties, and interest. See sections 6665(a)(2) and 6601(e)(1). Joint and several liability allows the IRS to collect the entire liability from either spouse signing the joint return, without regard to whom the items of income, deduction, credit, or basis that gave rise to the liability are attributable. Before the enactment of the Internal Revenue Service Restructuring and Reform Act of 1998, Public Law 105-206 (112 Stat. 685) (1998) (RRA), section 6013(e) provided the only relief from joint and several liability, and it only applied in very limited circumstances.

Section 3201 of the RRA repealed section 6013(e) and replaced it with section 6015. Section 6015 applies to liabilities that arise after July 22, 1998, and liabilities that arose prior to July 22, 1998, which remained unpaid as of that date. The provisions of section 6015 expand the relief available to spouses or former spouses who wish to be relieved from all or a portion of the joint and several liability arising from a joint individual Federal income tax return. Section 6015 makes the requirements for relief from joint and several liability, formerly in section 6013(e), less restrictive (section 6015(b)), and adds two other relief provisions. One provision, section 6015(c), permits the

allocation of a deficiency between certain estranged spouses or former spouses in proportion to their respective erroneous items or in accordance with other allocation rules. The other provision, section 6015(f), gives the Secretary equitable discretion to grant relief from joint and several liability. The three relief provisions have different eligibility requirements and provide different types of relief.

This document contains proposed amendments to the Income Tax Regulations (26 CFR part 1) that are necessary to carry out the provisions of section 6015. The proposed regulations provide detailed guidance on the three types of relief from joint and several liability under section 6015.

Explanation of Provisions*In General*

To qualify for relief from joint and several liability, a *requesting spouse* (as defined in the regulations) must elect the application of section 6015(b) or 6015(c), or request equitable relief under section 6015(f), within 2 years of the first collection activity after July 22, 1998, with respect to the requesting spouse. Relief under section 6015 is only available for income taxes required under Subtitle A (including self-employment taxes). Relief is not available for other taxes reported on a taxpayer's income tax return (e.g., domestic services employment taxes under section 3510).

The proposed regulations define several terms, some of which are unique to specific provisions, and others of which are generally applicable to section 6015. One generally applicable term is an *item*. An item is generally defined as that which is required to be separately reported on an individual income tax return. However, amounts received from investments that are required to be separately reported on an individual income tax return and that are from the same source are aggregated and treated as one item. For example, assume an individual receives \$700 in dividends and \$1,000 in interest from X Co. Although dividends and interest are required to be separately reported on the individual's income tax return, they are considered one item for purposes of section 6015 because the dividends and interest are both from X Co. Items include, but are not limited to, gross income, deductions, credits, and basis. An erroneous item is defined as any item resulting in an understatement or deficiency in tax to the extent such item is omitted from, or improperly reported (including improperly characterized) on, an individual income tax return.

Innocent Spouse Relief Under Section 6015(b)

In enacting section 6015, Congress focused, in part, on the limitations of section 6013(e). H.R. Conf. Rep. No. 599, 105th Cong., 2d Sess. 249 (1998). Thus, certain limitations under section 6013(e) have been eliminated in section 6015. For example, section 6013(e) required that there be a substantial understatement attributable to a grossly erroneous item, whereas section 6015(b) only requires that there be an understatement of an erroneous item. Another difference is that, unlike section 6013(e), section 6015(b) expressly provides for partial relief if a requesting spouse did not know, and had no reason to know, of only a portion of the understatement. One procedural difference is that a requesting spouse must now elect the application of section 6015(b).

Otherwise, section 6015(b) provides the same type of relief as was available under section 6013(e). In addition, as with section 6013(e), if a requesting spouse qualifies for relief under section 6015(b), refunds are available for amounts that the requesting spouse paid toward the liability for which relief was granted. Much of the language in section 6015(b) is identical to that of section 6013(e). Accordingly, the case law interpreting this language under section 6013(e) will be applied in interpreting the same language under section 6015(b).

The proposed regulations define *understatement* by reference to section 6662(d)(2)(A). Consistent with the interpretation of section 6013(e), the proposed regulations also clarify that "knowledge or reason to know" of an understatement exists only when either the requesting spouse actually knew of the erroneous item giving rise to the understatement, or a reasonable person in similar circumstances would have known of the item.

Allocation of Deficiency Under Section 6015(c)

Section 6015(c) is one of the new relief provisions added by section 3201 of the RRA. Section 6015(c) basically provides relief for an estranged or former spouse by allowing the requesting spouse to elect to limit the requesting spouse's liability for a deficiency to the portion of the deficiency allocated to the requesting spouse. As with section 6015(b), the relief under section 6015(c) must be elected. Unlike section 6015(b), refunds are not available under section 6015(c).

Of the three relief provisions in section 6015, section 6015(c) comes

closest to being a mechanical test. Unlike the other two relief provisions, section 6015(c) does not require a determination that it would be inequitable to hold the requesting spouse liable in order for the requesting spouse to obtain relief. Several objective tests apply to determine whether a requesting spouse qualifies for relief. Among the requirements for relief under section 6015(c) is the requirement that the requesting spouse be divorced, widowed, or legally separated, or not have been a member of the same household as the nonrequesting spouse at any time during the 12-month period ending on the date an election for relief is filed. The proposed regulations provide rules for determining whether spouses are members of the same household in particular situations.

Relief under section 6015(c) is not available for the portion of a deficiency attributable to an erroneous item of the nonrequesting spouse if the Secretary demonstrates that the requesting spouse had actual knowledge of that item at the time the requesting spouse signed the joint return. If the requesting spouse had actual knowledge of only a portion of the erroneous item, partial relief may be available for the amount of the deficiency attributable to the portion of the item of which the requesting spouse did not have actual knowledge. Reason to know of an erroneous item or a portion thereof is not sufficient to disqualify a requesting spouse from relief under section 6015(c). Hence, it may be easier to qualify for relief under this provision than under section 6015(b).

Knowledge of an item means knowledge of the receipt or expenditure. It does not mean knowledge of the proper tax treatment of the item or how (or whether) it was actually reported on the return. This knowledge standard is consistent with the knowledge standard adopted by the United States Tax Court and other courts. See *Cheshire v. Commissioner*, 115 T.C. No. 15 (August 30, 2000) (knowledge requirement under section 6015(c) does not require requesting spouse to possess knowledge of the tax consequences arising from the erroneous item or that the item reported on the return is incorrect; rather the statute requires only a showing that the requesting spouse actually knew of the erroneous item); *Wiksell v. Commissioner*, 215 F.3d 1335 (9th Cir. 2000) (knowledge inquiry in section 6015(c) focuses on whether the taxpayer had knowledge of the erroneous item, not the tax consequences of that item). Also, under the proposed regulations, a requesting spouse could have actual knowledge of an erroneous item without

necessarily knowing its source. Thus, if W knew that H received \$1,000 of interest income, W would have actual knowledge of that item even if W thought that the interest was tax-exempt, or even if W did not know from whom the interest was received. Similarly, W would have actual knowledge of the item even if W had thought (incorrectly) that H had included the interest income on the return. A requesting spouse's failure to review a completed joint return will not negate a demonstration by the Secretary that the requesting spouse had actual knowledge of an item.

To demonstrate that a requesting spouse had actual knowledge of an erroneous item, the Secretary may rely upon all of the facts and circumstances. One relevant factor is whether the requesting spouse made an effort to be shielded from liability by deliberately avoiding learning about an item. Another relevant factor is whether the requesting spouse had an ownership interest in the property that gave rise to the item. The proposed regulations provide that joint ownership is a factor supporting a finding that the requesting spouse had actual knowledge of an erroneous item.

The proposed regulations also provide that the portion of the deficiency for which the requesting spouse remains liable is increased (up to the entire amount of the deficiency) by the value of any disqualified assets transferred to the requesting spouse by the nonrequesting spouse. Disqualified assets are defined as those assets transferred for the principal purpose of avoidance of tax or payment of tax. Any assets transferred during the period beginning 12 months before the mailing date of the first letter of proposed deficiency and continuing to the present are presumed to be disqualified assets. However, the requesting spouse can rebut the presumption by showing that the principal purpose of the transfer was not the avoidance of tax or payment of tax. In addition, the presumption does not apply to transfers of assets pursuant to a divorce or separate maintenance or child support agreement. The IRS and Treasury Department are particularly interested in receiving comments on whether there should be a de minimis exception to the presumption, and if so, the appropriate amount for such an exception.

If a requesting spouse qualifies to elect the application of section 6015(c), section 6015(d) generally provides that erroneous items are allocated between the spouses as if they had filed separate returns. In addition, section 6015(g) directs the Secretary to establish

alternative methods of allocating erroneous items, other than the method in section 6015(d). Under the proposed regulations, erroneous income items are generally allocated to the spouse who earned the income or who owned the investment or business producing the income. If both spouses had an ownership interest in an investment or business, an erroneous income item from that investment or business is allocated between them in proportion to their respective ownership interests. Erroneous business or investment deductions are generally allocated to the spouse who owned the business or investment. If both spouses had an ownership in the business or investment, an erroneous deduction related to that business or investment is allocated between them in proportion to their respective ownership interests. Personal deductions are generally allocated 50% to each spouse, unless the evidence shows that a different allocation is appropriate.

Section 6015(d) also provides rules for allocating a deficiency. Under the proposed regulations, a portion of the deficiency is allocated under the "proportionate allocation method," that is, in proportion to each spouse's share of erroneous items. The proposed regulations provide additional rules regarding the allocation of other portions of the deficiency. First, any portion of the deficiency attributable to certain disallowed credits and taxes (other than income tax and alternative minimum tax) is allocated entirely to one spouse or the other. Second, any portion of the deficiency attributable to the liability of the child of the requesting or nonrequesting spouse is allocated under special rules. Third, any portion of the deficiency attributable to the alternative minimum tax under section 55 is allocated between the spouses in proportion to their individual shares of the total alternative minimum taxable income as defined under section 55(b)(2). Fourth, any portion of the deficiency attributable to accuracy-related penalties under section 6662 and fraud penalties under section 6663 is allocated to the spouse to whom the item giving rise to the penalty is allocable.

The proposed regulations provide one alternative allocation method, which must be used in place of the general allocation method when there are erroneous items taxed at different rates. This method ensures that the allocation of the liability is not skewed, for example, when the deficiency items consist of ordinary income items and capital gains.

Equitable Relief Under Section 6015(f)

Section 6015(f) is the other new relief provision that was added by section 3201 of the RRA. Section 6015(f) authorizes the Secretary to grant equitable relief from joint and several liability to requesting spouses who do not qualify for relief under section 6015(b) or 6015(c). The proposed regulations provide that the Secretary has the discretion to grant equitable relief and that the discretion may be exercised if it would be inequitable to hold the requesting spouse jointly and severally liable. Equitable relief is only available to requesting spouses who fail to qualify for relief under sections 6015(b) and 6015(c). However, section 6015(f) may not be used to circumvent the "no refund" rule of section 6015(c). Therefore, equitable relief under section 6015(f) is not available to refund liabilities already paid, for which the requesting spouse would otherwise qualify for relief under section 6015(c).

Section 6015(f) directs the Secretary to prescribe procedures regarding when equitable relief may be granted. These proposed regulations provide general information on section 6015(f) and refer individuals seeking more detailed guidance to the relevant revenue rulings, revenue procedures, or other published guidance issued on this topic. The detailed guidance on section 6015(f) is currently provided in Revenue Procedure 2000-15 (2000-5 I.R.B. 447).

Other Considerations

In addition to the three types of relief from joint and several liability, section 6015 has many provisions that are relevant when a requesting spouse elects relief under section 6015(b) or 6015(c), or requests relief under section 6015(f). The proposed regulations provide detailed guidance on these other provisions:

1. Types of Relief Considered

There are certain statutory consequences to electing the application of section 6015(b) or section 6015(c) (e.g., suspension of the statute of limitations on collection). Therefore, the IRS will not automatically consider such relief unless the requesting spouse affirmatively elects the application of at least one of those sections. If a spouse requests relief under section 6015(f) alone, relief will only be considered under that section. However, if a requesting spouse elects the application of either section 6015(b) or 6015(c), the IRS will automatically consider whether the requesting spouse qualifies for relief under the other relief provisions of section 6015.

2. Time and Manner of Requesting Relief

Relief under section 6015 must be elected or requested within two years from the first *collection activity* (as defined in the proposed regulations) after July 22, 1998, against the requesting spouse with respect to the joint and several liability. In addition, relief may be elected or requested before the commencement of collection activity. However, the election may not be made, nor may relief be requested, before the taxpayer receives a notification of an audit or a letter or notice from the Secretary indicating that there may be an outstanding liability with regard to the joint return. The proposed regulations provide that the Secretary will not consider premature claims.

3. Determinations

The proposed regulations provide that a requesting spouse generally only receives one final determination of relief under section 6015. However, a second election under section 6015(c) may be considered, and a final determination may be rendered on that election, if, at the time of the second election, but not at the time of the first election, the requesting spouse is divorced, legally separated, widowed, or has not been a member of the same household as the nonrequesting spouse at any time during the 12-month period ending on the date the election was filed.

4. Community Property

Under section 6015 and the proposed regulations, the operation of community property law is not considered in determining to which spouse an erroneous item is allocable.

5. Duress

The proposed regulations amend § 1.6013-4 to clarify that if a spouse asserts and establishes that he or she signed a joint return under duress, then the return is not a joint return, and he or she is not jointly and severally liable for the liability arising from that return. Therefore, in such a case, relief from joint and several liability under section 6015 is not necessary and inapplicable.

Highlighted Issues

These proposed regulations contain detailed guidance on the three types of relief available under section 6015, as well as the other provisions contained in section 6015. Although public comment is sought on all of the issues in the proposed regulations, the IRS and Treasury Department are particularly interested in receiving comments on the issues highlighted below. These issues

present the most challenge in administering section 6015(c).

1. *Knowledge:* The contrasting standards of the relief provisions are most evident in the respective knowledge limitations. Under section 6015(b), relief is not available unless the requesting spouse demonstrates that he or she had no knowledge or reason to know of the item giving rise to the understatement at the time the joint return was signed. In contrast, section 6015(c) provides that, assuming all of the qualifications are met, relief is available unless the Secretary demonstrates that the requesting spouse had actual knowledge of the item giving rise to the deficiency. Actual knowledge cannot be inferred from the requesting spouse's reason to know of the erroneous item. The Secretary bears the burden of proof with respect to the knowledge limitation of section 6015(c). In contrast, the requesting spouse bears the burden of proof with respect to the knowledge and reason to know limitations of section 6015(b). The IRS and Treasury Department are specifically seeking comments on the definition of *item*, because it is knowledge of an item that will disqualify a requesting spouse from receiving relief under sections 6015(b) and 6015(c).

2. *Alternative Allocation Methods:* Section 6015(g)(1) directs the Secretary to prescribe regulations providing alternative allocation methods, and the proposed regulations provide one that is discussed above. The proposed regulations also provide that additional alternative allocation methods may be provided in subsequent guidance. The IRS and Treasury Department are specifically interested in receiving comments about the alternative allocation method provided in the proposed regulations, and any other allocation methods that should be considered.

3. *Interests of the Nonrequesting Spouse:* It is anticipated that relief under section 6015 will be granted more frequently than it was under section 6013(e). Accordingly, section 6015 provides safeguards to protect nonrequesting spouses from erroneous determinations granting relief to their respective requesting spouses. The proposed regulations provide that the Secretary must give a nonrequesting spouse notice that the requesting spouse filed a claim for relief and an opportunity to participate in the determination of whether relief is appropriate.

In fashioning these safeguards, the IRS and Treasury Department are attempting to balance the rights and

interests of both the requesting spouse and the nonrequesting spouse. A spouse who signs a joint return is jointly and severally liable for the entire liability, and the Secretary may collect the entire liability from either spouse. Therefore, a determination that one spouse is relieved of joint and several liability may have no legal effect on the amount of the other spouse's liability. However, a nonrequesting spouse does have a practical interest in the outcome of an innocent spouse determination because if the requesting spouse is relieved of liability, the IRS's only recourse is to collect that liability from the nonrequesting spouse. The IRS and Treasury Department recognize that Congress intended that the IRS take into account the nonrequesting spouse's views when it makes a determination of relief. See H.R. Conf. Rep. No. 599, 105th Cong., 2d Sess. 251, 255 (1998). In addition, information provided by a nonrequesting spouse is helpful in many cases to determine the appropriate amount of relief, if any.

Under the proposed regulations, a nonrequesting spouse will have an opportunity to participate in any administrative or judicial determination of relief. At the administrative level, the nonrequesting spouse may submit information relevant to the determination to the IRS employee making the determination. In addition, if the requesting spouse files a petition with the Tax Court, the nonrequesting spouse will be notified, and have an opportunity to become a party to the proceeding. See Interim Tax Court Rule 325.

Nonetheless, the IRS and Treasury Department recognize that some spouses may be reluctant to apply for relief from joint and several liability, or submit information regarding the other spouse's request for relief, due to privacy concerns or for fear of the other spouse's reprisal. To address this concern, the proposed regulations provide that, at the request of one spouse, the Secretary will omit from shared documents any information (e.g., new name, address, employer) that would reasonably identify that spouse's location.

Special Analyses

It has been determined that these regulations are not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to the regulations, and because the regulations do not impose a collection of information on small entities, the

Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Pursuant to section 7805(f), this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small businesses.

Comments and Public Hearing

Before the regulations are adopted as final regulations, consideration will be given to any written and electronic comments that are submitted timely to the IRS. The IRS and Treasury Department specifically request comments on the clarity of the proposed regulations, on how the proposed regulations can be made easier to understand, and on the highlighted issues. All comments will be available for public inspection and copying.

A public hearing has been scheduled for May 30, 2001, at 10 a.m., in the IRS Auditorium (7th Floor), Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, DC. Due to building security procedures, visitors must enter at the 10th Street entrance, located between Constitution and Pennsylvania Avenues, NW. In addition, all visitors will not be admitted beyond the immediate entrance area more than 15 minutes before the hearing starts. For information about having your name placed on the building access list to attend the hearing, see the **FOR FURTHER INFORMATION CONTACT** section of this preamble.

The rules of 26 CFR 601.601(a)(3) apply to the hearing.

Persons who wish to present oral comments at the hearing must submit written comments and an outline of the topics to be discussed at the time to be devoted to each topic (signed original and eight (8) copies) by April 27, 2001.

A period of 10 minutes will be allotted to each person for making comments.

An agenda showing the scheduling of the speakers will be prepared after the deadline for receiving outlines has passed. Copies of the agenda will be available free of charge at the hearing.

Drafting Information

The principal author of the regulations is Bridget E. Finkenaur of the Office of Associate Chief Counsel, Procedure and Administration (Administrative Provisions and Judicial Practice Division). However, other personnel from the IRS and Treasury Department participated in the development of the regulations.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 is amended by adding the following entries in numerical order to read as follows:

Authority: 26 U.S.C. 7805 * * *
 § 1.6015-1 also issued under 26 U.S.C. 6015(g).
 § 1.6015-2 also issued under 26 U.S.C. 6015(g).
 § 1.6015-3 also issued under 26 U.S.C. 6015(g).
 § 1.6015-4 also issued under 26 U.S.C. 6015(g).
 § 1.6015-5 also issued under 26 U.S.C. 6015(g).
 § 1.6015-6 also issued under 26 U.S.C. 6015(g).
 § 1.6015-7 also issued under 26 U.S.C. 6015(g).
 § 1.6015-8 also issued under 26 U.S.C. 6015(g).
 § 1.6015-9 also issued under 26 U.S.C. 6015(g). * * *

Par. 2. In § 1.6013-4, paragraph (d) is added to read as follows:

§ 1.6013-4 Applicable rules.

* * * * *

(d) *Return signed under duress.* If an individual asserts and establishes that he or she signed a return under legal duress, the return is not a joint return. The individual who signed such return under duress is not jointly and severally liable for the tax shown on the return or any deficiency in tax with respect to the return. The return is adjusted to reflect only the tax liability of the individual who voluntarily signed the return, and the liability is determined at the applicable rates in section 1(d). Section 6212 applies to the assessment of any deficiency in tax on such return.

Par. 3. Sections 1.6015-0 through 1.6015-9 are added to read as follows:

§ 1.6015-0 Table of contents.

This section lists captions contained in §§ 1.6015-1 through 1.6015-9.

§ 1.6015-1 Relief from joint and several liability on a joint return.

- (a) In general.
- (b) Duress.
- (c) Prior closing agreement or offer in compromise.
- (d) Fraudulent scheme.
- (e) Res judicata and collateral estoppel.
- (f) Community property laws.
- (1) In general.

- (2) Example.
- (g) Definitions.
- (1) Requesting spouse.
- (2) Nonrequesting spouse.
- (3) Item.
- (4) Erroneous item.
- (5) Election or request.
- (h) Transferee liability.
- (1) In general.
- (2) Example.

§ 1.6015-2 Relief from liability applicable to all qualifying joint filers.

- (a) In general.
- (b) Understatement.
- (c) Knowledge or reason to know.
- (d) Inequity.
- (e) Partial relief.
- (1) In general.
- (2) Example.

§ 1.6015-3 Allocation of liability for individuals who are no longer married, are legally separated, or are not members of the same household.

- (a) Election to allocate liability.
- (b) Definitions.
- (1) Divorced.
- (2) Legally separated.
- (3) Not members of the same household.
- (i) Temporary absences.
- (ii) Separate dwellings.
- (c) Limitations.
- (1) No refunds.
- (2) Actual knowledge.
- (3) Disqualified asset transfers.
- (i) In general.
- (ii) Disqualified asset defined.
- (iii) Presumption.
- (4) Examples.
- (d) Allocation.

- (1) In general.
- (2) Allocation of erroneous items.
- (i) Benefit on the return.
- (ii) Fraud.
- (iii) Erroneous items of income.
- (iv) Erroneous deduction items.
- (3) Burden of proof.
- (4) General allocation method.
- (i) Proportionate allocation.
- (ii) Separate treatment items.
- (iii) Child's liability.
- (iv) Allocation of certain items.
- (A) Alternative minimum tax.
- (B) Accuracy-related and fraud penalties.
- (5) Examples.
- (6) Alternative allocation methods.
- (i) Allocation based on applicable tax rates.
- (ii) Allocation methods provided in subsequent published guidance.
- (iii) Example.

§ 1.6015-4 Equitable relief.**§ 1.6015-5 Time and manner for requesting relief.**

- (a) Requesting relief.
- (b) Time period for filing a request for relief.
- (1) In general.
- (2) Definitions.
- (i) Collection activity.
- (ii) Date of levy or seizure.
- (3) Requests for relief made before commencement of collection activity.

- (4) Examples.
- (5) Premature requests for relief.
- (c) Effect of a final administrative determination.

§ 1.6015-6 Nonrequesting spouse's notice and opportunity to participate in administrative proceedings.

- (a) In general.
- (b) Information submitted.
- (c) Effect of opportunity to participate.

§ 1.6015-7 Tax Court review.

- (a) In general.
- (b) Time period for petitioning the Tax Court.
- (c) Restrictions on collection and suspension of the running of the period of limitations.
- (1) Restrictions on collection under § 1.6015-2 or 1.6015-3.
- (2) Suspension of the running of the period of limitations.
- (i) Relief under § 1.6015-2 or 1.6015-3.
- (ii) Relief under § 1.6015-4.
- (3) Definitions.
- (i) Levy.
- (ii) Proceedings in court.
- (iii) Assessment to which the election relates.

§ 1.6015-8 Applicable liabilities.

- (a) In general.
- (b) Liabilities paid on or before July 22, 1998.
- (c) Examples.

§ 1.6015-9 Effective date.**§ 1.6015-1 Relief from joint and several liability on a joint return.**

(a) *In general.* (1) An individual who qualifies and elects under section 6013 to file a joint Federal income tax return with another individual is jointly and severally liable for the joint Federal income tax liabilities for that year. However, a spouse or former spouse may be relieved of joint and several liability for any Federal income tax, self-employment tax, penalties, additions to tax, and interest for that year under the following three relief provisions:

- (i) Innocent spouse relief under § 1.6015-2.
- (ii) Allocation of deficiency under § 1.6015-3.
- (iii) Equitable relief under § 1.6015-4.
- (2) A requesting spouse may submit a single claim electing relief under both or either §§ 1.6015-2 and 1.6015-3, and requesting relief under § 1.6015-4. However, equitable relief under § 1.6015-4 is available only to a requesting spouse who fails to qualify for relief under §§ 1.6015-2 and 1.6015-3. If a requesting spouse elects the application of either § 1.6015-2 or 1.6015-3, the Secretary may consider

whether relief is appropriate under the other elective provision and, to the extent relief is unavailable under either, under § 1.6015-4. If a requesting spouse seeks relief only under § 1.6015-4, the Secretary may not grant relief under § 1.6015-2 or 1.6015-3. A requesting spouse must affirmatively elect the application of § 1.6015-2 or 1.6015-3 in order for the Secretary to grant relief under one of those sections.

(3) Relief is not available for liabilities that are required to be reported on a joint Federal income tax return but are not income taxes imposed under Subtitle A of the Internal Revenue Code (e.g., domestic service employment taxes under section 3510).

(b) *Duress*. For rules relating to the treatment of returns signed under duress, see § 1.6013-4(d).

(c) *Prior closing agreement or offer in compromise*. A requesting spouse is not entitled to relief from joint and several liability under § 1.6015-2, § 1.6015-3, or § 1.6015-4 for any tax year for which the requesting spouse has entered into a closing agreement (other than an agreement entered into pursuant to section 6224(c) relating to partnership items) with the Commissioner that disposes of the same liability that is the subject of the claim for relief. In addition, a requesting spouse is not entitled to relief from joint and several liability under § 1.6015-2, § 1.6015-3, or § 1.6015-4 for any tax year for which the requesting spouse has entered into an offer in compromise with the Commissioner. For rules relating to the effect of closing agreements and offers in compromise, see sections 7121 and 7122, and the regulations thereunder.

(d) *Fraudulent scheme*. If the Secretary establishes that a spouse transferred assets to the other spouse as part of a fraudulent scheme, relief is not available under section 6015, and section 6013(d)(3) applies to the return.

(e) *Res judicata and collateral estoppel*. A requesting spouse is not entitled to relief from joint and several liability under § 1.6015-2 or 1.6015-3 for any tax year for which a court of competent jurisdiction has rendered a final determination on the requesting spouse's tax liability if the requesting spouse materially participated in the proceeding. A requesting spouse has not materially participated in a prior proceeding if, due to the effective date of section 6015, relief under section 6015 was not available in that proceeding. However, any final determinations made by a court of competent jurisdiction regarding issues relevant to § 1.6015-2, § 1.6015-3, or § 1.6015-4 are conclusive and may not be reconsidered, provided the

requesting spouse materially participated in the prior court proceeding.

(f) *Community property laws*—(1) *In general*. In determining whether relief is available under § 1.6015-2, § 1.6015-3, or § 1.6015-4, items of income, credits, and deductions are generally allocated to the spouses without regard to the operation of community property laws. An erroneous item is attributed to the individual whose activities gave rise to such item. See § 1.6015-3(d)(2).

(2) *Example*. The following example illustrates the rule of this paragraph (f):

Example. (i) H and W are married and have lived in State A (a community property state) since 1987. On April 15, 2003, H and W file a joint Federal income tax return for the 2002 taxable year. In August 2005, the Internal Revenue Service proposes a \$17,000 deficiency with respect to the 2002 joint return. A portion of the deficiency is attributable to \$20,000 of H's unreported interest income from his individual bank account, the remainder of the deficiency is attributable to \$30,000 of W's disallowed business expense deductions. Under the laws of State A, H and W each own ½ of all income earned and property acquired during the marriage.

(ii) In November 2005, H and W divorce and W timely elects to allocate the deficiency. Even though the laws of State A provide that ½ of the interest income is W's, for purposes of relief under this section, the \$20,000 unreported interest income is allocable to H, and the \$30,000 disallowed deduction is allocable to W. The community property laws of State A are not considered in allocating items for this purpose.

(g) *Definitions*—(1) *Requesting spouse*. A requesting spouse is an individual who filed a joint return and elects relief from Federal income tax liability arising from that return under § 1.6015-2 or § 1.6015-3, or requests relief from Federal income tax liability arising from that return under § 1.6015-4.

(2) *Nonrequesting spouse*. A nonrequesting spouse is the individual with whom the requesting spouse filed the joint return for the year for which relief from liability is sought.

(3) *Item*. An item is that which is required to be separately listed on an individual income tax return or any required attachments, subject to one exception: Amounts received from investments that are required to be separately reported on an individual income tax return and that are from the same source are aggregated and treated as a single item. Items include, but are not limited to, gross income, deductions, credits, and basis.

(4) *Erroneous item*. An erroneous item is any item resulting in an understatement or deficiency in tax to

the extent that such item is omitted from, or improperly reported (including improperly characterized) on an individual income tax return. For example, unreported income from an investment asset resulting in an understatement or deficiency in tax is an erroneous item. Similarly, ordinary income that is improperly reported as capital gain resulting in an understatement or deficiency in tax is also an erroneous item. An erroneous item is also an improperly reported item that affects the liability on other returns (e.g., an improper net operating loss that is carried back to a prior year's return).

(5) *Election or request*. A qualifying election under § 1.6015-2 or § 1.6015-3, or request under § 1.6015-4, is the first timely claim for relief from joint and several liability for the tax year for which relief is sought. A qualifying election also includes a requesting spouse's second election to seek relief from joint and several liability for the same tax year under § 1.6015-3 when the additional qualifications of paragraph (g)(5) (i) and (ii) of this section are met—

(i) The requesting spouse did not qualify for relief under § 1.6015-3 when the Internal Revenue Service considered the first election because the qualifications of § 1.6015-3(a) were not satisfied; and

(ii) At the time of the second election, the qualifications for relief under § 1.6015-3(a) are satisfied.

(h) *Transferee liability*—(1) *In general*. The relief provisions of section 6015 do not negate liability that arises under the operation of other laws. Therefore, a requesting spouse who is relieved of joint and several liability under § 1.6015-2, § 1.6015-3, or § 1.6015-4 may nevertheless remain liable for the unpaid tax (including additions to tax, penalties, and interest) to the extent provided by Federal or state transferee liability or property laws. For the rules regarding the liability of transferees, see sections 6901 through 6904 and the regulations thereunder. In addition, the requesting spouse's property may be subject to collection under Federal or state property laws.

(2) *Example*. The following example illustrates the rule of this paragraph (h):

Example. H and W timely file their 1998 joint income tax return on April 15, 1999. H dies in March 2000, and the executor of H's estate transfers all of the estate's assets to W. In July 2001, the Internal Revenue Service assesses a deficiency for the 1998 return. The items giving rise to the deficiency are attributable to H. W is relieved of the liability under § 6015, and H's estate remains solely liable. The Internal Revenue Service may seek to collect the deficiency from W to the

extent permitted under Federal or state transferee liability or property laws.

§ 1.6015-2 Relief from liability applicable to all qualifying joint filers.

(a) *In general.* A requesting spouse may be relieved of joint and several liability for tax (including additions to tax, penalties, and interest) from an understatement for a taxable year under this section if the requesting spouse elects the application of this section in accordance with §§ 1.6015-1(g)(5) and 1.6015-5, and—

(1) A joint return was filed for the taxable year;

(2) On the return there is an understatement attributable to erroneous items of the nonrequesting spouse;

(3) The requesting spouse establishes that in signing the return he or she did not know and had no reason to know of the item giving rise to the understatement; and

(4) It is inequitable to hold the requesting spouse liable for the deficiency attributable to the understatement.

(b) *Understatement.* The term *understatement* has the meaning given to such term by section 6662(d)(2)(A) and the regulations thereunder.

(c) *Knowledge or reason to know.* A requesting spouse has knowledge or reason to know of an erroneous item if he or she either actually knew of the item giving rise to the understatement, or if a reasonable person in similar circumstances would have known of the item giving rise to the understatement. For rules relating to a requesting spouse's actual knowledge, see § 1.6015-3(c)(2). All of the facts and circumstances are considered in determining whether a requesting spouse had reason to know of an erroneous item. The facts and circumstances that are considered include, but are not limited to, the nature of the item and the amount of the item relative to other items; the couple's financial situation; the requesting spouse's educational background and business experience; the extent of the requesting spouse's participation in the activity that resulted in the erroneous item; whether the requesting spouse failed to inquire, at or before the time the return was signed, about items on the return or omitted from the return that a reasonable person would question; and whether the erroneous item represented a departure from a recurring pattern reflected in prior years' returns (e.g., omitted income from an investment regularly reported on prior years' returns).

(d) *Inequity.* All of the facts and circumstances are considered in determining whether it is inequitable to hold a requesting spouse jointly and severally liable for an understatement. One relevant factor for this purpose is whether the requesting spouse significantly benefitted, directly or indirectly, from the understatement. A significant benefit is any benefit in excess of normal support. Evidence of direct or indirect benefit may consist of transfers of property or rights to property, including transfers that may be received several years after the year of the understatement. Thus, for example, if a requesting spouse receives property (including life insurance proceeds) from the nonrequesting spouse that is traceable to items omitted from gross income that are attributable to the nonrequesting spouse, the requesting spouse will be considered to have received significant benefit from those items. Other factors that may also be taken into account include the fact that the nonrequesting spouse has not fulfilled support obligations to the requesting spouse or the fact that the spouses have been divorced, legally separated, or not been members of the same household for at least the 12 months directly preceding the election. For more information on factors relevant to determining whether it is inequitable to hold a requesting spouse liable, see Rev. Proc. 2000-15 (2000-5 I.R.B. 447), or guidance subsequently published by the Secretary as described in § 1.6015-4(c).

(e) *Partial relief—(1) In general.* If a requesting spouse had no knowledge or reason to know of only a portion of an erroneous item, the requesting spouse may be relieved of the liability attributable to that portion of that item, if all other requirements are met with respect to that portion.

(2) *Example.* The following example illustrates the rules of this paragraph (e):

Example. H and W are married and file their 2004 joint income tax return in March 2005. In April 2006, H is convicted of embezzling \$2 million from his employer during 2004. H kept all of his embezzlement income in an individual bank account, and he used most of the funds to support his gambling habit. However, each month during 2004, H transferred \$10,000 from the individual account to H and W's joint bank account. W paid the household expenses using this joint account, and regularly received the bank statements relating to the account. W had no knowledge or reason to know of H's embezzling activities. However, W did have knowledge and reason to know of \$120,000 of the \$2 million of H's embezzlement income at the time she signed the joint return because that amount passed through the couple's joint bank account.

Therefore, W may be relieved of the liability arising from \$1,880,000 of the unreported embezzlement income, but she may not be relieved of the liability for the deficiency arising from \$120,000 of the unreported embezzlement income of which she knew and had reason to know.

§ 1.6015-3 Allocation of deficiency for individuals who are no longer married, are legally separated, or are not members of the same household.

(a) *Election to allocate deficiency.* A requesting spouse may elect to allocate a deficiency if, as defined in paragraph (b) of this section, the requesting spouse is divorced, widowed, or legally separated, or has not been a member of the same household as the nonrequesting spouse at any time during the 12-month period ending on the date an election for relief is filed. Subject to the restrictions of paragraph (c) of this section, an eligible requesting spouse who elects the application of this section in accordance with §§ 1.6015-1(g)(5) and 1.6015-5 generally may be relieved of joint and several liability for the portion of any deficiency that is allocated to the nonrequesting spouse pursuant to the allocation methods set forth in paragraph (d) of this section. Relief may be available to both spouses filing the joint return if each spouse is eligible for and elects the application of this section.

(b) *Definitions—(1) Divorced.* A requesting spouse is divorced if the requesting spouse has a divorce decree that is recognized in the jurisdiction in which the requesting spouse resides.

(2) *Legally separated.* A requesting spouse is legally separated if the separation is recognized under the laws of the jurisdiction in which the requesting spouse resides.

(3) *Not members of the same household—(i) Temporary absences.* A requesting spouse and a nonrequesting spouse are considered members of the same household during either spouse's temporary absences from the household if it is reasonable to assume that the absent spouse will return to the household, and the household or a substantially equivalent household is maintained in anticipation of such return. Examples of temporary absences may include, but are not limited to, absence due to incarceration, hospitalization, business travel, vacation travel, military service, or education away from home.

(ii) *Separate dwellings.* A husband and wife who reside in the same dwelling are considered members of the same household. However, a husband and wife who reside in two separate

dwellings, whether or not part of the same structure, are not considered members of the same household unless one is temporarily absent from the other's household within the meaning of paragraph (b)(3)(i) of this section.

(c) *Limitations*—(1) *No refunds*. Relief under this section is only available for unpaid liabilities resulting from understatements of liability. Refunds are not authorized under this section.

(2) *Actual knowledge*. (i) If the Secretary demonstrates that the requesting spouse had actual knowledge at the time the return was signed of an erroneous item that is allocable to the nonrequesting spouse, the election to allocate the deficiency attributable to that item is invalid, and the requesting spouse remains liable for the portion of the deficiency attributable to that item. For example, assume W received \$5,000 of dividend income from her investment in X Co. but did not report it on the joint return. H knew that W received \$5,000 of dividend income from X Co. that year. H had actual knowledge of the erroneous item (*i.e.*, \$5,000 of unreported dividend income from X Co.), and no relief is available under this section for the deficiency attributable to the dividend income from X Co. If a requesting spouse had actual knowledge of only a portion of an erroneous item, then relief is not available for that portion of the erroneous item. For example, if H knew that W received \$1,000 of dividend income and did not know that W received an additional \$4,000 of dividend income, relief would not be available for the portion of the deficiency attributable to the \$1,000 of dividend income of which H had actual knowledge. A requesting spouse's actual knowledge of the proper tax treatment of an item is not relevant for purposes of demonstrating that the requesting spouse had actual knowledge of an erroneous item. For example, assume H did not know W's dividend income from X Co. was taxable, but knew that W received the dividend income. Relief is not available under this provision. In addition, a requesting spouse's knowledge of how an erroneous item was treated on the tax return is not relevant to a determination of whether the requesting spouse had actual knowledge of the item. For example, assume that H knew of W's dividend income, but H failed to review the completed return and did not know that W omitted the dividend income from the return. Relief is not available under this provision.

(ii) Knowledge of the source of an erroneous item is not sufficient to establish actual knowledge. For example, assume H knew that W owned

X Co. stock, but H did not know that X Co. paid dividends to W that year. H's knowledge of W's ownership in X Co. is not sufficient to establish that H had actual knowledge of the dividend income from X Co. In addition, a requesting spouse's actual knowledge may not be inferred when the requesting spouse merely had reason to know of the erroneous item. Even if H's knowledge of W's ownership interest in X Co. indicates a reason to know of the dividend income, actual knowledge of such dividend income cannot be inferred from H's reason to know.

(iii) To demonstrate that a requesting spouse had actual knowledge of an erroneous item at the time the return was signed, the Secretary may rely upon all of the facts and circumstances. One factor that may be relied upon in demonstrating that a requesting spouse had actual knowledge of an erroneous item is whether the requesting spouse made a deliberate effort to avoid learning about the item in order to be shielded from liability. This factor, together with all other facts and circumstances, may demonstrate that the requesting spouse had actual knowledge of the item. Another factor that may be relied upon in demonstrating that a requesting spouse had actual knowledge of an erroneous item is whether the requesting spouse and the nonrequesting spouse jointly owned the property that resulted in the erroneous item. Joint ownership is a factor supporting a finding that the requesting spouse had actual knowledge of an erroneous item. For purposes of this paragraph, a requesting spouse will not be considered to have had an ownership interest in an item based solely on the operation of community property law. Rather, a requesting spouse who resided in a community property state at the time the return was signed will be considered to have had an ownership interest in an item only if the requesting spouse's name appeared on the ownership documents, or there otherwise is an indication that the requesting spouse had a direct interest in the item. For example, assume H and W live in State A, a community property state. After their marriage, H opens a bank account in his name. Under the operation of the community property laws of state A, W owns $\frac{1}{2}$ of the bank account. However, W does not have an ownership interest in the account for purposes of this paragraph (c)(2)(iii) because the account is not held in her name and there is no other indication that she has a direct interest in the item.

(3) *Disqualified asset transfers*—(i) *In general*. The portion of the deficiency for which a requesting spouse is liable

is increased (up to the entire amount of the deficiency) by the value of any disqualified asset that was transferred to the requesting spouse. For purposes of this paragraph (c)(3), the value of a disqualified asset is the fair market value of the asset on the date of the transfer.

(ii) *Disqualified asset defined*. A disqualified asset is any property or right to property that was transferred from the nonrequesting spouse to the requesting spouse if the principal purpose of the transfer was the avoidance of tax or payment of tax (including additions to tax, penalties, and interest).

(iii) *Presumption*. Any asset transferred from the nonrequesting spouse to the requesting spouse during the 12-month period before the mailing date of the first letter of proposed deficiency (*e.g.*, a 30-day letter or, if no 30-day letter is mailed, a notice of deficiency) is presumed to be a disqualified asset. The presumption also applies to any asset that is transferred from the nonrequesting spouse to the requesting spouse after the mailing date of the first letter of proposed deficiency. However, the presumption does not apply if the requesting spouse establishes that the asset was transferred pursuant to a divorce decree or separate maintenance agreement. In addition, a requesting spouse may rebut the presumption by establishing that the principal purpose of the transfer was not the avoidance of tax or payment of tax.

(4) *Examples*. The following examples illustrate the rules in this paragraph (c):

Example 1. Actual knowledge of an erroneous item. (i) H and W file their 2001 joint Federal income tax return on April 15, 2002. On the return, H and W report W's self-employment income, but they do not report W's self-employment tax on that income. In August 2003, H and W receive a 30-day letter from the Internal Revenue Service proposing a deficiency with respect to W's unreported self-employment tax on the 2001 return. On November 4, 2003, H, who otherwise qualifies under paragraph (a) of this section, files an election to allocate the deficiency to W. The erroneous item is the self-employment income, and it is allocable to W. H knows that W earned income in 2001 as a self-employed musician, but he does not know that self-employment tax must be reported on and paid with a joint return.

(ii) H's election to allocate the deficiency to W is invalid because, at the time H signed the joint return, H had actual knowledge of W's self-employment income. The fact that H was unaware of the tax consequences of that income (*i.e.*, that an individual is required to pay self-employment tax on that income) is not relevant.

Example 2. Actual knowledge not inferred from a requesting spouse's reason to know.

(i) H has long been an avid gambler. H supports his gambling habit and keeps all of his gambling winnings in an individual bank account, held solely in his name.

W knows about H's gambling habit and that he keeps a separate bank account, but she does not know whether he has any winnings because H does not tell her, and she does not otherwise know of H's bank account transactions. H and W file their 2001 joint Federal income tax return on April 15, 2002. On October 31, 2003, H and W receive a 30-day letter proposing a \$100,000 deficiency relating to H's unreported gambling income. In February 2003, H and W divorce, and in March 2004, W files an election under section 6015(c) to allocate the \$100,000 deficiency to H.

(ii) While W may have had reason to know of the gambling income because she knew of H's gambling habit and separate account, W did not have actual knowledge of the erroneous item (i.e., the gambling winnings). The Internal Revenue Service may not infer actual knowledge from W's reason to know of the income. Therefore, W's election to allocate the \$100,000 deficiency to H is valid.

Example 3. Actual knowledge of return reporting position. (i) H and W are legally separated. In February 1999, W signs a blank joint Federal income tax return for 1998 and gives it to H to fill out. The return was timely filed on April 15, 1999. In September 2001, H and W receive a 30-day letter proposing a deficiency relating to \$100,000 of unreported dividend income received by H with respect to stock of ABC Co. owned by H. W knew that H received the \$100,000 dividend payment in August 1998, but she did not know whether H reported that payment on the joint return.

(ii) On January 30, 2002, W files an election to allocate the deficiency from the 1998 return to H. W claims she did not review the completed joint return, and therefore, she had no actual knowledge that there was an understatement of the dividend income. W's election to allocate the deficiency to H is invalid because she had actual knowledge of the erroneous item (dividend income from ABC Co.) at the time she signed the return. The fact that W signed a blank return is irrelevant. The result would be the same if W had not reviewed the completed return or if W had reviewed the completed return and had not noticed that the item was omitted.

(iii) Assume the same facts as in paragraph (i) of this *Example 3* except that, instead of receiving \$100,000 of unreported dividend income, H received \$50,000 of interest income from ABC Co. during the year (properly reported on the return) and \$25,000 of dividend income from ABC Co. (omitted from the return). W knew that H received both dividend and interest income from ABC Co. but did not know the total was greater than \$50,000. W's election to allocate to H the deficiency attributable to the omitted dividend income is valid. Although interest and dividend income are required to be separately stated on a joint Federal income tax return, they are one item in this case because the dividend and interest income are investment income received from the same source (ABC Co.). The erroneous item is the

total dividend and interest income from ABC Co. W did not have actual knowledge of the erroneous item (combined dividend and interest income from ABC Co. greater than \$50,000). Therefore, her election to allocate to H the deficiency attributable to the erroneous item is valid.

Example 4. Actual knowledge of an erroneous item of income. (i) H and W are legally separated. In June 2004, a deficiency is proposed with respect to H and W's 2002 joint Federal income tax return that is attributable to \$30,000 of unreported income from H's plumbing business that should have been reported on a Schedule C. No Schedule C was attached to the return. At the time W signed the return, W knew that H had a plumbing business but did not know whether H received any income from the business. W's election to allocate to H the deficiency attributable to the \$30,000 of unreported plumbing income is valid.

(ii) Assume the same facts as in paragraph (i) of this *Example 4* except that, at the time W signed the return, W knew that H received \$20,000 of plumbing income. W's election to allocate to H the deficiency attributable to the \$20,000 of unreported plumbing income (of which W had actual knowledge) is invalid. W's election to allocate to H the deficiency attributable to the \$10,000 of unreported plumbing income (of which W did not have actual knowledge) is valid.

(iii) Assume the same facts as in paragraph (i) of this *Example 4* except that, at the time W signed the return, W did not know the exact amount of H's plumbing income. W did know, however, that H received at least \$8,000 of plumbing income. W's election to allocate to H the deficiency attributable to \$8,000 of unreported plumbing income (of which W had actual knowledge) is invalid. W's election to allocate to H the deficiency attributable to the remaining \$22,000 of unreported plumbing income (of which W did not have actual knowledge) is valid.

(iv) Assume the same facts as in paragraph (i) of this *Example 4* except that H reported \$26,000 of plumbing income on the return and omitted \$4,000 of plumbing income from the return. At the time W signed the return, W knew that H was a plumber, but she did not know that H earned more than \$26,000 that year. W's election to allocate to H the deficiency attributable to the \$4,000 of unreported plumbing income is valid because she did not have actual knowledge that H received plumbing income in excess of \$26,000.

(v) Assume the same facts as in paragraph (i) of this *Example 4* except that H reported only \$20,000 of plumbing income on the return and omitted \$10,000 of plumbing income from the return. At the time W signed the return, W knew that H earned at least \$26,000 that year as a plumber. However, W did not know that, in reality, H earned \$30,000 that year as a plumber. W's election to allocate to H the deficiency attributable to the \$6,000 of unreported plumbing income (of which W had actual knowledge) is invalid. W's election to allocate to H the deficiency attributable to the \$4,000 of unreported plumbing income (of which W did not have actual knowledge) is valid.

Example 5. Actual knowledge of a deduction that is an erroneous item. (i) H and

W are legally separated. In February 2005, a deficiency is asserted with respect to their 2002 joint Federal income tax return. The deficiency is attributable to a disallowed \$1,000 deduction for medical expenses H claimed he incurred. At the time W signed the return, W knew that H had not incurred any medical expenses. W's election to allocate to H the deficiency attributable to the disallowed medical expense deduction is invalid because W had actual knowledge that H had not incurred any medical expenses.

(ii) Assume the same facts as in paragraph (i) of this *Example 5* except that, at the time W signed the return, W did not know whether H had incurred any medical expenses. W's election to allocate to H the deficiency attributable to the disallowed medical expense deduction is valid because she did not have actual knowledge that H had not incurred any medical expenses.

(iii) Assume the same facts as in paragraph (i) of this *Example 5* except that the Internal Revenue Service disallowed \$400 of the \$1,000 medical expense deduction. At the time W signed the return, W knew that H had incurred some medical expenses but did not know the exact amount. W's election to allocate to H the deficiency attributable to the disallowed medical expense deduction is valid because she did not have actual knowledge that H had not incurred medical expenses (in excess of the floor amount under section 213(a)) of more than \$600.

(iv) Assume the same facts as in paragraph (i) of this *Example 5* except that H claims a medical expense deduction of \$10,000 and the Internal Revenue Service disallows \$9,600. At the time W signed the return, W knew H had incurred some medical expenses but did not know the exact amount. W also knew that H incurred medical expenses (in excess of the floor amount under section 213(a)) of no more than \$1,000. W's election to allocate to H the deficiency attributable to the portion of the overstated deduction of which she had actual knowledge (\$9,000) is invalid. W's election to allocate the deficiency attributable to the portion of the overstated deduction of which she had no knowledge (\$600) is valid.

Example 6. Disqualified asset presumption.

(i) H and W are divorced. In May 1999, W transfers \$20,000 to H, and in April 2000, H and W receive a 30-day letter proposing a \$40,000 deficiency on their 1998 joint Federal income tax return. The liability remains unpaid, and in October 2000, H elects to allocate the deficiency under this section. Seventy-five percent of the net amount of erroneous items are allocable to W, and 25% of the net amount of erroneous items are allocable to H.

(ii) In accordance with the proportionate allocation method (see paragraph (d)(4) of this section), H proposes that \$30,000 of the deficiency be allocated to W and \$10,000 be allocated to himself. H submits a signed statement providing that the principal purpose of the \$20,000 transfer was not the avoidance of tax or payment of tax, but he does not submit any documentation indicating the reason for the transfer. H has not overcome the presumption that the \$20,000 was a disqualified asset. Therefore, the portion of the deficiency for which H is

liable (\$10,000) is increased by the value of the disqualified asset (\$20,000). H is relieved of liability for \$10,000 of the \$30,000 deficiency allocated to W, and remains jointly and severally liable for the remaining \$30,000 of the deficiency (assuming that H does not qualify for relief under any other provision).

Example 7. Disqualified asset presumption inapplicable. On May 1, 2001, H and W receive a 30-day letter regarding a proposed deficiency on their 1999 joint Federal income tax return relating to unreported capital gain from H's sale of his investment in Z stock. W had no actual knowledge of the stock sale. The deficiency is assessed in November 2001, and in December 2001, H and W divorce. According to the divorce decree, H must transfer 1/2 of his interest in mutual fund A to W. The transfer takes place in February 2002. In August 2002, W elects to allocate the deficiency to H. Although the transfer of 1/2 of H's interest in mutual fund A took place after the 30-day letter was mailed, the mutual fund interest is not presumed to be a disqualified asset because the transfer of H's interest in the fund was made pursuant to a divorce decree.

(d) *Allocation*—(1) *In general.* (i) An election to allocate a deficiency limits the requesting spouse's liability to that portion of the deficiency allocated to the requesting spouse pursuant to this section. Unless relieved of liability under § 1.6015-2 or § 1.6015-4, the requesting spouse remains liable for that portion of the deficiency allocated to the requesting spouse pursuant to this section.

(ii) Only a requesting spouse may receive relief. A nonrequesting spouse who does not also elect relief under this section remains liable for the entire amount of the deficiency, unless the nonrequesting spouse is relieved of liability under § 1.6015-2 or § 1.6015-4. If both spouses elect to allocate a deficiency under this section, there may be a portion of the deficiency that is not

allocable, for which both spouses remain jointly and severally liable.

(2) *Allocation of erroneous items.* For purposes of allocating a deficiency under this section, erroneous items are generally allocated to the spouses as if separate returns were filed, subject to the following four exceptions:

(i) *Benefit on the return.* An erroneous item that would otherwise be allocated to the nonrequesting spouse is allocated to the requesting spouse to the extent that the requesting spouse received a tax benefit on the joint return.

(ii) *Fraud.* The Secretary may allocate any item appropriately between the spouses if the Secretary establishes that the allocation is appropriate due to fraud by one or both spouses.

(iii) *Erroneous items of income.* Erroneous items of income are allocated to the spouse who was the source of the income. Wage income is allocated to the spouse who performed the job producing such wages. Items of business or investment income are allocated to the spouse who owned the business or investment. If both spouses owned an interest in the business or investment, the erroneous item of income is generally allocated between the spouses in proportion to each spouse's ownership interest in the business or investment, subject to the limitations of paragraph (c) of this section. In the absence of clear and convincing evidence supporting a different allocation, an erroneous income item relating to an asset that the spouses owned jointly is generally allocated 50% to each spouse, subject to the limitations in paragraph (c) of this section and the exceptions in paragraph (d)(4) of this section. For information regarding the effect of community

property laws, see § 1.6015-1(f) and paragraph (c)(2)(iii) of this section.

(iv) *Erroneous deduction items.* Erroneous deductions related to a business or investment are allocated to the spouse who owned the business or investment. If both spouses owned an interest in the business or investment, an erroneous deduction item is generally allocated between the spouses in proportion to each spouse's ownership interest in the business or investment. In the absence of clear and convincing evidence supporting a different allocation, an erroneous deduction item relating to an asset that the spouses owned jointly is generally allocated 50% to each spouse, subject to the limitations in paragraph (c) of this section and the exceptions in paragraph (d)(4) of this section. Personal deduction items are also generally allocated 50% to each spouse, unless the evidence shows that a different allocation is appropriate.

(3) *Burden of proof.* Except for establishing actual knowledge under paragraph (c)(2) of this section, the requesting spouse must prove that all of the qualifications for making an election under this section are satisfied and that none of the limitations (including the limitation relating to transfers of disqualified assets) apply. The requesting spouse must also establish the proper allocation of the erroneous items.

(4) *General allocation method*—(i) *Proportionate allocation.*

(A) The portion of a deficiency allocable to a spouse is the amount that bears the same ratio to the deficiency as the net amount of erroneous items allocable to the spouse bears to the net amount of all erroneous items. This calculation may be expressed as follows:

$$\frac{X}{\text{deficiency}} = \frac{\text{net amount of erroneous items allocable to the spouse}}{\text{net amount of all erroneous items}}$$

where X = the portion of the deficiency allocable to the spouse. Thus,

$$X = (\text{deficiency}) \times \frac{\text{net amount of erroneous items allocable to the spouse}}{\text{net amount of all erroneous items}}$$

(B) The proportionate allocation applies to any portion of the deficiency other than—

(1) Any portion of the deficiency attributable to erroneous items allocable to the nonrequesting spouse of which

the requesting spouse had actual knowledge;

(2) Any portion of the deficiency attributable to separate treatment items (as defined in paragraph (d)(4)(ii) of this section);

(3) Any portion of the deficiency relating to the liability of a child (as defined in paragraph (d)(4)(iii) of this section) of the requesting spouse or nonrequesting spouse;

(4) Any portion of the deficiency attributable to alternative minimum tax under section 55;

(5) Any portion of the deficiency attributable to accuracy-related or fraud penalties;

(6) Any portion of the deficiency allocated pursuant to alternative allocation methods authorized under paragraph 6 of this section.

(ii) *Separate treatment items.* Any portion of a deficiency that is attributable to an item allocable solely to one spouse and that results from the disallowance of a credit, or a tax or an addition to tax (other than tax imposed by section 1 or section 55) that is required to be included with a joint return (a separate treatment item) is allocated separately to that spouse. Once the proportionate allocation is made, the liability for the requesting spouse's separate treatment items is added to the requesting spouse's share of the liability.

(iii) *Child's liability.* Any portion of a deficiency relating to the liability of a child of the requesting and nonrequesting spouse is generally allocated jointly to both spouses. However, if one of the spouses had sole custody of the child for the entire tax year for which the election relates, such portion of the deficiency is allocated solely to that spouse. For purposes of this paragraph, a child does not include the taxpayer's stepson or stepdaughter, unless such child was legally adopted by the taxpayer. If the child is the child of only one of the spouses, and the other

spouse had not legally adopted such child, any portion of a deficiency relating to the liability of such child is allocated solely to the parent spouse.

(iv) *Allocation of certain items—(A) Alternative minimum tax.* Any portion of the deficiency attributable to alternative minimum tax under section 55 is allocated between the spouses in the same proportion as each spouse's share of the total alternative minimum taxable income, as defined in section 55(b)(2).

(B) *Accuracy-related and fraud penalties.* Any portion of the deficiency attributable to accuracy-related or fraud penalties under section 6662 or 6663 is allocated to the spouse whose item generated the penalty.

(5) *Examples.* The following examples illustrate the rules of this paragraph (d). In each example, assume that the requesting spouse or spouses qualify to elect to allocate the deficiency, that any election is timely made, and that the deficiency remains unpaid. In addition, unless otherwise stated, assume that neither spouse has actual knowledge of the erroneous items allocable to the other spouse. The examples are as follows:

Example 1. Allocation of erroneous items.

(i) H and W file a 2003 joint Federal income tax return on April 15, 2004. On April 28, 2006, a deficiency is assessed with respect to their 2003 return. Three erroneous items give rise to the deficiency—

(A) Unreported interest income, of which W had actual knowledge, from H and W's joint bank account;

(B) A disallowed business expense deduction on H's Schedule C;

(C) A disallowed Lifetime Learning Credit for W's post-secondary education; and

(ii) H and W divorce in May 2006, and in September 2006, W timely elects to allocate the deficiency. The erroneous items are allocable as follows:

(A) The interest income would be allocated $\frac{1}{2}$ to H and $\frac{1}{2}$ to W, except that W has actual knowledge of it. Therefore, W's election to allocate the portion of the deficiency attributable to this item is invalid, and W remains jointly and severally liable for it.

(B) The business expense deduction is allocable to H.

(C) The Lifetime Learning Credit is allocable to W.

Example 2. Proportionate allocation. (i) W and H timely file their 2001 joint Federal income tax return on April 15, 2002. On August 16, 2004, a \$54,000 deficiency is assessed with respect to their 2001 joint return. H and W divorce on October 14, 2004, and W timely elects to allocate the deficiency. Five erroneous items give rise to the deficiency—

(A) A disallowed \$15,000 business deduction allocable to H;

(B) \$20,000 of unreported income allocable to H;

(C) A disallowed \$5,000 deduction for educational expense allocable to H;

(D) A disallowed \$40,000 charitable contribution deduction allocable to W; and

(E) A disallowed \$40,000 interest deduction allocable to W.

(ii) In total, there are \$120,000 worth of erroneous items, of which \$80,000 are attributable to W and \$40,000 are attributable to H.

| W's items | | H's items | |
|-----------|----------------------|-----------|---------------------|
| \$40,000 | charitable deduction | \$15,000 | business deduction |
| \$40,000 | interest deduction | \$20,000 | unreported income |
| \$80,000 | | \$ 5,000 | education deduction |
| | | \$40,000 | |

(iii) The ratio of erroneous items allocable to W to the total erroneous items is $\frac{2}{3}$ (\$80,000/\$120,000). W's liability is limited to \$36,000 of the deficiency ($\frac{2}{3}$ of \$54,000). The Internal Revenue Service may collect up to \$36,000 from W and up to \$54,000 from H (the total amount collected, however, may not exceed \$54,000). If H also made an election, there would be no remaining joint and several liability, and the Internal Revenue Service would collect \$36,000 from W and \$18,000 from H.

Example 3. Proportionate allocation with joint erroneous item. (i) On September 4, 2001, W elects to allocate a \$3,000 deficiency for the 1998 tax year to H. Three erroneous items give rise to the deficiency—

(A) Unreported interest in the amount of \$4,000 from a joint bank account;

(B) A disallowed deduction for business expenses in the amount of \$2,000 attributable to H's business; and

(C) Unreported wage income in the amount of \$6,000 attributable to W's second job.

(ii) The erroneous items total \$12,000. Generally, income, deductions, or credits from jointly held property that are erroneous items are allocable 50% to each spouse. However, in this case, both spouses had actual knowledge of the unreported interest income. Therefore, W's election to allocate the portion of the deficiency attributable to this item is invalid, and W and H remain jointly and severally liable for this portion. Assume that this portion is \$1,000. W may allocate the remaining \$2,000 of the deficiency.

| H's items | W's items |
|----------------------------|---------------------|
| \$2,000 business deduction | \$6,000 wage income |

Total allocable items: \$8,000

(iii) The ratio of erroneous items allocable to W to the total erroneous items is $\frac{3}{4}$ (\$6,000/\$8,000). W's liability is limited to \$1,500 of the deficiency ($\frac{3}{4}$ of \$2,000) allocated to her. The Internal Revenue Service may collect up to \$2,500 from W ($\frac{3}{4}$ of the total allocated deficiency plus \$1,000 of the deficiency attributable to the joint bank account interest) and up to \$3,000 from H (the total amount collected, however, cannot exceed \$3,000).

(iv) Assume H also elects to allocate the 1998 deficiency. H is relieved of liability for $\frac{3}{4}$ of the deficiency, which is allocated to W. H's relief totals \$1,500 ($\frac{3}{4}$ of \$2,000). H remains liable for \$1,500 of the deficiency ($\frac{1}{4}$

of the allocated deficiency plus \$1,000 of the deficiency attributable to the joint bank account interest).

Example 4. Separate treatment items (STIs). (i) On September 1, 2006, a \$28,000 deficiency is assessed with respect to H and W's 2003 joint return. The deficiency is the result of 4 erroneous items—

(A) A disallowed Lifetime Learning Credit of \$2,000 attributable to H;

(B) A disallowed business expense deduction of \$8,000 attributable to H;

(C) Unreported income of \$24,000 attributable to W; and

(D) Unreported self-employment tax of \$14,000 attributable to W.

(ii) H and W both elect to allocate the deficiency.

(iii) The \$2,000 Lifetime Learning Credit and the \$14,000 self-employment tax are STIs totaling \$16,000. The amount of erroneous items included in computing the proportionate allocation ratio is \$32,000 (\$24,000 unreported income and \$8,000 disallowed business expense deduction). The amount of the deficiency subject to proportionate allocation is reduced by the amount of STIs (\$28,000–\$16,000 = \$12,000).

(iv) Of the \$32,000 of proportionate allocation items, \$24,000 is allocable to W, and \$8,000 is allocable to H.

| W's share of allocable items | H's share of allocable items |
|-----------------------------------|----------------------------------|
| $\frac{3}{4}$ (\$24,000/\$32,000) | $\frac{1}{4}$ (\$8,000/\$32,000) |

(v) W's liability for the portion of the deficiency subject to proportionate allocation is limited to \$9,000 ($\frac{3}{4}$ of \$12,000) and H's

liability for such portion is limited to \$3,000 ($\frac{1}{4}$ of \$12,000).

(vi) After the proportionate allocation is completed, the amount of the STIs is added

to each spouse's allocated share of the deficiency.

| W's share of total deficiency | H's share of total deficiency |
|-------------------------------|----------------------------------|
| \$ 9,000 allocated deficiency | \$3,000 allocated deficiency |
| \$14,000 self-employment tax | \$2,000 Lifetime Learning Credit |
| \$23,000 | \$5,000 |

(vii) Therefore, W's liability is limited to \$23,000 and H's liability is limited to \$5,000.

Example 5. Allocation of the alternative minimum tax. (i) H and W file their 2004 joint Federal income tax return on April 15, 2005. During 2004, W's total alternative minimum taxable income was \$120,000, and H's total alternative minimum taxable income was \$30,000. All of H's income was from his business and was reported on Schedule C. Everything on the 2004 return was properly reported, and there was no alternative minimum tax liability. In 2005, H experienced a net operating loss of \$25,000 for regular tax purposes. H did not have a net operating loss for alternative minimum tax purposes. In February 2006, H and W file an amended return for 2004 claiming the net operating loss that was carried back from 2005. The loss is a proper deduction, but it results in an alternative minimum tax liability, which H and W do not report on the amended return. In December 2007, a \$5,500 deficiency is assessed on their 2004 joint Federal income tax return resulting from the unreported alternative minimum tax liability.

(ii) W and H divorce in January 2008, and W elects to allocate the deficiency.

W's AMT income for 2004: \$120,000

H's AMT income for 2004: \$ 30,000

Total AMT income for 2004: \$150,000

W's share of AMT income for 2004: $\frac{4}{5}$ (\$120,000/\$150,000)

H's share of AMT income for 2004: $\frac{1}{5}$ (\$30,000/\$150,000)

(iii) W's liability is limited \$4,400 ($\frac{4}{5} \times$ \$5,500). H remains liable for the entire deficiency because he did not make an election to allocate the deficiency.

Example 6. Requesting spouse receives a benefit on the joint return from the nonrequesting spouse's erroneous item. (i) In 2001, H earns gross income of \$4,000 from his business, and W earns \$50,000 of wage income. On their 2001 joint Federal income tax return, H deducts \$20,000 of business expenses resulting in a net loss from his business of \$16,000. H and W divorce in September 2002, and on May 22, 2003, a \$5,200 deficiency is assessed with respect to their 2001 joint return. W elects to allocate the deficiency. The deficiency on the joint return results from a disallowance of all of H's \$20,000 of deductions.

(ii) Since H used only \$4,000 of the disallowed deductions to offset gross income from his business, W benefitted from the other \$16,000 of the disallowed deductions used to offset her wage income. Therefore, \$4,000 of the disallowed deductions are allocable to H and \$16,000 of the disallowed deductions are allocable to W. W's liability is limited to \$3,900 ($\frac{3}{4}$ of \$5,200). If H also elected to allocate the deficiency, H's election to allocate the \$3,900 of the deficiency to W would be invalid because H had actual knowledge of the erroneous items.

Example 7. Calculation of requesting spouse's benefit on the joint return when the nonrequesting spouse's erroneous item is partially disallowed. Assume the same facts as in example 7, except that H deducts \$18,000 for business expenses on the joint return, of which \$16,000 are disallowed. Since H used only \$2,000 of the \$16,000 disallowed deductions to offset gross income from his business, W received benefit on the return from the other \$14,000 of the

disallowed deductions used to offset her wage income. Therefore, \$2,000 of the disallowed deductions are allocable to H and \$14,000 of the disallowed deductions are allocable to W. W's liability is limited to \$4,550 ($\frac{7}{8}$ of \$5,200).

(6) *Alternative allocation methods—*
(i) *Allocation based on applicable tax rates.* If a deficiency arises from two or more erroneous items that are subject to tax at different rates (e.g., ordinary income and capital gain items), the deficiency is allocated after first separating the erroneous items into categories according to their applicable tax rate. After all erroneous items are categorized, a separate allocation is made with respect to each tax rate category using the proportionate allocation method of paragraph (d)(4) of this section.

(ii) *Allocation methods provided in subsequent published guidance.* The Secretary may prescribe alternative methods for allocating erroneous items under section 6015(c) in subsequent revenue rulings, revenue procedures, or other appropriate guidance.

(iii) *Example.* The following example illustrates the rules of this paragraph (d)(6):

Example. Allocation based on applicable tax rates. H and W timely file their 1998 joint Federal income tax return. H and W divorce in 1999. On July 13, 2001, a \$5,100

deficiency is assessed with respect to H and W's 1998 return. Of this deficiency, \$2,000 results from unreported capital gain of \$6,000 that is attributable to W and \$4,000 of capital gain that is attributable to H (both gains being subject to tax at the 20% marginal rate). The remaining \$3,100 of the deficiency is attributable to \$10,000 of unreported dividend income of H that is subject to tax at a marginal rate of 31%. H and W both timely elect to allocate the deficiency, and qualify under this section to do so. There are erroneous items subject to different tax rates; thus, the alternative allocation method of this paragraph (d)(6) applies. The three erroneous items are first categorized according to their applicable tax rates, then allocated. Of the total amount of 20% tax rate items (\$10,000), 60% is allocable to W and 40% is allocable to H. Therefore, 60% of the \$2,000 deficiency attributable to these items (or \$1,200) is allocated to W. The remaining 40% of this portion of the deficiency (\$800) is allocated to H. The only 31% tax rate item is allocable to H. Accordingly, H is liable for \$3,900 of the deficiency (\$800 + \$3,100), and W is liable for the remaining \$1,200.

§ 1.6015-4 Equitable relief.

(a) A requesting spouse who files a joint return for which a liability remains unpaid and who does not qualify for full relief under § 1.6015-2 or § 1.6015-3 may request equitable relief under this section. The Internal Revenue Service has the discretion to grant equitable relief from joint and several liability to a requesting spouse when, considering all of the facts and circumstances, it would be inequitable to hold the requesting spouse jointly and severally liable.

(b) This section may not be used to circumvent the limitation of § 1.6015-3(c)(1) (*i.e.*, no refunds under § 1.6015-3). Therefore, relief is not available under this section to refund liabilities already paid, for which the requesting spouse would otherwise qualify for relief under § 1.6015-3.

(c) The Secretary will provide the criteria to be used in determining whether it is inequitable to hold a requesting spouse jointly and severally liable under this section in revenue rulings, revenue procedures, or other published guidance.

§ 1.6015-5 Time and manner for requesting relief.

(a) *Requesting relief.* To elect the application of § 1.6015-2 or § 1.6015-3, or to request equitable relief under § 1.6015-4, a requesting spouse must file Form 8857, "Request for Innocent Spouse Relief (And Separation of Liability and Equitable Relief)"; submit a written statement containing the same information required on Form 8857, which is signed under penalties of perjury; or submit information in the manner as may be prescribed by the

Secretary in relevant revenue rulings, revenue procedures, or other published guidance.

(b) *Time period for filing a request for relief.*—(1) *In general.* To elect the application of § 1.6015-2 or § 1.6015-3, or to request equitable relief under § 1.6015-4, a requesting spouse must file Form 8857 or other similar statement with the Internal Revenue Service no later than two years from the date of the first collection activity against the requesting spouse after July 22, 1998, with respect to the joint tax liability.

(2) *Definitions.*—(i) *Collection activity.* For purposes of this paragraph (b), collection activity means an administrative levy or seizure described by section 6331 to obtain property of the requesting spouse; an offset of an overpayment of the requesting spouse against a liability under section 6402; the filing of a suit by the United States against the requesting spouse for the collection of the joint tax liability; or the filing of a claim by the United States in a court proceeding in which the requesting spouse is a party or which involves property of the requesting spouse. Collection activity does not include a notice of intent to levy under sections 6330 and 6331(d); the filing of a Notice of Federal Tax Lien; or a demand for payment of tax. The term *property of the requesting spouse*, for purposes of this paragraph, means property in which the requesting spouse has an ownership interest (other than solely through the operation of community property laws), including property owned jointly with the nonrequesting spouse.

(ii) *Date of levy or seizure.* For purposes of this paragraph (b), if tangible personal property or real property is seized and is to be sold, a notice of seizure is required under section 6335(a). The date of levy or seizure is the date the notice of seizure is given. For more information on the rules regarding notice of seizure, see section 6502(b) and the regulations thereunder. For purposes of this paragraph (b), if a levy is made on cash or intangible personal property that will not be sold, the date of levy or seizure is the date the notice of levy is made. For more information on the rules regarding levy, see section 6331 and the regulations thereunder. For purposes of this paragraph (b), if a notice of levy is served by mail, the date of levy or seizure is the date of delivery of the notice of levy to the person on whom the levy is made. For more information on notices of levy served by mail, see § 301.6331-1(c) of this chapter.

(3) *Requests for relief made before commencement of collection activity.* An election or request for relief may be made before collection activity has commenced. For example, an election or request for relief may be made in connection with an audit or examination of the joint return, or pursuant to the pre-levy collection due process (CDP) hearing procedures pursuant to sections 6320 and 6330. For more information on the rules regarding pre-levy collection due process, see §§ 301.6320-1T(e)(1) and (2), and 301.6330-1T(e)(1) and (2) of this chapter. However, no request for relief may be made before the date specified in paragraph (b)(5) of this section.

(4) *Examples.* The following examples illustrate the rules of this paragraph (b):

Example 1. On January 11, 2000, a notice of intent to levy is mailed to H and W regarding their 1997 joint Federal income tax liability. The Internal Revenue Service levies on W's employer on June 5, 2000. The Internal Revenue Service levies on H's employer on July 10, 2000. W must elect or request relief by June 5, 2002, which is two years after the Internal Revenue Service levied on her wages. H must elect or request relief by July 10, 2002, which is two years after the Internal Revenue Service levied on his wages.

Example 2. The Internal Revenue Service levies on W's bank, in which W maintains a savings account, to collect a joint liability for 1995 on January 12, 1998. The bank complies with the levy, which only partially satisfies the liability. The Internal Revenue Service takes no other collection actions. On July 24, 2000, W elects relief with respect to the unpaid portion of the 1995 liability. W's election is timely because the Internal Revenue Service has not taken any collection activity after July 22, 1998; therefore, the two-year period has not commenced.

Example 3. Assume the same facts as in *Example 2*, except that the Internal Revenue Service delivers a second levy on the bank on July 23, 1998. W's election is untimely because it is filed more than two years after the first collection activity after July 22, 1998.

Example 4. H and W do not remit full payment with their timely filed joint Federal income tax return for the 1989 tax year. No collection activity is taken after July 22, 1998, until the United States files a suit against both H and W to reduce the tax assessment to judgment and to foreclose the tax lien on their jointly held residence on July 1, 1999. H elects relief on October 2, 2000. The election is timely because it is made within two years of the filing of a collection suit by the United States against H.

Example 5. W files a Chapter 7 bankruptcy petition on July 10, 2000. On September 5, 2000, the United States files a proof of claim for her joint 1998 income tax liability. W elects relief with respect to the 1998 liability on August 20, 2002. The election is timely because it is made within two years of the date the United States filed the claim in W's bankruptcy case.

(5) *Premature requests for relief.* The Secretary will not consider premature claims for relief under § 1.6015-2, § 1.6015-3, or § 1.6015-4. A premature claim is a claim for relief that is filed for a tax year prior to the receipt of a notification of an audit or a letter or notice from the Secretary indicating that there may be an outstanding liability with regard to that year. Such notices or letters do not include notices issued pursuant to section 6223 relating to TEFRA partnership proceedings. A premature claim is not considered an election or request under § 1.6015-1(g)(5).

(c) *Effect of a final administrative determination—(1) In general.* A requesting spouse is entitled to only one final administrative determination of relief under § 1.6015-1 for a given assessment, unless the requesting spouse properly submits a second request for relief that is described in § 1.6015-1(g)(5).

(2) *Example.* The following example illustrates the rule of this paragraph (c):

Example. In January 2001, W invests in tax shelter P, and in February 2001, she starts her own business selling crafts, from which she earns \$100,000 of net income for the year. H and W file a joint return for tax year 2001, on which they claim \$20,000 in losses from their investment in P, and they omit W's self-employment tax. In March 2003, the Internal Revenue Service opens an audit under the provisions of subchapter C of chapter 63 of subtitle F of the Internal Revenue Code (TEFRA partnership proceeding) and sends H and W a notice under section 6223(a)(1). In September 2003, the Internal Revenue Service audits H and W's 2001 joint return regarding the omitted self-employment tax. H may file a claim for relief from joint and several liability for the self-employment tax liability because he has received a notification of an audit indicating that there may be an outstanding liability on the joint return. However, his claim for relief regarding the TEFRA partnership proceeding is premature under paragraph (b)(5) of this section. H will have to wait until the Internal Revenue Service sends him a notice of computational adjustment or assesses the liability from the TEFRA partnership proceeding on H and W's joint return before he files a claim for relief with respect to any such liability. The assessment relating to the TEFRA partnership proceeding is separate from the assessment for the self-employment tax; therefore, H's subsequent claim for relief for the liability from the TEFRA partnership proceeding is not precluded by his previous claim for relief from the self-employment tax liability under this paragraph (c).

§ 1.6015-6 Nonrequesting spouse's notice and opportunity to participate in administrative proceedings.

(a) *In general.* (1) When the Secretary receives an election under § 1.6015-2 or § 1.6015-3, or a request for relief under

§ 1.6015-4, the Secretary must send a notice to the nonrequesting spouse's last known address that informs the nonrequesting spouse of the requesting spouse's claim for relief. The notice must provide the nonrequesting spouse with an opportunity to submit any information that should be considered in determining whether the requesting spouse should be granted relief from joint and several liability. A nonrequesting spouse is not required to submit information under this section. The Secretary has the discretion to share with one spouse any of the information submitted by the other spouse. At the request of one spouse, the Secretary will omit from shared documents the spouse's new name, address, employer, telephone number, and any other information that would reasonably indicate the other spouse's location.

(2) The Secretary must notify the nonrequesting spouse of the Secretary's final determination with respect to the requesting spouse's claim for relief under section 6015. However, the nonrequesting spouse is not permitted to appeal such determination.

(b) *Information submitted.* The Secretary will consider all of the information (as relevant to each particular relief provision) that the nonrequesting spouse submits in determining whether relief from joint and several liability is appropriate, including information relating to the following—

(1) The legal status of the requesting and nonrequesting spouses' marriage;

(2) The extent of the requesting spouse's knowledge of the erroneous items or underpayment;

(3) The extent of the requesting spouse's knowledge or participation in the family business or financial affairs;

(4) The requesting spouse's education level;

(5) The extent to which the requesting spouse benefitted from the erroneous items;

(6) Any asset transfers between the spouses;

(7) Any indication of fraud on the part of either spouse;

(8) Whether it would be inequitable, within the meaning of §§ 1.6015-2(d) and 1.6015-4(b), to hold the requesting spouse jointly and severally liable for the outstanding liability;

(9) The allocation or ownership of items giving rise to the deficiency; and

(10) Anything else that may be relevant to the determination of whether relief from joint and several liability should be granted.

(c) *Effect of opportunity to participate.* The failure to submit information pursuant to paragraph (b) of this section

does not affect the nonrequesting spouse's ability to seek relief from joint and several liability for the same tax year. However, information that the nonrequesting spouse submits pursuant to paragraph (b) of this section is relevant in determining whether relief from joint and several liability is appropriate for the nonrequesting spouse should the nonrequesting spouse also submit an application for relief.

§ 1.6015-7 Tax Court review.

(a) *In general.* Requesting spouses may petition the Tax Court to review the denial of relief under § 1.6015-1.

(b) *Time period for petitioning the Tax Court.* Pursuant to section 6015(e), the requesting spouse may petition the Tax Court to review a denial of relief under § 1.6015-1 within the 90-day period beginning on the date the final determination letter is mailed. If the Secretary does not mail the requesting spouse a final determination letter within 6 months of the date the requesting spouse files an election under § 1.6015-2 or § 1.6015-3, the requesting spouse may petition the Tax Court to review the election at any time after the expiration of the 6-month period, and before the expiration of the 90-day period beginning on the mailing date of the final determination letter. The Tax Court also may review a claim for relief if Tax Court jurisdiction has been acquired under section 6213(a) or 6330(d). For rules regarding petitioning the Tax Court under section 6213(a) or 6330(d), see §§ 301.6213-1, 301.6330-1T(f), and 301.6330-1T(g) of this chapter.

(c) *Restrictions on collection and suspension of the running of the period of limitations—(1) Restrictions on collection under § 1.6015-2 or 1.6015-3.* Unless the Secretary determines that collection will be jeopardized by delay, no levy or proceeding in court shall be made, begun, or prosecuted against a requesting spouse electing the application of § 1.6015-2 or § 1.6015-3 for the collection of any assessment to which the election relates until the expiration of the 90-day period described in paragraph (b) of this section, or if a petition is filed with the Tax Court, until the decision of the Tax Court becomes final under section 7481. Notwithstanding the preceding sentence, if the requesting spouse appeals the Tax Court's determination, the Internal Revenue Service may resume collection of the liability from the requesting spouse on the date of the Tax Court's determination unless the requesting spouse files an appeal bond pursuant to the rules of section 7485. For more information regarding the date

on which a decision of the Tax Court becomes final, see section 7481 and the regulations thereunder. Jeopardy under this paragraph (c)(1) means conditions exist that would require an assessment under section 6851 or 6861 and the regulations thereunder.

(2) *Suspension of the running of the period of limitations*—(i) *Relief under § 1.6015-2 or 1.6015-3*. The running of the period of limitations in section 6502 on collection against the requesting spouse of the assessment to which an election under § 1.6015-2 or § 1.6015-3 relates is suspended for the period during which the Commissioner is prohibited by paragraph (c)(1) of this section from collecting by levy or a proceeding in court and for 60 days thereafter.

(ii) *Relief under § 1.6015-4*. If a requesting spouse seeks only equitable relief under § 1.6015-4, the restrictions on collection of paragraph (c)(1) of this section do not apply. The request for relief does not suspend the running of the period of limitations on collection.

(3) *Definitions*—(i) *Levy*. For purposes of this paragraph (c), levy means an administrative levy or seizure described by section 6331.

(ii) *Proceedings in court*. For purposes of this paragraph (c), proceedings in court means suits filed by the United States for the collection of Federal tax. Proceedings in court does not refer to the filing of pleadings and claims and other participation by the Commissioner or the United States in suits not filed by the United States, including Tax Court cases, refund suits, and bankruptcy cases.

(iii) *Assessment to which the election relates*. For purposes of this paragraph (c), the assessment to which the election relates is the entire assessment of the deficiency to which the election relates, even if the election is made with respect to only part of that deficiency.

§ 1.6015-8 Applicable liabilities.

(a) *In general*. Sections 6015(b), 6015(c), and 6015(f) apply to liabilities that arise after July 22, 1998, and to liabilities that arose prior to July 22, 1998, that were not paid on or before July 22, 1998.

(b) *Liabilities paid on or before July 22, 1998*. A requesting spouse seeking relief from joint and several liability for amounts paid on or before July 22, 1998, must request relief under section 6013(e) and the regulations thereunder.

(c) *Examples*. The following examples illustrate the rules of this section:

Example 1. H and W file a joint income tax return for 1995 on April 15, 1996. There is an understatement on the return attributable to an omission of H's wage income. On October 15, 1998, H and W receive a 30-day letter proposing a deficiency on the 1995

joint return. W pays the outstanding liability in full on November 30, 1998. In March 1999, W files Form 8857, requesting relief from joint and several liability under section 6015(b). Although W's liability arose prior to July 22, 1998, it was unpaid as of that date. Therefore, section 6015 is applicable.

Example 2. H and W file their 1995 joint income tax return on April 15, 1996. On October 14, 1997, a deficiency is assessed regarding a disallowed business expense deduction attributable to H. On June 30, 1998, the Internal Revenue Service levies on W's bank account in full satisfaction of the outstanding liability. On August 31, 1998, W files a request for relief from joint and several liability. The liability arose prior to July 22, 1998, and it was paid as of July 22, 1998. Therefore, section 6015 is not applicable and section 6013(e) is applicable.

§ 1.6015-9 Effective date.

Sections 1.6015-0 through 1.6015-9 are applicable for all elections under § 1.6015-2 or § 1.6015-3 or any request for relief under § 1.6015-4 filed on or after federal regulations are published in the **Federal Register**.

Charles Rossotti,

Commissioner of Internal Revenue.

[FR Doc. 01-8 Filed 1-16-01; 8:45 am]

BILLING CODE 4830-01-U

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[REG-106030-98]

RIN 1545-AW50

Source of Income from Certain Space and Ocean Activities; Also, Source of Communications Income

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking and notice of public hearing.

SUMMARY: This document contains proposed regulations under section 863(d) governing the source of income from certain space and ocean activities. It also contains proposed regulations under sections 863(a), (d), and (e) governing the source of income from certain communications activity. This document also contains proposed regulations under sections 863(a) and (b), amending the regulations in § 1.863-3 to conform those regulations with these proposed regulations. This document affects persons who conduct activities in space, or on or under water not within the jurisdiction of a foreign country, possession of the United States, or the United States (collectively, in international water). This document also affects persons who derive income from transmission of communications.

In addition, this document provides notice of a public hearing on these proposed regulations.

DATES: Comments and outlines of oral comments to be presented at the public hearing scheduled for March 28, 2001, at 10 a.m. must be received by March 7, 2001.

ADDRESSES: Send submissions to: CC:M&SP:RU (Reg-106030-98), room 5226, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand delivered Monday through Friday between the hours of 8 a.m. and 5 p.m. to: CC:M&SP:RU (REG-106030-98), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC. Alternatively, taxpayers may submit comments electronically via the Internet by selecting the "Tax Regs" option on the IRS Home Page, or by submitting comments directly to the IRS Internet site at: http://www.irs.ustreas.gov/tax_regs/regslst.html. The public hearing will be held in the auditorium, seventh floor, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT:

Concerning the regulations, Anne Shelburne, (202) 874-1490; concerning submissions and the hearing, and/or to be placed on the building access list to attend the hearing, La Nita Van Dyke, (202) 622-7180 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget (OMB) for review in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)).

Comments on the collection of information should be sent to the Office of Management and Budget, Attn: Desk Officer for the Department of Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503, with copies to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, W:CAR:MP:FP:S:O, Washington, DC 20224. Comments on the collection of information should be received by March 19, 2001. Comments are specifically requested concerning:

Whether the proposed collection of information is necessary for the proper performance of the functions of the IRS, including whether the information will have practical utility;

The accuracy of the estimated burden associated with the proposed collection of information (see below);

How the quality, utility, and clarity of the information to be collected may be enhanced;

How the burden of complying with the proposed collection of information may be minimized, including through the application of automated collection techniques or other forms of information technology; and

Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

The collection of information requirements are in proposed § 1.863–8(g) and in § 1.863–9(g). This information is required by the IRS to monitor compliance with the federal tax rules for determining the source of income from space or ocean activities, or from transmission of communications. The likely respondents are taxpayers who conduct space or ocean activities, or who derive communications income. Responses to this collection of information are required to properly determine the source of a taxpayer's income from such transactions.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Estimated total annual reporting/recordkeeping burden: 1,200 hours. The estimated annual burden per respondent varies from 3 hours to 7 hours, depending on individual circumstances, with an estimated average of 5 hours.

Estimated number of respondents: 250.

Estimated annual frequency of responses: One time per year.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid control number assigned by the Office of Management and Budget.

Background

This document contains proposed regulations relating to the Income Tax Regulations (CFR part 1) under sections 863(a), (b), (d), and (e) of the Internal Revenue Code (Code). Congress enacted section 863(d) and section 863(e) as part of the Tax Reform Act of 1986 (Public Law 99–514, 100 Stat. 2085) (the 1986 Act). Section 863(d) governs the source of income derived from certain space and ocean activities. Section 863(e) governs the source of income derived

from international communications activity.

Explanation of Provisions

These proposed regulations provide two sets of rules, one in § 1.863–8 for determining the source of income from space and ocean activities, the other in § 1.863–9 for determining the source of income from communications activity. Section 1.863–9 provides rules for both international communications income (ICI) and other communications income. The IRS and Treasury believe it is appropriate to provide source rules for both ICI and other communications income in a single regulation.

The IRS and Treasury are fully aware of the rapid technological evolution in the space and communications industries since Congress enacted sections 863(d) and (e) in 1986, and have attempted to take into account these changes as well as changes in the space and communications industries and business practices and business models. The IRS and Treasury recognize that these regulations address important issues for many different industries and have worked closely with the industries in drafting these rules. The IRS and Treasury are interested in receiving comments from these industries on how to accommodate issues arising from the use of new technologies, consistent with the language and purpose of the statutory provisions.

A. Space and Ocean Activity Under Section 863(d)

1. Scope of § 1.863–8 of the Proposed Regulations

Section 1.863–8 of the proposed regulations provides rules for sourcing income derived from space and ocean activity, notwithstanding other sections. Proposed regulations § 1.863–8(a) provides that a taxpayer derives income from a space or ocean activity only if the taxpayer conducts such activity directly. This is consistent with the approach that IRS and Treasury adopted in the § 1.863–3 regulations sourcing income from inventory sales.

2. Source of Gross Income From Space or Ocean Activity

a. *General.* Section 863(d)(1) states that, except as provided in regulations, any income derived from space or ocean activity by a U.S. person will be U.S. source income, and if derived by a foreign person, foreign source income. Proposed regulations § 1.863–8(b)(1) provides that a U.S. person's space or ocean income is U.S. source. Proposed regulations § 1.863–8(b)(1) also states the general rule that income derived by

a foreign person from a space or ocean activity is foreign source income. However, the proposed regulations contain several exceptions to that general rule.

Proposed regulations § 1.863–8(b)(2) provides that if a foreign corporation is 50 percent or more owned by vote or value (directly, indirectly, or constructively) by U.S. persons and is not a controlled foreign corporation within the meaning of section 957 (CFC), all income derived by the corporation from space or ocean activity is U.S. source income. This rule reflects IRS and Treasury's concern that U.S. persons may use a foreign corporation (for example, by incorporating a 50/50 joint venture with a foreign person, thereby avoiding CFC status) to obtain results that are inconsistent with the purposes of this section. The IRS and Treasury believe Congress granted Treasury broad regulatory authority in section 863(d) to prevent taxpayers from circumventing the purposes of this section.

Proposed regulations § 1.863–8(b)(3) provides that if a foreign person is engaged in a U.S. trade or business, the foreign person's income derived from a space or ocean activity is presumed to be U.S. source income. The rule reflects IRS and Treasury's concern that a foreign person could engage in significant economic activities in the United States and avoid U.S. taxation of space or ocean income derived from such activities. For example, a foreign satellite company established in a no-tax jurisdiction could engage in substantial activity in the United States through launch facilities, yet pay no U.S. or foreign tax on income arising from leasing the satellites it launches. The IRS and Treasury believe Congress intended that a foreign person engaged in substantial U.S. business in the United States be subject to U.S. tax on related space or ocean activity.

The IRS and Treasury recognize that the presumption may be over-inclusive in certain cases. Therefore, the proposed regulations provide that if the foreign person can allocate gross space or ocean income between income from sources within the United States, space, or international water, and outside the United States and space and international water, to the satisfaction of the Commissioner, based on the facts and circumstances, which may include functions performed, resources employed, risks assumed, or other contributions to value, income from outside the United States and space and international water will be treated as foreign source income. When a foreign person is entitled to the benefits of a tax

treaty with the United States, such person may elect to be taxed under the rules of that treaty, so that, for example, the United States would tax only income attributable to a permanent establishment of that foreign person, regardless of the amount of income considered effectively connected with a U.S. trade or business.

b. *Source Rules for Sales of Certain Property.* Taxpayers must apply the rules of section 863(d) and these proposed regulations to determine the source of income from sales of property purchased or produced by the taxpayer, either when production occurs in whole or in part in space or in international water, or when the sale occurs in space or in international water. The rules of sections 861, 862, 863(a) and (b), and 865, and the regulations thereunder apply only to the extent provided in proposed regulations § 1.863–8(b)(4).

Proposed regulations § 1.863–8(b)(4)(i) provides that income derived from the sale of purchased property in space or international water is sourced under paragraph (b)(1), (2), or (3) of this section. Proposed regulations § 1.863–8(d)(2)(iii) provides that a sale occurs in space or international water if either property is located in space or international water at the time the rights, title, and interests pass to the purchaser, or the property sold is for use in space or international water. This rule for determining if a sale takes place in space or in international water modifies for space and ocean activity the rule in § 1.861–7(c) for otherwise determining where a sale takes place. The IRS and Treasury believe this rule for determining the place of sale in the case of space or ocean activity is consistent with the legislative history of section 863(d), indicating Congress intended that space and ocean activity be broadly defined. See S. Rept. No. 313, 99th Cong., 2d Sess. 357 (1986) (Senate Report). It is also consistent with the language of the Senate Report stating that the committee did not intend to override the title passage rule for sales of property on the high seas. Consistent with this language, proposed regulations § 1.863–8(d)(1)(ii) excludes from the definition of ocean activity the sale of inventory on international water, and the source of income from such sales continues to be determined under § 1.861–7(c).

Proposed regulations § 1.863–8(b)(4)(ii) provides rules for income derived from the sale of property produced by the taxpayer. To determine the source of income derived from the sale of property produced by the taxpayer, proposed regulations § 1.863–8(b)(4)(ii)(A) provides that the taxpayer

must divide gross income from such sale equally between production activity and sales activity. Thus, one-half of the taxpayer's gross income is attributed to production activity, and the other one-half of such gross income is attributed to sales activity.

Proposed regulations § 1.863–8(b)(4)(ii)(A) provides that income attributable to sales activity is sourced applying the rules applicable to the sale of purchased property. If the taxpayer sells such property in space or international water, the source of income attributable to sales activity is determined under paragraph (b)(1), (2), or (3). If the taxpayer sells such property outside space and outside international water, the source of income attributable to sales activity is determined under § 1.863–3(c)(2). Proposed regulations § 1.863–8(b)(4)(ii)(B) provides that income attributable to production activity, when production occurs only in space or in international water, is sourced under paragraphs (b)(1), (2), or (3). When production occurs only outside space and international water, income attributable to production activity is sourced under § 1.863–3(c)(1). When production activity occurs both in space or in international water and outside space and international water, proposed regulations § 1.863–8(b)(4)(ii)(C) splits the income attributed to production activity between production activities occurring in space or in international water, and production activities occurring outside space and international water. Gross income must be allocated to the satisfaction of the Commissioner, based on all relevant facts and circumstances, which may include functions performed, resources employed, risks assumed, and any other contributions to the value of the property. The source of gross income attributable to production activities in space or in international water is sourced under paragraphs (b)(1), (2), or (3). The source of gross income attributable to production activities outside space and international water is determined under § 1.863–3(c)(1).

c. *Special Rule for Determining the Source of Income from Services.* Proposed regulations § 1.863–8(b)(5) provides that income derived from the performance of services in space or in international water is sourced under paragraph (b)(1), (2), or (3). Proposed regulations § 1.863–8(d)(2)(ii)(A) provides that a performance of a service is a space or ocean activity when a part of the service, even if de minimis, is performed in space or in international water. The IRS and Treasury believe that Congress intended a broad range of

activities be treated as space or ocean activities.

The IRS and Treasury recognize that this rule may be over-inclusive in certain cases. Therefore, proposed regulations § 1.863–8(b)(5) provides that the taxpayer can allocate gross income derived from the performance of the service between activities that occur in space or international water and activities that occur outside space and international water, to the satisfaction of the Commissioner, based on facts and circumstances, which may include functions performed, resources employed, risks assumed, or other contributions to value. Gross income allocated to activities occurring outside space and international water will be sourced under sections 861, 862, 863, and 865 of the Code.

d. *Special Rule for Determining the Source of Communications Income.* A communications activity, as defined in proposed regulations § 1.863–9(d), also can be a space or ocean activity. Pursuant to the authority granted in section 863(d)(1), proposed regulations § 1.863–8(b)(6) provides that income from communications activity that is also a space or ocean activity is sourced under proposed regulations § 1.863–9(b).

3. Taxable Income

When a taxpayer allocates gross income under paragraph (b)(3) (allocation for certain foreign persons), paragraph (b)(4)(ii)(C) (allocation between production occurring in space or international water and production occurring outside), or paragraph (b)(5) (allocation between services occurring in space or international water and those occurring outside) of this section, the taxpayer must allocate or apportion expenses, losses, and other deductions under §§ 1.861–8 through 1.861–14T of the regulations to the class of gross income, which must include the total income so allocated in each case. A taxpayer must then apply the rules of §§ 1.861–8 through 1.861–14T to properly allocate or apportion amounts of expenses, losses, and other deductions allocated or apportioned to such class of gross income between gross income from sources within the United States and without the United States.

When a taxpayer must allocate gross income to the satisfaction of the Commissioner based on the facts and circumstances, IRS and Treasury believe that such allocations would be based generally on section 482 principles. However, IRS and Treasury solicit comments on this approach, including specific comments and examples on

alternative methods that could be used to make these allocations.

4. Definition of Space and Ocean Activity

a. *General Rules.* Section 863(d)(2) provides that space or ocean activity means any activity conducted in space, and any activity conducted in or under water not within the jurisdiction of the United States or a foreign country. Proposed regulations § 1.863–8(d)(1)(i) defines space as any area not within the jurisdiction (as recognized by the United States) of a foreign country, possession of the United States, or the United States, and not in international water.

Proposed regulations § 1.863–8(d)(1)(i) provides that space activity is any activity conducted in space, with certain exceptions. Space activity includes performance and provision of services in space, leasing of equipment or other property, including spacecraft (e.g., satellites) or transponders, located in space, licensing of technology or other intangibles for use in space, and the production, processing, or creation of property in space. Space activity includes the sale of property in space. Space activity also includes underwriting income from the insurance of risks on activities that produce income derived from space activity. The inclusion of such underwriting income is consistent with language in the Senate Report. See Senate Report at 357.

Proposed regulations § 1.863–8(d)(1)(ii) provides that ocean activity is any activity conducted in international water, with certain exceptions. Ocean activity includes performance and provision of services in international water, leasing of equipment or other property located in international water, licensing of technology or other intangibles for use in international water, and the production, processing, or creation of property in international water. Ocean activity includes the sale of property in international water, and the sale of inventory under international water, but does not include the selling of inventory if the sale takes place on international water. Thus, if property sold on international water is inventory property, income attributable to sales activity is sourced under § 1.861–7(c).

Ocean activity also includes underwriting income from the insurance of risks on activities that produce income derived from ocean activity. The inclusion of such underwriting income is consistent with language in the Senate Report. See Senate Report at 357.

Ocean activity also includes any activity performed in Antarctica. Ocean activity further includes the leasing of a

vessel if such vessel does not transport cargo or persons for hire between ports-of-call. Thus, for example, income earned by a lessor of a vessel that is to engage only in research activities in international water is ocean income. Ocean activity also includes the leasing of drilling rigs, extraction of minerals, and performance and provision of services related thereto, to the extent the mines, oil and gas wells, or other natural deposits are not within the jurisdiction of the United States, U.S. possessions, or any foreign country (as defined in section 638).

Based on legislative history, the IRS and Treasury believe space and ocean activity should be broadly defined based on legislative history. The legislative history clearly indicates that Congress intended to characterize certain land based activity as space or ocean activity. See Senate Report at 357. Consistent with that determination, the proposed regulations provide that when activities occur both in space or in international water and outside space and international water, and constitute parts of a single transaction described in § 1.863–8(d)(1), the transaction will be characterized as space or ocean activity. Thus, for example, income from the lease of equipment located in space will be sourced in its entirety under section 863(d), even though certain functions associated with the transaction may be performed outside space and international water. The rules of this section for defining space or ocean activity by combining activities occurring both in space or in international water and outside space and international water simply reflect existing principles for characterizing a transaction, and are fully consistent with rules for characterizing income for purposes of other source rules. Taxpayers enjoy flexibility in structuring their transactions that will be characterized under existing principles. To ensure the statutory purpose is not circumvented, the Commissioner may treat parts of a transaction as separate transactions, or combine separate transactions as a single transaction.

Certain activities occurring in space or international water are not considered either space or ocean activity. Proposed regulations § 1.863–8(d)(3)(i) provides that space or ocean activity does not include any activity giving rise to transportation income as defined in section 863(c). Proposed regulations § 1.863–8(d)(3)(ii) provides that space or ocean activity also does not include any activity with respect to mines, oil and gas wells, or other natural deposits to the extent the mines

or wells are located within the jurisdiction (as recognized by the United States) of any country, including the United States and its possessions (as defined in section 638). Proposed regulations § 1.863–8(d)(3)(iii) provides that space or ocean activity does not include any activity giving rise to international communications income as defined in proposed regulations § 1.863–9(d)(3)(ii). These exceptions are consistent with section 863(d)(2)(B) of the Code.

b. *Special Rules in Determining Space or Ocean Activity.* Proposed regulations § 1.863–8(d)(2)(ii)(A) provides that services are performed in space or in international water if functions are performed, resources employed, risks assumed, or other contributions to the value of the transaction occur in space or international water, whether such contributions are performed by personnel, or equipment, or otherwise. The IRS and Treasury believe that all contributions to a transaction's value, whether contributed by personnel, equipment, or otherwise, should be considered in determining whether services are performed in space or international water.

Proposed regulations § 1.863–8(d)(2)(ii)(A) provides that the performance of a service is treated as a space or ocean activity if a part of the service is performed in space or international water. The IRS and Treasury recognize that this rule may be over-inclusive in certain cases. Therefore, proposed regulations § 1.863–8(d)(2)(ii)(B) provides that the performance of a service will not be a space or ocean activity if the only activity of the taxpayer in space or in international water is to facilitate the taxpayer's own communications, as part of provision or delivery of a service by the taxpayer, and that service would not otherwise be in whole or in part a space or ocean activity. Several examples in the regulations illustrate this facilitation exception. The IRS and Treasury recognize that taxpayers may use communications services in conducting a business, and the fact that such communications may be routed through space or international water instead of by way of land should not produce differences in the source of the taxpayer's income derived from such service.

5. Treatment of Partnerships

Proposed regulations § 1.863–8(e) provides that for U.S. partnerships, section 863(d) and the regulations thereunder will be applied at the partnership level. The IRS and Treasury believe this rule is consistent with

section 7701(a)(30)(B), which defines a U.S. person as a domestic partnership. For foreign partnerships, section 863(d) and the regulations thereunder will be applied at the partner level. The proposed regulations provide a different rule for foreign partnerships because IRS and Treasury are concerned that U.S. persons may use a foreign partnership to circumvent the purposes of this section. For example, two U.S. persons by the simple expediency of forming a foreign partnership can change significantly the U.S. tax consequences under section 863(d).

6. Reporting and Documentation Requirements

When a taxpayer allocates gross income to the satisfaction of the Commissioner under § 1.863–8(b)(3) (income of certain foreign persons), § 1.863–8(b)(4)(ii)(C) (certain production activity), or under § 1.863–8(b)(5) (services) of the proposed regulations, the taxpayer must do so by making the allocation on a timely filed original return (including extensions). An amended return does not qualify, and section 9100 relief will not be available. In all cases, a taxpayer must maintain contemporaneous documentation regarding the allocation of gross income, and allocation of expenses, losses, and other deductions, the methodology used, and the circumstances justifying use of that methodology. The taxpayer must produce such documentation within 30 days upon request.

B. Communications Activity Under Sections 863(a), (d), and (e)

1. Scope

Section 1.863–9 of the proposed regulations provides rules for sourcing income derived from communications activity, notwithstanding any other section. Pursuant to proposed regulations § 1.863–8, these source rules apply to communications activity that is also space or ocean activity.

2. Source of Gross Income Derived From Communications Activity

a. *International Communications Income.* Section 863(e)(1)(A) states that any international communications income of a U.S. person will be sourced 50 percent to the United States and 50 percent to foreign sources. Proposed regulations § 1.863–9(b)(2)(i) provides that international communications income of a U.S. person will be sourced 50 percent to the United States and 50 percent to foreign sources.

Section 863(e)(1)(B)(i) provides that any international communications income of a foreign person will be

foreign source income except as provided in regulations or in section 863(e)(1)(B)(ii). Proposed regulations § 1.863–9(b)(2)(ii)(A) states the general rule that international communications income of a foreign person is foreign source income. However, the proposed regulations contain several exceptions to the general rule.

Proposed regulations § 1.863–9(b)(2)(ii)(B) states that if a foreign corporation is 50 percent or more owned by vote or value (directly, indirectly, or constructively) by U.S. persons, or is a controlled foreign corporation within the meaning of section 957, all international communications income is U.S. source income. This rule reflects IRS and Treasury's concern that U.S. persons may use a foreign corporation to obtain benefits that are inconsistent with the purposes of this section.

Section 863(e)(1)(B)(ii) provides that if a foreign person has a U.S. fixed place of business, international communications income attributable to the fixed place of business is U.S. source income. Consistent with section 863(e)(1)(B)(ii), proposed regulations § 1.863–9(b)(2)(ii)(C) states that if a foreign person, other than a foreign person described in paragraph (b)(2)(ii)(A), maintains an office or other fixed place of business in the United States, any international communications income attributable to the office or other fixed place of business is U.S. source income. The principles of section 864(c)(5) will apply to determine whether a foreign person has an office or fixed place of business in the United States. This rule does not apply if the foreign person is engaged in a U.S. trade or business.

Proposed regulations § 1.863–9(b)(2)(ii)(D) provides that if a foreign person is engaged in a U.S. trade or business, the foreign person's international communications income is presumed to be U.S. source income. The rule reflects IRS and Treasury's concern that a foreign person could avoid a U.S. fixed place of business under section 863(e)(1)(B)(ii), yet engage in significant communications activity in the United States.

The IRS and Treasury believe Congress intended that a foreign person engaged in substantial U.S. business in the United States be subject to U.S. tax on that communications activity.

The IRS and Treasury recognize that this rule may be over-inclusive in certain cases. Therefore, the proposed regulations provide that if the foreign person can allocate income to international communications activity outside the United States and space and

international water, to the satisfaction of the Commissioner, based on the facts and circumstances, which may include functions performed, resources employed, risks assumed, or other contributions to value, then the income allocated to such communications activity outside the United States and space and international water will be foreign source income. When a foreign person is entitled to the benefits of a tax treaty with the United States, such person may elect to be taxed under the rules of that treaty, so that, for example, the United States would tax only income attributable to a permanent establishment of that foreign person, regardless of the amount of income considered effectively connected with a U.S. trade or business.

b. *Other Communications Income.* The proposed regulations also provide rules, for both U.S. and foreign persons, for determining the source of income from communications activity that does not qualify as international communications activity. The IRS and Treasury believe rules that address income from other communications activities are necessary based on the legislative history. See Senate Report at 357.

Proposed regulations § 1.863–9(b)(3) states that the source of income derived by either a U.S. or foreign person from U.S. communications activity is U.S. source income. Proposed regulations § 1.863–9(b)(4) states that the source of income derived by either a U.S. or foreign person from foreign communications activity is foreign source income. Proposed regulations § 1.863–9(b)(5) states that the source of income derived from space/ocean communications activity is determined under section 863(d) and the regulations thereunder.

3. Taxable Income

When a taxpayer allocates gross income under paragraph (b)(2)(ii)(D) (certain foreign persons), or (d)(1)(ii) (determining a communications activity), the taxpayer must allocate or apportion expenses, losses, and other deductions as prescribed in §§ 1.861–8 through 1.861–14T of the regulations to the class of gross income, which must include the total income so allocated in each case. A taxpayer must then apply the rules of §§ 1.861–8 through 1.861–14T of the regulations to properly allocate or apportion amounts of expenses, losses, and other deductions allocated or apportioned to such gross income between gross income from sources within the United States and without the United States. For amounts of expenses, losses, and other

deductions allocated or apportioned to gross income derived from international communications activity, when the source of income is determined under the 50/50 method of paragraph (b)(2)(i), taxpayers must apportion expenses and other deductions between U.S. and foreign sources pro rata based on the relative amounts of U.S. and foreign source gross income. Research and experimental expenditures qualifying under § 1.861-17 are allocated under that section.

When a taxpayer must allocate gross income to the satisfaction of the Commissioner based on the facts and circumstances, IRS and Treasury believe that such allocations would be based generally on section 482 principles. However, IRS and Treasury solicit comments on this approach, including specific comments and examples on alternative methods that could be used to make these allocations.

4. Definition of Communications Activity and Income Derived From Communications Activity

a. *Communications Activity.* Proposed regulations § 1.863-9(d)(1) defines a communications activity as an activity consisting solely in the delivery by transmission of communications or data (communications). The definition of a communications activity is limited to the function of transmitting a particular communication from point A to point B. The delivery of communications by means other than transmission, for example, delivery of a letter is not a communications activity. The IRS and Treasury believe that this narrow definition of communications activity is consistent with the legislative history of section 863(e). See Senate Report at 357.

The provision of capacity to transmit communications or data is considered to be a communications activity. For example, the provision of satellite transponder capacity can qualify as a communications activity.

The provision of content or any other additional service will not be treated as a communications activity unless de minimis. For example, changes in the form of a voice communication when switching from analog technology to digital data for Internet telephony would be disregarded in determining whether there has been a transmission of communications within the meaning of proposed regulations § 1.863-9(d). However, payment for information from a data base sent electronically, or for income attributable to an entertainment event transmitted electronically, would not be income derived from a communications activity.

When the provision of content or any other services is de minimis, such content or services are ignored, and the transaction will be treated solely as the transmission of communications within the meaning of proposed regulations § 1.863-9(d)(1). The determination of whether the provision of content or other services is de minimis should be based on all the facts and circumstances. The IRS and Treasury believe the exclusion of content and other services is consistent with the legislative history of section 863(e). No evidence exists in the Congressional testimony or in the legislative history that content provided by transmission was to be considered a communications activity.

Proposed regulations § 1.863-9(d)(1)(ii) requires that a transaction encompassing non-de minimis communications activities and non-de minimis non-communications activities must be broken into parts and each part treated as a separate transaction. Proposed regulations § 1.863-9(d)(1)(ii) states that gross income derived from the activities must be allocated to each separate transaction, to the satisfaction of the Commissioner, based on all relevant facts and circumstances, which may include functions performed, resources employed, risks assumed, and any other contributions to the value of the respective transactions. For example, a payment by an advertiser to a TV broadcast station may be in part a payment for transmission of the advertisement, but could also be a payment for other property or services, for example the transmitter's ability to reach a particular market or audience. Such activities, if not de minimis, must be treated as non-communications activities under § 1.863-9(d)(1)(ii) of the proposed regulations.

To ensure the statutory purposes are not circumvented, the Commissioner may treat parts of a transaction as separate transactions, or construe separate transactions as a single transaction.

b. *Income Derived from Communications Activity.* Income derived from communications activity is defined in proposed regulations § 1.863-9(d)(2) as income derived from the transmission of communications, including income derived from the provision of capacity to transmit communications. There is no requirement that the income recipient perform the transmission function. This rule reflects IRS and Treasury's understanding that those providing communications services often use capacity owned or operated by others. However, income is derived from

communications activity only if the taxpayer is paid to transmit, and bears the risk of transmitting, the communications.

c. *Character of Communications Activity.* Proposed regulations § 1.863-9(d)(3) provides rules for characterizing income derived from a communications activity for purposes of sourcing the income derived from such activity. The character of income derived from communications activity is determined by establishing the two points between which the taxpayer is paid to transmit, and bears the risk of transmitting, the communication. Under the paid-to-do rule, the path the communication takes between the two points is not relevant in determining the character of the transmission. If a taxpayer is paid to take a communication from one point to another point, income derived from the transmission is characterized based on the transmission between those two points, even though the taxpayer contracts out part of the transmission to another. This rule reflects IRS and Treasury's recognition that those providing communications often use the network owned or operated by others. Several examples in the proposed regulations illustrate the paid-to-do rule.

Proposed regulations § 1.863-9(d)(3)(ii) defines income derived from international communications activity as the transmission from a point in the United States and a point in a foreign country (or a possession of the United States). Proposed regulations § 1.863-9(d)(3)(iii) defines income derived from U.S. communications activity as the transmission between two points in the United States or a point in the United States and a point in space or international water.

Proposed regulations § 1.863-9(d)(3)(iv) defines income derived from foreign communications activity as the transmission between two points either in a foreign country or in foreign countries or a point in a foreign country and a point in space or international water. Proposed regulations § 1.863-9(d)(3)(v) defines income derived from space/ocean communications activity as the transmission between a point in space or international water and another point in space or international water. The IRS and Treasury believe these rules are consistent with the legislative history. See Senate Report at 357.

When the taxpayer cannot establish the two points between which the taxpayer is paid to transmit, the source of income derived from such activity, for either a U.S. or foreign person, is U.S. source income. Thus, for example, when a provider of communications services provides both local and

international long distance along with cable services in one-price bundles for a set amount each month, tracing each transmission may not be possible or practical. In such cases, the source of income derived from communications activity is U.S. source income. The IRS and Treasury understand that many in the communications industry may not consider it practical or possible to prove the end points of the communications the taxpayer transmits. The IRS and Treasury solicit comments as to proposals for those situations when taxpayers cannot establish the points between which the taxpayer is paid to transmit the communications.

5. Treatment of Partnerships

Proposed regulations § 1.863-9(e) provides, in general, that for U.S. partnerships, section 863(e) and the regulations thereunder will be applied at the partnership level. The IRS and Treasury believe this rule is consistent with section 7701(a)(30)(B), which defines a U.S. person as a domestic partnership. For foreign partnerships, and in the case of a U.S. partnership in which 50 percent or more of the partnership interests are owned by foreign persons, section 863(e) and the regulations thereunder will be applied at the partner level. The proposed regulations provide a different rule for foreign partnerships and for U.S. partnerships with substantial foreign ownership because the IRS and Treasury are concerned that U.S. persons may use such partnerships to circumvent the purposes of this section.

6. Reporting Rules and Documentation Requirements

When a taxpayer allocates gross income to the satisfaction of the Commissioner under proposed regulations § 1.863-9(b)(2)(ii)(D) (certain foreign persons) or -(d)(1)(ii) (determining a communications activity), it does so by making the allocation on a timely filed original return (including extensions). An amended return does not qualify, and section 9100 relief will not be available. In all cases, a taxpayer must maintain contemporaneous documentation regarding the allocation of gross income, and allocation of expenses, losses and other deductions, the methodology used, and the circumstances justifying use of that methodology. The taxpayer must produce such documentation within 30 days upon request.

C. Amendment to the § 1.863-3 Regulations

These proposed regulations amend the regulations under § 1.863-3 for

determining the source of income in certain inventory sales.

The regulations provide that in determining the source of income from sales of property when the property is either (i) produced in whole or in part in space or in international water, or (ii) sold in space or in international water, the rules of § 1.863-8 of the proposed regulations apply. The rules of sections 863 (a) and (b), and the regulations under those sections, do not apply to determine the source of income in such cases, except to the extent provided in § 1.863-8 of the proposed regulations. The proposed regulations in § 1.863-8(b)(4)(ii)(A) provide, however, that the source of income from sales of inventory on international water continues to be sourced under § 1.863-3(c)(2). The regulations in § 1.863-3(a)(1) and -3(c)(1)(i)(A) are amended to reflect these provisions.

The proposed regulations also amend § 1.863-3(c)(2) to provide that the place of sale will be presumed to be the United States, for purposes of that section, when property is produced in the United States and the property is sold to a U.S. resident for use, consumption, or disposition in space. See § 1.864-6(b)(3) for determining whether property is used in space and whether the sale is to a U.S. resident.

These rules reflect the views of Treasury and the IRS that sales of satellites or transponders by a U.S. resident in space should produce U.S. source income. These rules also reflect the view that sales of such property by a U.S. resident to a U.S. purchaser should produce U.S. source income. Treasury and the IRS believe that these provisions are consistent with Congress' intent in enacting section 863(d) to tax U.S. persons on a residency basis on income that is not likely to be subject to foreign tax by a foreign country. It is also consistent with the tax policy of the foreign tax credit that income not likely to be subject to foreign tax should not be treated as foreign source income, which would inappropriately allow taxpayers with excess foreign tax credits to shelter this income from U.S. tax.

Proposed Effective Dates

These regulations are proposed to apply for taxable years beginning on or after the date that is 30 days after the date of publication of final regulations in the **Federal Register**.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It

is hereby certified that these regulations will not have a significant economic impact on a substantial number of small entities. This certification is based on the fact that the rules of this section principally impact large multinationals who pay foreign taxes on substantial foreign operations and therefore the rules will impact very few small entities. Moreover, in those few instances where the rules of this section impact small entities, the economic impact on such entities is not likely to be significant. Accordingly, a regulatory flexibility analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any comments that are submitted timely (in the manner described under the **ADDRESSES** caption) to the IRS. The IRS and Treasury specifically request comments on the clarity of the proposed regulations and how they may be made easier to understand. All comments will be available for public inspection and copying.

A public hearing has been scheduled for March 28, 2001, at 10 a.m., in the auditorium, seventh floor, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, DC. Due to building security procedures, visitors must enter at the 10th Street entrance, located between Constitution and Pennsylvania Avenues, NW. In addition, all visitors must present photo identification to enter the building. Because of access restrictions, visitors will not be admitted beyond the immediate entrance area more than 15 minutes before the hearing starts. For information about having your name placed on the building access list to attend the hearing, see the **FOR FURTHER INFORMATION CONTACT** section of this preamble.

The rules of 26 CFR 601.601(a)(3) apply to the hearing. Persons who wish to present oral comments at the hearing must submit comments and an outline of topics to be discussed and the time to be devoted to each topic (in the manner described under the **ADDRESSES** caption of this preamble) by March 7, 2001.

A period of 10 minutes will be allotted to each person for making comments.

An agenda showing the scheduling of the speakers will be prepared after the deadline for receiving outlines has passed. Copies of the agenda will be available free of charge at the hearing.

Drafting Information

The principal author of these regulations is Anne Shelburne, Office of Associate Chief Counsel (International). However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 is amended by adding entries in numerical order to read as follows:

Authority: 26 U.S.C. 7805 * * *

Section 1.863–8 also issued under 26 U.S.C. 863(a), (b) and (d).

Section 1.863–9 also issued under 26 U.S.C. 863(a), (d) and (e). * * *

Par. 2 Section 1.863–3 is amended by:

1. Adding a sentence after the first sentence in paragraph (a)(1).
2. Adding a sentence at the end of paragraph (c)(1)(i)(A).
3. Adding three sentences, one after the current first sentence of paragraph (c)(2), and the other two sentences after the current second sentence of paragraph (c)(2).

The additions read as follows:

§ 1.863–3 Allocation and apportionment of income from certain sales of inventory.

(a) * * * (1) * * * To determine the source of income from sales of property produced by the taxpayer, when the property is either produced in whole or in part in space or on or under water not within the jurisdiction (as recognized by the United States) of a foreign country, possession of the United States, or the United States (in international water), or is sold in space or in international water, the rules of § 1.863–8 apply, and the rules of this section do not apply, except to the extent provided in § 1.863–8. * * *

* * * * *

(c) * * * (1) * * * (i) * * * (A) * *

* For rules regarding the source of income when production takes place, in whole or in part, in space or in international water, the rules of § 1.863–8 apply, and the rules of this section do

not apply except to the extent provided in § 1.863–8.

* * * * *

(c)(2) * * * Notwithstanding any other provision, for rules regarding the source of income when a sale takes place in space or in international water, the rules of § 1.863–8 apply, and the rules of this section do not apply except to the extent provided in § 1.863–8. * * * The place of sale will be presumed to be the United States under this rule when property is produced in the United States and the property is sold to a U.S. resident, who uses the property in space or in international water. In such cases, the property will be treated as sold for use, consumption, or disposition in the United States.

* * * * *

Par. 3 Section 1.863–8 and 1.863–9 are added to read as follows:

§ 1.863–8 Source of income from space and ocean activity under section 863(d).

(a) *In general.* Income of a U.S. or a foreign person derived from space or ocean activity (space or ocean income) is sourced under the rules of this section, notwithstanding any other provision, including sections 861, 862, 863, and 865. A taxpayer will not be considered to derive income from space or ocean activity, as defined in paragraph (d) of this section, if such activity is performed by another person, subject to the rules for the treatment of consolidated groups in section § 1.1502–13.

(b) *Source of gross income from space or ocean activity—*(1) *In general.* Income derived by a U.S. person from space or ocean activity is income from sources within the United States, except as otherwise provided in this paragraph (b). Income derived by a person other than a United States person from space or ocean activity is income from sources without the United States, except as otherwise provided in this paragraph (b).

(2) *Income derived by certain foreign corporations.* If a U.S. person or U.S. persons own 50 percent or more of the vote or value of the stock of a foreign corporation (directly, indirectly or constructively) that is not a controlled foreign corporation within the meaning of section 957, all income derived by that foreign corporation from space or ocean activity is U.S. source income.

(3) *Income derived by foreign persons engaged in a U.S. trade or business.* If a foreign person, other than a controlled foreign corporation within the meaning of section 957 or a foreign person described in paragraph (b)(2) of this section, is engaged in a U.S. trade or business, all income derived by that

person from space or ocean activity is presumed to be U.S. source income. However, if the foreign person can allocate income between sources within the United States, or space, or international water, and sources outside the United States and space and international water, to the satisfaction of the Commissioner, based on the facts and circumstances, which may include functions performed, resources employed, risks assumed, or other contributions to value, then space or ocean income allocated to sources outside the United States and space and international water shall be treated as from sources outside the United States.

(4) *Source rules for income from certain sales of property—*(i) *Sales of purchased property.* When a taxpayer sells property in space or in international water, the source of gross income shall be determined under paragraph (b)(1), (2), or (3) of this section as applicable. However, if inventory, within the meaning of section 1221(1), is sold on international water, the source of income shall be determined under § 1.863–3(c)(2).

(ii) *Sales of property produced by the taxpayer—*(A) *General.* If the taxpayer both produces property and also sells such property, the taxpayer must divide gross income from such sales between production activity and sales activity under the 50/50 method as described in this paragraph (b)(4)(ii)(A). Under the 50/50 method, one-half of the taxpayer's gross income will be considered income attributable to production activity, and the source of that income will be determined under paragraphs (b)(4)(ii)(B) or (C) of this section. The remaining one-half of such gross income will be considered income attributable to sales activity and the source of that income will be determined under paragraph (b)(4)(i) of this section. However, if the taxpayer sells such property outside space and outside international water, the source of gross income attributable to sales activity will be determined under § 1.863–3(c)(2).

(B) *Production only in space or in international water, or only outside space and international water.* When production occurs only in space or in international water, income attributable to production activity is sourced under paragraph (b)(1), (2), or (3) of this section as space or ocean income. When production occurs only outside space and international water, income attributable to production activity is sourced under § 1.863–3(c)(1).

(C) *Production both in space or in international water and outside space and international water.* When property is produced in space or in international

water and outside space and international water, gross income must be allocated to production occurring in space or in international water and production occurring outside space and international water, to the satisfaction of the Commissioner, based on all the facts and circumstances, which may include functions performed, resources employed, risks assumed, and any other contributions to value. The source of gross income allocated to space or international water is determined under paragraph (b)(1), (2), or (3) of this section. The source of gross income allocated outside space and international water is determined under § 1.863-3(c)(1).

(5) *Special rule for determining the source of gross income from services.* If a transaction characterized as the performance of services constitutes a space or ocean activity by reason of the performance of part of the service in space or in international water, as determined under paragraph (d)(2)(ii)(A) of this section, the source of all gross income derived from such transaction of which such performance is a part is determined under paragraph (b)(1), (2), or (3) of this section. However, if the taxpayer can allocate gross income between performance occurring outside space and international water, and performance occurring in space or international water, to the satisfaction of the Commissioner, based on the facts and circumstances, including functions performed, resources employed, risks assumed, or other contributions to value, then the source of income allocated to performance occurring outside space and international water shall be determined under sections 861, 862, 863, and 865.

(6) *Special rule for determining source of income from communications activity (other than income from international communications activity).* Space and ocean activity, as defined in paragraphs (d)(1) and (2) of this section, includes activity occurring in space or in international water that is characterized as a communications activity as defined in § 1.863-9(d). The source of gross income from space or ocean activity that is also a communications activity as defined in § 1.863-9(d) is determined under the rules of § 1.863-9(b), rather than under paragraph (b) of this section.

(c) *Taxable income.* When a taxpayer allocates gross income under paragraph (b)(3), (b)(4)(ii)(C), or (b)(5) of this section, to the satisfaction of the Commissioner, based on all the facts and circumstances, the taxpayer must allocate or apportion expenses, losses, and other deductions as prescribed in

§§ 1.861-8 through 1.861-14T to the class of gross income, which must include the total income so allocated in each case. A taxpayer must then apply the rules of §§ 1.861-8 through 1.861-14T to properly allocate or apportion amounts of expenses, losses, and other deductions allocated or apportioned to such gross income between gross income from sources within the United States and without the United States.

(d) *Space and Ocean activity—(1) Definition—(i) Space activity.* In general, space activity is any activity conducted in space. Space activity includes performance and provision of services in space, as defined in paragraph (d)(2)(ii)(A) of this section, leasing of equipment located in space, including spacecraft (e.g., satellites) or transponders located in space, licensing of technology or other intangibles for use in space, and the production, processing, or creation of property in space, as defined in paragraph (d)(2)(i) of this section. Space activity includes activity occurring in space that is characterized as communications activity (other than international communications activity) under § 1.863-9(d). Space activity also includes underwriting income from the insurance of risks on activities that produce space income. Space activity includes the sale in space of property, as defined in paragraph (d)(2)(iii) of this section. For purposes of this section, space means any area not within the jurisdiction (as recognized by the United States) of a foreign country, possession of the United States, or the United States, and not in international water. For purposes of determining space activity, the Commissioner may separate parts of a single transaction into separate transactions or combine separate transactions as parts of a single transaction. Paragraph (d)(3) of this section lists exceptions to the general rule.

(ii) *Ocean activity.* In general, ocean activity is any activity conducted on or under water not within the jurisdiction (as recognized by the United States) of a foreign country, possession of the United States, or the United States (collectively, in international water). Ocean activity includes performance and provision of services in international water, as defined in paragraph (d)(2)(ii)(A) of this section, leasing of equipment located in international water, including underwater cables, licensing of technology or other intangibles for use in international water, and the production, processing, or creation of property in international water, as defined in paragraph (d)(2)(i) of this

section. Ocean activity includes sales of property in international water, as defined in paragraph (d)(2)(iii) of this section, but ocean activity does not include the selling of inventory as defined in section 1221(1) on international water. Ocean activity includes activity occurring in international water that is characterized as communications activity (other than international communications activity) under § 1.863-9(d). Ocean activity also includes underwriting income from the insurance of risks on activities that produce ocean income. Ocean activity also includes any activity performed in Antarctica. Ocean activity further includes the leasing of a vessel if such vessel does not transport cargo or persons for hire between ports-of-call. Thus, for example, the leasing of a vessel that is to engage only in research activities in international water is an ocean activity. Except as provided in paragraph (d)(3)(ii) of this section, ocean activity also includes the leasing of drilling rigs, extraction of minerals, and performance and provision of services related thereto. For purposes of determining ocean activity, the Commissioner may separate parts of a single transaction into separate transactions or combine separate transactions as parts of a single transaction. Paragraph (d)(3) of this section lists exceptions to the general rule.

(2) *Determining a space or ocean activity—(i) Production of property in space or in international water.* For purposes of this section, production activity means an activity that creates, fabricates, manufactures, extracts, processes, cures, or ages property within the meaning of sections 864(a) and § 1.864-1.

(ii) *Special rule for performance of services—(A) General.* If a transaction is characterized as the performance of a service, then such service will be treated as a space or ocean activity when a part of the service, even if de minimis, is performed in space or in international water. Services are performed in space or in international water if functions are performed, resources employed, risks assumed, or other contributions to value occur in space or in international water, regardless of whether performed by personnel, or equipment, or otherwise.

(B) *Exception to the general rule—facilitating the taxpayer's own communications.* If a taxpayer's only activity in space or in international water is to facilitate the taxpayer's own communications as part of the provision or delivery of a service provided by the taxpayer, and that service would not otherwise be in whole or in part a space

or ocean activity, such service will not be treated as either space or ocean activity because of such facilitation.

(iii) *Sale in space or in international water.* In applying § 1.861-7(c) to determine where a sale takes place, property will be sold in space or in international water if the property is located in space or in international water when rights, title and interest pass to the buyer (or when bare legal title is retained, at the time and place of passage of beneficial ownership and risk of loss), or if property is sold for use in space or in international water.

(3) *Exceptions to space or ocean activity.* Space or ocean activity does not include the following types of activities—

(i) Any activity giving rise to transportation income as defined in section 863(c); or

(ii) Any activity with respect to mines, oil and gas wells, or other natural deposits to the extent the mines or wells are located within the jurisdiction (as recognized by the United States) of any country, including the United States and its possessions; or

(iii) Any activity giving rise to international communications income as defined in § 1.863-9(d)(3)(ii).

(e) *Treatment of partnerships.* In the case of a U.S. partnership, this section will be applied at the partnership level. In the case of a foreign partnership, this section will be applied at the partner level.

(f) *Examples.* The following examples illustrate the rules of this section:

Example 1. Space activity—activity occurring on land and in space. (i) *Facts.* S owns satellites, and leases one of its satellites to A. S, as lessor, will not operate the satellite. Part of S's performance as lessor in this transaction occurs on land.

(ii) *Analysis.* The combination of S's activities is characterized as the lease of equipment. Since the equipment is located in space, the transaction is defined as space activity under paragraph (d)(1)(i) of this section. Income derived from the lease will be sourced in its entirety under paragraph (b) of this section.

Example 2. Space activity. (i) *Facts.* X is an Internet service provider, offering a service to personal computer users accessing the Internet. This service permits a customer, C, to make a call, initiated by a modem, routed to a control center, for connection to the World Wide Web. X transmits the requested information over its satellite capacity leased from S to C's personal computer. X charges its customers a flat monthly fee. Assume neither X nor S derive international communications income within the meaning of § 1.863-9(d)(3)(ii).

(ii) *Analysis.* In this case, X performs a service, and X's activity in space is not simply facilitation within the meaning of paragraph (d)(2)(ii)(B) of this section, because X's activity is not simply the facilitation of

X's own communications and because X's activity is not just part of another service provided by X. Thus, X's activity constitutes space activity in its entirety under paragraph (d)(2)(ii)(A) of this section, and the source of X's income is determined under paragraph (b) of this section. To the extent X derives income from communications activity, within the meaning of § 1.863-9(d), the source of X's income is determined under § 1.863-9(b), as provided in paragraph (b)(6) of this section. S derives communications income within the meaning of § 1.863-9(d), and therefore the source of S's income is determined under § 1.863-9(b), as provided in paragraph (b)(6) of this section.

Example 3. Services as space activity—facilitation of communications. (i) *Facts.* R owns a retail outlet in the United States. R employs S to provide a security system for R's premises. S operates its security system by transmitting images from R's premises to a satellite, and from there to a group of S employees located in Country B, who then monitor the premises by viewing the transmitted images. O provides S with transponder capacity on O's satellite, which S uses to transmit those images.

(ii) *Analysis.* S derives income for providing monitoring services. Because, in this case, S uses O's satellite transponder to transmit images to facilitate S's own communications in space as part of its provision of a security service, S's activity in space is limited to facilitating communications as described in paragraph (d)(2)(ii)(B) of this section. Thus, S is not engaged in a space activity, and none of S's income is space income. Assuming O's provision of capacity is viewed as the provision of a service, O's activity in space is not simply the facilitation of communications as provided in paragraph (d)(2)(ii)(B) of this section, because O is not just facilitating its own communications. Thus, O's activity is characterized as space activity in its entirety under paragraph (d)(2)(ii)(A) of this section (unless O's activity in space qualifies as international communications activity). To the extent O derives income from communications activity, within the meaning of § 1.863-9(d), the source of O's income is determined under § 1.863-9(b), as provided in paragraph (b)(6) of this section. On these facts, R does not derive any income from space activity.

Example 4. Space activity. (i) *Facts.* L, a U.S. company, offers programming and also certain services to customers located both in the United States and in foreign countries. Assume L's provision of programming and services in this case was viewed as the provision of a service, with no part of that service occurring in space. L uses satellite capacity acquired from S to deliver the service directly to customers' television sets, so that the delivery of the service occurs in space. Assume the delivery in this case is not considered de minimis. L also acquires programming from H, and L pays H a royalty for use of copyrighted material in the United States and in foreign countries. Customer, C, pays L for delivery of the service to C's residence in the United States. Assume S's provision of capacity in this case was viewed as the provision of a service, and also that S

does not derive international communications income within the meaning of § 1.863-9(d)(3)(ii).

(ii) *Analysis.* On these facts, S's activity in space is not just the facilitation of its own communications within the meaning of paragraph (d)(2)(ii)(B) of this section, because S is facilitating the communications of others. To the extent S derives income from a space activity that is also a communications activity under § 1.863-9(d), the source of S's income is determined under § 1.863-9(b), as provided in paragraph (b)(6) of this section. On these facts, L is treated as providing a service and is paid to deliver that service to its customers, and each transaction, i.e., the provision of the service and the delivery of the service, constitutes a separate transaction. L's income derived from provision of the service is not income derived from space activity. L's income derived from delivery of the service is space activity. L's delivery of the service is not just the facilitation of L's own communications within the meaning of paragraph (d)(2)(ii)(B) of this section, because it is not just a part of the provision of a service, but instead the entire service. Since L derives communications income within the meaning of § 1.863-9(d), the source of L's income is determined under § 1.863-9(b), as provided in paragraph (b)(6) of this section. If on other facts, L provides a service and delivers that service, and L treats the provision of the service and the delivery of the service as one separate transaction, then L performs services in space under paragraph (d)(2)(ii)(A) of this section, because the delivery of the service occurs in space. However, L's activity in space would be limited to facilitating its own communications within the meaning of paragraph (d)(2)(ii)(B) of this section, because it is part of another service that would not otherwise be a space activity. As a result, L's provision of the service would not be a space activity under paragraph (d)(2)(ii)(A) of this section.

Example 5. Space activity—treatment of land activity. (i) *Facts.* S, a U.S. person, offers remote imaging products and services to its customers. In year 1, S uses its satellite's remote sensors to gather data on certain geographical terrain. In year 3, C, a construction development company, contracts with S to obtain a satellite image of an area for site development work. S pulls data from its archives and transfers to C the images gathered in year 1, in a transaction that is characterized as a sale of the data. Title to the data passes to C in the United States. Before transferring the images to C, S uses computer software to enhance the images so that the images can be used.

(ii) *Analysis.* The collection of data and creation of images in space is characterized as the creation of property in space. S's income is derived from production of property in part in space, and is, therefore, derived in part from space activity. The source of S's income from production and sale of property is, therefore, determined under paragraph (b)(4) of this section. Since production activity occurs both in space and on land, the source of S's production income is determined under paragraphs (b)(4)(ii)(A) and (C) of this section. The source of S's

income attributable to sales activity is determined under paragraph (b)(4)(ii)(A) of this section and § 1.863-3(c)(2) as U.S. source income.

Example 6. Use of intangible property in space. (i) *Facts.* X acquires a license to use a particular satellite slot or orbit, which X sublicenses to C. C pays X a royalty.

(ii) *Analysis.* Since the royalty is paid for the right to use intangible property in space, the source of X's royalty is determined under paragraph (b) of this section.

Example 7. Performance of services.

(i) *Facts.* E, a U.S. company, operates satellites with sensing equipment that can determine how much heat and light particular plants emit and reflect. Based on the data, E will provide F, a U.S. farmer, a report analyzing the data, which F will use in growing crops. E analyzes the data from U.S. offices.

(ii) *Analysis.* Assume E's combined activities are characterized as the performance of services. Because part of the service is performed in space, all income E derives from the transaction will be treated as derived from space activity under paragraph (d)(2)(ii)(A) of this section. The source of such income will be determined under paragraph (b)(5) of this section. If, however, E can allocate gross income, to the satisfaction of the Commissioner, as prescribed in paragraph (b)(5) of this section, then the source of gross income attributable to services performed outside space may be determined as provided in paragraph (b)(5) of this section.

Example 8. Separate transactions.

(i) *Facts.* The same facts as *Example 7*, except that E provides the raw data to F in a transaction characterized as a sale of a copyrighted article, and in addition also provides an analysis in the form of a report to F, a U.S. farmer who uses the information in growing crops. The price F pays E for the raw data is separately stated.

(ii) *Analysis.* To the extent the provision of raw data and the analysis of the data are each treated as separate transactions, the source of income from the production and sale of data is determined under paragraph (b)(4) of this section. The provision of services would be analyzed in the same manner as in *Example 7*.

Example 9. Sale of property under international water.

(i) *Facts.* T owns transatlantic cable lying under the ocean, which it purchased. T sells the cable to B.

(ii) *Analysis.* Because the property is sold under international water as provided in paragraph (d)(2)(iii) of this section, the transaction is ocean activity under paragraph (d)(1)(ii) of this section, and the source of income is determined under paragraph (b)(4)(i) of this section, by reference to paragraph (b)(1), (2), or (3) of this section.

Example 10. Sales of property in space.

(i) *Facts.* S manufactures a satellite in the United States and sells it to a U.S. customer, with the rights, title, and interest passing to the customer when the satellite is located in space.

(ii) *Analysis.* The source of income derived from the sale of the satellite in space is determined under paragraph (b)(4) of this

section, with the source of income attributable to production activity determined under paragraphs (b)(4)(ii)(A) and (B) of this section, and the source of income attributable to sales activity determined under paragraphs (b)(4)(ii)(A) and (b)(4)(i) of this section, by reference to paragraph (b)(1), (2), or (3) of this section.

Example 11. Sale of property located in space.

(i) *Facts.* S has a right to operate from a particular position in space. S sells the right to operate from that satellite slot or orbit to P.

(ii) *Analysis.* Because the sale takes place in space, as provided in paragraph (d)(2)(iii) of this section, gain on the sale of the satellite slot or orbit is income derived from space activity under paragraph (d)(1)(i) of this section, and income from the sale is sourced under paragraph (b)(4)(i) of this section, by reference to paragraph (b)(1), (2), or (3) of this section.

Example 12. Source of income of a foreign person.

(1) *Facts.* FP, a foreign company, not a controlled foreign corporation within the meaning of section 957, derives income from the operation of satellites. FP operates a ground station in the United States and in foreign country, FC.

(ii) *Analysis.* In this case, FP is engaged in a U.S. trade or business of operating the ground station. Thus, under paragraph (b)(3) of this section, all FP's income derived from space activity is presumed to be U.S. source income. However, if FP can allocate space income to contributions occurring outside the United States, space, and international water, as provided in paragraph (b)(3) of this section, for example, to the ground station located in FC, then such space income so allocated will be from sources outside the United States.

Example 13. Source of income of a foreign person.

(i) *Facts.* FP, a foreign company, not a controlled foreign corporation within the meaning of Section 957, operates remote sensing satellites, collecting data and images in space for its customers. FP uses an independent agent, A, in the United States who provides marketing, order taking, and other customer service functions.

(ii) *Analysis.* In this case, FP is engaged in a U.S. trade or business on the basis of A's activities on its behalf in the United States. Therefore, under paragraph (b)(3) of this section, all of FP's income derived from space activity is presumed to be space income. However, if FP can allocate income to contributions occurring outside the United States, space, and international water, as provided in paragraph (b)(3) of this section, then such income so allocated will be from sources outside the United States.

(g) *Reporting and documentation requirements.* When a taxpayer allocates gross income, to the satisfaction of the Commissioner, under paragraph (b)(3), (b)(4)(ii)(C), or (b)(5) of this section, it does so by making the allocation on a timely filed original return (including extensions). An amended return does not qualify for this purpose, nor shall

the provisions of § 301.9100-1 of this chapter and any guidance promulgated thereunder apply. In all cases, a taxpayer must maintain contemporaneous documentation in existence when such return is filed regarding the allocation of gross income and allocation or apportionment of expenses, losses and other deductions, the methodology used, and the circumstances justifying use of that methodology. The taxpayer must produce such documentation within 30 days upon request.

(h) *Effective date.* This section applies to taxable years beginning on or after the date that is 30 days after the date of publication of final regulations in the **Federal Register**.

§ 1.863-9 Source of income derived from communications activity under sections 863(a), (d), and (e).

(a) *In general.* Income of a U.S. or foreign person derived from communications activity is sourced under the rules of this section, notwithstanding any other provision including sections 861, 862, 863, and 865.

(b) *Source of gross income derived from communications activity—(1) In general.* The source of gross income derived from each type of communications activity, as defined in paragraph (d)(3) of this section, is determined under this paragraph (b). If a communications activity would qualify as space or ocean activity under section 863(d) and the regulations thereunder, the source of income derived from such communications activity is determined under this section, and not under section 863(d) and the regulations thereunder. See § 1.863-8(b)(6).

(2) *Source of international communications income—(i) Income derived by a U.S. person.* Under the 50/50 method of this paragraph (b)(2)(i), income derived by a U.S. person from international communications activity is one-half from sources within the United States and one-half from sources without the United States.

(ii) *Income derived by foreign persons—(A) General rule.* Income derived by a person other than a U.S. person from international communications activity is, except as otherwise provided in this paragraph (b), wholly from sources without the United States.

(B) *Income derived by certain foreign corporations.* If a foreign corporation, including a controlled foreign corporation within the meaning of section 957, is 50 percent or more owned by vote or value (directly,

indirectly, or constructively) by U.S. persons, all income derived by that corporation from international communications activity is from sources within the United States.

(C) *Income derived by foreign persons with a U.S. fixed place of business.* If a foreign person (other than a foreign person described in paragraph (b)(2)(ii)(B) of this section) maintains an office or other fixed place of business in the United States, the foreign person's international communications income, as determined to the satisfaction of the Commissioner, attributable to the office or other fixed place of business is from sources within the United States. The principles of section 864(c)(5) apply in determining whether a foreign person has an office or fixed place of business in the United States. See § 1.864-6 and -7. This paragraph does not apply if the foreign person is engaged in a U.S. trade or business.

(D) *Income derived by foreign persons engaged in a U.S. trade or business.* If a foreign person (other than a foreign person described in paragraph (b)(2)(ii)(B) of this section) is engaged in a U.S. trade or business, all of the foreign person's international communications income is presumed to be from sources within the United States. However, if the foreign person can allocate income between sources within the United States, or space, or international water and sources outside the United States and space and international water, to the satisfaction of the Commissioner, based on the facts and circumstances, which may include functions performed, resources employed, risks assumed, or other contributions to value, then the income allocated to sources outside the United States and space and international water shall be treated as from sources without the United States.

(3) *Source of U.S. communications income.* The source of income derived by a U.S. or a foreign person from U.S. communications activity is from sources within the United States.

(4) *Source of foreign communications income.* The source of income derived by a U.S. or a foreign person from foreign communications activity is from sources without the United States.

(5) *Source of space/ocean communications income.* The source of income derived by a U.S. or a foreign person from space/ocean communications activity is determined under section 863(d) and the regulations thereunder, without regard to § 1.863-8(b)(6).

(6) *Source of communications income when taxpayer cannot establish the two points between which the taxpayer is*

paid to transmit the communication. The income derived by a U.S. person or foreign person from communications activity, when the taxpayer cannot establish the two points between which the taxpayer is paid to transmit the communication as required in paragraph (d)(3)(i) of this section, is from sources within the United States.

(c) *Taxable income.* When a taxpayer allocates gross income under paragraph (b)(2)(ii)(D) or (d)(1)(ii) of this section, to the satisfaction of the Commissioner, based on all the facts and circumstances, the taxpayer must allocate or apportion expenses, losses, and other deductions as prescribed in §§ 1.861-8 through 1.861-14T to the class of gross income, which must include the total income so allocated in each case. A taxpayer must then apply the rules of §§ 1.861-8 through 1.861-14T to properly allocate or apportion amounts of expenses, losses, and other deductions allocated or apportioned to such gross income between gross income from sources within the United States and without the United States. For amounts of expenses, losses, and other deductions allocated or apportioned to gross income derived from international communications activity, when the source of income is determined under the 50/50 method of paragraph (b)(2)(i) of this section, taxpayers must apportion expenses, losses, and other deductions between sources within and sources without pro rata based on the relative amounts of gross income from sources within the United States and without the United States. Research and experimental expenditures qualifying under § 1.861-17 are allocated under that section, and are not allocated and apportioned pro rata under the method of paragraph (b)(2)(i) of this section.

(d) *Communications activity and income derived from communications activity—(1) Communications activity—(i) General rule.* For purposes of this part, communications activity consists solely of the delivery by transmission of communications or data (communications). Delivery of communications other than by transmission, for example, by delivery of physical packages and letters, is not communications activity within the meaning of this section. Communications activity also includes the provision of capacity to transmit communications. Provision of content or any other additional service provided along with, or in connection with, a non-de minimis communications activity must be treated as a separate non-communications activity unless de minimis.

(ii) *Separate transaction.* To the extent a taxpayer's transaction consists in part of non-de minimis communications activity and in part of non-de minimis non-communications activity, such parts of the transaction must be treated as separate transactions. Gross income must be allocated to each such transaction involving the communications activity and the non-communications activity to the satisfaction of the Commissioner, based on all relevant facts and circumstances, which may include functions performed, resources employed, risks assumed, and any other contributions to the value of the respective transactions. For purposes of determining whether income is derived from communications activity, the Commissioner may treat communications activity and non-communications activity, treated as a single transaction, as separate transactions, or combine separate communications activity and non-communications activity transactions into a single transaction.

(2) *Income derived from communications activity.* Income derived from communications activity (communications income) is income derived from the delivery by transmission of communications, including income derived from the provision of capacity to transmit communications. Income may be considered derived from a communications activity even if the taxpayer itself does not perform the transmission function, but in all cases, the taxpayer derives communications income only if the taxpayer is paid to transmit, and bears the risk of transmitting, the communications.

(3) *Determining the type of communications activity—(i) In general.* Whether income is derived from international communications activity, U.S. communications activity, foreign communications activity, or space/ocean communications activity is determined by identifying the two points between which the taxpayer is paid to transmit the communication. The taxpayer must establish to the satisfaction of the Commissioner the two points between which the taxpayer is paid to transmit, and bears the risk of transmitting, the communication. Whether the taxpayer contracts out part or all of the transmission function is not relevant.

(ii) *Income derived from international communications activity.* Income derived by a taxpayer from international communications activity (international communications income) is income derived from communications activity, as defined in paragraph (d)(1) of this

section, when the taxpayer is paid to transmit between a point in the United States and a point in a foreign country (or a possession of the United States).

(iii) *Income derived from U.S. communications activity.* Income derived by a taxpayer from U.S. communications activity (U.S. communications income) is income derived from communications activity, as defined in paragraph (d)(1) of this section, when the taxpayer is paid to transmit—

(A) Between two points in the United States; or

(B) Between the United States and a point in space or in international water.

(iv) *Income derived from foreign communications activity.* Income derived by a taxpayer from foreign communications activity (foreign communications income) is income derived from communications activity, as defined in paragraph (d)(1) of this section, when the taxpayer is paid to transmit—

(A) Between two points in a foreign country or countries (or possession or possessions of the United States); or

(B) Between a foreign country (or a possession of the United States) and a point in space or in international water.

(v) *Income derived from space/ocean communications activity.* Income derived by a taxpayer from space/ocean communications activity (space/ocean communications income) is income derived from a communications activity, as defined in paragraph (d)(1) of this section, when the taxpayer is paid to transmit between a point in space or in international water and another point in space or in international water.

(e) *Treatment of partnerships—(1) General.* In the case of a U.S. partnership, this section will be applied at the partnership level. In the case of a foreign partnership, this section will be applied at the partner level.

(2) *Exception.* In the case of a U.S. partnership in which 50 percent or more of the partnership interests are owned by foreign persons, this section will be applied at the partner level.

(f) *Examples.* The following examples illustrate the rules of this section:

Example 1. Income derived from communications activity. (i) *Facts.* D provides its customers in various foreign countries with access to its data base. A customer, C, places a toll call to D's telephone number, and can then access D's data base to obtain certain information, such as C's customers' health care coverage.

(ii) *Analysis.* D is not paid to transmit communications and does not derive income solely from transmission of communications within the meaning of paragraph (d) of this section. D instead derives income from

provision of content or provision of services to its customers.

Example 2. Income derived from U.S. communications activity. (i) *Facts.* Local telephone company (TC) receives access fees from an international carrier for picking up calls from a local telephone customer and delivering the call to a U.S. point of presence (POP) of the international carrier. The international carrier picks up the call from its U.S. POP and delivers the call to a foreign country.

(ii) *Analysis.* TC is not paid to carry the transmission between the United States and a foreign country. It is paid to transmit communications between two points in the United States. TC derives income from U.S. communications activity as defined in paragraph (d)(3)(iii) of this section, which is sourced under paragraph (b)(3) of this section as U.S. source income.

Example 3. Income derived from international communications activity. (i) *Facts.* TC, a U.S. company, owns an underwater fiber optic cable. Pursuant to three year contracts, TC makes capacity to transmit communications via the cable available to its customers. Such customers then solicit telephone customers and arrange for transmitting their calls. The cable runs in part through U.S. waters, through international waters, and in part through foreign country waters.

(ii) *Analysis.* TC derives income from communications activity under paragraph (d)(2) of this section. The income is derived from international communications activity as provided in paragraph (d)(3)(ii) of this section, since TC is paid to make available capacity to transmit between the United States and a foreign country, and vice versa. Since TC is a U.S. person, TC's international communications income is sourced under paragraph (b)(2)(i) of this section as one-half from sources within the United States and one-half from sources without the United States.

Example 4. Character of communications activity: the paid-to-do rule. (i) *Facts.* TC is paid to transmit communications from Toronto, Canada, to Paris, France. TC transmits the communication to New York. TC pays another communications company, IC, to transmit the communications from New York to Paris.

(ii) *Analysis.* Under the paid-to-do rule of paragraph (d)(3)(i) of this section, TC derives income from foreign communications activity under paragraph (d)(3)(iv) of this section, since it is paid to transmit communications between two foreign points, Toronto and Paris. Under paragraph (d)(3)(i) of this section, the character of TC's activity is determined without regard to the fact that TC pays IC to transmit the communication for some portion of the delivery path. IC has international communications income under paragraph (d)(3)(ii) of this section, because it is paid to transmit the communication between a point in the United States and a point in a foreign country.

Example 5. Income derived from international communications activity. (i) *Facts.* S, a U.S. satellite operator, owns satellites and the uplink facilities in Country X, a foreign country. B, a resident of Country

X, pays S to deliver its programming from Country X to its downlink facility in the United States, owned by C, a customer of B.

(ii) *Analysis.* S derives communications income under paragraph (d) of this section. S's income is characterized as international communications income under paragraph (d)(3)(ii) of this section, because S is paid to transmit the communication between the beginning point in a foreign country to an end point in the United States. The source of S's international communications income is determined under paragraph (b)(2)(i) of this section as one-half from sources within the United States and one-half from sources without the United States.

Example 6. Character of income derived from communications activity: the paid-to-do rule. (i) *Facts.* TC is paid to take a call from North Carolina to Iowa, two points in the United States, but routes the call through Canada.

(ii) *Analysis.* Under paragraph (d)(3)(i) of this section, the character of the income derived from communications activity is determined by the two points between which the taxpayer is paid to transmit, and bears the risk of transmitting, the communications, without regard to the path of the transmission between those two points. Thus, under paragraph (d)(3)(iii) of this section, TC derives income from U.S. communications activity because it is paid to transmit between two U.S. points.

Example 7. Source of income derived from communications activity. (i) *Facts.* A, a U.S. company, is an Internet access provider. A charges C a lump sum, paid monthly, for Internet access. A transmits a call made by C in France to a recipient in England, over the public Internet. A does not maintain records as to the beginning and end points of the transmission.

(ii) *Analysis.* Although A derives income from communications activity as defined in paragraph (d)(1) of this section, the source of income is determined under paragraph (b)(6) of this section as income from sources within the United States, because A cannot establish the two points between which it is paid to transmit the communications.

Example 8. Income derived from communications and non-communications activity. (i) *Facts.* A, a U.S. company, offers customers local and long distance phone service, video, and Internet services. Customers pay one monthly fee, and in addition 10 cents a minute for all long-distance calls, including international calls.

(ii) *Analysis.* To the extent A derives income from communications activity, A must allocate income to its communications activity as provided in paragraph (d)(1)(ii) of this section. To the extent A can establish that it derives international communications income as defined in paragraph (d)(3)(ii) of this section, A would determine the source of such income under paragraph (b)(2)(i) of this section. If A cannot establish the points between which it is paid to transmit communications, as required in paragraph (d)(3)(i) of this section, the source of A's income must be determined under paragraph (b)(6) of this section as from within the United States.

Example 9. Income derived from communications activity. (i) *Facts.* T

purchases capacity from TC to transmit telephone calls. T sells prepaid telephone calling cards, giving customers access to TC's lines, for a certain number of minutes.

(ii) *Analysis.* T derives income from communications activity, under paragraph (d)(2) of this section, because T makes capacity to transmit available to its customers. In this case, T cannot establish the points between which communications are transmitted. Therefore, the source of its income must be determined under paragraph (b)(6) of this section as U.S. source income.

Example 10. Income derived from communications and non-communications activity. (i) *Facts.* B, a U.S. company, transmits television programs using its satellite transponder, from the United States to downlink facilities in foreign country Y, owned by D, a cable system operator in Country Y. D receives the transmission, unscrambles the signals, and distributes the broadcast to customers in Country Y.

(ii) *Analysis.* B derives income both from communications activity as defined under paragraph (d)(1)(i) of this section, and from non-communications activity. Gross income must be allocated to the communications activity as required in paragraph (d)(1)(ii) of this section. Income derived by B for transmission to D is international communications income within paragraph (d)(3)(ii) of this section, because B is paid to transmit communications from the United States to a foreign country.

Example 11. Income derived from communications activity. (i) *Facts.* TC is paid for Internet access. TC replicates frequently requested sites on its servers, solely to speed up response time.

(ii) *Analysis.* On these facts, the replication service would be treated as de minimis under paragraph (d)(1)(i) of this section, so that TC derives income from communications activity. The type and source of TC's communications income depends on demonstrating the points between which TC is paid by its customer to transmit the communications, under paragraph (d)(3)(i) of this section.

Example 12. Income derived from foreign communications activity. (i) *Facts.* S leases capacity to B, a broadcaster located in Australia. B beams programming to the satellite, and S's satellite picks the communications up in space, and beams the programming over Southeast Asia.

(ii) *Analysis.* S derives income from communications activity under paragraph (d)(2) of this section. S's income is characterized as income derived from foreign communications activity under paragraph (d)(3)(iv) of this section, because S picks up the communication in space, and beams it to a footprint entirely covering a foreign area. The source of S's income is determined under paragraph (b)(4) of this section as from sources without the United States. If S were beaming the programming over a satellite footprint that covered area both in the United States and outside the United States, S would be required to allocate the income derived from the different types of communications activity.

(g) *Reporting rules and disclosure on tax return.* When a taxpayer allocates

gross income to the satisfaction of the Commissioner under paragraph (b)(2)(ii)(D) or (d)(1)(ii) of this section, it does so by making the allocation on a timely filed original return (including extensions). An amended return does not qualify for this purpose, nor shall the provisions of § 301.9100-1 of this chapter and any guidance promulgated thereunder apply. In all cases, a taxpayer must maintain contemporaneous documentation in existence when such return is filed regarding the allocation of gross income, and allocation and apportionment of expenses, losses, and other deductions, the methodology used, and the circumstances justifying use of that methodology. The taxpayer must produce such documentation within 30 days of a request.

(h) *Effective date.* This section applies to taxable years beginning on or after the date that is 30 days after the date of publication of final regulations in the **Federal Register**.

Robert E. Wenzel,

Deputy Commissioner of Internal Revenue.

[REG-109481-99]

RIN 1545-AX34

Special Rules Under Section 417(a)(7) for Written Explanations Provided by Qualified Retirement Plans After Annuity Starting Dates

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations relating to the special rule added by the Small Business Job Protection Act of 1996 which permits the required written explanations of certain annuity benefits to be provided by qualified retirement plans to plan participants after the annuity starting date. These regulations affect administrators of, participants in, and beneficiaries of qualified retirement plans.

DATES: Written and electronic comments and requests for a public hearing must be received by April 17, 2001.

ADDRESSES: Send submissions to: CC:M&SP:RU (REG-109481-99), room 5226, Internal Revenue Service, POB

7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand-delivered Monday through Friday between the hours of 8 a.m. and 5 p.m. to: CC:M&SP:RU (REG-109481-99), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington DC. Alternatively, taxpayers may submit comments electronically via the Internet by selecting the "Tax Regs" option on the IRS Home Page, or by submitting comments directly to the IRS Internet site at http://www.irs.gov/tax_regs/reglist.html.

FOR FURTHER INFORMATION CONTACT:

Concerning the regulations, Robert M. Walsh, (202) 622-6090; concerning submissions and delivery of comments, Sonya Cruse (202) 622-7180 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)). Comments on the collection of information should be sent to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503, with copies to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, W:CAR:MP:FP:S:O, Washington, DC 20224. Comments on the collection of information should be received by March 19, 2001. Comments are specifically requested concerning:

Whether the proposed collection of information is necessary for the proper performance of the functions of the IRS, including whether the information will have practical utility;

The accuracy of the estimated burden associated with the proposed collection of information (see below);

How the quality, utility, and clarity of the information to be collected may be enhanced;

How the burden of complying with the proposed collection of information may be minimized, including through the application of automated collection techniques or other forms of information technology; and

Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

The collection of information in this proposed regulation is in § 1.417(e)-1(b)(3)(iv)(B) and § 1.417(e)-

1(b)(3)(v)(A). This collection of information is required by the IRS to ensure that the participant and the participant's spouse consent to a form of distribution from a qualified retirement plan that may result in reduced periodic payments. This information will be used by the plan administrator to verify that the required consent has been given. The collection of information is required to obtain a benefit. The respondents are individuals who are entitled to receive certain types of distributions from a qualified retirement plan or who are married to individuals entitled to receive certain types of distributions from a qualified retirement plan.

Taxpayers provide the information to administrators of qualified retirement plans when a distribution with a retroactive annuity starting date is elected.

Estimated total annual reporting burden: 12,500 hours.

Estimated average annual burden hours per respondent: 0.25 hours.

Estimated number of respondents: 50,000.

The estimated annual frequency of responses is on occasion.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by the Office of Management and Budget.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Background

This document contains proposed amendments to 26 CFR Part 1 under section 417(a)(7) of the Internal Revenue Code (Code). Section 401(a)(11) provides that, subject to certain exceptions, all distributions from a qualified plan must be made in the form of a qualified joint and survivor annuity (QJSA). One such exception is provided in section 417, which allows a participant to elect to waive the QJSA in favor of another form of distribution. Section 417(a)(2) provides that, for the waiver to be valid, the participant's spouse must consent to the waiver. Section 417(a)(3)(A) requires a qualified plan to provide to each participant, within a reasonable period of time before the annuity starting date, a written explanation (QJSA explanation) that describes the QJSA, the right to waive the QJSA and the rights of the

participant's spouse. Under section 417(d), a participant's spouse who has not been married to the participant throughout the 1-year period preceding the annuity starting date is not required to be treated as the spouse for purposes of entitlement to the QJSA. Section 417(a)(2)(B) provides that spousal consent is not required to waive the QJSA if it is established to the satisfaction of a plan representative that such consent may not be obtained because there is no spouse, because the spouse cannot be located, or because of such other circumstances as the Secretary may by regulations prescribe.

Section 417(a)(7), which was added to the Code by section 1451(a) of the Small Business Job Protection Act of 1996, Public Law 104-188 (110 Stat. 1755) (SBJPA), creates an exception to the rules of section 417(a)(3)(A), effective for plan years beginning after December 31, 1996. Section 417(a)(7)(A) provides that, notwithstanding any other provision of section 417(a), a plan may furnish the QJSA explanation after the annuity starting date, as long as the applicable election period is extended for at least 30 days after the date on which the explanation is furnished. Thus, section 417(a)(7)(A) allows the annuity starting date to be a date that is earlier than the date the QJSA explanation is provided, thereby allowing the retroactive payment of benefits that are attributable to the period before the QJSA explanation is provided. Section 417(a)(7)(A)(ii) provides that the Secretary may limit the application of the provision permitting the selection of a retroactive annuity starting date by regulations, except that the regulations may not limit the period of time by which the annuity starting date precedes the furnishing of the written explanation other than by providing that the retroactive annuity starting date may not be earlier than termination of employment.

Section 205(c)(8) of the Employee Retirement Income Security Act of 1974, Public Law 93-406 (88 Stat. 829) (ERISA), provides a parallel rule to section 417(a)(7) of the Code that applies under Title I of ERISA, and authorizes the Secretary of the Treasury to issue regulations limiting the application of the general rule. Thus, Treasury regulations issued under section 417(a)(7) of the Code apply as well for purposes of section 205(c)(8) of ERISA.

On December 18, 1998, final regulations were published in the **Federal Register** (63 FR 70009) which amended § 1.417(e)-1(b)(3)(ii) of the Income Tax Regulations, relating to the timing for the QJSA explanation and the

participant waiver of a QJSA form of distribution. The regulations finalized an earlier set of proposed regulations that were issued in 1995. The regulations specified that the QJSA explanation must be provided before the annuity starting date, except as otherwise provided by section 417(a)(7) for plan years beginning after December 31, 1996, but the regulations did not further address section 417(a)(7).

Explanation of Provisions

In accordance with section 417(a)(7)(A), these proposed regulations would provide that the QJSA explanation may be furnished on or after the annuity starting date under certain circumstances. The proposed regulations refer to the annuity starting date in such cases as the "retroactive annuity starting date", define how payments are made in the case of a retroactive annuity starting date, and set conditions for the use of retroactive annuity starting dates.

Under the proposed regulations, a retroactive annuity starting date could be used only if the plan provides for it and the participant elects to use the retroactive annuity starting date. The election under the proposed regulations would place the participant in approximately the same situation he or she would have been in had benefit payments actually commenced on the retroactive annuity starting date. Accordingly, the proposed regulations would provide that future periodic payments for a participant who elects a retroactive annuity starting date must be the same as the periodic payments that would have been paid to the participant had payments actually commenced on the retroactive annuity starting date and that the participant must also receive a make-up amount to reflect the missed payments (with an appropriate adjustment for interest from the date the payments would have been made to the date of actual payment).

In addition, because the purpose of a retroactive annuity starting date is to place the participant in approximately the same situation that he or she would have been in had benefits commenced on the retroactive date, the retroactive benefit payments would be required to be based upon the terms of the plan in effect as of the retroactive annuity starting date (taking into account plan amendments executed after the retroactive annuity starting date, but made effective on or before that date). Accordingly, the retroactive annuity starting date could not be earlier than the date the participant could have started receiving benefits if the payments had commenced at the

earliest date permitted under the terms of the plan (e.g., the retroactive annuity starting date could not be before the earlier of the date of the participant's termination of employment or attainment of normal retirement age), and the amount of the benefit must satisfy sections 415 and 417 as of the retroactive annuity starting date.

These proposed regulations would not require plans to provide for a retroactive annuity starting date. Instead, plans could continue to provide that the QJSA explanation is to be provided before the annuity starting date under the rules of section 417(a) without regard to section 417(a)(7)(A). Moreover, if a plan is amended to provide for a retroactive annuity starting date, the plan could impose additional restrictions on availability not imposed under these proposed regulations, provided that the additional restrictions did not violate any of the rules applicable to qualified plans. For example, plans that generally provide benefit options that include annuities and lump sum payments could provide that retroactive annuity starting dates are available only for participants who elect annuities.

These proposed regulations make it clear that the notice, consent, and election rules of section 417(a)(1), (2), and (3), and the regulations thereunder, would apply to the retroactive payment of benefits but with several modifications. These modifications generally reflect the fact that the existing timing rules relating to notice and consent are generally tied to an annuity starting date that is after the furnishing of the QJSA explanation.¹

Section 417(a)(7)(A) specifically permits the QJSA explanation to be made after the annuity starting date and modifies the participant election period in these situations. These regulations would make a comparable adjustment for the timing rules applicable to spousal consent by providing generally that, for retroactive payments under section 417(a)(7), the first date of actual payment is substituted for the annuity starting date in applying the timing rules for notice and consent. These modifications are intended to ensure that the notice and election are generally contemporaneous with the

commencement of benefits, but the modifications recognize the need for flexibility in the timing to take into account administrative delays. In furtherance of that goal, these proposed regulations would modify the general timing rule applicable to the furnishing of notices, and to participant elections and spousal consent. The proposed regulations would provide that the participant's election to waive the QJSA under section 417(a)(1)(A)(i) and the spouse's consent under section 417(a)(2) must generally be made before the annuity starting date, but permits a later election if the distribution commences no more than 90 days after the QJSA explanation required by section 417(a)(3)(A) is furnished to the participant. This modification would apply without regard to the retroactivity of annuity starting dates, but would include an exception for reasonable administrative delay in the distribution of benefits.

Pursuant to the regulatory authority provided in section 417(a)(7)(A)(ii), these proposed regulations include a special spousal consent rule in addition to those rules applicable under section 417(a). Under this special rule, if the spouse's survivor annuity under a QJSA with an annuity starting date after the date the QJSA explanation was provided would be greater than the spouse's survivor annuity pursuant to the participant's election of a retroactive annuity starting date, the participant could not elect a retroactive annuity starting date unless the participant's spouse (determined at the time distributions actually commence) consents to the distribution. This special rule applies even if the form of benefit that the participant elects as of the retroactive annuity starting date is a QJSA. Thus, for example, where a QJSA that begins after the QJSA explanation is furnished would provide \$1,000 monthly to the participant with a survivor annuity of \$500 monthly to the spouse, and a QJSA with a retroactive annuity starting date would provide \$900 monthly to the participant with a survivor annuity of \$450 monthly to the spouse, together with a \$20,000 make-up payment to the participant, the spouse would be required to consent in order for the participant to elect the retroactive annuity starting date. Spousal consent under this special rule would not be required in this example if the spouse's survivor annuity under the retroactive annuity starting date election is at least \$500 per month.

These proposed regulations would also provide that, pursuant to section 417(a)(2)(B), the consent of the participant's spouse as of the retroactive

annuity starting would not be required if that spouse is not the participant's spouse as of the date distributions commence, unless otherwise provided in a qualified domestic relations order (as defined in section 414(p)).

The proposed regulations would impose an additional condition on the availability of a retroactive annuity starting date, regarding the permissible amount of the distribution under sections 417(e)(3) (if applicable) and 415. To satisfy this condition, the distribution would be required to be adjusted, if necessary, to satisfy the requirements of sections 417(e)(3) (if applicable) and 415 if the date the distribution commences is substituted for the annuity starting date.

Proposed Effective Date

These regulations are proposed to be applicable for plan years beginning on or after January 1, 2002.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It is hereby certified that these regulations will not have a significant economic impact on a substantial number of small entities. This certification is based on the fact that the regulations require the collection of plan participants' written elections requesting qualified retirement plan distributions, and written spousal consent to these distributions, under limited circumstances. It is anticipated that most small businesses affected by these regulations will be sponsors of qualified retirement plans. Since these written participant elections and written spousal consents are required to be collected only for certain distributions, and since, in the case of a small plan, there will be relatively few distributions per year (and even fewer that are subject to these requirements), small plans that provide distributions for which this collection of information is required will only have to collect a small number of participant elections and spousal consents as a result of these regulations. Accordingly, a Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Requests for a Public Hearing

Before these proposed regulations are adopted as final regulations,

¹ For example, section 417(a)(1) provides that a participant may elect to waive the QJSA within the "applicable election period" which is defined by section 417(a)(6) as the 90-day period ending on the annuity starting date. Similarly, § 1.417(e)-1(b)(3)(i) provides that the written consent of the plan participant and the participant's spouse must be made no more than 90 days before the annuity starting date. Also, § 1.417(e)-1(b)(3)(ii) provides that the QJSA explanation must generally be provided no less than 30 days and no more than 90 days before the annuity starting date.

consideration will be given to any written comments (a signed original and 8 copies) or electronic comments that are submitted timely to the IRS. The IRS and Treasury request comments on the clarity of the proposed rules and how they can be made easier to understand. All comments will be available for public inspection and copying. A public hearing may be scheduled if requested in writing by any person that timely submits written comments. If a public hearing is scheduled, notice of the date, time, and place for the public hearing will be published in the **Federal Register**.

Drafting Information

The principal authors of these regulations are Robert M. Walsh and Linda S. F. Marshall, Office of Division Counsel/Associate Chief Counsel (Tax Exempt and Government Entities). However, other personnel from the IRS and Treasury participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 continues to read, in part, as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. Section 1.417(e)–1 is amended by:

1. Revising paragraph (b)(3)(i).
2. Revising paragraph (b)(3)(ii) introductory text.
3. Revising paragraph (b)(3)(ii)(C).
4. Redesignating paragraphs (b)(3)(iii) and (b)(3)(iv) as paragraphs (b)(3)(viii) and (b)(3)(ix), respectively.
5. Adding new paragraphs (b)(3)(iii) through (b)(3)(vii).

The additions and revisions read as follows:

§ 1.417(e)–1 Restrictions and valuations of distributions from plans subject to sections 401(a)(11) and 417.

* * * * *

(b) * * *
(3) * * *

(i) Written consent of the participant and the participant's spouse to the distribution must be made not more than 90 days before the annuity starting date, and, except as otherwise provided in paragraphs (b)(3)(iii) and (b)(3)(iv) of this section, no later than the annuity starting date.

(ii) A plan must provide participants with the written explanation of the QJSA required by section 417(a)(3) no less than 30 days and no more than 90 days before the annuity starting date, except as provided in paragraph (b)(3)(iv) of this section regarding retroactive annuity starting dates. However, if the participant, after having received the written explanation of the QJSA, affirmatively elects a form of distribution and the spouse consents to that form of distribution (if necessary), a plan will not fail to satisfy the requirements of section 417(a) merely because the written explanation was provided to the participant less than 30 days before the annuity starting date, provided that the following conditions are met:

* * * * *

(C) The annuity starting date is after the date that the explanation of the QJSA is provided to the participant.

* * * * *

(iii) The plan may permit the annuity starting date to be before the date that any affirmative distribution election is made by the participant (and before the date that distribution is permitted to commence under paragraph (b)(3)(ii)(D) of this section), provided that, except as otherwise provided in paragraph (b)(3)(vii) of this section regarding administrative delay, distributions commence not more than 90 days after the explanation of the QJSA is provided.

(iv) *Retroactive annuity starting dates.* (A) Notwithstanding the requirements of paragraphs (b)(3)(i) and (ii) of this section, pursuant to section 417(a)(7), a defined benefit plan is permitted to provide benefits based on a retroactive annuity starting date if the requirements described in paragraph (b)(3)(v) of this section are satisfied. A defined benefit plan is not required to provide for retroactive annuity starting dates. If a plan does provide for a retroactive annuity starting date, it may impose conditions on the availability of a retroactive annuity starting date in addition to those imposed by paragraph (b)(3)(v) of this section, provided that imposition of those additional conditions does not violate any of the rules applicable to qualified plans. For example, a plan that includes a single sum payment as a benefit option may limit the election of a retroactive annuity starting date to those participants who do not elect the single sum payment. A defined contribution plan is not permitted to have a retroactive annuity starting date.

(B) For purposes of this section, a "retroactive annuity starting date" is an annuity starting date affirmatively

elected by a participant that occurs on or before the date the written explanation required by section 417(a)(3) is provided to the participant. In order for a plan to treat a participant as having elected a retroactive annuity starting date, future periodic payments with respect to a participant who elects a retroactive annuity starting date must be the same as the future periodic payments, if any, that would have been paid with respect to the participant had payments actually commenced on the retroactive annuity starting date. The participant must receive a make-up payment to reflect any missed payment or payments for the period from the retroactive annuity starting date to the date of the actual make-up payment (with an appropriate adjustment for interest from the date the missed payment or payments would have been made to the date of the actual make-up payment). Thus, the benefit determined as of the retroactive annuity starting date must satisfy the requirements of sections 417(e)(3), if applicable, and section 415 with the applicable interest rate and applicable mortality table determined as of that date. Similarly, a participant is not permitted to elect a retroactive annuity starting date that precedes the date upon which the participant could have otherwise started receiving benefits (e.g., the earlier of the participant's termination of employment or the participant's normal retirement age) under the terms of the plan in effect as of the retroactive annuity starting date. A plan does not fail to treat a participant as having elected a retroactive annuity starting date as described in this paragraph (b)(3)(iv)(B) merely because the distributions are adjusted to the extent necessary to satisfy the requirements of paragraph (b)(3)(v)(B) of this section relating to sections 415 and 417(e)(3).

(C) If the participant's spouse as of the retroactive annuity starting date would not be the participant's spouse determined as if the date distributions commence were the participant's annuity starting date, consent of that former spouse is not needed to waive the QJSA with respect to the retroactive annuity starting date, unless otherwise provided under a qualified domestic relations order (as defined in section 414(p)).

(D) A distribution payable pursuant to a retroactive annuity starting date election is treated as excepted from the present value requirements of paragraph (d) of this section under paragraph (d)(6) of this section if the distribution form would have been described in paragraph (d)(6) of this section had the distribution

actually commenced on the retroactive annuity starting date.

(v) *Requirements applicable to retroactive annuity starting dates.* A distribution is permitted to have a retroactive annuity starting date with respect to a participant's benefit only if the following requirements are met:

(A) The participant's spouse (including an alternate payee who is treated as the spouse under a qualified domestic relations order (QDRO), as defined in section 414(p)), determined as if the date distributions commence were the participant's annuity starting date, consents to the distribution in a manner that would satisfy the requirements of section 417(a)(2). The spousal consent requirement of this paragraph (b)(3)(v)(A) is satisfied if such spouse consents to the distribution under paragraph (b)(2)(i) of this section. The spousal consent requirement of this paragraph (b)(3)(v)(A) does not apply if the amount of such spouse's survivor annuity payments under the retroactive annuity starting date election is no less than the amount that the payments to such spouse would have been under a QJSA with an annuity starting date after the date that the explanation was provided.

(B) The distribution (including appropriate interest adjustments) provided based on the retroactive annuity starting date would satisfy the requirements of sections 417(e)(3), if applicable, and section 415 if the date the distribution commences is substituted for the annuity starting date for all purposes, including for purposes of determining the applicable interest rate and the applicable mortality table.

(vi) *Timing of notice and consent requirements in the case of retroactive annuity starting dates.* In the case of a retroactive annuity starting date, the date of the first actual payment of benefits based on the retroactive annuity starting date is substituted for the annuity starting date for purposes of satisfying the timing requirements for giving consent and providing an explanation of the QJSA provided in paragraphs (b)(3)(i) and (ii) of this section, except that the substitution does not apply for purposes of paragraph (b)(3)(iii) of this section. Thus, the written explanation required by section 417(a)(3)(A) must generally be provided no less than 30 days and no more than 90 days before the date of the first payment of benefits and the election to receive the distribution must be made after the written explanation is provided and on or before the date of the first payment. Similarly, the written explanation may also be provided less than 30 days prior to the first payment

of benefits if the requirements of paragraph (b)(3)(ii) of this section would be satisfied if the date of the first payment is substituted for the annuity starting date.

(vii) *Administrative delay.* A plan will not fail to satisfy the 90-day timing requirements of paragraphs (b)(3)(iii) and (vi) of this section merely because, due solely to administrative delay, a distribution commences more than 90 days after the written explanation of the QJSA is provided to the participant.

* * * * *

Robert E. Wenzel,

Deputy Commissioner of Internal Revenue.

RIN 1545-AY66

Taxable Years of Partner and Partnership; Foreign Partners

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking and notice of public hearing.

SUMMARY: This document contains proposed regulations on the taxable year of a partnership with foreign partners. The proposed regulations affect partnerships and their partners. This document also contains a notice of public hearing on these proposed regulations.

DATES: Written comments must be received by April 17, 2001. Requests to speak (with outlines of oral comments) at the public hearing scheduled for June 6, 2001, at 10 a.m., must be submitted by May 16, 2001.

ADDRESSES: Send submissions to: CC:M&SP:RU (REG-104876-00), room 5226, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand delivered between the hours of 8 a.m. and 5 p.m. to: CC:M&SP:RU (REG-104876-00), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC. Alternatively, taxpayers may submit comments electronically via the Internet by selecting the "Tax Regs" option of the IRS Home Page or by submitting comments directly to the IRS Internet site at http://www.irs.ustreas.gov/tax_regs/regslst.html. The public

hearing will be held in room 4718, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT:

Concerning the regulations, Dan Carmody, (202) 622-3080; concerning specific international issues, Ronald M. Gootzeit, (202) 622-3860; concerning submissions of comments, the hearing, and/or to be placed on the building access list to attend the hearing, LaNita VanDyke, (202) 622-7180 (not toll-free numbers).

SUPPLEMENTARY INFORMATION: This document proposes to amend section 706 of the Income Tax Regulations (26 CFR part 1) regarding partnership taxable years.

Background

Section 706 governs the taxable years for a partnership and its partners. The partners and the partnership each have their own taxable years, which may or may not coincide. Under section 706(a), for a partner's taxable year, the partner must include in taxable income the partner's share of any income, gain, loss, deduction, or credit of the partnership for the partnership's taxable year that ends within or with the partner's taxable year. Section 706(b) provides rules for determining a partnership's taxable year.

Prior to the Tax Reform Act of 1986, it was possible for partners to create income deferral opportunities through arranging divergent taxable years for a partnership and its partners. For example, under certain circumstances, a partnership could elect a June 30 taxable year while its partners were calendar year taxpayers. Under such an arrangement, the partners would include partnership income earned from July 1, Year 1, to June 30, Year 2, in Year 2, when the partnership's taxable year ended, even though six months of income was generated during Year 1. To prevent this potential for income deferral, Congress amended section 706(b). See generally Staff of the Joint Committee on Taxation, *General Explanation of the Tax Reform Act of 1986*, 533-39 (1986).

Section 706(b) provides that, unless the partnership establishes a business purpose for a different taxable year, a partnership cannot have a taxable year other than: (i) the majority interest taxable year; (ii) if there is no majority interest taxable year, the taxable year of all the principal partners of the partnership; or (iii) if there is no taxable year described in (i) or (ii), the calendar year unless the Secretary by regulation prescribes another period. Section

1.706–1T(a)(1) and (2) provides that if neither (i) nor (ii) is applicable, the partnership's taxable year will be the taxable year that results in the least aggregate deferral of partnership income.

Additionally, § 1.706–3T(a) provides that under certain circumstances, a tax-exempt partner will be disregarded for purposes of section 706(b).

Explanation of Provisions

I. Treatment of Foreign Partners

Currently, foreign partners are taken into consideration when determining a partnership's taxable year under section 706(b). In some circumstances, this could allow the taxable year of a partnership to be determined for Federal tax purposes by reference to the taxable year of one or more partners who may not be subject to U.S. taxation on income earned through the partnership. For instance, assume that a foreign partner owns a majority interest in a partnership that generates only foreign source income that is not effectively connected with a trade or business conducted within the United States. The minority partners are domestic persons subject to tax in the United States on income earned through the partnership. If the taxable year or years of the domestic partners are different from that of the majority partner, the majority partner's taxable year would determine the partnership's taxable year, which would affect the timing of the domestic partners' inclusion of partnership income. Thus, by conforming the partnership's taxable year to the taxable year of foreign partners, the mechanical application of section 706(b) can create deferral for those partners who are subject to tax in the United States on income earned through the partnership, while having no impact on the majority foreign partners who are not subject to tax in the United States on such income. The IRS and the Treasury do not believe that such a result is consistent with the intent of the statute.

A. Disregard Certain Foreign Partners

The proposed regulations generally require foreign partners who are not subject to U.S. taxation on a net basis on income earned through the partnership to be disregarded for purposes of applying section 706(b). For these purposes a foreign partner will be considered subject to Federal income tax only if the partner is allocated gross income of the partnership that is effectively connected (or treated as effectively connected) with the conduct of a trade or business within the United States (effectively connected income or

ECI). In the case of a foreign partner claiming benefits under a U.S. income tax treaty, a foreign partner will be disregarded unless it is allocated gross income that is attributable to a permanent establishment in the United States.

A foreign partner also may be subject to U.S. Federal income tax on its distributive share of fixed or determinable annual or periodic income (FDAP income) from U.S. sources. In certain circumstances, the timing for imposing United States withholding tax on FDAP income earned through a partnership may be affected by the partnership's taxable year. See, e.g., § 1.1441–5(b)(2)(i) (providing the timing for withholding under section 1441 in the case of a domestic partnership that has received, but not distributed, FDAP income that is includible in the distributive share of a foreign partner). The IRS and Treasury believe that the withholding provisions of section 1441 provide a more appropriate mechanism than section 706 for addressing timing issues for these partners. Additionally, the IRS and Treasury are concerned that the ability of a partnership to earn small amounts of FDAP income, and thereby alter the determination of its taxable year, may permit inappropriate manipulation of the rule under section 706(b) for the domestic partners. Accordingly, under these proposed regulations, the taxable year of a foreign partner would be disregarded for purposes of section 706(b) if that partner is subject to Federal income tax solely due to the presence of U.S. source income earned through the partnership that is not ECI. In addition, it is irrelevant, for purposes of the proposed regulations, whether the foreign partner is subject to tax in the United States with respect to income other than income earned by the partnership.

The rule for foreign partners provided in these proposed regulations generally is consistent with the present rule under § 1.706–3T for the treatment of partners that are exempt from taxation under section 501(a). The taxable years of tax-exempt partners are not considered for purposes of section 706(b) unless those partners are subject to tax on income from the partnership. One difference between the rules for foreign partners and the rules for tax-exempt partners is that foreign partners will be included in determining a partnership's taxable year where the foreign partner is allocated gross income that is effectively connected with a U.S. trade or business, but actually has a net loss from the partnership for the taxable year (i.e., the foreign partners are not actually subject to tax on their allocable portion of the

partnership's income). By contrast, a tax-exempt partner is disregarded where its allocable share of the partnership's tax items produces a net loss for the taxable year even though, if the foreign partner were allocated net income for the taxable year, the tax-exempt entity would have been subject to tax on such income. The IRS and Treasury are considering modifying the tax-exempt rule to conform with the proposed rule for foreign partners and request comments in this regard.

Finally, for purposes of these rules, the proposed regulations generally define a foreign partner as a partner that is not a U.S. person (as defined in section 7701(a)(30)), but provide that controlled foreign corporations (CFCs) and foreign personal holding companies (FPHCs) are not treated as foreign partners. These entities are not treated as foreign for purposes of determining a partnership's taxable year under section 706 because the U.S. owners of such entities may be subject to Federal income taxation on a current basis with respect to income earned by the entities.

The IRS and Treasury also considered, but did not include, a similar rule for passive foreign investment companies (PFICs). The proposed regulations do not include a similar rule for PFICs because, unlike the rules for CFCs and FPHCs, which require that a majority of the ownership be concentrated in a small group of U.S. persons, the PFIC rules apply without regard to the level of ownership of the individual, or of all U.S. owners in the aggregate. Additionally, in most instances where a PFIC does have substantial U.S. ownership, it will also be a CFC or a FPHC.

B. Minority Interest Rule

The IRS and Treasury recognize that requiring a partnership taxable year to be determined without regard to certain foreign partners may present difficulties for minority partners in some cases. If the taxable years of certain foreign partners are disregarded for purposes of section 706(b), it is possible that the taxable year of a partnership may be determined solely by reference to the taxable year of one or more small minority domestic partners. This could create significant administrative burdens for minority partners if the partnership maintains its books and records on a taxable year selected by significant foreign partners that is different from the taxable year of the minority partner or partners.

In order to provide relief in this situation, the proposed regulations contain an exception providing that foreign partners will not be disregarded

for purposes of section 706(b) if the partnership's taxable year would be determined by reference to partners that individually hold less than a 10-percent interest, and in the aggregate hold less than a 20-percent interest, in the capital and profits of the partnership. For purposes of this rule, a partner's interest will include interests held directly and interests held by related partners. In determining whether the minority interest rule applies, the proposed regulations take into account the ownership of tax-exempt entities that are disregarded under § 1.706-3T(a).

Where a domestic tax-exempt entity (or entities) owns a relatively small interest in the partnership, but enough to cause the minority interest rule not to apply, the result may be anomalous, given that the tax-exempt entity has no real interest in a particular taxable year and thus has no incentive to convince significant foreign partners to cause the partnership to determine its taxable year by reference to the domestic partners. However, where such a tax-exempt entity (or entities) owns a majority interest in the partnership, the result may be more appropriate because the domestic partners are more likely to have significant bargaining power regarding the taxable year vis-a-vis the foreign partners. An appropriate solution may be to exclude tax-exempt entities from both the numerator and denominator in applying the de minimis rule. The IRS and Treasury request comments regarding how tax-exempt entities should be treated for purposes of the minority interest rule.

C. Transitional Relief

Under current law, a partnership may have adopted a taxable year that creates deferral by reference to the taxable year of a foreign partner not subject to U.S. net income taxation. In such instances, compliance with these regulations could result in a change in the partnership taxable year which would cause a "bunching" of more than 12 months of partnership income into a single taxable year of the partners subject to Federal income tax.

For example, consider a partnership that has a June 30 taxable year because of the presence of a 60-percent foreign partner that is not subject to U.S. net income taxation on income earned through the partnership. This taxable year creates six months of deferral for the 40-percent domestic partner, who is on the calendar year. In the year that these proposed regulations become effective, two partnership taxable years (the taxable year concluding on June 30 and the initial short calendar year concluding December 31) would close

during the domestic partner's taxable year. Thus, section 706(a) would require the domestic partner to recognize its distributive share of 18 months of partnership income during a single taxable year. While the historic taxable year of the partnership in this example is inconsistent with the intent of section 706(b), the IRS and Treasury recognize that the potential bunching of income caused by changing to an appropriate taxable year might present an undue hardship for some taxpayers.

In order to alleviate such a hardship, the proposed regulations would permit adversely affected taxpayers to apply the four-year spread provisions of § 1.702-3T. This transitional rule will have limited application; it is intended only to provide relief for bunching of income that occurs in the first taxable year beginning on or after the effective date of these proposed regulations.

II. Application of § 1.701-2

The mechanical rules of section 706(b) operate to limit partners' opportunities to defer the recognition of partnership income. Where partners have different taxable years, eliminating or limiting deferral for one partner may result in increasing deferral for another partner. Such deferral is an anticipated result of section 706(b). However, an application of the mechanical rules of section 706(b) and these proposed regulations remains subject to the anti-abuse rule of § 1.701-2.

For example, assume that these proposed regulations would disregard the taxable year of a 76-percent foreign partner and require the partnership (which only has foreign operations, and therefore does not earn ECI) to adopt the taxable year of the 24-percent domestic partner. Conceivably the partners could attempt to avoid this result by forming a tiered structure where the foreign partner would own a 95-percent interest in an upper-tier domestic partnership that would hold, as its only asset, an 80 percent interest in the lower-tier operating partnership (the domestic partner would own the remaining 5 percent of the upper-tier partnership and the remaining 20 percent of the lower-tier partnership). In substance, this is the same arrangement as the single partnership except that the minority interest rule would generally require the upper-tier partnership to adopt the taxable year of the foreign partner (because the domestic partner owns less than a 10-percent interest in the upper-tier partnership). The upper-tier domestic partnership's taxable year would then be considered the majority interest taxable year of the lower-tier partnership under section

706(b)(1)(B)(i). In these circumstances, the Commissioner may determine that in order to achieve a tax result that is consistent with the intent of section 706, § 1.701-2 should apply. In such event, the Commissioner may disregard the upper-tier partnership and treat the assets thereof (in this case, the interest in the lower-tier partnership) as being owned directly by its partners, with the result that the foreign partner would be disregarded in determining the taxable year of the lower-tier partnership under section 706(b) and these proposed regulations.

III. Finalization of Prior Proposed Regulations

The current temporary regulations under section 706 are the product of three separate Treasury decisions. The text of these Treasury decisions, TD 7991 (adopted November 29, 1984), TD 8169 (adopted December 23, 1987), and TD 8205 (adopted May 24, 1988), were also contemporaneously promulgated as proposed regulations, LR-183-84 (published in the **Federal Register** on November 30, 1984), LR-101-86 (published in the **Federal Register** on December 29, 1987), and LR-53-880 (published in the **Federal Register** on May 27, 1988). These proposed regulations have not been withdrawn, and it is likely that they will be finalized in conjunction with the finalization of the regulations proposed by this document. The IRS and Treasury expect that the finalization of these previously proposed regulations will be accompanied by the withdrawal of the existing temporary regulations. Comments previously received in connection with the prior proposed regulations will be considered as well as new or additional comments with respect to such regulations.

IV. Effective Date

These regulations are proposed to apply to partnership taxable years beginning on or after the date final regulations are published in the **Federal Register**. For example, if the final regulations were published on November 1, 2001, a partnership that historically has determined its taxable year by reference to a 75-percent foreign partner with a March 31 taxable year end rather than by reference to a 25-percent domestic partner that uses the calendar year would be required to change to the calendar year as of April 1, 2002 (the partnership year beginning after the date final regulations were published). This would result in a short taxable year from April 1, 2002, to December 31, 2002.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations, and because these regulations do not impose on small entities a collection of information requirement, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Therefore, a Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written comments (preferably a signed original and eight (8) copies) that are submitted timely to the IRS. The IRS and Treasury specifically request comments on the clarity of the proposed regulations and how they may be made easier to understand. All comments will be available for public inspection and copying.

A public hearing has been scheduled for June 6, 2001, beginning at 10 a.m., in room 4718, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, DC. Due to building security procedures, visitors must enter at the 10th Street entrance, located between Constitution and Pennsylvania Avenues, NW. In addition, all visitors must present photo identification to enter the building. Because of access restrictions, visitors will not be admitted beyond the immediate entrance area more than 15 minutes before the hearing starts. For information about having your name placed on the building access list to attend the hearing, see the **FOR FURTHER INFORMATION CONTACT** section of this preamble.

The rules of 26 CFR 601.601(a)(3) apply to the hearing. Persons that wish to present oral comments at the hearing must submit timely written comments and must submit an outline of the topics to be discussed and the time to be devoted to each topic (preferably a signed original and eight (8) copies) by May 16, 2001.

A period of 10 minutes will be allotted to each person for making comments.

An agenda showing the scheduling of the speakers will be prepared after the deadline for receiving outlines has passed. Copies of the agenda will be available free of charge at the hearing.

Drafting Information

The principal author of these regulations is Dan Carmody, Office of Chief Counsel (Passthroughs and Special Industries). However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. Section 1.706-4 is added to read as follows:

§ 1.706-4 Certain foreign partners disregarded.

(a) *General rule*—(1) *Foreign partners not claiming benefits under a U.S. income tax treaty.* In determining the taxable year (the current taxable year) of a partnership under section 706(b) and the regulations thereunder, a foreign partner shall be disregarded unless such partner is allocated any gross income of the partnership that was effectively connected (or treated as effectively connected) with the conduct of a trade or business within the United States during the partnership's taxable year immediately preceding the current taxable year. However, if a foreign partner was not a partner during the partnership's immediately preceding taxable year, such partner will be disregarded for the current taxable year if the partnership reasonably believes that the partner will not be allocated any gross income generated by the partnership during the current taxable year that is effectively connected with the conduct of a trade or business within the United States.

(2) *Foreign partners claiming benefits under a U.S. income tax treaty.* In the case of a foreign partner claiming benefits under an income tax treaty between the United States and another jurisdiction, a foreign partner will be disregarded under this paragraph (a) unless such partner was allocated any

gross income that was attributable to a permanent establishment in the United States during the partnership's taxable year immediately preceding the current taxable year (or, if such partner was not a partner during the immediately preceding taxable year, the partnership reasonably believes that such partner will be allocated such income during the current taxable year).

(b) *Minority interest rule.* If the partners that are not disregarded by paragraph (a) of this section (absent the application of this paragraph (b)) individually hold less than a 10-percent interest, and in the aggregate hold less than a 20-percent interest, in the capital and profits of the partnership, paragraph (a) of this section will not apply. For purposes of determining ownership in the partnership after application of paragraph (a) of this section, the constructive ownership rules of section 318 shall apply, and the attribution rules of section 267(c) also shall apply to the extent they attribute ownership to persons to whom section 318 does not attribute ownership. However, "10 percent" shall be substituted for "50 percent" in section 318(a)(2)(C) and (3)(C). For purposes of determining if partners hold less than a 20-percent interest in the aggregate, the same interests will not be considered as being owned by more than one partner.

(c) *Definition of foreign partner.* For purposes of this section, a foreign partner is any partner that is not a U.S. person (as defined in section 7701(a)(30)), except that a partner that is a controlled foreign corporation (as defined in section 957(a)) or a foreign personal holding company (as defined in section 552) shall not be treated as a foreign partner.

(d) *Example.* The provisions of this section may be illustrated by the following example:

Example. Partnership B is owned by two partners, F, a foreign corporation that owns a 95-percent interest in the capital and profits of partnership B, and D, a domestic corporation that owns the remaining 5-percent interest in the capital and profits of partnership B. Partnership B is not engaged in the conduct of a trade or business within the United States, and, accordingly, partnership B does not earn any income that is effectively connected with a U.S. trade or business. F uses a March 31 fiscal year, and causes partnership B to maintain its books and records on a March 31 fiscal year as well. D is a calendar year taxpayer. Under paragraph (a) of this section, F would be disregarded and partnership B's taxable year would be determined by reference to D. However, because D owns less than a 10-percent interest in the capital and profits of partnership B, the minority interest rule of paragraph (b) of this section applies, and

partnership B must adopt the March 31 fiscal year.

(e) *Effective date*—(1) *Generally*. The provisions of this section are applicable for partnership taxable years that begin on or after the date final regulations are published in the **Federal Register**.

(2) *Transition rule*. Partners of a partnership that is required to change its taxable year as of the beginning of its first taxable year after the date final regulations are published in the **Federal Register** may apply the provisions of § 1.702-3T if the change in taxable year occurs in the first taxable year following the date final regulations are published in the **Federal Register**.

Internal Revenue Service

26 CFR Part 1

[Reg-107175-00]

RIN 1545-AY19

Definition of Disqualified Person

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking and notice of public hearing.

SUMMARY: This document contains proposed regulations to narrow the definition of the term disqualified person for section 1031 like-kind exchanges. The regulations are in response to recent changes in the federal banking law, especially the repeal of section 20 of the Glass-Steagall Act of 1933. The regulations will affect the eligibility of certain persons to serve as escrow holders of qualified escrow accounts, trustees of qualified trusts, or as qualified intermediaries. This document also provides notice of a public hearing on these proposed regulations.

DATES: Written or electronic comments must be received by April 17, 2001. Requests to speak and outlines of topics to be discussed at the public hearing scheduled for June 5, 2001, at 10 a.m. must be received by May 15, 2001.

ADDRESSES: Send submissions to: CC:M&SP:RU (REG-107175-00), room 5226, Internal Revenue Service, Post Office Box 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand delivered Monday through Friday between the hours of 8 a.m. and

5 p.m. to: CC:M&SP:RU (REG-107175-00), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC. Alternatively, taxpayers may submit comments electronically via the Internet by selecting the "Tax Regs" option on the IRS Home Page, or by submitting comments directly to the IRS Internet site at http://www.irs.ustreas.gov/tax_regs/regslst.html. The public hearing will be held in room 4718, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT:

Concerning the proposed regulations, J. Peter Baumgarten, at (202) 622-4950; concerning submissions of comments, the hearing, or to be placed on the building access list to attend the hearing, Treena Garrett, at (202) 622-7190 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Background and Explanation of Provisions

This document contains proposed amendments to the Income Tax Regulations (26 CFR part 1) for the definition of disqualified person under section 1.1031(k)-1(k).

An exchange of property, like a sale, usually results in the current recognition of gain or loss. Section 1031(a) provides an exception to the general rule. Under section 1031(a), no gain or loss is recognized if property held for productive use in a trade or business or for investment is exchanged solely for property of a like kind that is to be held either for productive use in a trade or business or for investment.

Taxpayers may use a qualified escrow account, qualified trust, or qualified intermediary (or any combination of the three) to facilitate a like-kind exchange. A requirement common to qualified escrow accounts, qualified trusts, and qualified intermediaries is that the escrow holder, trustee, or intermediary may not be the taxpayer or a disqualified person.

Section 1.1031(k)-1(k) defines a disqualified person to include a person that is an agent of the taxpayer at the time of the transaction. An agent includes a person that has acted as the taxpayer's employee, attorney, accountant, investment banker or broker, or real estate agent or broker within two years of the taxpayer's transfer of relinquished property. However, in determining whether a person is a disqualified person, services provided by such person for the taxpayer with respect to section 1031 exchanges of property and routine

financial, title insurance, escrow, or trust services provided to the taxpayer by a financial institution, title insurance company, or escrow company are not taken into account. A person that is related to a disqualified person, determined by using the attribution rules of sections 267(b) and 707(b) but substituting 10 percent for 50 percent, is also considered a disqualified person.

Under section 20 of the Banking Act of 1933 (12 U.S.C. 377) (the Glass-Steagall Act), banks generally were proscribed from affiliation with any corporation, association, business trust, or other similar organization engaged principally in the issue, flotation, underwriting, public sale, or distribution at wholesale or retail or through syndicate participation of stocks, bonds, debentures, notes, or other securities. However, last year Congress enacted the Gramm-Leach-Bliley Act, Public Law 106-102 (November 12, 1999), 113 Stat. 1341 (the GLB Act). Section 101 of the GLB Act repeals section 20 of the Glass-Steagall Act. In addition, section 103 of the GLB Act amends section 4 of the Bank Holding Company Act of 1956 (12 U.S.C. 1843) by adding new subsection (k). Subsection (k) specifically authorizes qualifying financial institutions to engage in activities that are financial in nature, such as (1) providing financial, investment, or economic advisory services, including advising an investment company (as defined in section 3 of the Investment Company Act of 1940 (15 U.S.C. 80a-3)); (2) issuing and selling instruments representing interests in pools of assets permissible for a bank to hold directly; and (3) underwriting, dealing in, and making a market in securities.

As a consequence of the GLB Act (and other changes in policy by the Federal Reserve System in recent years), many banks and bank holding companies are, or are in the process of becoming, members of controlled groups that include investment banking and brokerage firms. This, in turn, may cause the banks, bank holding companies, and their subsidiaries to be disqualified persons for purposes of section 1031 by virtue of the related party rule of § 1.1031(k)-1(k)(4).

Treasury and the Service believe that, in general, banks should be permitted to serve as qualified intermediaries, escrow holders, or trustees. Banks, as regulated institutions, have historically acted in this role as neutral or independent holders of funds. These regulations permit banks to continue in this role despite recent legislative and regulatory changes.

In order to account for changes in the banking industry, the proposed regulations generally provide that a bank that is a member of a controlled group that includes an investment banking or brokerage firm as a member will not be a disqualified person merely because the investment banking or brokerage firm has provided services to an exchange customer within a two-year period ending on the date of the transfer of the relinquished property by that customer.

Proposed Effective Date

The regulations are applicable for transfers of property made by a taxpayer on or after January 17, 2001.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations, and, because the regulations do not impose a collection of information on small entities, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Pursuant to section 7805(f) of the Internal Revenue Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any electronic or written comments that are submitted timely to the IRS. The IRS and the Treasury Department request comments on the merits of the proposed regulations and how the proposed regulations can be made clearer and easier to understand. All comments will be available for public inspection and copying.

A public hearing has been scheduled for June 5, 2001, beginning at 10 a.m. in room 4718 of the Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, DC. Due to building security procedures, visitors must enter at the main Constitution Avenue entrance between 10th and 12th Streets, NW. In addition, all visitors must present photo identification to enter the building. Because of access restrictions, visitors will not be admitted beyond the immediate entrance area more than 15 minutes before the hearing starts. For information about having your name placed on the building access list to

attend the hearing, see the **FOR FURTHER INFORMATION CONTACT** section of this preamble.

The rules of 26 CFR 601.601(a)(3) apply to the hearing. Persons who wish to present oral comments at the hearing must submit electronic or written comments and an outline of the topics to be discussed and the time to be devoted to each topic by May 15, 2001. A period of ten (10) minutes will be allotted to each person for making comments. An agenda showing the scheduling of the speakers will be prepared after the deadline for receiving the outlines has passed. Copies of the agenda will be available free of charge at the hearing.

Drafting Information

The principal author of these regulations is J. Peter Baumgarten of the Office of Associate Chief Counsel (Income Tax & Accounting). However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Proposed Amendment to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. Section 1.1031(k)–1 is amended by adding a sentence to the end of paragraph (k)(4) to read as follows:

§ 1.1031(k)–1 Treatment of deferred exchanges.

* * * * *

(k) * * *

(4) * * * However, with respect to transfers of relinquished property made by a taxpayer on or after the date on which these regulations are published as final regulations, this paragraph (k)(4) does not apply to a bank (as defined in section 581) that is a member of a controlled group (as determined under section 267(f)(1), substituting “10 percent” for “50 percent” where it appears), where a person described in paragraph (k)(2) of this section is an investment banker or broker that has provided investment banking or brokerage services to the taxpayer

within the 2-year period and also is a member of the controlled group.

Guidance on Reporting of Deposit Interest Paid to Nonresident Aliens

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking and notice of public hearing.

SUMMARY: This document contains proposed regulations that provide guidance on the reporting requirements for interest on deposits maintained at the U.S. office of certain financial institutions and paid to nonresident alien individuals. These proposed regulations affect persons making payments of interest with respect to such a deposit. This document also provides a notice of public hearing on these proposed regulations.

DATES: Written or electronic comments must be received by February 27, 2001. Requests to speak (with outlines of oral comments to be discussed) at the public hearing scheduled for 10 a.m. on March 21, 2001, must be received by February 27, 2001.

ADDRESSES: Send submissions to: CC:M&SP:RU (REG–126100–00), Room 5226, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044. Submissions also may be hand delivered Monday through Friday between the hours of 8 a.m. and 5 p.m. to: CC:M&SP:RU (REG–126100–00), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC. Alternatively, taxpayers may submit comments electronically via the Internet by selecting the “Tax Regs” option on the IRS Home Page, or by submitting comments directly to the IRS Internet site at <http://www.irs.gov/tax-regs/regslst.html>. The public hearing will be held in Room 4718, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Concerning the proposed regulations,

Kate Y. Hwa, (202) 622-3840 (not a toll free number); concerning submissions of comments, the hearing, and/or to be placed on the building access list to attend the hearing, Lanita Vandyke, (202) 622-7180 (not a toll free number).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)). Comments on the collection of information should be sent to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503, with copies to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, W:CAR:MP:FP:S:O, Washington, DC 20224. Comments on the collections of information should be received by March 19, 2001. Comments are specifically requested concerning:

Whether the proposed collection of information is necessary for the proper operation of the functions of the IRS, including whether the information will have practical utility;

The accuracy of the estimated burden associated with the proposed collection of information (see below);

How the quality, utility, and clarity of the information to be collected may be enhanced;

How the burden of complying with the proposed collection of information may be minimized, including through the application of automated collection techniques or other forms of information technology; and

Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of service to provide information.

The collection of information in these proposed regulations is in §§ 1.6049-4(b)(5)(i), 1.6049-6(e)(4)(i), and (ii). This information is required to determine if taxpayers have properly reported amounts received as income. The collection of information is mandatory. The likely respondents are businesses and other for-profit institutions.

The estimated average annual burden per respondent and/or recordkeeper required by §§ 1.6049-4(b)(5)(i), 1.6049-6(e)(4)(i), and (ii) will be reflected in the burdens of Forms W-8, 1042, 1042-S, and the income tax return of a foreign person.

Further, the estimated average annual burden per respondent and/or

recordkeeper for the statement required by § 1.6049-6(e)(4)(i) is as follows:

Estimated total annual reporting burden: 500 hours.

Estimated average annual burden per respondent: 15 minutes.

Estimated number of respondents: 2,000.

Estimated annual frequency of responses: annually.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid control number assigned by the Office of Management and Budget.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law.

Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Background and Explanation of Provisions

The IRS previously determined that information concerning interest paid on deposits from U.S. bank accounts to nonresident alien individuals who are residents of Canada would be significant in furthering its compliance efforts. Consequently, § 1.6049-8(a) requires the reporting of such interest on a Form 1042-S.

The proposed regulations extend the information reporting requirement for bank deposit interest paid to nonresident alien individuals who are residents of other foreign countries. This extension is appropriate for two reasons. First, requiring routine reporting to the IRS of all bank deposit interest paid within the United States will help to ensure voluntary compliance by U.S. taxpayers by minimizing the possibility of avoidance of the U.S. information reporting system (such as through false claims of foreign status). Second, several countries that have tax treaties or other agreements that provide for the exchange of tax information with the United States have requested information concerning bank deposits of individual residents of their countries. Because of the importance that the United States attaches to exchanging tax information as a way of encouraging voluntary compliance and furthering transparency, see e.g. S. Exec. Rep. No. 106-8, at 15 (1st Sess. 1999), Treasury and the IRS believe it is important for the United States to facilitate, wherever possible, the effective exchange of all relevant tax information with our treaty partners.

In addition to extending the information reporting requirement for interest paid on deposits maintained at a bank's office within the United States to all nonresident alien individuals, the proposed regulations also make the following minor changes and clarifications.

Section 1.6049-6 provides that a copy of Form 1042-S must be furnished to the recipient for interest paid on deposits maintained at a bank's office within the United States. Paragraph (e)(4)(i) of that section has been revised to clarify that the payor or middleman can satisfy this requirement by furnishing a copy of Form 1042-S either in person or to the last known address of the recipient.

A new paragraph (e)(4)(ii) has been added to § 1.6049-6 to provide guidance on the manner in which a Form 1042-S is furnished when there are joint account holders. Specifically, if any joint account holder is a U.S. non-exempt recipient, the payor or middleman must report the entire payment to that person. If all joint account holders are foreign persons, the payor or middleman must report the payment to the nonresident alien individual that is a resident of a country with which the United States has an income tax treaty or a tax information exchange agreement (TIEA). If more than one of the joint account holders is a foreign person and is a resident of a country with which the United States has an income tax treaty or a TIEA, the payor or middleman must report the payment to the person that is the primary account holder. The payor or middleman must, however, furnish a Form 1042-S to any account holder who requests it.

Section 1.6049-8(a) provides that interest paid with respect to a deposit maintained at an office within the United States to individuals who are Canadian residents must be reported. The payor or middleman may rely on the permanent address found on Form W-8 to make the determination of whether the nonresident alien individual resides in Canada. However, the regulation also provides that a payor or middleman may rely on its actual knowledge of the individual's residence address in Canada, even if a valid Form W-8 has not been provided, to make such a determination. This "actual knowledge of the individual's residence address" rule has been eliminated because it creates a result that is contrary to the presumption rules contained in § 1.1441-1(b)(3)(iii) (and made applicable to reportable payments by § 1.6049-5(d)(2)). Accordingly, § 1.6049-8(a) has been clarified to

provide that, while amounts described in § 1.6049-8(a) generally are not subject to backup withholding under section 3406, the payor must report the payment on a Form 1099 as made to a U.S. non-exempt recipient in accordance with the presumption rules of §§ 1.6049-5(d)(2) and 1.1441-1(b)(3)(iii) if the payor or middleman does not have either a valid Form W-8 or valid Form W-9. Further, such payment is subject to backup withholding under section 3406.

Proposed Effective Date

These regulations are proposed to apply to payments made after December 31 of the year in which they are published as final regulations in the **Federal Register**.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations, and, because the regulations do not impose a collection of information on small entities, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Pursuant to section 7805(f) of the Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written comments (a signed original and eight (8) copies) that are submitted timely (in the manner described in the **ADDRESSES** portion of this preamble) to the IRS. The IRS and Treasury Department request comments on the clarity of the proposed rules and how they can be made easier to understand. All comments will be available for public inspection and copying.

A public hearing has been scheduled for March 31, 2001, beginning at 10 a.m. in Room 4718, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, DC. Due to building security procedures, visitors must enter at the 10th Street entrance, located between Constitution and Pennsylvania Avenues, NW. In addition, all visitors must present photo identification to enter the building. Because of access restrictions, visitors will not be admitted beyond the immediate

entrance area more than 15 minutes before the hearing starts. For information about having your name placed on the building access list to attend the hearing, see the **FOR FURTHER INFORMATION CONTACT** portion of this preamble.

The rules of 26 CFR 601.601(a)(3) apply to the hearing. Persons who wish to present oral comments must submit written comments and an outline of the topics to be discussed and the time to be devoted to each topic (a signed original and eight (8) copies) by February 27, 2001. A period of 10 minutes will be allotted to each person for making comments. An agenda showing the scheduling of the speakers will be prepared after the deadline for reviewing outlines has passed. Copies of the agenda will be available free of charge at the hearing.

Drafting Information

The principal author of the regulations is Kate Y. Hwa, Office of Associate Chief Counsel (International). However, other personnel from the IRS and Treasury Department participated in their development.

Proposed Amendments to the Regulations

Accordingly, 26 CFR parts 1 and 31 are proposed to be amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. In section 1.6049-4, paragraph (b)(5) is revised to read as follows:

§ 1.6049-4 Return of information as to interest paid and original issue discount includible in gross income after December 31, 1982.

* * * * *

(b) * * *

(5) *Interest payments to nonresident alien individuals*—(i) *General rule.* In the case of interest aggregating \$10 or more paid to a nonresident alien individual (as defined in section 7701(b)(1)(B)) that is reportable under § 1.6049-8(a), the payor shall make an information return on Form 1042-S for the calendar year in which the interest is paid. The payor or middleman shall prepare and file Form 1042-S at the time and in the manner prescribed by section 1461 and the regulations under that section and by the form and its accompanying instructions. See §§ 1.1461-1(b) (rules regarding the preparation of a Form 1042) and 1.6049-6(e)(4) (rules for furnishing a

copy of the Form 1042-S to the payee). To determine whether an information return is required for original issue discount, see §§ 1.6049-5(f) and 1.6049-8(a).

(ii) *Effective date.* Paragraph (b)(5)(i) of this section shall be effective for payments made after December 31 of the year in which the final regulations are published in the **Federal Register** with respect to a Form W-8 (Certificate of Foreign Status) furnished to the payor or middleman after that date. (For interest paid to a Canadian nonresident alien individual on or before December 31 of the year in which final regulations are published in the **Federal Register**, see § 1.6049-4(b)(5) as in effect and contained in 26 CFR part 1 revised April 1, 2000.)

* * * * *

Par. 3. Section 1.6049-6 is amended as follows:

1. Paragraph (e)(4) is revised.

2. In paragraph (e)(5), the first sentence is revised and a new sentence is added at the end of the paragraph.

The addition and revisions read as follows:

§ 1.6049-6 Statements to recipients of interest payments and holders of obligations for attributed original issue discount.

* * * * *

(e) * * *

(4) *Special rule for amounts described in § 1.6049-8(a)*—(i) *In general.* In the case of amounts described in § 1.6049-8(a) (relating to payments of deposit interest to nonresident alien individuals) paid after December 31 of the year in which the final regulations are published in the **Federal Register**, any person who makes a Form 1042-S under section 6049(a) and § 1.6049-4(b)(5) shall furnish a statement to the recipient either in person or by first-class mail to the recipient's last known address. The statement shall include a copy of the Form 1042-S required to be prepared pursuant to § 1.6049-4(b)(5) and a statement to the effect that the information on the form is being furnished to the United States Internal Revenue Service and may be furnished to the government of the foreign country where the recipient resides.

(ii) *Joint account holders.* In the case of joint account holders, a payor or middleman must report the entire amount of interest as paid to any joint account holder that provides a valid Form W-9, or, if any account holder has not furnished a Form W-8 or Form W-9, any account holder that is presumed to be a U.S. non-exempt recipient under § 1.6049-5(d)(2) and 1.1441-1(b)(3)(iii). If all of the joint account holders are

foreign persons, then the payor or middleman must report the payment to the nonresident alien individual that is a resident of a country with which the United States has an income tax treaty or a tax information exchange agreement. If more than one of the joint account holders is a foreign person and is a resident of a country with which the United States has an income tax treaty or a tax information exchange agreement, then the payor or middleman may report the interest as paid to any such account holder that is treated as the primary account holder under § 31.3406(h)-2(a) of this chapter. If, however, any account holder requests its own Form 1042-S, the payor or middleman must furnish a Form 1042-S to the account holder who requests it.

(5) *Effective date.* Paragraph (e)(4) is effective for payee statements due after December 31 of the year in which the final regulations are published in the **Federal Register**, without regard to extensions. * * * (For interest paid to a Canadian nonresident alien individual on or before December 31 of the year in which final regulations are published in the **Federal Register**, see § 1.6049-6(e)(4) as in effect and contained in 26 CFR part 1 revised April 1, 2000.)

Par. 4. In section 1.6049-8, the section heading and paragraph (a) are revised to read as follows:

§ 1.6049-8 Interest and original issue discount paid to nonresident alien individuals.

(a) *Interest subject to reporting requirement.* For purposes of §§ 1.6049-4, 1.6049-6, and this section and except as provided in paragraph (b) of this section, the term *interest* means interest paid to a nonresident alien individual after December 31 of the year in which the final regulations are published in the **Federal Register**, where the interest is described in section 871(i)(2)(A) with respect to a deposit maintained at an office within the United States. For purposes of the regulations under section 6049, a nonresident alien individual is a person described in section 7701(b)(1)(B). The payor or middleman may rely upon a valid Form W-8 to determine whether the payment is made to a nonresident alien individual. Generally, amounts described in this paragraph (a) are not subject to backup withholding under section 3406. See § 31.3406(g)-1(d) of this chapter. However, if the payor or middleman does not have either a valid Form W-8 or valid Form W-9, the payor or middleman must report the payment as made to a U.S. non-exempt recipient if it must so treat the payee under the

presumption rules of §§ 1.6049-5(d)(2) and 1.1441-1(b)(3)(iii) and must also backup withhold under section 3406. (For interest paid to a Canadian nonresident alien individual on or before December 31 of the year in which final regulations are published in the **Federal Register**, see § 1.6049-8(a) as in effect and contained in 26 CFR part 1 revised April 1, 2000.)

PART 31—EMPLOYMENT TAXES AND COLLECTION OF INCOME TAX AT SOURCE

Par. 5. The authority citation for part 31 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 6. In § 31.3406(g)-1, paragraph (d) is revised to read as follows:

§ 31.3406(g)-1 Exceptions for payments to certain payees and certain other payment.

(d) *Reportable payments made to nonresident alien individuals.* A payment of interest that is reported on Form 1042-S as paid to a nonresident alien individual under § 1.6049-8(a) of this chapter is not subject to withholding under section 3406. (For interest paid to a Canadian nonresident alien individual on or before December 31 of the year in which final regulations are published in the **Federal Register**, see § 31.3406(g)-1(d) as in effect and contained in 26 CFR part 1 revised April 1, 2000.)

Required Distributions from Retirement Plans

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking and notice of public hearing.

SUMMARY: This document contains proposed regulations relating to required minimum distributions from qualified plans, individual retirement plans, deferred compensation plans under section 457, and section 403(b) annuity contracts, custodial accounts,

and retirement income accounts. These regulations will provide the public with guidance necessary to comply with the law and will affect administrators of, participants in, and beneficiaries of qualified plans; institutions that sponsor and individuals who administer individual retirement plans, individuals who use individual retirement plans for retirement income, and beneficiaries of individual retirement plans; and employees for whom amounts are contributed to section 403(b) annuity contracts, custodial accounts, or retirement income accounts and beneficiaries of such contracts and accounts.

DATES: Written and electronic comments must be received by April 17, 2001. Outlines of topics to be discussed at the public hearing scheduled for June 1, 2001, at 10 a.m. must be received by May 11, 2001.

ADDRESSES: Send submissions to: CC:M&SP:RU (REG-130477-00/REG-130481-00) room 5226, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand delivered Monday through Friday between the hours of 8 a.m. and 5 p.m. to: CC:M&SP:RU (REG-130477-00/REG-130481-00), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC. Alternatively, taxpayers may submit comments electronically via the Internet by selecting the "Tax Regs" option of the IRS Home Page, or by submitting comments directly to the IRS Internet site at: http://www.irs.gov/tax_regs/reglist.html. The public hearing on June 1, 2001, will be held in the IRS Auditorium (7th Floor), Internal Revenue Building, 1111 Constitution Avenue NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Concerning the regulations, Cathy A. Vohs, 202-622-6090; concerning submissions and the hearing, and/or to be placed on the building access list to attend the hearing, Guy Traynor, 202-622-7180 (not toll-free numbers).

Paperwork Reduction Act

The collections of information contained in these proposed regulations have been reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act (44 U.S.C. 3507) under control number 1545-0996, in conjunction with the notice of proposed rulemaking published on July 27, 1987, 52 FR 28070, REG-EE-113-82, Required Distributions From Qualified Plans and Individual Retirement Plans, and control number 1545-1573, in

conjunction with the notice of proposed rulemaking published on December 30, 1997, 62 FR 67780, REG-209463-82, Required Distributions from Qualified Plans and Individual Retirement Plans.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by the Office of Management and Budget.

Books and records relating to the collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Background

This document contains proposed amendments to the Income Tax Regulations (26 CFR Part 1) and to the Pension Excise Tax Regulations (26 CFR Part 54) under sections 401, 403, 408, and 4974 of the Internal Revenue Code of 1986. It is contemplated that proposed rules similar to those in these proposed regulations applicable to section 401 will be published in the near future for purposes of applying the distribution requirements of section 457(d). These amendments are proposed to conform the regulations to section 1404 of the Small Business Job Protection Act of 1996 (SBJPA) (110 Stat. 1791), sections 1121 and 1852 of the Tax Reform Act of 1986 (TRA of 1986) (100 Stat. 2464 and 2864), sections 521 and 713 of the Tax Reform Act of 1984 (TRA of 1984) (98 Stat. 865 and 955), and sections 242 and 243 of the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) (96 Stat. 521). The regulations provide guidance on the required minimum distribution requirements under section 401(a)(9) for plans qualified under section 401(a). The rules are incorporated by reference in section 408(a)(6) and (b)(3) for individual retirement accounts and annuities (IRAs), section 408A(c)(5) for Roth IRAs, section 403(b)(10) for section 403(b) annuity contracts, and section 457(d) for eligible deferred compensation plans.

For purposes of this discussion of the background of the regulations in this preamble, as well as the explanation of provisions below, whenever the term *employee* is used, it is intended to include not only an employee but also an IRA owner.

Section 401(a)(9) provides rules for distributions during the life of the employee in section 401(a)(9)(A) and rules for distributions after the death of the employee in section 401(a)(9)(B).

Section 401(a)(9)(A)(ii) provides that the entire interest of an employee in a qualified plan must be distributed, beginning not later than the employee's required beginning date, in accordance with regulations, over the life of the employee or over the lives of the employee and a designated beneficiary (or over a period not extending beyond the life expectancy of the employee and a designated beneficiary).

Section 401(a)(9)(C) defines required beginning date for employees (other than 5-percent owners and IRA owners) as April 1 of the calendar year following the later of the calendar year in which the employee attains age 70 $\frac{1}{2}$ or the calendar year in which the employee retires. For 5-percent owners and IRA owners, the required beginning date is April 1 of the calendar year following the calendar year in which the employee attains age 70 $\frac{1}{2}$, even if the employee has not retired.

Section 401(a)(9)(D) provides that (except in the case of a life annuity) the life expectancy of an employee and the employee's spouse that is used to determine the period over which payments must be made may be redetermined, but not more frequently than annually.

Section 401(a)(9)(E) provides that the term *designated beneficiary* means any individual designated as a beneficiary by the employee.

Section 401(a)(9)(G) provides that any distribution required to satisfy the incidental death benefit requirement of section 401(a) is a required minimum distribution.

Section 401(a)(9)(B)(i) provides that, if the employee dies after distributions have begun, the employee's interest must be distributed at least as rapidly as under the method used by the employee.

Section 401(a)(9)(B)(ii) and (iii) provides that, if the employee dies before required minimum distributions have begun, the employee's interest must be either: distributed (in accordance with regulations) over the life or life expectancy of the designated beneficiary with the distributions beginning no later than 1 year after the date of the employee's death, or distributed within 5 years after the death of the employee. However, under section 401(a)(9)(B)(iv), a surviving spouse may wait until the date the employee would have attained age 70 $\frac{1}{2}$ to begin taking required minimum distributions.

Comprehensive proposed regulations under section 401(a)(9) were previously published in the **Federal Register** on July 27, 1987, 52 FR 28070. Many of the comments on the 1987 proposed

regulations expressed concerns that the required minimum distribution must be satisfied separately for each IRA owned by an individual by taking distributions from each IRA. In response, Notice 88-38 (1988-1 C.B. 524) provided that the amount of the required minimum distribution must be calculated for each IRA, but permitted that amount to be taken from any IRA. Amendments to the 1987 proposed regulations published in the **Federal Register** on December 30, 1997, 62 FR 67780, responded to comments on the use of trusts as beneficiaries. Notice 96-67 (1996-2 C.B. 235) and Notice 97-75 (1997-2 C.B. 337) provided guidance on the changes made to section 401(a)(9) by the SBJPA. The guidance in Notice 88-38, Notice 96-67, and Notice 97-75 is incorporated in these proposed regulations with some modifications.

Even though the distribution requirements added by TEFRA were retroactively repealed by TRA of 1984, the transition election rule in section 242(b) of TEFRA was preserved. Notice 83-23 (1983-2 C.B. 418) continues to provide guidance for distributions permitted by this transition election rule. These proposed regulations retain the additional guidance on the transition rule provided in the 1987 proposed regulations.

As discussed below, in response to extensive comments, the rules for calculating required minimum distributions from individual accounts under the 1987 proposed regulations have been substantially simplified. Certain other 1987 rules have also been simplified and modified, although many of the 1987 rules remain unchanged. In particular, due to the relatively small number of comments on practices with respect to annuity contracts, and the effect of the 1987 proposed regulations on these practices, the basic structure of the 1987 proposed regulation provisions with respect to annuity payments is retained in these proposed regulations. The IRS and Treasury are continuing to study these rules and specifically request updated comments on current practices and issues relating to required minimum distributions from annuity contracts.

Explanation of Provisions

Overview

Many of the comments on the 1987 proposed regulations addressed the rules for required minimum distributions during an employee's life, including calculation of life expectancy and determination of designated beneficiary. In particular, comments raised concerns about the default

provisions, election requirements, and plan language requirements. In general, the need to make decisions at age 70½, which under the 1987 proposed regulations would bind the employee in future years during which financial circumstances could change significantly, was perceived as unreasonably restrictive. In addition, the determination of life expectancy and designated beneficiary and the resulting required minimum distribution calculation for individual accounts were viewed as too complex.

To respond to these concerns, these proposed regulations would make it much easier for individuals—both plan participants and IRA owners—and plan administrators to understand and apply the minimum distribution rules. The new proposed regulations would make major simplifications to the rules, including the calculation of the required minimum distribution during the individual's lifetime and the determination of a designated beneficiary for distributions after death. The new proposed regulations simplify the rules by

- Providing a simple, uniform table that all employees can use to determine the minimum distribution required during their lifetime. This makes it far easier to calculate the required minimum distribution because employees would
 - no longer need to determine their beneficiary by their required beginning date, still no longer need to decide whether or not to recalculate their life expectancy each year in determining required minimum distributions, and
 - no longer need to satisfy a separate incidental death benefit rule.
- Permitting the required minimum distribution during the employee's lifetime to be calculated without regard to the beneficiary's age (except when required distributions can be reduced by taking into account the age of a beneficiary who is a spouse more than 10 years younger than the employee).
- Permitting the beneficiary to be determined as late as the end of the year following the year of the employee's death. This allows
 - the employee to change designated beneficiaries after the required beginning date without increasing the required minimum distribution and
 - the beneficiary to be changed after the employee's death, such as by one or more beneficiaries disclaiming or being cashed out.
- Permitting the calculation of post-death minimum distributions to take into account an employee's remaining life expectancy at the time of death, thus allowing distributions in all cases to be

spread over a number of years after death.

These simplifications would also have the effect of reducing the required minimum distributions for the vast majority of employees.

The Uniform Distribution Period

Under these proposed regulations and the 1987 proposed regulations, for distributions from an individual account, the required minimum distribution is determined by dividing the account balance by the distribution period. For lifetime required minimum distributions, these proposed regulations provide a uniform distribution period for all employees of the same age. The uniform distribution period table is the required minimum distribution incidental benefit (MDIB) divisor table originally prescribed in § 1.401(a)(9)-2 of the 1987 proposed regulations and now included in A-4 of § 1.401(a)-5 of the new proposed regulations. An exception applies if the employee's sole beneficiary is the employee's spouse and the spouse is more than 10 years younger than the employee. In that case, the employee is permitted to use the longer distribution period measured by the joint life and last survivor life expectancy of the employee and spouse.

These changes provide a simple administrable rule for plans and individuals. Using the MDIB table, most employees will be able to determine their required minimum distribution for each year based on nothing more than their current age and their account balance as of the end of the prior year (which IRA trustees report annually to IRA owners). Under the 1987 proposed regulations, some employees already use the MDIB table to determine required minimum distributions. Under the new proposed regulations, they would continue to do so. For the majority of other employees, required minimum distributions would be reduced as a result of the changes.

For years after the year of the employee's death, the distribution period is generally the remaining life expectancy of the designated beneficiary. The beneficiary's remaining life expectancy is calculated using the age of the beneficiary in the year following the year of the employee's death, reduced by one for each subsequent year. If the employee's spouse is the employee's sole beneficiary at the end of the year following the year of death, the distribution period during the spouse's life is the spouse's single life expectancy. For years after the year of the spouse's death, the distribution period is the spouse's life expectancy

calculated in the year of death, reduced by one for each subsequent year. If there is no designated beneficiary as of the end of the year after the employee's death, the distribution period is the employee's life expectancy calculated in the year of death, reduced by one for each subsequent year.

The MDIB table is based on the joint life expectancies of an individual and a survivor 10 years younger at each age beginning at age 70. Allowing the use of this table reflects the fact that an employee's beneficiary is subject to change until the death of the employee and ultimately may be a beneficiary more than 10 years younger than the employee. The proposed regulations would allow lifetime distributions at a rate consistent with this possibility. Consistent with the requirements of section 401(a)(9)(A)(ii), the distribution period after death is measured by the life expectancy of the employee's designated beneficiary in the year following death, or the employee's remaining life expectancy if there is no designated beneficiary. This ensures that the employee's entire benefit is distributed over a period described in section 401(a)(9)(A)(ii), i.e., the life expectancy of the employee or the joint life expectancy of the employee and a designated beneficiary.

The approach in these proposed regulations allowing the use of a uniform lifetime distribution period addresses concerns raised in comments on the 1987 proposed regulations that the rules are too complex. It eliminates the use of two tables and the interaction of the multiple beneficiary and change in beneficiary rules. Finally, it generally eliminates the need to fix the amount of the distribution during the employee's lifetime based on the beneficiary designated on the required beginning date and eliminates the need to elect recalculation or no recalculation of life expectancies at the required beginning date.

Suggestions have been received that the life expectancy table used to calculate required minimum distributions should be revised to reflect recent increases in longevity. These proposed regulations instead provide authority for the Commissioner to issue guidance of general applicability revising the life expectancy tables and the uniform distribution table in the future if it becomes appropriate. While life expectancy has increased in the 14 years since the issuance of the section 72 life expectancy tables, those tables may already overstate the average life expectancy of the class of individuals who are subject to these required

minimum distribution rules (qualified plan participants, IRA owners, et al.). That is because those existing section 72 tables were derived from the particular mortality experience of the select population of individuals who purchase individual annuities, as opposed to the population who are subject to the required minimum distribution rules. In any event, as noted earlier, the new proposed uniform distribution period—equal to the joint life expectancy of an individual and a survivor 10 years younger at each age—would lengthen the lifetime distribution period for most employees and beneficiaries. In fact, the new proposed regulations would lengthen that period more for many individuals than would an update to reflect recent increases in longevity. The IRS and Treasury believe that this lengthening of the distribution period for most employees provides further justification for retaining the existing life expectancy tables at this time.

Some commentators suggested that the calculation of required minimum distributions include credit for any distribution in a prior year that exceeded that year's required minimum distribution. However, such a "credit" carryforward would require significant additional data retention and would add substantial complexity to the calculation of required minimum distributions. By using the prior year's ending account balance for calculating required minimum distributions, distribution of amounts in excess of the required minimum distribution has the effect of reducing future required minimum distributions over the remaining distribution period to some extent. Accordingly, these proposed regulations do not provide for a credit carryforward.

Determination of the Designated Beneficiary

These proposed regulations provide that, generally, the designated beneficiary is determined as of the end of the year following the year of the employee's death rather than as of the employee's required beginning date or date of death, as under the 1987 proposed regulations. Thus, any beneficiary eliminated by distribution of the benefit or through disclaimer (or otherwise) during the period between the employee's death and the end of the year following the year of death is disregarded in determining the employee's designated beneficiary for purposes of calculating required minimum distributions. If, as of the end of the year following the year of the employee's death, the employee has more than one designated beneficiary

and the account or benefit has not been divided into separate accounts or shares for each beneficiary, the beneficiary with the shortest life expectancy is the designated beneficiary, consistent with the approach in the 1987 proposed regulations.

This approach for determining the designated beneficiary following the death of an employee after the employee's required beginning date is simpler in several respects than the approach in the 1987 proposed regulations and responds to concerns raised with respect to the effects of beneficiary designation at the required beginning date. Under this approach, the determination of the designated beneficiary and the calculation of the beneficiary's life expectancy generally are contemporaneous with commencement of required distributions to the beneficiary. Any prior beneficiary designation is irrelevant for distributions from individual accounts, unless the employee takes advantage of a lifetime distribution period measured by the joint life expectancy of the employee and a spouse more than 10 years younger than the employee. Further, for an employee with a designated beneficiary, this approach provides the same rules for distributions after the employee's death, regardless of whether death occurs before or after an employee's required beginning date. Finally, in the case of an employee who elects or defaults into recalculation of life expectancy and who dies without a designated beneficiary, the requirement that the employee's entire remaining account balance be distributed in the year after an employee's death has been eliminated and replaced with a distribution period equal to the employee's remaining life expectancy recalculated immediately before death.

Default Rule for Post-Death Distributions

As requested by some commentators, these proposed regulations would change the default rule in the case of death before the employee's required beginning date for a nonspouse designated beneficiary from the 5-year rule in section 401(a)(9)(B)(ii) to the life expectancy rule in section 401(a)(9)(B)(iii). Thus, absent a plan provision or election of the 5-year rule, the life expectancy rule would apply in all cases in which the employee has a designated beneficiary. As in the case of death on or after the employee's required beginning date, the designated beneficiary whose life expectancy is used to determine the distribution period would be determined as of the

end of the year following the year of the employee's death, rather than as of the employee's date of death (as would have been required under the 1987 proposed regulations). The 5-year rule would apply automatically only if the employee did not have a designated beneficiary as of the end of the year following the year of the employee's death. Finally, in the case of death before the employee's required beginning date, these proposed regulations allow a waiver, unless the Commissioner determines otherwise, of any excise tax resulting from the life expectancy rule during the first five years after the year of the employee's death if the employee's entire benefit is distributed by the end of the fifth year following the year of the employee's death.

Annuity Payments

These proposed regulations make several changes to the rules for determining whether annuity payments satisfy section 401(a)(9). The changes are designed to make these rules more administrable without adverse effects on the basic structure and application of the rules. The IRS and Treasury are continuing to study and evaluate whether additional changes would be appropriate for determining whether annuity payments satisfy section 401(a)(9). Some comments were received on the annuity rules in 1987, but updated comments that include a discussion of current industry practices, products, and concerns would be helpful.

These proposed regulations provide that the designated beneficiary for determining the distribution period for annuity payments generally is the beneficiary as of the annuity starting date, even if that date is after the required beginning date. Thus, if annuity payments commence after the required beginning date, the determination of the designated beneficiary is contemporaneous with the annuity starting date and any intervening changes in the beneficiary designation since the required beginning date are ignored. Second, as requested in comments, these regulations extend to all annuity payment streams the rule in the 1987 proposed regulations that allows a life annuity with a period certain not exceeding 20 years to commence on the required beginning date with no makeup for the first distribution calendar year. For this purpose, the regulations clarify that only accruals as of the end of the prior calendar year must be taken into account in calculating the amount of an annuity

commencing on the required beginning date. Subsequent accruals are treated as additional accruals that must be taken into account in the next calendar year. Also as requested in comments, the regulations provide that, although additional accruals need to be taken into account in the first payment in the calendar year following the year of the accrual, actual payment in the form of a make-up payment need only be completed by the end of that calendar year.

The permitted increase in annuity payments to an employee upon the death of the survivor annuitant has been expanded to cover the elimination of the survivor portion of a joint and survivor annuity due to a qualified domestic relations order. Further, in response to comments, in the case of an annuity contract purchased from an insurance company, an exception to the nonincreasing-payment requirement in these proposed regulations has been added to accommodate a cash refund upon the employee's death of the amount of the premiums paid for the contract.

One of the rules in the 1987 proposed regulations that the IRS and Treasury are continuing to study and evaluate is the rule providing that if the distributions from a defined benefit plan are not in the form of an annuity, the employee's benefit will be treated as an individual account for purposes of determining required minimum distributions. The IRS and Treasury are continuing to consider whether retention of this rule is appropriate for defined benefit plans. Similarly, the IRS and Treasury are continuing to consider whether the rule permitting the benefit under a defined benefit plan to be divided into segregated shares for purposes of section 401(a)(9) is useful and appropriate for defined benefit plans.

Trust as Beneficiary

These proposed regulations retain the provision in the proposed regulations, as amended in 1997, allowing an underlying beneficiary of a trust to be an employee's designated beneficiary for purposes of determining required minimum distributions when the trust is named as the beneficiary of a retirement plan or IRA, provided that certain requirements are met. One of these requirements is that documentation of the underlying beneficiaries of the trust be provided timely to the plan administrator. In the case of individual accounts, unless the lifetime distribution period for an employee is measured by the joint life expectancy of the employee and the

employee's spouse, the deadline under these proposed regulations for providing the beneficiary documentation would be the end of the year following year of the employee's death. This is consistent with the deadline for determining the employee's designated beneficiary. Because the designated beneficiary during an employee's lifetime is not relevant for determining lifetime required minimum distributions in most cases under these proposed regulations, the burden of lifetime documentation requirements contained in the previous proposed regulations is significantly reduced.

A significant number of commentators on the 1997 amendment to the proposed regulations requested clarification that a testamentary trust named as an employee's beneficiary is a trust that qualifies for the look-through rule to the underlying beneficiaries, as permitted in the 1997 proposed regulations. These proposed regulations provide examples in which a testamentary trust is named as an employee's beneficiary and the look-through trust rules apply. As previously illustrated in the facts of Rev. Rul. 2000-2, 2000-3 I.R.B. 305, the examples also clarify that remaindermen of a "QTIP" trust must be taken into account as beneficiaries in determining the distribution period for required minimum distributions if amounts are accumulated for their benefit during the life of the income beneficiary under the trust.

Rules for Qualified Domestic Relations Orders

These proposed regulations retain the basic rules in the 1987 proposed regulation for a qualified domestic relations order (QDRO). Thus, for example, the proposed regulations continue to provide that a former spouse to whom all or a portion of the employee's benefit is payable pursuant to a QDRO will be treated as a spouse (including a surviving spouse) of the employee for purposes of section 401(a)(9), including the minimum distribution incidental benefit requirement, regardless of whether the QDRO specifically provides that the former spouse is treated as the spouse for purposes of sections 401(a)(11) and 417. This rule applies regardless of the number of former spouses an employee has who are alternate payees with respect to the employee's retirement benefits. Further, for example, if a QDRO divides the individual account of an employee in a defined contribution plan into a separate account for the employee and a separate account for the alternate payee, the required minimum distribution to the alternate payee

during the lifetime of the employee must nevertheless be determined using the same rules that apply to distribution to the employee. Thus, required minimum distributions to the alternate payee must commence by the employee's required beginning date. However, the required minimum distribution for the alternate payee will be separately determined. The required minimum distributions for the alternate payee during the lifetime of the employee may be determined either using the uniform distribution period discussed above based on the age of the employee in the distribution calendar year, or, if the alternate payee is the employee's former spouse and is more than 10 years younger than the employee, using the joint life expectancy of the employee and the alternate payee.

Election of Surviving Spouse To Treat an Inherited IRA as Spouse's Own IRA

These proposed regulations clarify the rule in the 1987 proposed regulations that allows the surviving spouse of a decedent IRA owner to elect to treat an IRA inherited by the surviving spouse from that owner as the spouse's own IRA. The 1987 proposed regulations provide that this election is deemed to have been made if the surviving spouse contributes to the IRA or does not take the required minimum distribution for a year under section 401(a)(9)(B) as a beneficiary of the IRA. These new proposed regulations clarify that this deemed election is permitted to be made only after the distribution of the required minimum amount for the account, if any, for the year of the individual's death. Further these new proposed regulations clarify that this deemed election is permitted only if the spouse is the sole beneficiary of the account and has an unlimited right to withdrawal from the account. This requirement is not satisfied if a trust is named as beneficiary of the IRA, even if the spouse is the sole beneficiary of the trust. These clarifications make the election consistent with the underlying premise that the surviving spouse could have received a distribution of the entire decedent IRA owner's account and rolled it over to an IRA established in the surviving spouse's own name as IRA owner.

These new proposed regulations also clarify that, except for the required minimum distribution for the year of the individual's death, the spouse is permitted to roll over the post-death required minimum distribution under section 401(a)(9)(B) for a year if the spouse is establishing the IRA rollover account in the name of the spouse as

IRA owner. However, if the surviving spouse is age 70½ or older, the minimum lifetime distribution required under section 401(a)(9)(A) must be made for the year and, because it is a required minimum distribution, that amount may not be rolled over. These proposed regulations provide that this election by a surviving spouse eligible to treat an IRA as the spouse's own may also be accomplished by redesignating the IRA with the name of the surviving spouse as owner rather than beneficiary.

IRA Reporting of Required Minimum Distributions

Because these regulations substantially simplify the calculation of required minimum distributions from IRAs, IRA trustees determining the account balance as of the end of the year can also calculate the following year's required minimum distribution for each IRA. To improve compliance and further reduce the burden imposed on IRA owners and beneficiaries, under the authority provided in section 408(i), these proposed regulations would require the trustee of each IRA to report the amount of the required minimum distribution from the IRA to the IRA owner or beneficiary and to the IRS at the time and in the manner provided under IRS forms and instructions. This reporting would be required regardless of whether the IRA owner is planning to take the required minimum distribution from that IRA or from another IRA, and would indicate that the IRA owner is permitted to take the required minimum distribution from any other IRA of the owner. During year 2001, the IRS will be receiving public comments and consulting with interested parties to assist the IRS in evaluating what form best accommodates this reporting requirement, what timing is appropriate (e.g., the beginning of the calendar year for which the required amount is being calculated), and what effective date would be most appropriate for the reporting requirement. In this context, after thorough consideration of comments and consultation with interested parties, the IRS intends to develop procedures and a schedule for reporting that provides adequate lead time, and minimizes the reporting burden, for IRA trustees, issuers, and custodians in complying with this new reporting requirement while providing the most useful information to the IRA owners and beneficiaries.

The IRS and Treasury are also considering whether similar reporting would be appropriate for section 403(b) contracts.

Permitted Delays Relative to QDROs and State Insurer Delinquency Proceedings

The regulations permit the required minimum distribution for a year to be delayed to a later year in certain circumstances. Specifically, commentators requested a delay during a period of up to 18 months during which an amount is segregated in connection with the review of a domestic relations order pursuant to section 414(p)(7). Commentators also requested that a delay be permitted while annuity payments under an annuity contract issued by a life insurance company in state insurer delinquency proceedings have been reduced or suspended by reason of state proceedings. These proposed regulations allow delay in these circumstances.

Correction of Failures Under Section 401(a)(9)

The proposed regulations do not set forth the special rule relieving a plan from disqualification for isolated instances of failure to satisfy section 401(a)(9) because all failures for qualified plans and section 403(b) accounts under section 401(a)(9) are now permitted to be corrected through the Employee Plans Compliance Resolution System (EPCRS). See Rev. Proc. 2000-16 (2000-6 I.R.B. 518).

Amendment of Qualified Plans

These regulations are proposed to be effective for distributions for calendar years beginning on or after January 1, 2002. For distributions for calendar years beginning before the effective date of final regulations, plan sponsors can continue to rely on the 1987 proposed regulations, to the extent those proposed regulations are not inconsistent with the changes to section 401(a)(9) made by the Small Business Job Protection Act of 1996 (SBJPA) and guidance related to those changes. Alternatively, for distributions for the 2001 and subsequent calendar years beginning before the effective date of final regulations, plan sponsors are permitted, but not required, to follow these proposed regulations in the operation of their plans by adopting the model amendment set forth below.

The Treasury Department and the IRS are making the model amendment set forth below available to plan sponsors to permit them to apply these proposed regulations in the operation of their plans without violating the requirement that a plan be operated in accordance with its terms. Plan sponsors who adopt the model amendment will have reliance that, during the term of the

amendment, operation of their plans in a manner that satisfies the minimum distribution requirements in these proposed regulations will not cause their plans to fail to be qualified. In addition, distributees will have reliance that distributions that are made during the term of the amendment that satisfy the minimum distribution requirements in these proposed regulations. The model amendment may be adopted by plan sponsors, practitioners who sponsor volume submitter specimen plans and sponsors of master and prototype (M&P) plans.

These proposed regulations permit plans to make distributions under either default provisions or under permissible optional provisions. A plan that has been amended by adoption of the model amendment will be treated as operating in conformance with a requirement of the proposed regulations that permits the use of either default or optional provisions if the plan is operated consistently in accordance with either the default rule or a specific permitted alternative, notwithstanding the plan's terms.

The Service will not issue determination, opinion or advisory letters on the basis of the changes in these proposed regulations until the publication of final regulations. Until such time, the IRS will continue to issue such letters on the basis of the 1987 proposed regulations and SBJPA. Although the IRS will not issue determination, opinion or advisory letters with respect to the model amendment, the adoption of the model amendment will not affect a determination letter issued for a plan whose terms otherwise satisfy the 1987 proposed regulations and SBJPA. Plan sponsors should not adopt other amendments to attempt to conform their plans to the changes in these proposed regulations before the publication of final regulations. The IRS intends to publish procedures at a later date that will allow qualified plans to be amended to reflect the regulations under section 401(a)(9) when they are finalized.

Qualified plans are required to be amended for changes in the plan qualification requirements made by GUST by the end of the GUST remedial amendment period under section 401(b), which is generally the end of the first plan year beginning on or after January 1, 2001, or, if applicable, a later date determined under the provisions of section 19 of Rev. Proc. 2000-20 (2000-6 I.R.B. 553). Many plans have been operated in a manner that reflects the changes to section 401(a)(9) made by SBJPA and will have to be amended for

these changes by the end of the GUST remedial amendment period. The IRS intends that its procedures for amending qualified plans for the final regulations under section 401(a)(9) will generally avoid the need for plan sponsors, volume submitter practitioners and M&P plan sponsors to request another determination, opinion or advisory letter subsequent to their application for a GUST letter. In addition, to the extent such a subsequent letter is needed or desired, the IRS intends that its procedures will provide that the application for the letter will not have to be submitted prior to the next time the plan is otherwise amended or required to be amended.

The model amendment described above is set forth below:

With respect to distributions under the Plan made in calendar years beginning on or after January 1, 2000 (ALTERNATIVELY, SPECIFY A LATER CALENDAR YEAR FOR WHICH THE AMENDMENT IS TO BE INITIALLY EFFECTIVE), the Plan will apply the minimum distribution requirements of section 401(a)(9) of the Internal Revenue Code in accordance with the regulations under section 401(a)(9) that were proposed in January 2001, notwithstanding any provision of the Plan to the contrary. This amendment shall continue in effect until the end of the last calendar year beginning before the effective date of final regulations under section 401(a)(9) or such other date specified in guidance published by the Internal Revenue Service.

Amendment of IRAs and Effective Date

These regulations are proposed to be effective for distributions for calendar years beginning on or after January 1, 2002. For distributions for the 2001 calendar year, IRA owners are permitted, but not required, to follow these proposed regulations in operation, notwithstanding the terms of the IRA documents. IRA owners may therefore rely on these proposed regulations for distributions for the 2001 calendar year. However, IRA sponsors should not amend their IRA documents to conform their IRAs to the changes in these proposed regulations before the publication of final regulations. The IRS will not issue model IRAs on the basis of the changes in these proposed regulations until the publication of final regulations. Until such time, IRA owners can continue to use the current model IRAs which are based on the 1987 proposed regulations under section 401(a)(9). The IRS will publish procedures at a later date that will allow IRAs to be amended to reflect final regulations under section 401(a)(9).

Proposed Effective Date

The regulations are proposed to be applicable for determining required minimum distributions for calendar years beginning on or after January 1, 2002. For determining required minimum distributions for calendar year 2001, taxpayers may rely on these proposed regulations or on the 1987 proposed regulations. If, and to the extent, future guidance is more restrictive than the guidance in these proposed regulations, the future guidance will be issued without retroactive effect.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations, and because the regulation does not impose a collection of information on small entities, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Pursuant to section 7805(f) of the Code, these proposed regulations will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Comments and Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any electronic or written comments (preferably a signed original and eight (8) copies) that are submitted timely to the IRS. In addition to the other requests for comments set forth in this document, the IRS and Treasury also request comments on the clarity of the proposed rule and how it may be made easier to understand. All comments will be available for public inspection and copying.

A public hearing has been scheduled for June 1, 2001, at 10 a.m. in the IRS Auditorium (7th Floor), Internal Revenue Building, 1111 Constitution Avenue NW., Washington, DC. Due to building security procedures, visitors must enter at the 10th street entrance, located between Constitution and Pennsylvania Avenues, NW. In addition, all visitors must present photo identification to enter the building. Because of access restrictions, visitors will not be admitted beyond the immediate entrance area more than 15 minutes before the hearing starts. For information about having your name

placed on the building access list to attend the hearing, see the **FOR FURTHER INFORMATION CONTACT** section of this preamble.

The rules of 26 CFR 601.601(a)(3) apply to the hearing.

Persons who wish to present oral comments at the hearing must submit written comments and an outline of the topics to be discussed and the time to be devoted to each topic (signed original and eight (8) copies) by May 11, 2001.

A period of 10 minutes will be allotted to each person for making comments.

An agenda showing the scheduling of the speakers will be prepared after the deadline for receiving outlines has passed. Copies of the agenda will be available free of charge at the hearing.

Drafting Information

The principal authors of these regulations are Marjorie Hoffman and Cathy A. Vohs of the Office of the Division Counsel/Associate Chief Counsel (Tax Exempt and Government Entities). However, other personnel from the IRS and Treasury participated in their development.

List of Subjects

26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

26 CFR Part 54

Excise taxes, Pensions, Reporting and recordkeeping requirements.

Adoption of Amendments of the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 is amended by adding entries in numerical order to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

§ 1.401(a)(9)–1 is also issued under 26 U.S.C. 401(a)(9).

§ 1.401(a)(9)–2 is also issued under 26 U.S.C. 401(a)(9).

§ 1.401(a)(9)–3 is also issued under 26 U.S.C. 401(a)(9).

§ 1.401(a)(9)–4 is also issued under 26 U.S.C. 401(a)(9).

§ 1.401(a)(9)–5 is also issued under 26 U.S.C. 401(a)(9).

§ 1.401(a)(9)–6 is also issued under 26 U.S.C. 401(a)(9).

§ 1.401(a)(9)–7 is also issued under 26 U.S.C. 401(a)(9).

§ 1.401(a)(9)–8 is also issued under 26 U.S.C. 401(a)(9). * * *

§ 1.403(b)–2 is also issued under 26 U.S.C. 403(b)(10). * * *

§ 1.408-8 is also issued under 26 U.S.C. 408(a)(6) and (b)(3). * * *

Par. 2. Sections 1.401(a)(9)-0 through 1.401(a)(9)-8 are added to read as follows:

§ 1.401(a)(9)-0 Required minimum distributions; table of contents.

This table of contents lists the regulations relating to required minimum distributions under section 401(a)(9) of the Internal Revenue Code as follows:

- § 1.401(a)(9)-0 Required minimum distributions; table of contents.
- § 1.401(a)(9)-1 Required minimum distribution requirement in general.
- § 1.401(a)(9)-2 Distributions commencing before an employee's death.
- § 1.401(a)(9)-3 Death before required beginning date.
- § 1.401(a)(9)-4 Determination of the designated beneficiary.
- § 1.401(a)(9)-5 Required minimum distributions from defined contribution plans.
- § 1.401(a)(9)-6 Required minimum distributions from defined benefit plans.
- § 1.401(a)(9)-7 Rollovers and transfers.
- § 1.401(a)(9)-8 Special rules.

§ 1.401(a)(9)-1 Required minimum distribution requirement in general.

Q-1. What plans are subject to the required minimum distribution requirement under section 401(a)(9) and §§ 1.401(a)(9)-1 through 1.401(a)(9)-8?

A-1. All stock bonus, pension, and profit-sharing plans qualified under section 401(a) and annuity contracts described in section 403(a) are subject to the required minimum distribution rules in section 401(a)(9) and §§ 1.401(a)(9)-1 through 1.401(a)(9)-8. See § 1.403(b)-2 for the distribution rules applicable to annuity contracts or custodial accounts described in section 403(b), see § 1.408-8 for the distribution rules applicable to individual retirement plans, see § 1.408A-6 described for the distribution rules applicable to Roth IRAs under section 408A, and see section 457(d)(2)(A) for distribution rules applicable to certain deferred compensation plans for employees of tax exempt organizations or state and local government employees.

Q-2. Which employee account balances and benefits held under qualified trusts and plans are subject to the distribution rules of section 401(a)(9) and §§ 1.401(a)(9)-1 through 1.401(a)(9)-8?

A-2. The distribution rules of section 401(a)(9) apply to all account balances and benefits in existence on or after January 1, 1985. Sections 1.401(a)(9)-1 through 1.401(a)(9)-8 apply for purposes of determining required minimum distributions for calendar

years beginning on or after January 1, 2002.

Q-3. What specific provisions must a plan contain in order to satisfy section 401(a)(9)?

A-3. (a) *Required provisions.* In order to satisfy section 401(a)(9), the plan must include several written provisions reflecting section 401(a)(9). First, the plan must generally set forth the statutory rules of section 401(a)(9), including the incidental death benefit requirement in section 401(a)(9)(G). Second, the plan must provide that distributions will be made in accordance with §§ 1.401(a)(9)-1 through 1.401(a)(9)-8. The plan document must also provide that the provisions reflecting section 401(a)(9) override any distribution options in the plan inconsistent with section 401(a)(9). The plan also must include any other provisions reflecting section 401(a)(9) as are prescribed by the Commissioner in revenue rulings, notices, and other guidance published in the Internal Revenue Bulletin. See § 601.601(d)(2)(ii)(b) of this chapter.

(b) *Optional provisions.* The plan may also include written provisions regarding any optional provisions governing plan distributions that do not conflict with section 401(a)(9) and the regulations thereunder.

(c) *Absence of optional provisions.* Plan distributions commencing after an employee's death will be required to be made under the default provision set forth in § 1.401(a)(9)-3 for distributions unless the plan document contains optional provisions that override such default provisions. Thus, if distributions have not commenced to the employee at the time of the employee's death, distributions after the death of an employee are to be made automatically in accordance with the default provisions in A-4(a) of § 1.401(a)(9)-3 unless the plan either specifies in accordance with A-4(b) of § 1.401(a)(9)-3 the method under which distributions will be made or provides for elections by the employee (or beneficiary) in accordance with A-4(c) of § 1.401(a)(9)-3 and such elections are made by the employee or beneficiary.

§ 1.401(a)(9)-2 Distributions commencing before an employee's death.

Q-1. In the case of distributions commencing before an employee's death, how must the employee's entire interest be distributed in order to satisfy section 401(a)(9)(A)?

A-1. (a) In order to satisfy section 401(a)(9)(A), the entire interest of each employee must be distributed to such employee not later than the required beginning date, or must be distributed,

beginning not later than the required beginning date, over the life of the employee or joint lives of the employee and a designated beneficiary or over a period not extending beyond the life expectancy of the employee or the joint life and last survivor expectancy of the employee and the designated beneficiary.

(b) Section 401(a)(9)(G) provides that lifetime distributions must satisfy the incidental death benefit requirements.

(c) The amount required to be distributed for each calendar year in order to satisfy section 401(a)(9)(A) and (G) generally depends on whether a distribution is in the form of distributions under a defined contribution plan or annuity payments under a defined benefit plan. For the method of determining the required minimum distribution in accordance with section 401(a)(9)(A) and (G) from an individual account under a defined contribution plan, see § 1.401(a)(9)-5. For the method of determining the required minimum distribution in accordance with section 401(a)(9)(A) and (G) in the case of annuity payments from a defined benefit plan or an annuity contract, see § 1.401(a)(9)-6.

Q-2. For purposes of section 401(a)(9)(C), what does the term *required beginning date* mean?

A-2. (a) Except as provided in paragraph (b) of this A-2 with respect to a 5-percent owner, as defined in paragraph (c), the term *required beginning date* means April 1 of the calendar year following the later of the calendar year in which the employee attains age 70½, or the calendar year in which the employee retires from employment with the employer maintaining the plan.

(b) In the case of an employee who is a 5-percent owner, the term *required beginning date* means April 1 of the calendar year following the calendar year in which the employee attains age 70½.

(c) For purposes of section 401(a)(9), a 5-percent owner is an employee who is a 5-percent owner (as defined in section 416) with respect to the plan year ending in the calendar year in which the employee attains age 70½.

(d) Paragraph (b) of this A-2 does not apply in the case of a governmental plan (within the meaning of section 414(d)) or a church plan. For purposes of this paragraph, the term *church plan* means a plan maintained by a church for church employees, and the term *church* means any church (as defined in section 3121(w)(3)(A)) or qualified church-controlled organization (as defined in section 3121(w)(3)(B)).

(e) A plan is permitted to provide that the required beginning date for purposes of section 401(a)(9) for all employees is April 1 of the calendar year following the calendar year in which the employee attained age 70½ regardless of whether the employee is a 5-percent owner.

Q-3. When does an employee attain age 70½?

A-3. An employee attains age 70½ as of the date six calendar months after the 70th anniversary of the employee's birth. For example, if an employee's date of birth was June 30, 1932, the 70th anniversary of such employee's birth is June 30, 2002. Such employee attains age 70½ on December 30, 2002. Consequently, if the employee is a 5-percent owner or retired, such employee's required beginning date is April 1, 2003. However, if the employee's date of birth was July 1, 1932, the 70th anniversary of such employee's birth would be July 1, 2002. Such employee would then attain age 70½ on January 1, 2003 and such employee's required beginning date would be April 1, 2004.

Q-4. Must distributions made before the employee's required beginning date satisfy section 401(a)(9)?

A-4. Lifetime distributions made before the employee's required beginning date for calendar years before the employee's first distribution calendar year, as defined in A-1(b) of § 1.401(a)(9)-5, need not be made in accordance with section 401(a)(9). However, if distributions commence before the employee's required beginning date under a particular distribution option, such as in the form of an annuity, the distribution option fails to satisfy section 401(a)(9) at the time distributions commence if, under terms of the particular distribution option, distributions to be made for the employee's first distribution calendar year or any subsequent distribution calendar year will fail to satisfy section 401(a)(9).

Q-5. If distributions have begun to an employee before the employee's death (in accordance with section 401(a)(9)(A)(ii)), how must distributions be made after an employee's death?

A-5. Section 401(a)(9)(B)(i) provides that if the distribution of the employee's interest has begun in accordance with section 401(a)(9)(A)(ii) and the employee dies before his entire interest has been distributed to him, the remaining portion of such interest must be distributed at least as rapidly as under the distribution method being used under section 401(a)(9)(A)(ii) as of the date of his death. The amount required to be distributed for each

distribution calendar year following the calendar year of death generally depends on whether a distribution is in the form of distributions from an individual account under a defined contribution plan or annuity payments under a defined benefit plan. For the method of determining the required minimum distribution in accordance with section 401(a)(9)(B)(i) from an individual account, see A-5(a) of § 1.401(a)(9)-5 for the calculation of the distribution period that applies when an employee dies after the employee's required beginning date. In the case of annuity payments from a defined benefit plan or an annuity contract, see § 1.401(a)(9)-6.

Q-6. For purposes of section 401(a)(9)(B), when are distributions considered to have begun to the employee in accordance with section 401(a)(9)(A)(ii)?

A-6. (a) *General rule.* Except as otherwise provided in A-10 of § 1.401(a)(9)-6, distributions are not treated as having begun to the employee in accordance with section 401(a)(9)(A)(ii) until the employee's required beginning date, without regard to whether payments have been made before that date. For example, if employee A upon retirement in 2002, the calendar year A attains age 65½, begins receiving installment distributions from a profit-sharing plan over a period not exceeding the joint life and last survivor expectancy of A and A's beneficiary, benefits are not treated as having begun in accordance with section 401(a)(9)(A)(ii) until April 1, 2008 (the April 1 following the calendar year in which A attains age 70½). Consequently, if such employee dies before April 1, 2008 (A's required beginning date), distributions after A's death must be made in accordance with section 401(a)(9)(B)(ii) or (iii) and (iv) and § 1.401(a)(9)-4, and not section 401(a)(9)(B)(i). This is the case without regard to whether the plan has distributed the minimum distribution for the first distribution calendar year (as defined in A-1(b) of § 1.401(a)(9)-5) before A's death.

(b) If a plan provides, in accordance with A-2(e) of this section, that the required beginning date for purposes of section 401(a)(9) for all employees is April 1 of the calendar year following the calendar year in which the employee attains age 70½, an employee who dies after the required beginning date determined under the plan terms is treated as dying after the employee's required beginning date for purposes of A-5(a) of this section even though the employee dies before the April 1

following the calendar year in which the employee retires.

§ 1.401(a)(9)-3 Death before required beginning date.

Q-1. If an employee dies before the employee's required beginning date, how must the employee's entire interest be distributed in order to satisfy section 401(a)(9)?

A-1. (a) Except as otherwise provided in A-10 of § 1.401(a)(9)-6, if an employee dies before the employee's required beginning date (and, thus, generally before distributions are treated as having begun in accordance with section 401(a)(9)(A)(ii)), distribution of the employee's entire interest must be made in accordance with one of the methods described in section 401(a)(9)(B)(ii) or (iii). One method (the five-year rule in section 401(a)(9)(B)(ii)) requires that the entire interest of the employee be distributed within five years of the employee's death regardless of who or what entity receives the distribution. Another method (the life expectancy rule in section 401(a)(9)(B)(iii)) requires that any portion of an employee's interest payable to (or for the benefit of) a designated beneficiary be distributed, commencing within one year of the employee's death, over the life of such beneficiary (or over a period not extending beyond the life expectancy of such beneficiary). Section 401(a)(9)(B)(iv) provides special rules where the designated beneficiary is the surviving spouse of the employee, including a special commencement date for distributions under section 401(a)(9)(B)(iii) to the surviving spouse.

(b) See A-4 of this section for the rules for determining which of the methods described in paragraph (a) applies. See A-3 of this section to determine when distributions under the exception to the five-year rule in section 401(a)(9)(B)(iii) and (iv) must commence. See A-2 of this section to determine when the five-year period in section 401(a)(9)(B)(ii) ends. For distributions using the life expectancy rule in section 401(a)(9)(B)(iii) and (iv), see § 1.401(a)(9)-4 in order to determine the designated beneficiary under section 401(a)(9)(B)(iii) and (iv), see § 1.401(a)(9)-5 for the rules for determining the required minimum distribution under a defined contribution plan, and see § 1.401(a)(9)-6 for required minimum distributions under defined benefit plans.

Q-2. By when must the employee's entire interest be distributed in order to satisfy the five-year rule in section 401(a)(9)(B)(ii)?

A-2. In order to satisfy the five-year rule in section 401(a)(9)(B)(ii), the employee's entire interest must be distributed by the end of the calendar year which contains the fifth anniversary of the date of the employee's death. For example, if an employee dies on January 1, 2002, the entire interest must be distributed by the end of 2007, in order to satisfy the five-year rule in section 401(a)(9)(B)(ii).

Q-3. When are distributions required to commence in order to satisfy the life expectancy rule in section 401(a)(9)(B)(iii) and (iv)?

A-3. (a) *Nonspouse beneficiary.* In order to satisfy the life expectancy rule in section 401(a)(9)(B)(iii), if the designated beneficiary is not the employee's surviving spouse, distributions must commence on or before the end of the calendar year immediately following the calendar year in which the employee died. This rule also applies to the distribution of the entire remaining benefit if another individual is a designated beneficiary in addition to the employee's surviving spouse. See A-2 and A-3 of § 1.401(a)(9)-8, however, if the employee's benefit is divided into separate accounts (or segregated shares, in the case of a defined benefit plan).

(b) *Spousal beneficiary.* In order to satisfy the rule in section

401(a)(9)(B)(iii) and (iv), if the sole designated beneficiary is the employee's surviving spouse, distributions must commence on or before the later of—

(1) The end of the calendar year immediately following the calendar year in which the employee died; and

(2) The end of the calendar year in which the employee would have attained age 70½.

Q-4. How is it determined whether the five-year rule in section 401(a)(9)(B)(ii) or the life expectancy rule in section 401(a)(9)(B)(iii) and (iv) applies to a distribution?

A-4. (a) *No plan provision.* If a plan does not adopt an optional provision described in paragraph (b) or (c) of this A-4 specifying the method of distribution after the death of an employee, distribution must be made as follows:

(1) If the employee has a designated beneficiary, as determined under § 1.401(a)(9)-4, distributions are to be made in accordance with the life expectancy rule in section 401(a)(9)(B)(iii) and (iv).

(2) If the employee has no designated beneficiary, distributions are to be made in accordance with the five-year rule in section 401(a)(9)(B)(ii).

(b) *Optional plan provisions.* The plan may adopt a provision specifying either

that the five-year rule in section 401(a)(9)(B)(ii) will apply to certain distributions after the death of an employee even if the employee has a designated beneficiary or that distribution in every case will be made in accordance with the five-year rule in section 401(a)(9)(B)(ii). Further, a plan need not have the same method of distribution for the benefits of all employees.

(c) *Elections.* A plan may adopt a provision that permits employees (or beneficiaries) to elect on an individual basis whether the five-year rule in section 401(a)(9)(B)(ii) or the life expectancy rule in section 401(a)(9)(B)(iii) and (iv) applies to distributions after the death of an employee who has a designated beneficiary. Such an election must be made no later than the earlier of, the end of the calendar year in which distribution would be required to commence in order to satisfy the requirements for the life expectancy rule in section 401(a)(9)(B)(iii) and (iv) (see A-3 of this section for the determination of such calendar year), or the end of the calendar year which contains the fifth anniversary of the date of death of the employee. As of the date determined under the life expectancy rule, the election must be irrevocable with respect to the beneficiary (and all subsequent beneficiaries) and must apply to all subsequent calendar years. If a plan provides for the election, the plan may also specify the method of distribution that applies if neither the employee nor the beneficiary makes the election. If neither the employee nor the beneficiary elects a method and the plan does not specify which method applies, distribution must be made in accordance with paragraph (a).

Q-5. If the employee's surviving spouse is the employee's designated beneficiary and such spouse dies after the employee, but before distributions have begun to the surviving spouse under section 401(a)(9)(B)(iii) and (iv), how is the employee's interest to be distributed?

A-5. Pursuant to section 401(a)(9)(B)(iv)(II), if the surviving spouse dies after the employee, but before distributions to such spouse have begun under section 401(a)(9)(B)(iii) and (iv), the five-year rule in section 401(a)(9)(B)(ii) and the life expectancy rule in section 401(a)(9)(B)(iii) are to be applied as if the surviving spouse were the employee. In applying this rule, the date of death of the surviving spouse shall be substituted for the date of death of the employee. However, in such case, the rules in section 401(a)(9)(B)(iv) are not available to the surviving spouse of

the deceased employee's surviving spouse.

Q-6. For purposes of section 401(a)(9)(B)(iv)(II), when are distributions considered to have begun to the surviving spouse?

A-6. Distributions are considered to have begun to the surviving spouse of an employee, for purposes of section 401(a)(9)(B)(iv)(II), on the date, determined in accordance with A-3 of this section, on which distributions are required to commence to the surviving spouse, even though payments have actually been made before that date. See A-11 of § 1.401(a)(9)-6 for a special rule for annuities.

§ 1.401(a)(9)-4 Determination of the designated beneficiary.

Q-1. Who is a designated beneficiary under section 401(a)(9)(E)?

A-1. A designated beneficiary is an individual who is designated as a beneficiary under the plan. An individual may be designated as a beneficiary under the plan either by the terms of the plan or, if the plan so provides, by an affirmative election by the employee (or the employee's surviving spouse) specifying the beneficiary. A beneficiary designated as such under the plan is an individual who is entitled to a portion of an employee's benefit, contingent on the employee's death or another specified event. For example, if a distribution is in the form of a joint and survivor annuity over the life of the employee and another individual, the plan does not satisfy section 401(a)(9) unless such other individual is a designated beneficiary under the plan. A designated beneficiary need not be specified by name in the plan or by the employee to the plan in order to be a designated beneficiary so long as the individual who is to be the beneficiary is identifiable under the plan as of the date the beneficiary is determined under A-4 of this section. The members of a class of beneficiaries capable of expansion or contraction will be treated as being identifiable if it is possible, as of the date the beneficiary is determined, to identify the class member with the shortest life expectancy. The fact that an employee's interest under the plan passes to a certain individual under applicable state law does not make that individual a designated beneficiary unless the individual is designated as a beneficiary under the plan.

Q-2. Must an employee (or the employee's spouse) make an affirmative election specifying a beneficiary for a person to be a designated beneficiary under section 401(a)(9)(E)?

A-2. No. A designated beneficiary is an individual who is designated as a beneficiary under the plan whether or not the designation under the plan was made by the employee. The choice of beneficiary is subject to the requirements of sections 401(a)(11), 414(p), and 417.

Q-3. May a person other than an individual be considered to be a designated beneficiary for purposes of section 401(a)(9)?

A-3. (a) No. Only individuals may be designated beneficiaries for purposes of section 401(a)(9). A person that is not an individual, such as the employee's estate, may not be a designated beneficiary, and, if a person other than an individual is designated as a beneficiary of an employee's benefit, the employee will be treated as having no designated beneficiary for purposes of section 401(a)(9). However, see A-5 of this section for special rules which apply to trusts.

(b) If an employee is treated as having no designated beneficiary, for distributions under a defined contribution plan, the distribution period under section 401(a)(9)(A)(ii) after the death of the employee is limited to the period described in A-5(a)(2) of § 1.401(a)(9)-5 (the remaining life expectancy of the employee determined in accordance with A-5(c)(3) of § 1.401(a)(9)-5). Further, in such case, except as provided in A-10 of § 1.401(a)(9)-6, if the employee dies before the employee's required beginning date, distribution must be made in accordance with the 5-year rule in section 401(a)(9)(B)(ii).

Q-4. When is the designated beneficiary determined?

A-4. (a) *General rule.* Except as provided in paragraph (b) and § 1.401(a)(9)-6, the employee's designated beneficiary will be determined based on the beneficiaries designated as of the last day of the calendar year following the calendar year of the employee's death. Consequently, except as provided in § 1.401(a)(9)-6, any person who was a beneficiary as of the date of the employee's death, but is not a beneficiary as of that later date (e.g., because the person disclaims entitlement to the benefit in favor of another beneficiary or because the person receives the entire benefit to which the person is entitled before that date), is not taken into account in determining the employee's designated beneficiary for purposes of determining the distribution period for required minimum distributions after the employee's death.

(b) *Surviving spouse.* As provided in A-5 of § 1.401(a)(9)-3, in the case in which the employee's spouse is the designated beneficiary as of the date described in paragraph (a) of this A-5, and the surviving spouse dies after the employee and before the date on which distributions have begun to the spouse under section 401(a)(9)(B)(iii) and (iv), the rule in section 401(a)(9)(B)(iv)(II) will apply. Thus, the relevant designated beneficiary for determining the distribution period is the designated beneficiary of the surviving spouse. Such designated beneficiary will be determined as of the last day of the calendar year following the calendar year of surviving spouse's death. If, as of such last day, there is no designated beneficiary under the plan with respect to that surviving spouse, distribution must be made in accordance with the 5-year rule in section 401(a)(9)(B)(ii) and A-2 of § 1.401(a)(9)-3.

(c) *Multiple beneficiaries.*

Notwithstanding anything in this A-4 to the contrary, the rules in A-7 of § 1.401(a)(9)-5 apply if more than one beneficiary is designated with respect to an employee as of the date on which the designated beneficiary is to be determined in accordance with paragraphs (a) and (b) of this A-4.

Q-5. If a trust is named as a beneficiary of an employee, will the beneficiaries of the trust with respect to the trust's interest in the employee's benefit be treated as having been designated as beneficiaries of the employee under the plan for purposes of determining the distribution period under section 401(a)(9)?

A-5. (a) Only an individual may be a designated beneficiary for purposes of determining the distribution period under section 401(a)(9). Consequently, a trust is not a designated beneficiary even though the trust is named as a beneficiary. However, if the requirements of Paragraph (b) of this A-5 are met, the beneficiaries of the trust will be treated as having been designated as beneficiaries of the employee under the plan for purposes of determining the distribution period under section 401(a)(9).

(b) The requirements of this paragraph (b) are met if, during any period during which required minimum distributions are being determined by treating the beneficiaries of the trust as designated beneficiaries of the employee, the following requirements are met:

(1) The trust is a valid trust under state law, or would be but for the fact that there is no corpus.

(2) The trust is irrevocable or will, by its terms, become irrevocable upon the death of the employee.

(3) The beneficiaries of the trust who are beneficiaries with respect to the trust's interest in the employee's benefit are identifiable from the trust instrument within the meaning of A-1 of this section.

(4) The documentation described in A-6 of this section has been provided to the plan administrator.

(c) In the case of payments to a trust having more than one beneficiary, see A-7 of § 1.401(a)(9)-5 for the rules for determining the designated beneficiary whose life expectancy will be used to determine the distribution period. If the beneficiary of the trust named as beneficiary is another trust, the beneficiaries of the other trust will be treated as having been designated as beneficiaries of the employee under the plan for purposes of determining the distribution period under section 401(a)(9)(A)(ii), provided that the requirements of paragraph (b) of this A-5 are satisfied with respect to such other trust in addition to the trust named as beneficiary.

Q-6. If a trust is named as a beneficiary of an employee, what documentation must be provided to the plan administrator?

A-6. (a) *Required minimum distributions before death.* In order to satisfy the documentation requirement of this A-6 for required minimum distributions under section 401(a)(9) to commence before the death of an employee, the employee must comply with either paragraph (a)(1) or (2) of this A-6:

(1) The employee provides to the plan administrator a copy of the trust instrument and agrees that if the trust instrument is amended at any time in the future, the employee will, within a reasonable time, provide to the plan administrator a copy of each such amendment.

(2) The employee—

(i) Provides to the plan administrator a list of all of the beneficiaries of the trust (including contingent and remaindermen beneficiaries with a description of the conditions on their entitlement);

(ii) Certifies that, to the best of the employee's knowledge, this list is correct and complete and that the requirements of paragraphs (b)(1), (2), and (3) of A-5 of this section are satisfied;

(iii) Agrees that, if the trust instrument is amended at any time in the future, the employee will, within a reasonable time, provide to the plan administrator corrected certifications to the extent that the amendment changes any information previously certified; and

(iv) Agrees to provide a copy of the trust instrument to the plan administrator upon demand.

(b) *Required minimum distributions after death.* In order to satisfy the documentation requirement of this A-6 for required minimum distributions after the death of the employee, by the last day of the calendar year immediately following the calendar year in which the employee died, the trustee of the trust must either—

(1) Provide the plan administrator with a final list of all beneficiaries of the trust (including contingent and remaindermen beneficiaries with a description of the conditions on their entitlement) as of the end of the calendar year following the calendar year of the employee's death; certify that, to the best of the trustee's knowledge, this list is correct and complete and that the requirements of paragraph (b)(1), (2), and (3) of A-5 of this section are satisfied; and agree to provide a copy of the trust instrument to the plan administrator upon demand; or

(2) Provide the plan administrator with a copy of the actual trust document for the trust that is named as a beneficiary of the employee under the plan as of the employee's date of death.

(c) *Relief for discrepancy between trust instrument and employee certifications or earlier trust instruments.* (1) If required minimum distributions are determined based on the information provided to the plan administrator in certifications or trust instruments described in paragraph (a)(1), (a)(2) or (b) of this A-6, a plan will not fail to satisfy section 401(a)(9) merely because the actual terms of the trust instrument are inconsistent with the information in those certifications or trust instruments previously provided to the plan administrator, but only if the plan administrator reasonably relied on the information provided and the required minimum distributions for calendar years after the calendar year in which the discrepancy is discovered are determined based on the actual terms of the trust instrument.

(2) For purposes of determining the amount of the excise tax under section 4974, the required minimum distribution is determined for any year based on the actual terms of the trust in effect during the year.

§ 1.401(a)(9)-5 Required minimum distributions from defined contribution plans.

Q-1. If an employee's benefit is in the form of an individual account under a defined contribution plan, what is the

amount required to be distributed for each calendar year?

A-1. (a) *General rule.* If an employee's accrued benefit is in the form of an individual account under a defined contribution plan, the minimum amount required to be distributed for each distribution calendar year, as defined in paragraph (b) of this A-1, is equal to the quotient obtained by dividing the account (determined under A-3 of this section) by the applicable distribution period (determined under A-4 of this section). However, the required minimum distribution amount will never exceed the entire vested account balance on the date of the distribution. Further, the minimum distribution required to be distributed on or before an employee's required beginning date is always determined under section 401(a)(9)(A)(ii) and this A-1 and not section 401(a)(9)(A)(i).

(b) *Distribution calendar year.* A calendar year for which a minimum distribution is required is a distribution calendar year. If an employee's required beginning date is April 1 of the calendar year following the calendar year in which the employee attains age 70½, the employee's first distribution calendar year is the year the employee attains age 70½. If an employee's required beginning date is April 1 of the calendar year following the calendar year in which the employee retires, the calendar year in which the employee retires is the employee's first distribution calendar year. In the case of distributions to be made in accordance with the life expectancy rule in § 1.401(a)(9)-3 and in section 401(a)(9)(B)(iii) and (iv), the first distribution calendar year is the calendar year containing the date described in A-3(a) or A-3(b) of § 1.401(a)(9)-3, whichever is applicable.

(c) *Time for distributions.* The distribution required to be made on or before the employee's required beginning date shall be treated as the distribution required for the employee's first distribution calendar year (as defined in paragraph (b) of this A-1). The required minimum distribution for other distribution calendar years, including the required minimum distribution for the distribution calendar year in which the employee's required beginning date occurs, must be made on or before the end of that distribution calendar year.

(d) *Minimum distribution incidental benefit requirement.* If distributions are made in accordance with this section, the minimum distribution incidental benefit requirement of section 401(a)(9)(G) will be satisfied.

(e) *Annuity contracts.* Instead of satisfying this A-1, the required minimum distribution requirement may be satisfied by the purchase of an annuity contract from an insurance company in accordance with A-4 of § 1.401(a)(9)-6 with the employee's entire individual account. If such an annuity is purchased after distributions are required to commence (the required beginning date, in the case of distributions commencing before death, or the date determined under A-3 of § 1.401(a)(9)-3, in the case of distributions commencing after death), payments under the annuity contract purchased will satisfy section 401(a)(9) for distribution calendar years after the calendar year of the purchase if payments under the annuity contract are made in accordance with § 1.401(a)(9)-6. In such a case, payments under the annuity contract will be treated as distributions from the individual account for purposes of determining if the individual account satisfies section 401(a)(9) for the calendar year of the purchase. An employee may also purchase an annuity contract for a portion of the employee's account under the rules of A-2(c) of § 1.401(a)(9)-8.

Q-2. If an employee's benefit is in the form of an individual account and, in any calendar year, the amount distributed exceeds the minimum required, will credit be given in subsequent calendar years for such excess distribution?

A-2. If, for any distribution calendar year, the amount distributed exceeds the minimum required, no credit will be given in subsequent calendar years for such excess distribution.

Q-3. What is the amount of the account of an employee used for determining the employee's required minimum distribution in the case of an individual account?

A-3. (a) In the case of an individual account, the benefit used in determining the required minimum distribution for a distribution calendar year is the account balance as of the last valuation date in the calendar year immediately preceding that distribution calendar year (valuation calendar year) adjusted in accordance with paragraphs (b) and (c) of this A-3.

(b) The account balance is increased by the amount of any contributions or forfeitures allocated to the account balance as of dates in the valuation calendar year after the valuation date. Contributions include contributions made after the close of the valuation calendar year which are allocated as of dates in the valuation calendar year.

(c)(1) The account balance is decreased by distributions made in the

valuation calendar year after the valuation date.

(2)(i) The following rule applies if any portion of the required minimum distribution for the first distribution calendar year is made in the second distribution calendar year (*i.e.*, generally, the distribution calendar year in which the required beginning date occurs). In such case, for purposes of determining the account balance to be used for determining the required minimum distribution for the second distribution calendar year, distributions described in paragraph (c)(1) shall include an additional amount. This additional amount is equal to the amount of any distribution made in the second distribution calendar year on or before the required beginning date that is not in excess (when added to the amounts distributed in the first calendar year) of the amount required to meet the required minimum distribution for the first distribution calendar year.

(ii) This paragraph (c)(2) is illustrated by the following example:

Example. (i) Employee X, born October 1, 1931, is an unmarried participant in a qualified defined contribution plan (Plan Z). After retirement, X attains age 70½ in calendar year 2002. X's required beginning date is April 1, 2003. As of the last valuation date under Plan Z in calendar year 2001, which was on December 31, 2001, the value of X's account balance was \$25,300. No contributions are made or amounts forfeited after such date which are allocated in calendar year 2001. No rollover amounts are received after such date by Plan Z on X's behalf which were distributed by a qualified plan or IRA in calendar years 2001, 2002, or 2003. The applicable distribution period from the table in A-4(a)(2) for an individual age 71 is 25.3 years. The required minimum distribution for calendar year 2002 is \$1,000 (\$25,300 divided by 25.3). That amount is distributed to X on April 1, 2003.

(ii) The value of X's account balance as of December 31, 2002 (the last valuation date under Plan Z in calendar year 2002) is \$26,400. No contributions are made or amounts forfeited after such date which are allocated in calendar year 2002. In order to determine the benefit to be used in calculating the required minimum distribution for calendar year 2003, the account balance of \$26,400 will be reduced by \$1,000, the amount of the required minimum distribution for calendar year 2002 made on April 1, 2003. Consequently, the benefit for purposes of determining the required minimum distribution for calendar year 2003 is \$25,400.

(iii) If, instead of \$1,000 being distributed to X, \$20,000 is distributed on April 1 2003, the account balance of \$26,400 would still be reduced by \$1,000 in order to determine the benefit to be used in calculating the required minimum distribution for calendar year 2003. The amount of the distribution made on April 1, 2003, in order to meet the required minimum distribution for 2002

would still be \$1,000. The remaining \$19,000 (\$20,000—\$1,000) of the distribution is not the required minimum distribution for 2002. Instead, the remaining \$19,000 of the distribution is sufficient to satisfy the required minimum distribution requirement with respect to X for calendar year 2003. The amount which is required to be distributed for calendar year 2003 is \$1,040.10 (\$25,400 divided by 24.4, the applicable distribution period for an individual age 72). Consequently, no additional amount is required to be distributed to X in 2003 because \$19,000 exceeds \$1,040.10. However, pursuant to A-2 of this section, the remaining \$17,959.90 (\$19,000—\$1,040.10) may not be used to satisfy the required minimum distribution requirements for calendar year 2004 or any subsequent calendar years.

(d) If an amount is distributed by one plan and rolled over to another plan (receiving plan), A-2 of § 1.401(a)(9)-7 provides additional rules for determining the benefit and required minimum distribution under the receiving plan. If an amount is transferred from one plan (transferor plan) to another plan (transferee plan), A-3 and A-4 of § 1.401(a)(9)-7 provide additional rules for determining the amount of the required minimum distribution and the benefit under both the transferor and transferee plans.

Q-4. For required minimum distributions during an employee's lifetime, what is the applicable distribution period?

A-4. (a) *General rule*—(1) *Applicable distribution period.* Except as provided in paragraph (b) of this A-4, the applicable distribution period for required minimum distributions for distribution calendar years up to and including the distribution calendar year that includes the employee's date of death is determined using the table in paragraph (a)(2) for the employee's age as of the employee's birthday in the relevant distribution calendar year.

(2) *Table for determining distribution period*—(i) *General rule.* The following table is used for determining the distribution period for lifetime distributions to an employee.

| Age of the employee | Distribution period |
|---------------------|---------------------|
| 70 | 26.2 |
| 71 | 25.3 |
| 72 | 24.4 |
| 73 | 23.5 |
| 74 | 22.7 |
| 75 | 21.8 |
| 76 | 20.9 |
| 77 | 20.1 |
| 78 | 19.2 |
| 79 | 18.4 |
| 80 | 17.6 |
| 81 | 16.8 |
| 82 | 16.0 |
| 83 | 15.3 |

| Age of the employee | Distribution period |
|---------------------|---------------------|
| 84 | 14.5 |
| 85 | 13.8 |
| 86 | 13.1 |
| 87 | 12.4 |
| 88 | 11.8 |
| 89 | 11.1 |
| 90 | 10.5 |
| 91 | 9.9 |
| 92 | 9.4 |
| 93 | 8.8 |
| 94 | 8.3 |
| 95 | 7.8 |
| 96 | 7.3 |
| 97 | 6.9 |
| 98 | 6.5 |
| 99 | 6.1 |
| 100 | 5.7 |
| 101 | 5.3 |
| 102 | 5.0 |
| 103 | 4.7 |
| 104 | 4.4 |
| 105 | 4.1 |
| 106 | 3.8 |
| 107 | 3.6 |
| 108 | 3.3 |
| 109 | 3.1 |
| 110 | 2.8 |
| 111 | 2.6 |
| 112 | 2.4 |
| 113 | 2.2 |
| 114 | 2.0 |
| 115 and older | 1.8 |

(ii) *Authority for revised table.* The table in A-4(a)(2)(i) of this section may be replaced by any revised table prescribed by the Commissioner in revenue rulings, notices, or other guidance published in the Internal Revenue Bulletin. See § 601.601(d)(2)(ii)(b) of this chapter.

(b) *Spouse is sole beneficiary.* If the sole designated beneficiary of an employee is the employee's surviving spouse, for required minimum distributions during the employee's lifetime, the applicable distribution period is the longer of the distribution period determined in accordance with paragraph (a) of this A-4 or the joint life expectancy of the employee and spouse using the employee's and spouse's attained ages as of the employee's and the spouse's birthdays in the distribution calendar year. The spouse is sole designated beneficiary for purposes of determining the applicable distribution period for a distribution calendar year during the employee's lifetime if the spouse is the sole beneficiary of the employee's entire interest at all times during the distribution calendar year.

Q-5. For required minimum distributions after an employee's death, what is the applicable distribution period?

A-5. (a) *Death on or after the employee's required beginning date.* If an employee dies on or after

distribution has begun as determined under A-6 of § 1.401(a)(9)-2 (generally after the employee's required beginning date), in order to satisfy section 401(a)(9)(B)(i), the applicable distribution period for distribution calendar years after the distribution calendar year containing the employee's date of death is either—

(1) If the employee has a designated beneficiary as of the date determined under A-4 of § 1.401(a)(9)-4, the remaining life expectancy of the employee's designated beneficiary determined in accordance with paragraph(c)(1) or (2) of A-5; or

(2) If the employee does not have a designated beneficiary as of the date determined under A-4(a) of § 1.401(a)(9)-4, the remaining life expectancy of the employee determined in accordance with paragraph (c)(3) of this A-5.

(b) *Death before an employee's required beginning date.* If an employee dies before distribution has begun as determined under A-5 of § 1.401(a)(9)-2 (generally before the employee's required beginning date), in order to satisfy section 401(a)(9)(B)(iii) or (iv) and the life expectancy rule described in A-1 of § 1.401(a)(9)-3, the applicable distribution period for distribution calendar years after the distribution calendar year containing the employee's date of death is the remaining life expectancy of the employee's designated beneficiary, determined in accordance with paragraph(c)(1) or (2) of this A-5.

(c) *Life expectancy*—(1) *Nonspouse designated beneficiary.* The applicable distribution period measured by the beneficiary's remaining life expectancy is determined using the beneficiary's age as of the beneficiary's birthday in the calendar year immediately following the calendar year of the employee's death. In subsequent calendar years the applicable distribution period is reduced by one for each calendar year that has elapsed since the calendar year immediately following the calendar year of the employee's death.

(2) *Spouse designated beneficiary.* If the surviving spouse of the employee is the employee's sole beneficiary, the applicable period is measured by the surviving spouse's life expectancy using the surviving spouse's birthday for each distribution calendar year for which a required minimum distribution is required after the calendar year of the employee's death. For calendar years after the calendar year of the spouse's death, the spouse's remaining life expectancy is the life expectancy of the spouse using the age of the spouse as of the spouse's birthday in the calendar

year of the spouse's death. In subsequent calendar years, the applicable distribution period is reduced by one for each calendar year that has elapsed since the calendar year immediately following the calendar year of the spouse's death.

(3) *No designated beneficiary.* The applicable distribution period measured by the employee's remaining life expectancy is the life expectancy of the employee using the age of the employee as of the employee's birthday in the calendar year of the employee's death. In subsequent calendar years the applicable distribution period is reduced by one for each calendar year that has elapsed since the calendar year of death.

Q-6. What life expectancies must be used for purposes of determining required minimum distributions under section 401(a)(9)?

A-6. (a) *General rule.* Unless otherwise prescribed in accordance with paragraph (b) of this A-6, life expectancies for purposes of determining required minimum distributions under section 401(a)(9) must be computed using of the expected return multiples in Tables V and VI of § 1.72-9.

(b) *Revised expected return table.* The expected return multiples described in paragraph (a) of this A-6 may be replaced by revised expected return multiples prescribed for use for purposes of determining required minimum distributions under section 401(a)(9) by the Commissioner in revenue rulings, notices, and other guidance published in the Internal Revenue Bulletin. See § 601.601(d)(2)(ii)(b) of this chapter.

Q-7. If an employee has more than one designated beneficiary, which designated beneficiary's life expectancy will be used to determine the applicable distribution period?

A-7. (a) *General rule.* (1) Except as otherwise provided in paragraph (c) of this A-7, if more than one individual is designated as a beneficiary with respect to an employee as of any applicable date for determining the designated beneficiary, the designated beneficiary with the shortest life expectancy will be the designated beneficiary for purposes of determining the distribution period. However, except as otherwise provided in A-5 of § 1.401(a)(9)-4 and paragraph (c)(1) of this A-7, if a person other than an individual is designated as a beneficiary, the employee will be treated as not having any designated beneficiaries for purposes of section 401(a)(9) even if there are also individuals designated as beneficiaries.

(2) See A-2 of § 1.401(a)(9)-8 for special rules which apply if an employee's benefit under a plan is divided into separate accounts (or segregated shares in the case of a defined benefit plan) and the beneficiaries with respect to a separate account differ from the beneficiaries of another separate account.

(b) *Contingent beneficiary.* Except as provided in paragraph (c)(1) of this A-7, if a beneficiary's entitlement to an employee's benefit is contingent on an event other than the employee's death or the death of another beneficiary, such contingent beneficiary is considered to be a designated beneficiary for purposes of determining which designated beneficiary has the shortest life expectancy under paragraph (a) of this A-7.

(c) *Death contingency.* (1) If a beneficiary (subsequent beneficiary) is entitled to any portion of an employee's benefit only if another beneficiary dies before the entire benefit to which that other beneficiary is entitled has been distributed by the plan, the subsequent beneficiary will not be considered a beneficiary for purposes of determining who is the designated beneficiary with the shortest life expectancy under paragraph (a) of this A-7 or whether a beneficiary who is not an individual is a beneficiary. This rule does not apply if the other beneficiary dies prior to the applicable date for determining the designated beneficiary.

(2) If the designated beneficiary whose life expectancy is being used to calculate the distribution period dies on or after the applicable date, such beneficiary's remaining life expectancy will be used to determine the distribution period whether or not a beneficiary with a shorter life expectancy receives the benefits.

(3) This paragraph (c) is illustrated by the following examples:

Example 1. Employer L maintains a defined contribution plan, Plan W. Unmarried Employee C dies in calendar year 2001 at age 30. As of December 31, 2002, D, the sister of C, is the beneficiary of C's account balance under Plan W. Prior to death C has designated that, if D dies before C's entire account balance has been distributed to D, E, mother of C and D, will be the beneficiary of the account balance. Because E is only entitled, as a beneficiary, to any portion of C's account if D dies before the entire account has been distributed, E is disregarded in determining C's designated beneficiary. Accordingly, even after D's death, D's life expectancy continues to be used to determine the distribution period.

Example 2. (i) Employer M maintains a defined contribution plan, Plan X. Employee A, an employee of M, died in 2001 at the age of 55, survived by spouse, B, who was 50 years old. Prior to A's death, M had

established an account balance for A in Plan X. A's account balance is invested only in productive assets. A named the trustee of a testamentary trust (Trust P) established under A's will as the beneficiary of all amounts payable from the A's account in Plan X after A's death. A copy of the Trust P and a list of the trust beneficiaries were provided to the plan administrator of Plan X by the end of the calendar year following the calendar year of A's death. As of the date of A's death, the Trust P was irrevocable and was a valid trust under the laws of the state of A's domicile. A's account balance in Plan X was includible in A's gross estate under § 2039.

(ii) Under the terms of Trust P, all trust income is payable annually to B, and no one has the power to appoint Trust P principal to any person other than B. A's children, who are all younger than B, are the sole remainder beneficiaries of the Trust P. No other person has a beneficial interest in Trust P. Under the terms of the Trust P, B has the power, exercisable annually, to compel the trustee to withdraw from A's account balance in Plan X an amount equal to the income earned on the assets held in A's account in Plan X during the calendar year and to distribute that amount through Trust P to B. Plan X contains no prohibition on withdrawal from A's account of amounts in excess of the annual required minimum distributions under section 401(a)(9). In accordance with the terms of Plan X, the trustee of Trust P elects, in order to satisfy section 401(a)(9), to receive annual required minimum distributions using the life expectancy rule in section 401(a)(9)(B)(iii) for distributions over a distribution period equal to B's life expectancy. If B exercises the withdrawal power, the trustee must withdraw from A's account under Plan X the greater of the amount of income earned in the account during the calendar year or the required minimum distribution. However, under the terms of Trust P, and applicable state law, only the portion of the Plan X distribution received by the trustee equal to the income earned by A's account in Plan X is required to be distributed to B (along with any other trust income.)

(iii) Because some amounts distributed from A's account in Plan X to Trust P may be accumulated in Trust P during B's lifetime for the benefit of A's children, as remaindermen beneficiaries of Trust P, even though access to those amounts are delayed until after B's death, A's children are beneficiaries of A's account in Plan X in addition to B and B is not the sole beneficiary of A's account. Thus the designated beneficiary used to determine the distribution period from A's account in Plan X is the beneficiary with the shortest life expectancy. B's life expectancy is the shortest of all the potential beneficiaries of the testamentary trust's interest in A's account in Plan X (including remainder beneficiaries). Thus, the distribution period for purposes of section 401(a)(9)(B)(iii) is B's life expectancy. Because B is not the sole beneficiary of the testamentary trust's interest in A's account in Plan X, the special rule in 401(a)(9)(B)(iv) is not available and the annual required minimum distributions from the account to Trust M must begin no later than the end of

the calendar year immediately following the calendar year of A's death.

Example 3. (i) The facts are the same as Example 2 except that the testamentary trust instrument provides that all amounts distributed from A's account in Plan X to the trustee while B is alive will be paid directly to B upon receipt by the trustee of Trust P.

(ii) In this case, B is the sole beneficiary of A's account in Plan X for purposes of determining the designated beneficiary under section 401(a)(9)(B)(iii) and (iv). No amounts distributed from A's account in Plan X to Trust P are accumulated in Trust P during B's lifetime for the benefit of any other beneficiary. Because B is the sole beneficiary of the testamentary trust's interest in A's account in Plan X, the annual required minimum distributions from A's account to Trust P must begin no later than the end of the calendar year in which A would have attained age 70½, rather than the calendar year immediately following the calendar year of A's death.

(d) *Designations by beneficiaries.* (1) If the plan provides (or allows the employee to specify) that, after the end of the calendar year following the calendar year in which the employee died, any person or persons have the discretion to change the beneficiaries of the employee, then, for purposes of determining the distribution period after the employee's death, the employee will be treated as not having designated a beneficiary. However, such discretion will not be found to exist merely because a beneficiary may designate a subsequent beneficiary for distributions of any portion of the employee's benefit after the beneficiary dies.

(2) This paragraph (d) is illustrated by the following example:

Example. The facts are the same as in Example 1 in paragraph (c)(3) of this A-7, except that, as permitted under the plan, D designates E as the beneficiary of any amount remaining after the death of D rather than C making this designation. E is still disregarded in determining C's designated beneficiary for purposes of section 401(a)(9).

Q-8. If a portion of an employee's individual account is not vested as of the employee's required beginning date, how is the determination of the required minimum distribution affected?

A-8. If the employee's benefit is in the form of an individual account, the benefit used to determine the required minimum distribution for any distribution calendar year will be determined in accordance with A-1 of this section without regard to whether or not all of the employee's benefit is vested. If any portion of the employee's benefit is not vested, distributions will be treated as being paid from the vested portion of the benefit first. If, as of the end of a distribution calendar year (or as of the employee's required beginning date, in the case of the employee's first

distribution calendar year), the total amount of the employee's vested benefit is less than the required minimum distribution for the calendar year, only the vested portion, if any, of the employee's benefit is required to be distributed by the end of the calendar year (or, if applicable, by the employee's required beginning date). However, the required minimum distribution for the subsequent distribution calendar year must be increased by the sum of amounts not distributed in prior calendar years because the employee's vested benefit was less than the required minimum distribution (subject to the limitation that the required minimum distribution for that subsequent distribution calendar year will not exceed the vested portion of the employee's benefit). In such case, an adjustment for the additional amount distributed which corresponds to the adjustment described in A-3(c)(2) of this section will be made to the account used to determine the required minimum distribution for that calendar year.

§ 1.401(a)(9)-6 Required minimum distributions as annuity payments.

Q-1. How must annuity distributions under a defined benefit plan be paid in order to satisfy section 401(a)(9)?

A-1. (a) In order to satisfy section 401(a)(9), annuity distributions under a defined benefit plan must be paid in periodic payments made at intervals not longer than one year (payment intervals) for a life (or lives), or over a period certain not longer than a life expectancy (or joint life and last survivor expectancy) described in section 401(a)(9)(A)(ii) or section 401(a)(9)(B)(iii), whichever is applicable. The life expectancy (or joint life and last survivor expectancy) for purposes of determining the length of the period certain will be determined in accordance with A-3 of this section. Once payments have commenced over a period certain, the period certain may not be lengthened even if the period certain is shorter than the maximum permitted. Life annuity payments must satisfy the minimum distribution incidental benefit requirements of A-2 of this section. All annuity payments (life and period certain) also must either be nonincreasing or increase only as follows:

(1) With any percentage increase in a specified and generally recognized cost-of-living index;

(2) To the extent of the reduction in the amount of the employee's payments to provide for a survivor benefit upon death, but only if the beneficiary whose life was being used to determine the

period described in section 401(a)(9)(A)(ii) over which payments were being made dies or is no longer the employee's beneficiary pursuant to a qualified domestic relations order within the meaning of section 414(p);

(3) To provide cash refunds of employee contributions upon the employee's death; or

(4) Because of an increase in benefits under the plan.

(b) The annuity may be a life annuity (or joint and survivor annuity) with a period certain if the life (or lives, if applicable) and period certain each meet the requirements of paragraph (a) of this A-1. For purposes of this section, if distribution is permitted to be made over the lives of the employee and the designated beneficiary, references to life annuity include a joint and survivor annuity.

(c) Distributions under a variable annuity will not be found to be increasing merely because the amount of the payments varies with the investment performance of the underlying assets. However, the Commissioner may prescribe additional requirements applicable to such variable life annuities in revenue rulings, notices, and other guidance published in the Internal Revenue Bulletin. See § 601.601(d)(2)(ii)(b) of this chapter.

(d)(1) Except as provided in (d)(2) of this A-1, annuity payments must commence on or before the employee's required beginning date (within the meaning of A-2 of § 1.401(a)(9)-2). The first payment which must be made on or before the employee's required beginning date must be the payment which is required for one payment interval. The second payment need not be made until the end of the next payment interval even if that payment interval ends in the next calendar year. Similarly, in the case of distributions commencing after death in accordance with section 401(a)(9)(B)(iii) and (iv), the first payment that must be made on or before the date determined under A-3(a) or (b) (whichever is applicable) of § 1.401(a)(9)-3 must be the payment which is required for one payment interval. Payment intervals are the periods for which payments are received, e.g., bimonthly, monthly, semi-annually, or annually. All benefit accruals as of the last day of the first distribution calendar year must be included in the calculation of the amount of the life annuity payments for payment intervals ending on or after the employee's required beginning date.

(2) In the case of an annuity contract purchased after the required beginning date, the first payment interval must begin on or before the purchase date and

the payment required for one payment interval must be made no later than the end of such payment interval.

(3) This paragraph (d) is illustrated by the following example:

Example. A defined benefit plan (Plan X) provides monthly annuity payments of \$500 for the life of unmarried participants with a 10-year period certain. An unmarried participant (A) in Plan X attains age 70 1/2 in 2001. In order to meet the requirements of this paragraph, the first payment which must be made on behalf of A on or before April 1, 2002, will be \$500 and the payments must continue to be made in monthly payments of \$500 thereafter for the life and 10-year certain period.

(e) If distributions from a defined benefit plan are not in the form of an annuity, the employee's benefit will be treated as an individual account for purposes of determining the required minimum distribution. See § 1.401(a)(9)-5.

Q-2. How must distributions in the form of a life (or joint and survivor) annuity be made in order to satisfy the minimum distribution incidental benefit (MDIB) requirement of section 401(a)(9)(G)?

A-2. (a) *Life annuity for employee.* If the employee's benefit is payable in the form of a life annuity for the life of the employee satisfying section 401(a)(9), the MDIB requirement of section 401(a)(9)(G) will be satisfied.

(b) *Joint and survivor annuity, spouse beneficiary.* If the employee's sole beneficiary, as of the annuity starting date for annuity payments, is the employee's spouse and the distributions satisfy section 401(a)(9) without regard to the MDIB requirement, the distributions to the employee will be deemed to satisfy the MDIB requirement of section 401(a)(9)(G). For example, if an employee's benefit is being distributed in the form of a joint and survivor annuity for the lives of the employee and the employee's spouse and the spouse is the sole beneficiary of the employee, the amount of the periodic payment payable to the spouse may always be 100 percent of the annuity payment payable to the employee regardless of the difference in the ages between the employee and the employee's spouse. However, the amount of the payments under the annuity must be nonincreasing unless specifically permitted under A-1 of this section.

(c) *Joint and survivor annuity, nonspouse beneficiary—(1) Explanation of rule.* If distributions commence under a distribution option that is in the form of a joint and survivor annuity for the joint lives of the employee and a beneficiary other than the employee's

spouse, the MDIB requirement will not be satisfied as of the date distributions commence unless the distribution option provides that annuity payments to be made to the employee on and after the employee's required beginning date will satisfy the conditions of this paragraph. The periodic annuity payment payable to the survivor must not at any time on and after the employee's required beginning date exceed the applicable percentage of the annuity payment payable to the employee using the table below. Thus, this requirement must be satisfied with respect to any benefit increase after such date, including increases to reflect increases in the cost of living. The applicable percentage is based on the excess of the age of the employee over the age of the beneficiary as of their attained ages as of their birthdays in a calendar year. If the employee has more than one beneficiary, the applicable percentage will be the percentage using the age of the youngest beneficiary. Additionally, the amount of the annuity payments must satisfy A-1 of this section.

(2) *Table.*

| Excess of age of employee over age of beneficiary | Applicable percentage |
|---|-----------------------|
| 10 years or less | 100 |
| 11 | 96 |
| 12 | 93 |
| 13 | 90 |
| 14 | 87 |
| 15 | 84 |
| 16 | 82 |
| 17 | 79 |
| 18 | 77 |
| 19 | 75 |
| 20 | 73 |
| 21 | 72 |
| 22 | 70 |
| 23 | 68 |
| 24 | 67 |
| 25 | 66 |
| 26 | 64 |
| 27 | 63 |
| 28 | 62 |
| 29 | 61 |
| 30 | 60 |
| 31 | 59 |
| 32 | 59 |
| 33 | 58 |
| 34 | 57 |
| 35 | 56 |
| 36 | 56 |
| 37 | 55 |
| 38 | 55 |
| 39 | 54 |
| 40 | 54 |
| 41 | 53 |
| 42 | 53 |
| 43 | 53 |
| 44 and greater | 52 |

(3) *Example.* This paragraph (c) is illustrated by the following example:

Example. Distributions commence on January 1, 2001 to an employee (Z), born March 1, 1935, after retirement at age 65. Z's daughter (Y), born February 5, 1965, is Z's beneficiary. The distributions are in the form of a joint and survivor annuity for the lives of Z and Y with payments of \$500 a month to Z and upon Z's death of \$500 a month to Y, i.e., the projected monthly payment to Y is 100 percent of the monthly amount payable to Z. There is no provision under the option for a change in the projected payments to Y as of April 1, 2006, Z's required beginning date. Consequently, as of January 1, 2001, the date annuity distributions commence, the plan does not satisfy the MDIB requirement in operation because, as of such date, the distribution option provides that, as of Z's required beginning date, the monthly payment to Y upon Z's death will exceed 60 percent of Z's monthly payment (the maximum percentage for a difference of ages of 30 years).

(d) *Period certain and annuity features.* If a distribution form includes a life annuity and a period certain, the amount of the annuity payments payable to the employee must satisfy paragraph (c) of this A-2, and the period certain may not exceed the period determined under A-3 of this section.

Q-3. How long is a period certain under an annuity contract permitted to extend?

A-3. (a) *Distributions commencing during the employee's life—(1) Spouse beneficiary.* If an employee's spouse is the employee's sole beneficiary as of the annuity starting date, the period certain for annuity distributions commencing during the life of an employee with an annuity starting date on or after the employee's required beginning date is not permitted to exceed the joint life and last survivor expectancy of the employee and the spouse using the age of the employee and spouse as of their birthdays in the calendar year that contains the annuity starting date.

(2) *Nonspouse beneficiary.* If an employee's surviving spouse is not the employee's sole beneficiary as of the annuity starting date, the period certain for any annuity distributions during the life of the employee with an annuity starting date on or after the employee's required beginning date is not permitted to exceed the shorter of the applicable distribution period for the employee (determined in accordance with the table in A-4(a)(2) of § 1.401(a)(9)-5 for the calendar year that contains on the annuity starting date or the joint life and last survivor expectancy of the employee and the employee's designated beneficiary, determined using the designated beneficiary as of the annuity starting date and using their ages as of their birthdays in the calendar year that contains the annuity starting date. See A-10 for the rule for annuity

payments with an annuity starting date before the required beginning date.

(b) *Life expectancy rule.* (1) If annuity distributions commence after the death of the employee under the life expectancy rule (under section 401(a)(9)(iii) or (iv)), the period certain for any distributions commencing after death cannot exceed the applicable distribution period determined under A-5(b) of § 1.401(a)(9)-5 for the distribution calendar year that contains the annuity starting date.

(2) If the annuity starting date is in a calendar year before the first distribution calendar year, the period certain may not exceed the life expectancy of the designated beneficiary using the beneficiary's age in the year that contains the annuity starting date.

Q-4. May distributions be made from an annuity contract which is purchased from an insurance company?

A-4. Yes. Distributions may be made from an annuity contract which is purchased with the employee's benefit by the plan from an insurance company and which makes payments that satisfy the provisions of this section. In the case of an annuity contract purchased from an insurance company, there is also an exception to the nonincreasing requirement in A-1(a) of this section for an increase to provide a cash refund upon the employee's death equal to the excess of the amount of the premiums paid for the contract over the prior distributions under the contract. If the payments actually made under the annuity contract do not meet the requirements of section 401(a)(9), the plan fails to satisfy section 401(a)(9).

Q-5. In the case of annuity distributions under a defined benefit plan, how must additional benefits which accrue after the employee's required beginning date be distributed in order to satisfy section 401(a)(9)?

A-5. (a) In the case of annuity distributions under a defined benefit plan, if any additional benefits accrue after the employee's required beginning date, distribution of such amount as a separate identifiable component must commence in accordance with A-1 of this section beginning with the first payment interval ending in the calendar year immediately following the calendar year in which such amount accrues.

(b) A plan will not fail to satisfy section 401(a)(9) merely because there is an administrative delay in the commencement of the distribution of the separate identifiable component, provided that the actual payment of such amount commences as soon as practicable but not later than by the end of the first calendar year following the calendar year in which the additional benefit accrues, and that the total

amount paid during such first calendar year is not less than the total amount that was required to be paid during that year under A-5(a) of this section.

Q-6. If a portion of an employee's benefit is not vested as of the employee's required beginning date, how is the determination of the required minimum distribution affected?

A-6. In the case of annuity distributions from a defined benefit plan, if any portion of the employee's benefit is not vested as of December 31 of a distribution calendar year (or as of the employee's required beginning date in the case of the employee's first distribution calendar year), the portion which is not vested as of such date will be treated as not having accrued for purposes of determining the required minimum distribution for that distribution calendar year. When an additional portion of the employee's benefit becomes vested, such portion will be treated as an additional accrual. See A-5 of this section for the rules for distributing benefits which accrue under a defined benefit plan after the employee's required beginning date.

Q-7. If an employee retires after the calendar year in which the employee attains age 70½, for what period must the employee's accrued benefit under a defined benefit plan be actuarially increased?

A-7. (a) *Actuarial increase starting date.* If an employee (other than a 5-percent owner) retires after the calendar year in which the employee attains age 70½, in order to satisfy section 401(a)(9)(C)(iii), the employee's accrued benefit under a defined benefit plan must be actuarially increased to take into account any period after age 70½ in which the employee was not receiving any benefits under the plan. The actuarial increase required to satisfy section 401(a)(9)(C)(iii) must be provided for the period starting on April 1 following the calendar year in which the employee attains age 70½.

(b) *Actuarial increase ending date.* The period for which the actuarial increase must be provided ends on the date on which benefits commence after retirement in an amount sufficient to satisfy section 401(a)(9).

(c) *Nonapplication to plan providing same required beginning date for all employees.* If as permitted under A-2(e) of § 1.401(a)(9)-2, a plan provides that the required beginning date for purposes of section 401(a)(9) for all employees is April 1 of the calendar year following the calendar year in which the employee attained age 70½ (regardless of whether the employee is a 5-percent owner) and the plan makes distributions

in an amount sufficient to satisfy section 401(a)(9) using that required beginning date, no actuarial increase is required under section 401(a)(9)(C)(iii).

(d) *Nonapplication to defined contribution plans.* The actuarial increase required under this A-7 does not apply to defined contribution plans.

(e) *Nonapplication to governmental and church plans.* The actuarial increase required under this A-7 does not apply to a governmental plan (within the meaning of section 414(d)) or a church plan. For purposes of this paragraph, the term *church plan* means a plan maintained by a church for church employees, and the term *church* means any church (as defined in section 3121(w)(3)(A)) or qualified church-controlled organization (as defined in section 3121(w)(3)(B)).

Q-8. What amount of actuarial increase is required under section 401(a)(9)(C)(iii)?

A-8. In order to satisfy section 401(a)(9)(C)(iii), the retirement benefits payable with respect to an employee as of the end of the period for actuarial increases (described in A-7 of this section) must be no less than: the actuarial equivalent of the employee's retirement benefits that would have been payable as of the date the actuarial increase must commence under A-7(a) of this section if benefits had commenced on that date; plus the actuarial equivalent of any additional benefits accrued after that date; reduced by the actuarial equivalent of any distributions made with respect to the employee's retirement benefits after that date. Actuarial equivalence is determined using the plan's assumptions for determining actuarial equivalence for purposes of satisfying section 411.

Q-9. How does the actuarial increase required under section 401(a)(9)(C)(iii) relate to the actuarial increase required under section 411?

A-9. In order for any of an employee's accrued benefit to be nonforfeitable as required under section 411, a defined benefit plan must make an actuarial adjustment to an accrued benefit the payment of which is deferred past normal retirement age. The only exception to this rule is that generally no actuarial adjustment is required to reflect the period during which a benefit is suspended as permitted under section 203(a)(3)(B) of the Employee Retirement Income Security Act of 1974 (ERISA). The actuarial increase required under section 401(a)(9) for the period described in A-7 of this section is generally the same as, and not in addition to, the actuarial increase required for the same period under

section 411 to reflect any delay in the payment of retirement benefits after normal retirement age. However, unlike the actuarial increase required under section 411, the actuarial increase required under section 401(a)(9)(C) must be provided even during the period during which an employee's benefit has been suspended in accordance with ERISA section 203(a)(3)(B).

Q-10. What rule applies if distributions commence to an employee on a date before the employee's required beginning date over a period permitted under section 401(a)(9)(A)(ii) and the distribution form is an annuity under which distributions are made in accordance with the provisions of A-1 (and if applicable A-4) of this section?

A-10. (a) *General rule.* If distributions irrevocably (except for acceleration) commence to an employee on a date before the employee's required beginning date over a period permitted under section 401(a)(9)(A)(ii) and the distribution form is an annuity under which distributions are made in accordance with the provisions of A-1 (and, if applicable, A-4) of this section, the annuity starting date will be treated as the required beginning date for purposes of applying the rules of this section and § 1.401(a)(9)-3. Thus, for example, the designated beneficiary distributions will be determined as of the annuity starting date. Similarly, if the employee dies after the annuity starting date but before the annuity starting date determined under A-2 of § 1.401(a)(9)-2, after the employee's death, the remaining portion of the employee's interest must continue to be distributed in accordance with this section over the remaining period over which distributions commenced (single or joint lives and, if applicable, period certain). The rules in § 1.401(a)(9)-3 and section 401(a)(9)(B)(ii) or (iii) and (iv) do not apply.

(b) *Period certain.* If as of the employee's birthday in the year that contains the annuity starting date, the age of the employee is under 70, the following rule applies in applying the rule in paragraph (a)(2) of A-3 of this section. The applicable distribution period for the employee (determined in accordance with the table in A-4(a)(2) of § 1.401(a)(9)-5) is 26.2 plus the difference between 70 and the age of the employee as of the employee's birthday in the year that contains the annuity starting date.

Q-11. What rule applies if distributions commence irrevocably (except for acceleration) to the surviving spouse of an employee over a period permitted under section 401(a)(9)(B)(iii)(II) before the date on

which distributions are required to commence and the distribution form is an annuity under which distributions are made as of the date distributions commence in accordance with the provisions of A-1 (and if applicable A-4) of this section,

A-11. If distributions commence irrevocably (except for acceleration) to the surviving spouse of an employee over a period permitted under section 401(a)(9)(B)(iii)(II) before the date on which distributions are required to commence and the distribution form is an annuity under which distributions are made as of the date distributions commence in accordance with the provisions of A-1 (and if applicable A-4) of this section, distributions will be considered to have begun on the actual commencement date for purposes of section 401(a)(9)(B)(iv)(II). Consequently, in such case, A-5 of § 1.401(a)(9)-3 and section 401(a)(9)(B)(ii) and (iii) will not apply upon the death of the surviving spouse as though the surviving spouse were the employee. Instead, the annuity distributions must continue to be made, in accordance with the provisions of A-1 (and if applicable A-4) of this section over the remaining period over which distributions commenced (single life and, if applicable, period certain).

§ 1.401(a)(9)-7 Rollovers and Transfers.

Q-1. If an amount is distributed by one plan (distributing plan) and is rolled over to another plan, is the benefit or the required minimum distribution under the distributing plan affected by the rollover?

A-1. No. If an amount is distributed by one plan and is rolled over to another plan, the amount distributed is still treated as a distribution by the distributing plan for purposes of section 401(a)(9), notwithstanding the rollover.

Q-2. If an amount is distributed by one plan (distributing plan) and is rolled over to another plan (receiving plan), how are the benefit and the required minimum distribution under the receiving plan affected?

A-2. If an amount is distributed by one plan (distributing plan) and is rolled over to another plan (receiving plan), the benefit of the employee under the receiving plan is increased by the amount rolled over. However, the distribution has no impact on the required minimum distribution to be made by the receiving plan for the calendar year in which the rollover is received. But, if a required minimum distribution is required to be made by the receiving plan for the following calendar year, the rollover amount must be considered to be part of the

employee's benefit under the receiving plan. Consequently, for purposes of determining any required minimum distribution for the calendar year immediately following the calendar year in which the amount rolled over is received by the receiving plan, in the case in which the amount rolled over is received after the last valuation date in the calendar year under the receiving plan, the benefit of the employee as of such valuation date, adjusted in accordance with A-3 of § 1.401(a)(9)-5, will be increased by the rollover amount valued as of the date of receipt. For purposes of calculating the benefit under the receiving plan pursuant to the preceding sentence, if the amount rolled over is received by the receiving plan in a different calendar year from the calendar year in which it is distributed by the distributing plan, the amount rolled over is deemed to have been received by the receiving plan in the calendar year in which it was distributed by the distributing plan.

Q-3. In the case of a transfer of an amount of an employee's benefit from one plan (transferor plan) to another plan (transferee plan), are there any special rules for satisfying the required minimum distribution requirement or determining the employee's benefit under the transferor plan?

A-3. (a) In the case of a transfer of an amount of an employee's benefit from one plan to another, the transfer is not treated as a distribution by the transferor plan for purposes of section 401(a)(9). Instead, the benefit of the employee under the transferor plan is decreased by the amount transferred. However, if any portion of an employee's benefit is transferred in a distribution calendar year with respect to that employee, in order to satisfy section 401(a)(9), the transferor plan must determine the amount of the required minimum distribution with respect to that employee for the calendar year of the transfer using the employee's benefit under the transferor plan before the transfer. Additionally, if any portion of an employee's benefit is transferred in the employee's second distribution calendar year but on or before the employee's required beginning date, in order to satisfy section 401(a)(9), the transferor plan must determine the amount of the required minimum distribution requirement for the employee's first distribution calendar year based on the employee's benefit under the transferor plan before the transfer. The transferor plan may satisfy the required minimum distribution requirement for the calendar year of the transfer (and the prior year if applicable) by segregating

the amount which must be distributed from the employee's benefit and not transferring that amount. Such amount may be retained by the transferor plan and distributed on or before the date required.

(b) For purposes of determining any required minimum distribution for the calendar year immediately following the calendar year in which the transfer occurs, in the case of a transfer after the last valuation date for the calendar year of the transfer under the transferor plan, the benefit of the employee as of such valuation date, adjusted in accordance with A-3 of § 1.401(a)(9)-5, will be decreased by the amount transferred, valued as of the date of the transfer.

Q-4. If an amount of an employee's benefit is transferred from one plan (transferor plan) to another plan (transferee plan), how are the benefit and the required minimum distribution under the transferee plan affected?

A-4. In the case of a transfer from one plan (transferor plan) to another (transferee plan), the general rule is that the benefit of the employee under the transferee plan is increased by the amount transferred. The transfer has no impact on the required minimum distribution to be made by the transferee plan in the calendar year in which the transfer is received. However, if a required minimum distribution is required from the transferee plan for the following calendar year, the transferred amount must be considered to be part of the employee's benefit under the transferee plan. Consequently, for purposes of determining any required minimum distribution for the calendar year immediately following the calendar year in which the transfer occurs, in the case of a transfer after the last valuation date of the transferee plan in the transfer calendar year, the benefit of the employee under the receiving plan valued as of such valuation date, adjusted in accordance with A-3 of § 1.401(a)(9)-5, will be increased by the amount transferred valued as of the date of the transfer.

Q-5. How are a spinoff, merger or consolidation (as defined in § 1.414(l)-1) treated for purposes of determining an employee's benefit and required minimum distribution under section 401(a)(9)?

A-5. For purposes of determining an employee's benefit and required minimum distribution under section 401(a)(9), a spinoff, a merger, or a consolidation (as defined in § 1.414(l)-1) will be treated as a transfer of the benefits of the employees involved. Consequently, the benefit and required minimum distribution of each employee involved under the transferor and

transferee plans will be determined in accordance with A-3 and A-4 of this section.

§ 1.401(a)(9)-8 Special rules.

Q-1. What distribution rules apply if an employee is a participant in more than one plan?

A-1. If an employee is a participant in more than one plan, the plans in which the employee participates are not permitted to be aggregated for purposes of testing whether the distribution requirements of section 401(a)(9) are met. The distribution of the benefit of the employee under each plan must separately meet the requirements of section 401(a)(9). For this purpose, a plan described in section 414(k) is treated as two separate plans, a defined contribution plan to the extent benefits are based on an individual account and a defined benefit plan with respect to the remaining benefits.

Q-2. If an employee's benefit under a plan is divided into separate accounts (or segregated shares in the case of a defined benefit plan), do the distribution rules in section 401(a)(9) and these regulations apply separately to each separate account (or segregated share)?

A-2. (a) Except as otherwise provided in paragraphs (b) and (c) of this A-2, if an employee's account under a defined contribution plan is divided into separate accounts (or if an employee's benefit under a defined benefit plan is divided into segregated shares in the case of a defined benefit plan) under the plan, the separate accounts (or segregated shares) will be aggregated for purposes of satisfying the rules in section 401(a)(9). Thus, except as otherwise provided in paragraphs (b) and (c) of this A-2, all separate accounts, including a separate account for nondeductible employee contributions (under section 72(d)(2)) or for qualified voluntary employee contributions (as defined in section 219(e)), will be aggregated for purposes of section 401(a)(9).

(b) If, for lifetime distributions, as of an employee's required beginning date (or the beginning of any distribution calendar year beginning after the employee's required beginning date), or in the case of distributions under section 401(a)(9)(B)(ii) or (iii) and (iv), as of the end of the year following the year containing the employee's (or spouse's, where applicable) date of death, the beneficiaries with respect to a separate account (or segregated share in the case of a defined benefit plan) under the plan differ from the beneficiaries with respect to the other separate accounts (or segregate shares)

of the employee under the plan, such separate account (or segregated share) under the plan need not be aggregated with other separate accounts (or segregated shares) under the plan in order to determine whether the distributions from such separate account (or segregated share) under the plan satisfy section 401(a)(9). Instead, the rules in section 401(a)(9) may separately apply to such separate account (or segregated share) under the plan. For example, if, in the case of a distribution described in section 401(a)(9)(B)(iii) and (iv), the only beneficiary of a separate account (or segregated share) under the plan is the employee's surviving spouse, and beneficiaries other than the surviving spouse are designated with respect to the other separate accounts of the employee, distribution of the spouse's separate account (or segregated share) under the plan need not commence until the date determined under the first sentence in A-3(b) of § 1.401(a)(9)-3, even if distribution of the other separate accounts (or segregated shares) under the plan must commence at an earlier date. In the case of a distribution after the death of an employee to which section 401(a)(9)(B)(i) does not apply, distribution from a separate account (or segregated share) of an employee may be made over a beneficiary's life expectancy in accordance with section 401(a)(9)(B)(iii) and (iv) even through distributions from other separate accounts (or segregated shares) under the plan with different beneficiaries are being made in accordance with the five-year rule in section 401(a)(9)(B)(ii).

(c) A portion of an employee's account balance under a defined contribution plan is permitted to be used to purchase an annuity contract with a remaining amount maintained in the separate account. In that case, the separate account under the plan must be distributed in accordance with § 1.401(a)(9)-5 in order to satisfy section 401(a)(9) and the annuity payments under the annuity contract must satisfy § 1.401(a)(9)-6 in order to satisfy section 401(a)(9).

Q-3. What is a separate account or segregated share for purposes of section 401(a)(9)?

A-3. (a) For purposes of section 401(a)(9), a separate account in an individual account is a portion of an employee's benefit determined by an acceptable separate accounting including allocating investment gains and losses, and contributions and forfeitures, on a pro rata basis in a reasonable and consistent manner between such portion and any other benefits. Further, the amounts of each

such portion of the benefit will be separately determined for purposes of determining the amount of the required minimum distribution in accordance with § 1.401(a)(9)-5.

(b) A benefit in a defined benefit plan is separated into segregated shares if it consists of separate identifiable components which may be separately distributed.

Q-4. Must a distribution that is required by section 401(a)(9) to be made by the required beginning date to an employee or that is required by section 401(a)(9)(B)(iii) and (iv) to be made by the required time to a designated beneficiary who is a surviving spouse be made notwithstanding the failure of the employee, or spouse where applicable, to consent to a distribution while a benefit is immediately distributable?

A-4. Yes. Section 411(a)(11) and section 417(e) (see §§ 1.411(a)(11)-1(c)(2) and 1.417(e)-1(c)) require employee and spousal consent to certain distributions of plan benefits while such benefits are immediately distributable. If an employee's normal retirement age is later than the required beginning date for the commencement of distributions under section 401(a)(9) and, therefore, benefits are still immediately distributable, the plan must, nevertheless, distribute plan benefits to the participant (or where applicable, to the spouse) in a manner that satisfies the requirements of section 401(a)(9). Section 401(a)(9) must be satisfied even though the participant (or spouse, where applicable) fails to consent to the distribution. In such a case, the plan may distribute in the form of a qualified joint and survivor annuity (QJSA) or in the form of a qualified preretirement survivor annuity (QPSA) and the consent requirements of sections 411(a)(11) and 417(e) are deemed to be satisfied if the plan has made reasonable efforts to obtain consent from the participant (or spouse if applicable) and if the distribution otherwise meets the requirements of section 417. If, because of section 401(a)(11)(B), the plan is not required to distribute in the form of a QJSA to a participant or a QPSA to a surviving spouse, the plan may distribute the required minimum distribution amount required at the time required to satisfy section 401(a)(9) and the consent requirements of sections 411(a)(11) and 417(e) are deemed to be satisfied if the plan has made reasonable efforts to obtain consent from the participant (or spouse if applicable) and if the distribution otherwise meets the requirements of section 417.

Q-5. Who is an employee's spouse or surviving spouse for purposes of section 401(a)(9)?

A-5. Except as otherwise provided in A-6(a) (in the case of distributions of a portion of an employee's benefit payable to a former spouse of an employee pursuant to a qualified domestic relations order), for purposes of section 401(a)(9), an individual is a spouse or surviving spouse of an employee if such individual is treated as the employee's spouse under applicable state law. In the case of distributions after the death of an employee, for purposes of determining whether, under the life expectancy rule in section 401(a)(9)(B)(iii) and (iv), the provisions of section 401(a)(9)(B)(iv) apply, the spouse of the employee is determined as of the date of death of the employee.

Q-6. In order to satisfy section 401(a)(9), are there any special rules which apply to the distribution of all or a portion of an employee's benefit payable to an alternate payee pursuant to a qualified domestic relations order as defined in section 414(p) (QDRO)?

A-6. (a) A former spouse to whom all or a portion of the employee's benefit is payable pursuant to a QDRO will be treated as a spouse (including a surviving spouse) of the employee for purposes of section 401(a)(9), including the minimum distribution incidental benefit requirement, regardless of whether the QDRO specifically provides that the former spouse is treated as the spouse for purposes of sections 401(a)(11) and 417.

(b)(1) If a QDRO provides that an employee's benefit is to be divided and a portion is to be allocated to an alternate payee, such portion will be treated as a separate account (or segregated share) which separately must satisfy the requirements of section 401(a)(9) and may not be aggregated with other separate accounts (or segregated shares) of the employee for purposes of satisfying section 401(a)(9). Except as otherwise provided in paragraph

(b)(2) of this A-6, distribution of such separate account allocated to an alternate payee pursuant to a QDRO must be made in accordance with section 401(a)(9). For example, in general, distribution of such account will satisfy section 401(a)(9)(A) if required minimum distributions from such account during the employee's lifetime begin not later than the employee's required beginning date and the required minimum distribution is determined in accordance with § 1.401(a)(9)-5 for each distribution calendar year using an applicable distribution period determined under A-4 of § 1.401(a)(9)-5 using the age of the employee in the distribution calendar year for purposes of using the

table in A-4(a)(2) of § 1.401(a)(9)-5 if applicable or ages of the employee and spousal alternate payee if their joint life expectancy is longer than the distribution period using that table. The determination of whether distribution from such account after the death of the employee to the alternate payee will be made in accordance with section 401(a)(9)(B)(i) or section 401(a)(9)(B)(ii) or (iii) and (iv) will depend on whether distributions have begun as determined under A-5 or § 1.401(a)(9)-2 (which provides, in general, that distributions are not treated as having begun until the employee's required beginning date even though payments may actually have begun before that date). For example, if the alternate payee dies before the employee and distribution of the separate account allocated to the alternate payee pursuant to the QDRO is to be made to the alternate payee's beneficiary, such beneficiary may be treated as a designated beneficiary for purposes of determining the required minimum distribution required from such account after the death of the employee if the beneficiary of the alternate payee is an individual and if such beneficiary is a beneficiary under the plan or specified to or in the plan. Specification in or pursuant to the QDRO will also be treated as specification to the plan.

(2) Distribution of the separate account allocated to an alternate payee pursuant to a QDRO satisfy the requirements of section 401(a)(9)(A)(ii) if such account is to be distributed, beginning not later than the employee's required beginning date, over the life of the alternate payee (or over a period not extending beyond the life expectancy of the alternate payee). Also, if the plan permits the employee to elect whether distribution upon the death of the employee will be made in accordance with the five-year rule in section 401(a)(9)(B)(ii) or the life expectancy rule in section 401(a)(9)(B)(iii) and (iv) pursuant to A-4(c) of § 1.401(a)(9)-3, such election is to be made only by the alternate payee for purposes of distributing the separate account allocated to the alternate payee pursuant to the QDRO. If the alternate payee dies after distribution of the separate account allocated to the alternate payee pursuant to a QDRO has begun (determined under A-5 of § 1.401(a)(9)-2) but before the employee dies, distribution of the remaining portion of that portion of the benefit allocated to the alternate payee must be made in accordance with the rules in § 1.401(a)(9)-5 or § 1.401(a)(9)-6 for distributions during the life of the employee. Only after the death of the

employee is the amount of the required minimum distribution determined in accordance with the rules that apply after the death of the employee.

(c) If a QDRO does not provide that an employee's benefit is to be divided but provides that a portion of an employee's benefit (otherwise payable to the employee) is to be paid to an alternate payee, such portion will not be treated as a separate account (or segregated share) of the employee. Instead, such portion will be aggregated with any amount distributed to the employee and will be treated as having been distributed to the employee for purposes of determining whether the required minimum distribution requirement has been satisfied with respect to that employee.

Q-7. Will a plan fail to satisfy section 401(a)(9) where it is not legally permitted to distribute to an alternate payee all or a portion of an employee's benefit payable to an alternate payee pursuant to a QDRO within the period specified in section 414(p)(7)?

A-7. A plan will not fail to satisfy section 401(a)(9) merely because it fails to distribute a required amount during the period in which the issue of whether a domestic relations order is a QDRO is being determined pursuant to section 414(p)(7), provided that the period does not extend beyond the 18-month period described in section 414(p)(7)(E). To the extent that a distribution otherwise required under section 401(a)(9) is not made during this period, this amount and any additional amount accrued during this period will be treated as though it is not vested during the period and any distributions with respect to such amounts must be made under the relevant rules for nonvested benefits described in either A-8 of § 1.401(a)(9)-5 or A-6 of § 1.401(a)(9)-6.

Q-8. Will a plan fail to satisfy section 401(a)(9) where an individual's distribution from the plan is less than the amount otherwise required to satisfy section 401(a)(9) under § 1.401(a)(9)-5 or § 1.401(a)(9)-6 because distributions were being paid under an annuity contract issued by a life insurance company in state insurer delinquency proceedings and have been reduced or suspended by reasons of such state proceedings?

A-8. A plan will not fail to satisfy section 401(a)(9) merely because an individual's distribution from the plan is less than the amount otherwise required to satisfy section 401(a)(9) under § 1.401(a)(9)-5 or § 1.401(a)(9)-6 because distributions were being paid under an annuity contract issued by a life insurance company in state insurer delinquency proceedings and have been

reduced or suspended by reasons of such state proceedings. To the extent that a distribution otherwise required under section 401(a)(9) is not made during the state insurer delinquency proceedings, this amount and any additional amount accrued during this period will be treated as though it is not vested during the period and any distributions with respect to such amounts must be made under the relevant rules for nonvested benefits described in either A-8 of § 1.401(a)(9)-5 or A-6 of § 1.401(a)(9)-6.

Q-9. Will a plan fail to qualify as a pension plan within the meaning of section 401(a) solely because the plan permits distributions to commence to an employee on or after April 1 of the calendar year following the calendar year in which the employee attains age 70½ even though the employee has not retired or attained the normal retirement age under the plan as of the date on which such distributions commence?

A-9. No. A plan will not fail to qualify as a pension plan within the meaning of section 401(a) solely because the plan permits distributions to commence to an employee on or after April 1 of the calendar year following the calendar year in which the employee attains age 70½ even though the employee has not retired or attained the normal retirement age under the plan as of the date on which such distributions commence. This rule applies without regard to whether or not the employee is a 5-percent owner with respect to the plan year ending in the calendar year in which distributions commence.

Q-10. Is the distribution of an annuity contract a distribution for purposes of section 401(a)(9)?

A-10. No. The distribution of an annuity contract is not a distribution for purposes of section 401(a)(9).

Q-11. Will a payment by a plan after the death of an employee fail to be treated as a distribution for purposes of section 401(a)(9) solely because it is made to an estate or a trust?

A-11. A payment by a plan after the death of an employee will not fail to be treated as a distribution for purposes of section 401(a)(9) solely because it is made to an estate or a trust. As a result, the estate or trust which receives a payment from a plan after the death of an employee need not distribute the amount of such payment to the beneficiaries of the estate or trust in accordance with section 401(a)(9)(B). However, pursuant to A-3 of § 1.401(a)(9)-4, distribution to the estate must satisfy the five-year rule in section 401(a)(9)(B)(iii) if the distribution to the employee had not begun (as defined in

A-6 of § 1.401(a)(9)-2 as of the employee's date of death, and pursuant to A-3 of § 1.401(a)(9)-4, an estate may not be a designated beneficiary. See A-5 and A-6 of § 1.401(a)(9)-4 for provisions under which beneficiaries of a trust with respect to the trust's interest in an employee's benefit are treated as having been designated as beneficiaries of the employee under the plan.

Q-12. Will a plan fail to satisfy section 411 if the plan is amended to eliminate benefit options that do not satisfy section 401(a)(9)?

A-12. Nothing in section 401(a)(9) permits a plan to eliminate for all participants a benefit option that could not otherwise be eliminated pursuant to section 411(d)(6). However, a plan must provide that, notwithstanding any other plan provisions, it will not distribute benefits under any option that does not satisfy section 401(a)(9). See A-3 of § 1.401(a)(9)-1. Thus, the plan, notwithstanding section 411(d)(6), must prevent participants from electing benefit options that do not satisfy section 401(a)(9).

Q-13. Is a plan disqualified merely because it pays benefits under a designation made before January 1, 1984, in accordance with section 242(b)(2) of the Tax Equity and Fiscal Responsibility Act (TEFRA)?

A-13. No. Even though the distribution requirements added by TEFRA were retroactively repealed by the Tax Reform Act of 1984 (TRA of 1984), the transitional election rule in section 242(b) was preserved. Satisfaction of the spousal consent requirements of section 417(a) and (e) (added by the Retirement Equity Act of 1984) will not be considered a revocation of the pre-1984 designation. However, sections 401(a)(11) and 417 must be satisfied with respect to any distribution subject to those sections. The election provided in section 242(b) of TEFRA is hereafter referred to as a section 242(b)(2) election.

Q-14. In the case in which an amount is transferred from one plan (transferor plan) to another plan (transferee plan), may the transferee plan distribute the amount transferred in accordance with a section 242(b)(2) election made under either the transferor plan or under the transferee plan?

A-14. (a) In the case in which an amount is transferred from one plan to another plan, the amount transferred may be distributed in accordance with a section 242(b)(2) election made under the transferor plan if the employee did not elect to have the amount transferred and if the amount transferred is separately accounted for by the transferee plan. However, only the

benefit attributable to the amount transferred, plus earnings thereon, may be distributed in accordance with the section 242(b)(2) election made under the transferor plan. If the employee elected to have the amount transferred, the transfer will be treated as a distribution and rollover of the amount transferred for purposes of this section.

(b) In the case in which an amount is transferred from one plan to another plan, the amount transferred may not be distributed in accordance with a section 242(b)(2) election made under the transferee plan. If a section 242(b)(2) election was made under the transferee plan, the amount transferred must be separately accounted for. If the amount transferred is not separately accounted for under the transferee plan, the section 242(b)(2) election under the transferee plan is revoked and section 401(a)(9) will apply to subsequent distributions by the transferee plan.

(c) A merger, spinoff, or consolidation, as defined in § 1.414(l)-1(b), will be treated as a transfer for purposes of the section 242(b)(2) election.

Q-15. If an amount is distributed by one plan (distributing plan) and rolled over into another plan (receiving plan), may the receiving plan distribute the amount rolled over in accordance with a section 242(b)(2) election made under either the distributing plan or the receiving plan?

A-15. No. If an amount is distributed by one plan and rolled over into another plan, the receiving plan must distribute the amount rolled over in accordance with section 401(a)(9) whether or not the employee made a section 242(b)(2) election under the distributing plan. Further, if the amount rolled over was not distributed in accordance with the election, the election under the distributing plan is revoked and section 401(a)(9) will apply to all subsequent distributions by the distributing plan. Finally, if the employee made a section 242(b)(2) election under the receiving plan and such election is still in effect, the amount rolled over must be separately accounted for under the receiving plan and distributed in accordance with section 401(a)(9). If amounts rolled over are not separately accounted for, any section 242(b)(2) election under the receiving plan is revoked and section 401(a)(9) will apply to subsequent distributions by the receiving plan.

Q-16. May a section 242(b)(2) election be revoked after the date by which distributions are required to commence in order to satisfy section 401(a)(9) and this section of the regulations?

A-16. Yes. A section 242(b)(2) election may be revoked after the date by which distributions are required to commence in order to satisfy section 401(a)(9) and this section of the regulations. However, if the section 242(b)(2) election is revoked after the date by which distributions are required to commence in order to satisfy section 401(a)(9) and this section of the regulations and the total amount of the distributions which would have been required to be made prior to the date of the revocation in order to satisfy section 401(a)(9), but for the section 242(b)(2) election, have not been made, the trust must distribute by the end of the calendar year following the calendar year in which the revocation occurs the total amount not yet distributed which was required to have been distributed to satisfy the requirements of section 401(a)(9) and continue distributions in accordance with such requirements.

Par. 3-4. Section 1.403(b)-2 is added to read as follows:

§ 1.403(b)-2 Required minimum distributions from annuity contracts purchased, or custodial accounts or retirement income accounts established, by a section 501(c)(3) organization or a public school.

Q-1. Are section 403(b) contracts subject to the distribution rules provided in section 401(a)(9)?

A-1. (a) Yes. Section 403(b) contracts are subject to the distribution rules provided in section 401(a)(9). For purposes of this section the term *section 403(b) contract* means an annuity contract described in section 403(b)(1), custodial account described in section 403(b)(7), or a retirement income account described in section 403(b)(9).

(b) For purposes of applying the distribution rules in section 401(a)(9), section 403(b) contracts will be treated as individual retirement annuities described in section 408(b) and individual retirement accounts described in section 408(a) (IRAs). Consequently, except as otherwise provided in paragraph (c), the distribution rules in section 401(a)(9) will be applied to section 403(b) contracts in accordance with the provisions in § 1.408-8.

(c)(1) The required beginning date for purposes of section 403(b)(9) is April 1, of the calendar year following the later of the calendar year in which the employee attains 70½ or the calendar year in which the employee retires from employment with the employer maintaining the plan. The concept of 5-percent owner has no application in the case of employees of employers described in section 403(b)(1)(A).

(2) The rule in A-5 of § 1.408-8 does not apply to section 403(b) contracts. Thus, the surviving spouse of an employee is not permitted to treat a section 403(b) contract of which the spouse is the sole beneficiary as the spouse's own section 403(b) contract.

Q-2. To what benefits under section 403(b) contracts, do the distribution rules provided in section 401(a)(9) apply?

A-2. (a) The distribution rules provided in section 401(a)(9) apply to all benefits under section 403(b) contracts accruing after December 31, 1986 (post-'86 account balance). The distribution rules provided in section 401(a)(9) do not apply to the balance of the account balance under the section 403(b) contract valued as of December 31, 1986, exclusive of subsequent earnings (pre-'87 account balance). Consequently, the post-'86 account balance includes earnings after December 31, 1986 on contributions made before January 1, 1987, in addition to the contributions made after December 31, 1986 and earnings thereon. The issuer or custodian of the section 403(b) contract must keep records that enable it to identify the pre-'87 account balance and subsequent changes as set forth in paragraph (b) of this A-2 and provide such information upon request to the relevant employee or beneficiaries with respect to the contract. If the issuer does not keep such records, the entire account balance will be treated as subject to section 401(a)(9).

(b) In applying the distribution rules in section 401(a)(9), only the post-'86 account balance is used to calculate the required minimum distribution required for a calendar year. The amount of any distribution required to satisfy the required minimum distribution requirement for a calendar year will be treated as being paid from the post-'86 account balance. Any amount distributed in a calendar year in excess of the required minimum distribution requirement for a calendar year will be treated as paid from the pre-'87 account balance. The pre-'87 account balance for the next calendar year will be permanently reduced by the deemed distributions from the account.

(c) The pre-'86 account balance and the post-'87 account balance have no relevance for purposes of determining the amount includible in income under section 72.

Q-3. Must the value of the account balance under a section 403(b) contract as of December 31, 1986 be distributed in accordance with the minimum distribution incidental benefit requirement?

A-3. Distributions of the entire account balance of a section 403(b) contract, including the value of the account balance under the contract or account as of December 31, 1986, must satisfy the minimum distribution incidental benefit requirement. However, distributions attributable to the value of the account balance under the contract or account as of December 31, 1986 is treated as satisfying the minimum distribution incidental benefit requirement if such distributions satisfy the rules in effect as of July 27, 1987, interpreting 1.401-1(b)(1)(i).

Q-4. Is the required minimum distribution from one section 403(b) contract of an employee permitted to be distributed from another section 403(b) contract in order to satisfy section 401(a)(9)?

A-4. Yes. The required minimum distribution must be separately determined for each section 403(b) contract of an employee. However, such amounts may then be totaled and the total distribution taken from any one or more of the individual section 403(b) contracts. However, under this rule, only amounts in section 403(b) contracts that an individual holds as an employee may be aggregated. Amounts in section 403(b) contracts that an individual holds as a beneficiary of the same decedent may be aggregated, but such amounts may not be aggregated with amounts held in section 403(b) contracts that the individual holds as the employee or as the beneficiary of another decedent. Distributions from section 403(b) contracts or accounts will not satisfy the distribution requirements from IRAs, nor will distributions from IRAs satisfy the distribution requirements from section 403(b) contracts or accounts.

Par. 5. Section § 1.408-8 is added to read as follows:

§ 1.408-8 Distribution requirements for individual retirement plans.

The following questions and answers relate to the distribution rules for IRAs provided in sections 408(a)(6) and 408(b)(3).

Q-1. Are individual retirement plans (IRAs) subject to the distribution rules provided in section 401(a)(9) and §§ 1.401(a)(9)-1 through 1.401(a)(9)-8 for qualified plans?

A-1. (a) Yes. Except as otherwise provided in this section, IRAs are subject to the required minimum distribution rules provided in section 401(a)(9) and §§ 1.401(a)(9)-1 through 1.401(a)(9)-8 for qualified plans. For example, whether the five year rule or the life expectancy rule applies to distribution after death occurring before

the IRA owner's required beginning date will be determined in accordance with § 1.401(a)(9)-3, the rules of § 1.401(a)(9)-4 apply for purposes of determining an IRA owner's designated beneficiary, the amount of the required minimum distribution required for each calendar year from an individual account will be determined in accordance with § 1.401(a)(9)-5, and whether annuity payments from an individual retirement annuity satisfy section 401(a)(9) will be determined under § 1.401(a)(9)-6. For this purpose the term IRA means an individual retirement account or annuity described in section 408(a) or (b).

(b) For purposes of applying the required minimum distribution rules in §§ 1.401(a)(9)-1 through 1.401(a)(9)-8 for qualified plans, the IRA trustee, custodian, or issuer is treated as the plan administrator, and the IRA owner is substituted for the employee.

Q-2. Are employer contributions under a simplified employee pension (defined in section 408(k)) or a SIMPLE IRA (defined in section 408(p)) treated as contributions to an IRA?

A-2. Yes. IRAs that receive employer contributions under a simplified employee pension (defined in section 408(k)) or a SIMPLE plan (defined in section 408(p)) are treated as IRAs for purposes of section 401(a) and are, therefore, subject to the distribution rules in this section.

Q-3. In the case of distributions from an IRA, what does the term *required beginning date* mean?

A-3. In the case of distributions from an IRA, the term *required beginning date* means April 1 of the calendar year following the calendar year in which the individual attains age 70½.

Q-4. When is the amount of a distribution from an IRA not eligible for rollover because the amount is a required minimum distribution?

A-4. The amount of a distribution that is a required minimum distribution from an IRA and thus not eligible for rollover is determined in the same manner as provided in Q&A-7 of § 1.402(c)-2 for distributions from qualified plans. For example, if a required minimum distribution is required for a calendar year, the amounts distributed during a calendar year from an IRA are treated as required minimum distributions under section 401(a)(9) to the extent that the total required minimum distribution for the year under section 401(a)(9) for that IRA has not been satisfied. This requirement may be satisfied by a distribution from the IRA or, as permitted under A-8 of this section, from another IRA.

Q-5. May an individual's surviving spouse elect to treat such spouse's entire interest as a beneficiary in an individual's IRA upon the death of the individual (or the remaining part of such interest if distribution to the spouse has commenced) as the spouse's own account?

A-5. (a) The surviving spouse of an individual may elect in the manner described in paragraph (b) of this A-5 to treat the spouse's entire interest as a beneficiary in an individual's IRA (or the remaining part of such interest if distribution thereof has commenced to the spouse) as the spouse's own IRA. This election is permitted to be made at any time after the distribution of the required minimum amount for the account for the calendar year containing the individual's date of death. In order to make this election, the spouse must be the sole beneficiary of the IRA and have an unlimited right to withdrawal amounts from the IRA. This requirement is not satisfied if a trust is named as beneficiary of the IRA even if the spouse is the sole beneficiary of the trust. If the surviving spouse makes such an election, the surviving spouse's interest in the IRA would then be subject to the distribution requirements of section 401(a)(9)(A) applicable to the spouse as the IRA owner rather than those of section 401(a)(9)(B) applicable to the surviving spouse as the decedent IRA owner's beneficiary. Thus, the required minimum distribution for the year of the election and each subsequent year would be determined under section 401(a)(9)(A) with the spouse as IRA owner and not section 401(a)(9)(B).

(b) The election described in paragraph (a) of this A-5 is made by the surviving spouse redesignating the account as the account in the name of the surviving spouse as IRA owner rather than as beneficiary. Alternatively, a surviving spouse eligible to make the election is deemed to have made the election if, at any time, either of the following occurs:

(1) Any required amounts in the account (including any amounts that have been rolled over or transferred, in accordance with the requirements of section 408(d)(3)(A)(i), into an individual retirement account or individual retirement annuity for the benefit of such surviving spouse) have not been distributed within the appropriate time period applicable to the surviving spouse as beneficiary under section 401(a)(9)(B); or

(2) Any additional amounts are contributed to the account (or to the account or annuity to which the surviving spouse has rolled such amounts over, as described in (1) above)

which are subject, or deemed to be subject, to the distribution requirements of section 401(a)(9)(A).

(c) The result of an election described in paragraph (b) of this A-5 is that the surviving spouse shall then be considered the IRA owner for whose benefit the trust is maintained for all purposes under the Code (e.g. section 72(t)).

Q-6. How is the benefit determined for purposes of calculating the required minimum distribution from an IRA?

A-6. For purposes of determining the required minimum distribution required to be made from an IRA in any calendar year, the account balance of the IRA as of the December 31 of the calendar year immediately preceding the calendar year for which distributions are being made will be substituted in A-3 of § 1.401(a)(9)-5 for the account of the employee. The account balance as of December 31 of such calendar year is the value of the IRA upon close of business on such December 31. However, for purposes of determining the required minimum distribution for the second distribution calendar year for an individual, the account balance as of December 31 of such calendar year must be reduced by any distribution (as described in A-3(c)(2) of § 1.401(a)(9)-5) made to satisfy the required minimum distribution requirements for the individual's first distribution calendar year after such date.

Q-7. What rules apply in the case of a rollover to an IRA of an amount distributed by a qualified plan or another IRA?

A-7. If the surviving spouse of an employee rolls over a distribution from a qualified plan, such surviving spouse may elect to treat the IRA as the spouse's own IRA in accordance with the provisions in A-5 of this section. In the event of any other rollover to an IRA of an amount distributed by a qualified plan or another IRA, the rules in § 1.401(a)(9)-3 will apply for purposes of determining the account balance for the receiving IRA and the required minimum distribution from the receiving IRA. However, because the value of the account balance is determined as of December 31 of the year preceding the year for which the required minimum distribution is being determined and not as of a valuation date in the preceding year, the account balance of the receiving IRA need not be adjusted for the amount received as provided in A-2 of § 1.401(a)(9)-7 in order to determine the required minimum distribution for the calendar year following the calendar year in which the amount rolled over is received, unless the amount received is

deemed to have been received in the immediately preceding year, pursuant to A-2 of § 1.401(a)(9)-7. In that case, for purposes of determining the required minimum distribution for the calendar year in which such amount is actually received, the account balance of the receiving IRA as of December 31 of the preceding year must be adjusted by the amount received in accordance with A-2 of § 1.401(a)(9)-7.

Q-8. What rules apply in the case of a transfer from one IRA to another?

A-8. In the case of a transfer from one IRA to another IRA, the rules in A-3 or A-4 of § 1.401(a)(9)-7 will apply for purposes of determining the account balance of, and the required minimum distribution from, the IRAs involved. Thus, the transferor IRA must distribute in the year of the transfer any amount required determined without regard to the transfer. For purposes of determining the account balance of the transferee IRA and the transferor IRA, the account balance need not be adjusted for the amount transferred as provided in A-4(a) of § 1.401(a)(9)-7 in order to calculate the required minimum distribution for the calendar year following the calendar year of the transfer, because the account balance is determined as of December 31 of the calendar year immediately preceding the calendar year for which the required minimum distribution is being determined.

Q-9. Is the required minimum distribution from one IRA of an owner permitted to be distributed from another IRA in order to satisfy section 401(a)(9).

A-9. Yes. The required minimum distribution must be calculated separately for each IRA. However, such amounts may then be totaled and the total distribution taken from any one or more of the individual IRAs. However, under this rule, only amounts in IRAs that an individual holds as the IRA owner may be aggregated. Amounts in IRAs that an individual holds as a beneficiary of the same decedent may be aggregated, but such amounts may not be aggregated with amounts held in IRAs that the individual holds as the IRA owner or as the beneficiary of another decedent. Distributions from section 403(b) contracts or accounts will not satisfy the distribution requirements from IRAs, nor will distributions from IRAs satisfy the distribution requirements from section 403(b) contracts or accounts. Distributions from Roth IRAs (defined in section 408A) will not satisfy the distribution requirements applicable to IRAs or section 403(b) accounts or contracts and distributions from IRAs or section 403(b) contracts or accounts will not

satisfy the distribution requirements from Roth IRAs.

Q-10. Is the trustee of an IRA required to report the amount that is required to be distributed from that IRA?

A-10. Yes. The trustee of an IRA is required to report to the Internal Revenue Service and to the IRA owner the amount required to be distributed from the IRA for each calendar year at the time and in the manner prescribed in the instructions to the applicable Federal tax forms, as well as any additional information as required by such forms or such instructions.

PART 54—PENSION EXCISE TAXES

Par. 6. The authority citation for part 54 is amended by adding the following citation to read as follows:

Authority: 26 U.S.C. 7805 * * *.

§ 54.4974-2 is also issued under 26 U.S.C. 4974.

Par. 7. Section after § 54.4974-2 is added to read as follows:

§ 54.4974-2 Excise tax on accumulations in qualified retirement plans.

Q-1. Is any tax imposed on a payee under any qualified retirement plan or any eligible deferred compensation plan (as defined in section 457(b)) to whom an amount is required to be distributed for a taxable year if the amount distributed during the taxable year is less than the required minimum distribution?

A-1. Yes. If the amount distributed to a payee under any qualified retirement plan or any eligible deferred compensation plan (as defined in section 457(b)) for a calendar year is less than the required minimum distribution for such year, an excise tax is imposed on such payee under section 4974 for the taxable year beginning with or within the calendar year during which the amount is required to be distributed. The tax is equal to 50 percent of the amount by which such required minimum distribution exceeds the actual amount distributed during the calendar year. Section 4974 provides that this tax shall be paid by the payee. For purposes of section 4974, the term *required minimum distribution* means the required minimum distribution amount required to be distributed pursuant to section 401(a)(9), 403(b)(10), 408(a)(6), 408(b)(3), or 457(d)(2), as the case may be, and the regulations thereunder. Except as otherwise provided in Q&A-6, the required minimum distribution for a calendar year is the required minimum distribution amount required to be distributed during the calendar year. Q&A-6 provides a special rule for

amounts required to be distributed by an employee's (or individual's) required beginning date.

Q-2. For purposes of section 4974, what is a qualified retirement plan?

A-2. For purposes of section 4974, each of the following is a qualified retirement plan—

(a) A plan described in section 401(a) which includes a trust exempt from tax under section 501(a);

(b) An annuity plan described in section 403(a);

(c) An annuity contract, custodial account, or retirement income account described in section 403(b);

(d) An individual retirement account described in section 408(a);

(e) An individual retirement annuity described in section 408(b); or

(f) Any other plan, contract, account, or annuity that, at any time, has been treated as a plan, account, or annuity described in (a) through (e) of this A-2, whether or not such plan, contract, account, or annuity currently satisfies the applicable requirements for such treatment.

Q-3. If a payee's interest under a qualified retirement plan is in the form of an individual account, how is the required minimum distribution for a given calendar year determined for purposes of section 4974?

A-3. (a) *General rule.* If a payee's interest under a qualified retirement plan is in the form of an individual account and distribution of such account is not being made under an annuity contract purchased in accordance with A-4 of § 1.401(a)(9)-6, the amount of the required minimum distribution for any calendar year for purposes of section 4974 is the required minimum distribution amount required to be distributed for such calendar year in order to satisfy the required minimum distribution requirements in § 1.401(a)(9)-5 as provided in the following (whichever is applicable)—

(1) Section 401(a)(9) and §§ 1.401(a)(9)-1 through 1.401(a)(9)-8 in the case of a plan described in section 401(a) which includes a trust exempt under section 501(a) or an annuity plan described in section 403(a);

(2) Section 403(b)(10) and § 1.403(b)-2 (in the case of an annuity contract, custodial account, or retirement income account described in section 403(b)); or

(3) Section 408(a)(6) or (b)(3) and § 1.408-8 (in the case of an individual retirement account or annuity described in section 408(a) or (b)).

(b) *Default provisions.* Unless otherwise provided under the qualified retirement plan (or, if applicable, the governing instrument of the qualified retirement plan), the default provisions

in A-4(a) of § 1.401(a)(9)-3 apply in determining the required minimum distribution for purposes of section 4974.

(c) *Five year rule.* If the five-year rule in section 401(a)(9)(B)(ii) applies to the distribution to a payee, no amount is required to be distributed for any calendar year to satisfy the applicable enumerated section in paragraph (a) of this A-3 until the calendar year which contains the date five years after the date of the employee's death. For the calendar year which contains the date five years after the employee's death, the required minimum distribution amount required to be distributed to satisfy the applicable enumerated section is the payee's entire remaining interest in the qualified retirement plan.

Q-4. If a payee's interest in a qualified retirement plan is being distributed in the form of an annuity, how is the amount of the required minimum distribution determined for purposes of section 4974?

A-4. If a payee's interest in a qualified retirement plan is being distributed in the form of an annuity (either directly from the plan, in the case of a defined benefit plan, or under an annuity contract purchased from an insurance company), the amount of the required minimum distribution for purposes of section 4974 will be determined as follows:

(a) *Permissible annuity distribution option.* A permissible annuity distribution option is an annuity contract (or, in the case of annuity distributions from a defined benefit plan, a distribution option) which specifically provides for distributions which, if made as provided, would for every calendar year equal or exceed the required minimum distribution amount required to be distributed to satisfy the applicable section enumerated in paragraph (a) of A-2 of this section for every calendar year. If the annuity contract (or, in the case of annuity distributions from a defined benefit plan, a distribution option) under which distributions to the payee are being made is a permissible annuity distribution option, the required minimum distribution for a given calendar year will equal the amount which the annuity contract (or distribution option) provides is to be distributed for that calendar year.

(b) *Impermissible annuity distribution option.* An impermissible annuity distribution option is an annuity contract (or, in the case of annuity distributions from a defined benefit plan, a distribution option) under which distributions to the payee are being made that specifically provides for

distributions which, if made as provided, would for any calendar year be less than the required minimum distribution amount required to be distributed to satisfy the applicable section enumerated in paragraph (a) of A-2 of this section. If the annuity contract (or, in the case of annuity distributions from a defined benefit plan, the distribution option) under which distributions to the payee are being made is an impermissible annuity distribution option, the required minimum distribution for each calendar year will be determined as follows:

(1) If the qualified retirement plan under which distributions are being made is a defined benefit plan, the required minimum distribution amount required to be distributed each year will be the amount which would have been distributed under the plan if the distribution option under which distributions to the payee were being made was the following permissible annuity distribution option:

(i) In the case of distributions commencing before the death of the employee, if there is a designated beneficiary under the impermissible annuity distribution option for purposes of section 401(a)(9), the permissible annuity distribution option is the joint and survivor annuity option under the plan for the lives of the employee and the designated beneficiary which provides for the greatest level amount payable to the employee determined on an annual basis. If the plan does not provide such an option or there is no designated beneficiary under the impermissible distribution option for purposes of section 401(a)(9), the permissible annuity distribution option is the life annuity option under the plan payable for the life of the employee in level amounts with no survivor benefit.

(ii) In the case of distributions commencing after the death of the employee, if there is a designated beneficiary under the impermissible annuity distribution option for purposes of section 401(a)(9), the permissible annuity distribution option is the life annuity option under the plan payable for the life of the designated beneficiary in level amounts. If there is no designated beneficiary, the five-year rule in section 401(a)(9)(B)(ii) applies. See paragraph (b)(3) of this A-4. The determination of whether or not there is a designated beneficiary and the determination of which designated beneficiary's life is to be used in the case of multiple beneficiaries will be made in accordance with § 1.401(a)(9)-4 and A-7 of § 1.401(a)(9)-5. If the defined benefit plan does not provide for distribution in the form of the

applicable permissible distribution option, the required minimum distribution for each calendar year will be an amount as determined by the Commissioner.

(2) If the qualified retirement plan under which distributions are being made is a defined contribution plan and the impermissible annuity distribution option is an annuity contract purchased from an insurance company, the required minimum distribution amount required to be distributed each year will be the amount which would have been distributed in the form of an annuity contract under the permissible annuity distribution option under the plan determined in accordance with paragraph (b)(1) of this A-4 for defined benefit plans. If the defined contribution plan does not provide the applicable permissible annuity distribution option, the required minimum distribution for each calendar year will be the amount which would have been distributed under an annuity described below in paragraph (b)(2)(i) or (ii) of this A-4 purchased with the employee's or individual's account used to purchase the annuity contract which is the impermissible annuity distribution option.

(i) In the case of distributions commencing before the death of the employee, if there is a designated beneficiary under the impermissible annuity distribution option for purposes of section 401(a)(9), the annuity is a joint and survivor annuity for the lives of the employee and the designated beneficiary which provides level annual payments and which would have been a permissible annuity distribution option. However, the amount of the periodic payment which would have been payable to the survivor will be the applicable percentage under the table in A-2(b) of § 1.401(a)(9)-6 of the amount of the periodic payment which would have been payable to the employee or individual. If there is no designated beneficiary under the impermissible distribution option for purposes of section 401(a)(9), the annuity is a life annuity for the life of the employee with no survivor benefit which provides level annual payments and which would have been a permissible annuity distribution option.

(ii) In the case of a distribution commencing after the death of the employee, if there is a designated beneficiary under the impermissible annuity distribution option for purposes of section 401(a)(9), the annuity option is a life annuity for the life of the designated beneficiary which provides level annual payments and which would have been permissible annuity

distribution option. If there is no designated beneficiary, the five year rule in section 401(a)(9)(B)(ii) applies. See paragraph (b)(3) of this A-4. The amount of the payments under the annuity contract will be determined using the interest rate and actuarial tables prescribed under section 7520 determined using the date determined under A-3 of § 1.401(a)(9)-3 when distributions are required to commence and using the age of the beneficiary as of the beneficiary's birthday in the calendar year that contains that date. The determination of whether or not there is a designated beneficiary and the determination of which designated beneficiary's life is to be used in the case of multiple beneficiaries will be made in accordance with § 1.401(a)(9)-3 and A-7 of § 1.401(a)(9)-5.

(3) If the five-year rule in section 401(a)(9)(B)(ii) applies to the distribution to the payee under the contract (or distribution option), no amount is required to be distributed to satisfy the applicable enumerated section in paragraph (a) of this A-4 until the calendar year which contains the date five years after the date of the employee's death. For the calendar year which contains the date five years after the employee's death, the required minimum distribution amount required to be distributed to satisfy the applicable enumerated section is the payee's entire remaining interest in the annuity contract (or under the plan in the case of distributions from a defined benefit plan).

Q-5. If there is any remaining benefit with respect to an employee (or IRA owner) after any calendar year in which the entire remaining benefit is required to be distributed under section, what is the amount of the required minimum distribution for each calendar year subsequent to such calendar year?

A-5. If there is any remaining benefit with respect to an employee (or IRA owner) after the calendar year in which the entire remaining benefit is required to be distributed, the required minimum distribution for each calendar year subsequent to such calendar year is the entire remaining benefit.

Q-6. If a payee has an interest under an eligible deferred compensation plan (as defined in section 457(b)), how is the required minimum distribution for a given taxable year of the payee determined for purposes of section 4974?

A-6. If a payee has an interest under an eligible deferred compensation plan (as defined in section 457(b)), the required minimum distribution for a given taxable year of the payee

determined for purposes of section 4974 is determined under section 457(d).

Q-7. With respect to which calendar year is the excise tax under section 4974 imposed in the case in which the amount not distributed is an amount required to be distributed by April 1 of a calendar year (by the employee's or individual's required beginning date)?

A-7. In the case in which the amount not paid is an amount required to be paid by April 1 of a calendar year, such amount is a required minimum distribution for the previous calendar year, *i.e.*, for the employee's or the individual's first distribution calendar year. However, the excise tax under section 4974 is imposed for the calendar year containing the last day by which the amount is required to be distributed, *i.e.*, the calendar year containing the employee's or individual's required beginning date, even though the preceding calendar year is the calendar year for which the amount is required to be distributed. Pursuant to A-2 of § 1.401(a)(9)-5, amounts distributed in the employee's or individual's first distribution calendar year will reduce the amount required to be distributed in the next calendar year by the employee's or individual's required beginning date. There is also a required minimum distribution for the calendar year which contains the employee's required beginning date. Such distribution is also required to be made during the calendar year which contains the employee's required beginning date.

Q-8. Are there any circumstances when the excise tax under section 4974 for a taxable year may be waived?

A-8. (a) *Reasonable cause.* The tax under section 4974(a) may be waived if the payee described in section 4974(a) establishes to the satisfaction of the Commissioner the following—

(1) The shortfall described in section 4974(a) in the amount distributed in any taxable year was due to reasonable error; and

(2) Reasonable steps are being taken to remedy the shortfall.

(b) *Automatic Waiver.* The tax under section 4974 will be automatically waived, unless the Commissioner determines otherwise, if—

(1) The payee described in section 4974(a) is an individual who is the sole beneficiary and whose required minimum distribution amount for a calendar year is determined under the life expectancy rule described in § 1.401(a)(9)-3 A-3 in the case of an employee's death before the employee's required beginning date; and

(2) The employee's or individual's entire benefit to which that beneficiary is entitled is distributed by the end of

the fifth calendar year following the calendar year that contains the employee's date of death.

Robert E. Wenzel,

Deputy Commissioner of Internal Revenue.

BILLING CODE 4830-01-P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Parts 1 and 601

[REG-129608-00]

RIN 1545-AY68

Notice to Interested Parties

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations relating to the notice to interested parties. Before the IRS can issue an advance determination regarding the qualification of a retirement plan, a plan sponsor must provide evidence that it has notified all persons who qualify as interested parties that an application for an advance determination will be filed. These proposed regulations set forth standards by which a plan sponsor may satisfy the notice to interested parties requirement. The proposed regulations affect retirement plan sponsors, plan participants and other interested parties with respect to an application for a determination letter, and certain representatives of interested parties.

DATES: Written or electronic comments and requests for a public hearing must be received by April 17, 2001.

ADDRESSES: Send submissions to: CC:M&SP:RU (REG-129608-00), room 5226, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand delivered Monday through Friday between the hours of 8 a.m. and 5 p.m. to: CC:M&SP:RU (REG-129608-00), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC. Alternatively, taxpayers may submit comments electronically via the Internet by selecting the "Tax Regs" option on the IRS Home Page, or by submitting comments directly to the IRS Internet site at http://www.irs.gov/tax_regs/reglist.html.

FOR FURTHER INFORMATION CONTACT:

Concerning the proposed regulations, contact Pamela R. Kinard, (202) 622-6060; concerning the submission of

comments, contact LaNita VanDyke, (202) 622-7180 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed amendments to the Income Tax Regulations (26 CFR parts 1 and 601) under section 7476 of the Internal Revenue Code of 1986 (Code).

Section 7476(b)(2) provides that, with respect to a pleading filed by a petitioner for a request for a determination on the qualified status of a retirement plan under section 7476(a), the Tax Court may find the pleading to be premature unless the petitioner establishes to the satisfaction of the court that he has complied with the requirements prescribed by the regulations of the Secretary regarding the notice to interested parties.

On May 21, 1976, Final Income Tax Regulations (TD 7421) under section 7476 were published in the **Federal Register** (41 FR 20874). The final regulations provide guidance on the nature and method of giving notice to interested parties. Existing § 1.7476-1(a)(1) provides that in order to receive a determination on the qualified status of a retirement plan, the applicant must provide evidence that individuals who qualified as interested parties received notification of the determination letter application. In general, interested parties are defined in § 1.7476-1(b)(1) as all present employees of the employer eligible to participate in the plan, and all other present employees whose principal place of employment is the same as the principal place of employment of the employees eligible to participate. For plan terminations, § 1.7476-1(b)(5) defines interested parties as all present employees with accrued benefits, all former employees with vested benefits, and all beneficiaries of deceased former employees currently receiving benefits under the plan.

Existing § 1.7476-2(b) provides that the notice must be given in writing, must contain the information in § 601.201(o)(3) (Statement of Procedural Rules) and must be given in the manner prescribed in § 1.7476-2(c). For present employees, § 1.7476-2(c)(1) provides that the notice must be given in person, by mailing, by posting, or by printing it in a publication of the employer or an employee organization that is reasonably available to employees. For interested parties who are in a unit of employees covered by a collective-bargaining agreement, the notice must also be given in person or by mail to the collective-bargaining representative of the interested parties. For former

employees and beneficiaries who qualify as interested parties, § 1.7476-2(c)(2)(i) provides that notice shall be given in person or by mail to the last known address of the interested party.

On February 8, 2000, the IRS and Treasury published Final Income Tax Regulations (TD 8873) in the **Federal Register** (65 FR 6001) that provide safe harbor methods for plan sponsors and administrators using electronic media to transmit notices and consents required under sections 402(f), 411(a)(11), or 3405(e)(10)(B). Notice 99-1 (1999-2 I.R.B. 8) and Announcement 99-6 (1999-4 I.R.B. 24) also provide guidance on the use of electronic media by retirement plans.

In order to continue to advance the goal of permitting plan sponsors to use electronic media in administering their retirement plans, this amendment to the regulations eliminates the writing requirement for the notice to interested parties. Instead, the proposed regulations set forth new standards for satisfying the notice requirement that would ensure that interested parties will receive timely and adequate notice.

Explanation of Provisions

This notice of proposed rulemaking would amend §§ 1.7476-2 and 601.201 regarding the nature and method of giving notices to interested parties. The proposed regulations do not change the information that the notice must contain or the time period in which the notice must be given. These regulations continue to provide that the notice to interested parties must contain the information and be given within the time period prescribed in § 601.201(o)(3) (Statement of Procedural Rules). The proposed regulations would set forth new standards for providing the notice to interested parties. These new standards permit greater flexibility in the manner in which the notice may be provided.

The proposed regulations provide that, in the case of a present employee, former employee, or beneficiary who is an interested party, the notice may be provided by any method that reasonably ensures that all interested parties will receive the notice. The method used must be reasonably calculated to provide timely and adequate notice to all interested parties. In addition, the proposed regulations provide that if an interested party who is a present employee is in a unit of employees covered by a collective-bargaining agreement between employee representatives and one or more employers, notice shall also be given to the collective-bargaining representative of such interested party by any method

that reasonably ensures that the collective-bargaining representative will receive the notice. The proposed regulations also provide if the notice to interested parties is delivered using an electronic medium under a system that satisfies the requirements of Q&A-5 of § 1.402(f)-1, the notice will be deemed to be provided in a manner that satisfies the notice to interested parties requirement.

The proposed regulations provide that whether the notice to interested parties is given in a manner that satisfies the requirements under these regulations will be determined on the basis of all the facts and circumstances. These regulations further provide that since the facts and circumstances will differ depending on the interested party, it is possible that more than one method of delivery (including nonelectronic writing) must be used in order to ensure timely and adequate notice to all interested parties.

The proposed regulations also revise § 601.201 (Statement of Procedural Rules) to conform to the changes in § 1.7476-2.

Proposed Effective Date

These regulations are proposed to be effective with respect to applications made on or after the date they are published in the **Federal Register** as final regulations. Plan sponsors may rely on these proposed regulations for guidance pending the issuance of final regulations. If, and to the extent, future guidance is more restrictive than the guidance in these proposed regulations, the future guidance will be applied without retroactive effect.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in Executive Order 12866. Therefore a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations, and because these regulations do not impose a collection of information on small entities, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Pursuant to section 7805(f) of the Code, these proposed regulations will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Requests for a Public Hearing

Before these proposed regulations are adopted as final regulations,

consideration will be given to any written comments (a signed original and eight (8) copies) or electronic comments that are submitted timely to the IRS. The IRS and Treasury specifically request comments on the clarity of the proposed rule and how it may be made easier to understand. All comments will be available for public inspection and copying.

A public hearing may be scheduled if requested in writing by a person that timely submits written comments. If a public hearing is scheduled, notice of the date, time, and place for the hearing will be published in the **Federal Register**.

Drafting Information

The principal author of these regulations is Pamela R. Kinard of the Office of the Division Counsel/Associate Chief Counsel (Tax Exempt and Government Entities), IRS. However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 continues to read, in part, as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. Section 1.7476-2 is amended as follows:

1. Paragraphs (b) and (c) are revised.
2. Paragraph (d) is redesignated as paragraph (e) and a new paragraph (d) is added.

3. Paragraph (e)(1) is revised.

The revisions and additions read as follows:

§ 1.7476-2 Notice to interested parties.

* * * * *

(b) *Nature of notice.* The notice required by this section shall —

(1) Contain the information and be given within the time period prescribed in § 601.201(o)(3) of this chapter (Statement of Procedural Rules); and,

(2) Be given in a manner prescribed in paragraph (c) of this section.

(c) *Method of giving notice.* (1) In the case of a present employee, former employee, or beneficiary who is an interested party, the notice may be provided by any method that reasonably ensures that all interested parties will

receive timely and adequate notice. If an interested party who is a present employee is in a unit of employees covered by a collective-bargaining agreement between employee representatives and one or more employers, notice shall also be given to the collective-bargaining representative of such interested party by any method that satisfies this paragraph. Whether the notice is provided in a manner that satisfies the requirements of this paragraph will be determined on the basis of all the facts and circumstances. Because the facts and circumstances will differ depending on the interested party, it is possible that more than one method of delivery must be used in order to ensure timely and adequate notice to all interested parties.

(2) If the notice to interested parties is delivered using an electronic medium under a system that satisfies the requirements of Q&A-5 of § 1.402(f)-1, the notice will be deemed to be provided in a manner that satisfies the requirements of paragraph (c)(1) of this section.

(d) *Examples.* The principles of this section are illustrated by the following examples:

Example 1. (i) Employer A is amending Plan C and applying for a determination letter. Plan C is not maintained pursuant to one or more collective-bargaining agreements and is not being terminated. As part of the determination letter application process, Employer A provides the notice required under this section to interested parties. For present employees, Employer A provides the notice by posting the notice at those locations within the principal places of employment of the interested parties which are customarily used for employer notices to employees with regard to labor-management relations matters.

(ii) In this *Example 1*, Employer A satisfies the notice to interested parties requirement described in this section.

Example 2. (i) Employer B is amending Plan D and applying for a determination letter. As part of the determination letter application process, Employer B provides the notice required under this section to interested parties.

(ii) Employer B has multiple worksites. Employer B's employees located at worksites 1 through 4 have access to computers at their workplace. However, Employer B's employees located at worksite 5 do not have access to computers.

(iii) For present employees with access to computers (worksites 1 through 4), Employer B provides the notice by posting the notice on Employer B's web site (Internet or intranet). Employer B customarily posts employer notices to employees at worksites 1 through 4 with regard to labor-management relations matters on its web site. For present employees without access to computers (worksite 5), Employer B provides the notice by posting the notice at worksite 5 in a

location that is customarily used for employer notices to employees with regard to labor-management relations matters.

(iv) Employer B also sends the notice by e-mail to each collective-bargaining representative of interested parties who are present employees of Employer B covered by a collective-bargaining agreement between employee representatives and Employer B, using the e-mail address previously provided to Employer B by such collective-bargaining representative.

(v) In this *Example 2*, Employer B satisfies the notice to interested parties requirement described in this section.

Example 3. (i) Employer C is terminating Plan E and applying for a determination letter as to whether the plan termination affects the continuing qualification of Plan E. As part of the determination letter application process, Employer C provides the notice required under this section to interested parties.

(ii) All of Employer C's employees have access to computers. Each employee has an e-mail address where he or she can receive messages from Employer C. Employer C has set up kiosks for employees' use. The kiosks are located within the principal places of employment of the employees and are customarily used for employer notices to employees with regard to labor-management relations matters.

(iii) For present employees, Employer C provides the notice by sending the notice by e-mail.

(iv) Employer C also sends the notice by e-mail to each collective-bargaining representative of interested parties who are present employees of Employer C covered by a collective-bargaining agreement between employee representatives and Employer C, using the e-mail address previously provided to Employer C by such collective-bargaining representative.

(v) In addition, Employer C sends the notice by e-mail to each interested party who is a former employee or beneficiary, using the e-mail address previously provided to Employer C by such interested party. For any former employee or beneficiary who did not provide an e-mail address, Employer C sends the notice by regular mail to the last known address of such former employee or beneficiary.

(vi) In this *Example 3*, Employer C satisfies the notice to interested parties requirement described in this section.

(e) *Effective date.* (1) The provisions of this section shall apply to applications referred to in paragraph (a) of § 1.7476-1 made on or after the date the regulations are published in the **Federal Register** as final regulations.

PART 601—STATEMENT OF PROCEDURAL RULES

Paragraph 1. The authority citation for part 601 continues to read, in part, as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. Section 601.201 is amended as follows:

1. In paragraph (o)(3)(xv), the first sentence is replaced by two new sentences.

2. In paragraph (o)(3)(xvi), introductory text is revised.

The revisions read as follows:

§ 601.201 Rulings and determination letters.

* * * * *

(o) * * * (3) * * *

(xv) When the notice referred to in paragraph (o)(3)(xiv) of this section is given in the manner set forth in § 1.7476-2(c), the following time limitations for providing the notice apply. When the notice is given other than by mailing, it should be given not less than 7 days nor more than 21 days prior to the date that the application for a determination is made. * * *

(xvi) The notice referred to in paragraph (o)(3)(xiv) of this section shall be given in the manner prescribed in § 1.7476-2 and shall contain the following information:

* * * * *

Interest-free adjustments with respect to underpayments of employment taxes

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains a proposed amendment to the regulations relating to interest-free adjustments with respect to underpayments of employment taxes. The proposed amendment reflects changes to the law made by the Taxpayer Relief Act of 1997. The proposed amendment affects employers that are the subject of IRS examinations involving determinations by the IRS that workers are employees for purposes of subtitle C or that the employers are not entitled to relief from employment taxes under section 530 of the Revenue Act of 1978 (section 530).

DATES: Written and electronic comments and requests for a public hearing must be received by April 17, 2001.

ADDRESSES: Send submissions to: CC:M&SP:RU (REG-110374-00), room 5226, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand delivered Monday through Friday between the hours of 8 a.m. and 5 p.m. to: Unit CC:M&SP:RU (REG-110374-00), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC. Alternatively, taxpayers may submit comments electronically via the Internet by selecting the "Tax Regs" option on the IRS Home Page, or by submitting comments directly to the IRS Internet site at <http://www.irs.gov/taxregs/reglist.html>.

FOR FURTHER INFORMATION CONTACT: Concerning the proposed regulations, Lynne Camillo of the Office of Associate Chief Counsel (Tax Exempt and Government Entities), (202) 622-6040.

SUPPLEMENTARY INFORMATION:

Background

This document contains a proposed amendment to the Employment Tax Regulations (26 CFR part 31) under section 6205. Section 6205 allows employers that have paid less than the correct amount of employment taxes to make adjustments without interest, provided the error is reported and the taxes are paid by the last day for filing the return for the quarter in which the error was ascertained. However, no interest-free adjustments are permitted pursuant to section 6205 after receipt of notice and demand for payment thereof based upon an assessment. § 31.6205-1(a)(6).

The Taxpayer Relief Act of 1997, Public Law 105-34 (111 Stat. 788), effective August 5, 1997, created new section 7436 of the Internal Revenue Code (Code), which provides the Tax Court with jurisdiction to review determinations by the IRS that workers are employees for purposes of subtitle C, or that the employer is not entitled to relief from employment taxes under section 530. Section 7436 resulted in a change in the way employment tax examinations involving worker classification and section 530 issues are conducted insofar as notice and demand for payment of an employment tax underpayment based upon an assessment cannot be made until after the taxpayer under examination receives notice of the IRS's determination and has been given an opportunity to file a petition in the Tax Court contesting such determination.

Explanation of Provisions

This document contains a proposed amendment to the regulations under section 6205. The proposed amendment clarifies the period for adjustments of employment tax underpayments without interest under section 6205 following the expansion of Tax Court review to certain employment tax determinations.

As a general rule, under section 6601, all taxpayers who fail to pay the full amount of a tax due under the Code must pay interest at the applicable rate on the unpaid amount from the last date prescribed for payment of the tax until the date the tax is paid. However, section 6205 allows employers that have paid less than the correct amount of certain employment taxes¹ with respect to any payment of wages or compensation to make adjustments to returns without interest pursuant to the regulations. The employment tax regulations under section 6205 generally allow employers to make adjustments to returns without interest until the last day for filing the return for the quarter in which the error was ascertained. An error is ascertained when the employer has sufficient knowledge of the error to be able to correct it. § 31.6205-1(a)(4). Section 31.6205-1(a)(6) provides that no interest-free adjustments can be made after receipt of a statement of notice and demand for payment based upon an assessment.

In Revenue Ruling 75-464 (1975-2 C.B. 474), the IRS further clarified the time for adjustments under section 6205. The ruling clarifies that employers can still make interest-free adjustments where the underpayment is discovered during an audit or examination (i.e., where the employer has not independently ascertained the underpayment). The ruling sets forth situations illustrating when an error is ascertained with respect to returns under audit by the IRS. Under the facts in the revenue ruling, an error is ascertained when the employer signs an "Agreement to Adjustment and Collection of Additional Tax", Form 2504, either at the examination level or the appeals level, when the taxpayer pays the full amount due so as to file a refund claim (if paid prior to notice and demand), or at the conclusion of internal IRS appeal rights if no agreement is reached. Under the factual

¹ Section 6205 applies to underpayments of taxes under the Federal Insurance Contributions Act (FICA), the Railroad Retirement Tax Act (RRTA), and income tax withholding. Section 6205 does not apply to underpayments of taxes under Federal Unemployment Tax Act (FUTA), as such underpayments are not subject to interest under section 6601(i).

situations in Revenue Ruling 75-464, the employment taxes can be paid free of interest at the time the employer signs Agreement Form 2504 or at the time it pays the tax preparatory to filing a claim to contest the liability in court, after having exhausted all appeal rights within the IRS, provided the payment is made before the taxpayer receives notice and demand for payment.

The Taxpayer Relief Act of 1997, Public Law 105-34 (111 Stat. 788), created new section 7436 of the Code which provides the Tax Court with jurisdiction to review determinations by the IRS that workers are employees for purposes of subtitle C of the Code, or that the organization for which services are performed is not entitled to relief from employment taxes under section 530. Section 7436(a) requires that the determination involve an actual controversy and that it be made as part of an examination. Subsequent to enactment of section 7436 of the Code, the IRS created a standard notice, the "Notice of Determination Concerning Worker Classification Under Section 7436" (notice of determination) to serve as the "determination" that is a prerequisite to invoking the Tax Court's jurisdiction under section 7436. Notice 98-43 (1998-33 I.R.B. 13).

Section 7436(d)(1) provides that the suspension of the limitations period for assessment in section 6503(a) applies in the same manner as if a notice of deficiency had been issued. Thus, pursuant to section 6503(a), the mailing of the notice of determination by certified or registered mail will suspend the statute of limitations for assessment of taxes attributable to the worker classification and section 530 issues. Generally, the statute of limitations for assessment of taxes attributable to the worker classification and section 530 issues is suspended for the 90-day period during which the taxpayer can begin a suit in Tax Court, plus an additional 60 days thereafter. Moreover, if the taxpayer does file a timely petition in the Tax Court, the statute of limitations for assessment of taxes attributable to the worker classification and section 530 issues is suspended under section 6503(a) during the Tax Court proceedings, and for sixty days after the Tax Court decision becomes final.

Current IRS guidance provides for interest-free adjustments under section 6205 prior to assessment and notice and demand. Because of the prohibition on assessment for cases pending in the Tax Court, this creates a potential for inconsistent application of interest depending upon whether an employer files a claim in the Tax Court or in

another court of Federal jurisdiction. The legislative history of section 7436 shows no intent to create an advantage for taxpayers who choose to litigate their cases in Tax Court as opposed to another court of Federal jurisdiction. H.R. No. 105-148, 105th Cong., 1st Sess., at 639-640 (1997). Taxpayers who choose to petition the Tax Court under section 7436 still have the benefit of all of the inherent advantages of litigating in the Tax Court, including the ability to obtain judicial review without prior payment of the additional tax the IRS has determined to be due.

Judicial and administrative precedents provide that an error is ascertained for purposes of section 6205 (ending the period for interest-free adjustments) when the taxpayer has exhausted all internal appeal rights with the Service. *Eastern Investment Corp. v. United States*, 49 F. 3d 651 (10th Cir. 1995); Rev. Rul. 75-464 (1975-2 C.B. 474). In the context of refund litigation, where a taxpayer whose erroneous underpayment of employment taxes is discovered during an examination pays only the required divisible portion of employment tax prior to filing a claim for refund in order to satisfy the jurisdictional requirements for filing suit in district court, interest continues to accrue on the unpaid portion of employment tax from the date upon which the tax is assessed after the taxpayer has exhausted all appeal rights within the IRS until the date such tax is paid. See *Eastern Investment Corp.*, *supra* (rejecting taxpayer's argument that the error could not have been "ascertained" until a decision was made by the court and the liability was no longer being contested). Moreover, in Tax Court deficiency proceedings that do not involve employment taxes, unless the taxpayer makes a deposit to stop the running of interest, interest continues to accrue on the deficiency during the course of the Tax Court proceeding. Rev. Rul. 56-501 (1956-2 C.B. 954).

In employment tax examinations that do not involve worker classification or section 530 issues, the taxpayer has exhausted all internal appeal rights by the time a notice and demand for payment thereof based upon an assessment is received. Similarly, in employment tax examinations involving worker classification or section 530 issues, the taxpayer has already had the benefit of all of the same internal appeal rights by the time a notice of determination is received.

These proposed regulations provide that, in employment tax examinations involving worker classification or section 530 issues, as in other types of employment tax examinations, the error

is ascertained for purposes of section 6205 when the employer has exhausted all internal appeals within the IRS. The fact that notice and demand for payment based upon an assessment cannot be made in cases involving worker classification and section 530 issues until the suspension of the statute of limitations is lifted, following issuance of a notice of determination, does not result in an extension of the period during which interest-free adjustments can be made under section 6205. Accordingly, in order to clarify that the error is ascertained for purposes of section 6205 once a taxpayer has exhausted all internal appeal rights with the IRS, the existing regulations would be modified by prohibiting interest-free adjustments after receipt of the notice of determination.

However, if, prior to receipt of a notice of determination, a taxpayer makes a remittance which is equal to the amount of the proposed liability, the IRS considers the remittance a payment and assesses it. Rev. Proc. 84-58 (1984-2 C.B. 501). In such a situation, no notice of determination would be sent to the taxpayer. If a taxpayer wants to stop the running of interest and contest the adjustment in the Tax Court, the taxpayer may make a remittance, designating it in writing as a deposit in the nature of a cash bond. If the taxpayer makes such a deposit, the IRS does not consider the remittance a payment. Id. at § 4.02. The deposit stops the running of interest and, if the taxpayer does not waive the restrictions on assessment, the IRS will send the taxpayer a notice of determination, thus permitting the taxpayer the option of Tax Court review.

In order to provide a mechanism for taxpayers to make a remittance to stop the accrual of interest, yet still receive a notice of determination and retain the right to petition the Tax Court, these proposed regulations would further modify the existing regulations to provide that, prior to receipt of a notice of determination, the taxpayer may, in lieu of making a payment, make a cash bond deposit which would have the effect of stopping the accrual of any interest, but would not deprive the taxpayer of its right to receive a notice of determination and to petition the Tax Court under section 7436.

Proposed Effective Date

These regulations are proposed to be applicable with respect to notices of determination issued on or after March 19, 2001. Interest will be computed under the rule in this regulation on any claims for refund of interest pending on January 12, 2001. No inference is intended that the rule set forth in these

proposed regulations is not current law. Taxpayers may rely on these proposed regulations for guidance pending the issuance of final regulations. If, and to the extent, future guidance is more restrictive than the guidance in the proposed regulations, the future guidance will be applied without retroactive effect.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations and, because these regulations do not impose on small entities a collection of information requirement, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Therefore, a Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Requests for a Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any electronic and written comments that are submitted timely to the IRS. The IRS and Treasury Department specifically request comments on the clarity of the proposed regulations and how they may be made easier to understand. All comments will be available for public inspection and copying. A public hearing may be scheduled if requested in writing by any person that timely submits written comments. If a public hearing is scheduled, notice of the date, time, and place for the hearing will be published in the **Federal Register**.

Drafting Information

The principal author of these proposed regulations is Lynne Camillo, Office of the Associate Chief Counsel (Tax Exempt and Government Entities). However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects in 26 CFR Part 31

Employment taxes, Income taxes, Penalties, Pensions, Railroad retirement, Reporting and recordkeeping requirements, Social Security, Unemployment compensation.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 31 is proposed to be amended as follows:

PART 31—EMPLOYMENT TAXES AND COLLECTION OF INCOME TAX AT THE SOURCE

Paragraph 1. The authority for part 31 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. In § 31.6205–1, paragraph (a)(6) is revised to read as follows:

§ 31.6205–1 Adjustments of underpayments.

(a) * * *

(6) No underpayment shall be reported pursuant to this section after the earlier of the following—

(i) Receipt from the Commissioner of notice and demand for payment thereof based upon an assessment; or

(ii) Receipt from the Commissioner of a Notice of Determination Concerning Worker Classification Under Section 7436 (Notice of Determination). (Prior to receipt of a Notice of Determination, the taxpayer may, in lieu of making a payment, make a cash bond deposit which would have the effect of stopping the accrual of any interest, but would not deprive the taxpayer of its right to receive a Notice of Determination and to petition the Tax Court under section 7436).

Amendment, Check the Box Regulations

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations that provide guidance relating to elective changes in entity classification. The proposed regulations apply to subsidiary corporations that elect to change their classification for Federal tax purposes from a corporation to either a partnership or disregarded entity.

DATES: Written or electronic comments, or requests for a public hearing must be received by February 2, 2001.

ADDRESSES: Send submissions to: CC:M&SP:RU (REG–110659–00), room 5226, Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand delivered Monday through Friday between the hours of 8 a.m. and 5 p.m. to: CC:M&SP:RU (REG–110659–00), Courier's desk, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC. Alternatively, taxpayers may submit comments electronically via the Internet by selecting the "Tax Regs" option on the IRS Home Page, or by submitting comments directly to the IRS Internet site at <http://www.irs.ustreas.gov/tax—regs/regslst.html>.

FOR FURTHER INFORMATION CONTACT:

Concerning the proposed regulations, David J. Sotos, (202) 622–3050; concerning submissions of comments, or to request a hearing, Sonya Cruse, (202) 622–7180 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:**Background**

On November 29, 1999, Treasury and the IRS published final regulations (TD 8844) describing the transactions that are deemed to occur when an entity elects to change its classification for Federal tax purposes. Those regulations did not address certain requirements of section 332 as applied to the deemed liquidation incident to an association's election to be classified as a partnership or to be disregarded as an entity separate from its owner. This amendment to the final regulations addresses those requirements.

On January 20, 2000, Treasury and the IRS issued final regulations relating to qualified subchapter S subsidiaries. In order to permit the deemed transaction resulting from a QSub election to comply with the requirement of section 332 that a plan of liquidation have been adopted at the time of a liquidating distribution, the final regulations provide that a plan of liquidation is deemed adopted immediately before the deemed liquidation incident to the QSub election, unless a formal plan of liquidation that contemplates the filing of a QSub election is adopted on an earlier date. The preamble to the QSub regulations provided that Treasury and the IRS intend to amend the section 7701 regulations regarding elective changes in entity classification to provide a similar rule concerning the timing of the plan of liquidation.

Explanation of Provisions**A. In General**

Section 301.7701–3(g)(1) describes how elective changes in the classification of an entity will be treated for tax purposes. Section 301.7701–3(g)(1)(ii) provides that an elective conversion of an association to a partnership is deemed to have the following form: the association distributes all of its assets and liabilities to its shareholders in liquidation of the association, and immediately thereafter, the shareholders contribute all of the distributed assets and liabilities to a newly formed partnership. Section 301.7701–3(g)(1)(iii) provides that an elective conversion of an association to an entity that is disregarded as an entity separate from its owner is deemed to have the following form: the association distributes all of its assets and liabilities to its single owner in liquidation of the association.

Section 332 may be relevant to the deemed liquidation of an association if it has a corporate owner. Under section 332, no gain or loss is recognized on the receipt by a corporation of property distributed in complete liquidation of another corporation if the requirements of section 332(b) are satisfied. Those requirements include the adoption of a plan of liquidation at a time when the corporation receiving the distribution owns stock of the liquidating corporation meeting the requirements of section 1504(a)(2) (i.e., 80 percent of vote and value). The elective changes from association to a partnership and to a disregarded entity result in a constructive liquidation of the association for Federal tax purposes. Formally adopting a plan of liquidation for the entity, however, is potentially incompatible with an elective change under § 301.7701–3, which allows the local law entity to remain in existence while liquidating only for Federal tax purposes. Accordingly, to provide tax treatment of an association's deemed liquidation that is compatible with the requirements of section 332, the proposed regulations state that, for purposes of satisfying the requirement of adoption of a plan of liquidation under section 332(b), a plan of liquidation is deemed adopted immediately before the deemed liquidation incident to an elective change in entity classification, unless a formal plan of liquidation that contemplates the filing of the elective change in entity classification is adopted on an earlier date.

B. Proposed Effective Dates

These regulations are proposed to apply to elections occurring on or after the date final regulations are published in the **Federal Register**; however, it is also proposed that taxpayers may elect to apply the amendments retroactively.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in Executive Order 12866. It also has been determined that section 533(b) of the Administrative Procedures Act (5 U.S.C. chapter 5) does not apply to these regulations, and because these regulations do not impose a collection of information on small entities, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Pursuant to section 7805(f) of the Internal Revenue Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Requests for a Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written comments (a signed original and eight (8) copies) that are submitted timely to the IRS. Alternatively, taxpayers may submit comments electronically via the Internet by selecting the "Tax Regs" option on the IRS Home Page, or by submitting comments directly to the IRS Internet Site at <http://www.irs.ustreas.gov/tax-regs/comments.html>. All comments will be available for public inspection and copying. The Treasury Department and IRS specifically request comments on the clarity of the proposed regulations and how they may be made easier to understand. A public hearing may be scheduled if requested in writing by any person that timely submits written comments. If a public hearing is scheduled, notice of the date, time, and place for the hearing will be published in the **Federal Register**.

Drafting Information

The principal authors of these proposed regulations are David J. Sotos, and Jeanne M. Sullivan of Associate Chief Counsel (Passthroughs & Special Industries). However, other personnel from the Treasury Department and IRS participated in their development.

List of Subjects in 26 CFR Part 301

Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes,

Penalties, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 301 is proposed to be amended as follows:

PART 301—PROCEDURE AND ADMINISTRATION

Paragraph 1. The authority citation for part 301 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. Section 301.7701-3 is amended as follows:

1. Redesignating the text of paragraph (g)(2) as paragraph (g)(2)(i) and adding a heading for paragraph (g)(2)(i).
2. Adding a new paragraph (g)(2)(ii).
3. Revising the first sentence of paragraph (g)(4).

The addition and revision read as follows:

§ 301.7701-3 Classification of certain business entities.

* * * * *

(g) * * *

(2) *Effect of elective changes*—(i) *In general.* * * *

* * * * *

(ii) *Adoption of plan of liquidation.*

For purposes of satisfying the requirement of adoption of a plan of liquidation under section 332, unless a formal plan of liquidation that contemplates the election to be classified as a partnership or to be disregarded as an entity separate from its owner is adopted on an earlier date, the making, by an association, of an election under paragraph (c)(1)(i) of this section to be classified as a partnership or to be disregarded as an entity separate from its owner is considered to be the adoption of a plan of liquidation immediately before the deemed liquidation described in paragraph (g)(1)(ii) or (iii) of this section. This paragraph (g)(2)(ii) applies to elections effective on or after the date these regulations are published as final regulations in the **Federal Register**. Taxpayers may apply this paragraph (g)(2)(ii) retroactively to elections filed before these regulations are published as final regulations in the **Federal Register** if the corporate owner claiming treatment under section 332 and its subsidiary making the election take consistent positions with respect to the Federal tax consequences of the election.

* * * * *

(4) *Effective date.* Except as otherwise provided in paragraph (g)(2)(ii) of this section, this paragraph (g) applies to

elections that are filed on or after November 29, 1999. * * *

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 25

[IB Docket 99-67; DA 00-2826]

911 Requirements for Satellite Services

AGENCY: Federal Communications Commission.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: In this public notice, the Chief of the FCC's International Bureau invites public comment in answer to a series of questions pertaining to implementation of emergency-calling services for people using commercial mobile radio services provided via satellite. The purpose for issuing the public notice is to elicit information that will help the Commission determine whether it would serve the public interest to adopt rules to require or facilitate provision of such services to mobile satellite-service customers.

DATES: Comments due on or before February 19, 2001. Reply Comments due on or before March 6, 2001.

ADDRESSES: Federal Communications Commission, 445 12th Street, SW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: William Bell, Satellite Policy Branch, (202) 418-0741.

SUPPLEMENTARY INFORMATION:

Background

In 1996, the Commission adopted rules for the provision of basic and Enhanced 911 (E911) service by terrestrial commercial mobile radio service (CMRS) carriers. Basic 911 is the delivery of emergency 911 calls to a Public Safety Answering Point (PSAP).¹ E911 includes additional features, including automatically reporting the

¹ "PSAP" is a point that has been designated to receive 911 calls and route them to emergency service personnel. A "Designated PSAP" is a PSAP that is designated by the local or state entity that has the authority and responsibility to designate the PSAP to receive wireless 911 calls. We use the term in this notice to refer to any local facility performing such functions, whether or not pursuant to a state-government mandate. See 47 CFR 20.3.

caller's location and telephone number. The Commission concluded that requiring wireless carriers to provide these 911 services helped implement its statutory mandate to "promot[e] safety of life and property through the use of wire and radio communication."² Specifically, the Commission adopted rules requiring cellular licensees, broadband PCS licensees, and other terrestrial wireless carriers providing two-way voice communication via interconnection with the public switched telephone network to offer basic 911 and E911 under a phased schedule.³

In the 1996 Order, the Commission exempted providers of Mobile Satellite Service (MSS) from these rules. While the Commission expressed its belief that the public interest will ordinarily require that providers of real time two-way voice services offer emergency service, it reasoned that adding specific regulatory requirements to MSS at that time might impede development of a service then in early development stages.⁴ Further, the Commission agreed with commenters who maintained that emergency-service requirements for global MSS systems should be developed in an international forum in the first instance. The Commission stated that it expected that CMRS voice MSS carriers would eventually provide appropriate access to emergency services, however, and it urged carriers and other interested parties to do so as soon as feasible.⁵

In 1999, Congress enacted the Wireless Communications and Public Safety Act of 1999, with the purpose of "facilitat[ing] the prompt deployment * * * of a seamless, ubiquitous, and reliable end-to-end infrastructure for communications, including wireless communications, to meet the Nation's public safety * * * needs." To implement parts of this Act, the Commission has designated 911 as the

universal emergency telephone number in the United States for both wireline and wireless telephone service and requested comment, inter alia, on what actions to take to encourage and support coordinated statewide deployment plans for wireless emergency communications networks that include E911 service.⁶ The Act also contains provisions granting liability protection or immunity to wireless carriers, and to users of wireless 911 services, not less than that granted to providers and users of wireline services.⁷

The Commission revisited the subject of emergency-call service for MSS users in the current rulemaking in IB Docket No. 99-67, which primarily concerns adoption of rules to facilitate and promote international circulation of customer-operated satellite earth terminals used for Global Mobile Personal Communications by Satellite (GMPCS). In the initial Notice of Proposed Rulemaking in that proceeding, issued last year, the Commission sought comment as to whether, in light of recent technological developments, it should require MSS providers to implement 911 features, subject to transitional measures to avert adverse impact on systems already in operation or at an advanced stage of development.⁸

In the Notice of Proposed Rulemaking proposing licensing and service rules for the 2 GHz MSS, the Commission more narrowly inquired as to whether it should require licensees in that particular MSS service to implement basic and/or enhanced 911 capabilities.⁹ In the *2 GHz Report and Order*, the Commission acknowledged that 911 services can save lives and that significant strides had been made in developing location technology, but found that the information in the record was insufficient to support adoption of specific 911 requirements in the 2 GHz MSS service rules proceeding.

Therefore, the Commission decided that it would be better to address issues concerning 911 requirements for 2 GHz MSS in the more-general 911 inquiry conducted in the *GMPCS* proceeding.¹⁰ To that end, the Commission directed the International Bureau to issue a public notice in the *GMPCS* proceeding requesting additional information "regarding the technological, regulatory, and international aspects of Basic 911 and E911 for satellite services."¹¹

Request for Further Comment

In accordance with the Commission's instruction in the *2 GHz Report and Order*, and in order to obtain a more substantial record, we seek additional comment from interested parties and members of the general public in response to the following questions. We also encourage commenters to identify and discuss any other issues relevant to the implementation of 911 services by MSS licensees.

General Considerations

The general issues on which we seek comment and information are: first, whether it would improve public safety and promote the overall public interest to eliminate the exception allowed to MSS carriers under the wireless 911 rules and require MSS carriers to provide 911 emergency services; and, second, if rules are warranted, what the terms of those rules should be, including relevant implementation time frames.

We recognize that there are operational differences between MSS systems and terrestrial wireless systems that may have a bearing on resolution of these issues. MSS can provide voice service at locations where no terrestrial service is available, for instance, such as in maritime environments and remote areas. Cellular carriers interconnect with local wireline carriers at many points throughout their service areas and can generally make use of existing facilities to route 911 calls directly to local PSAPs in the areas where the calls are placed. MSS carriers, on the other hand, interconnect with the public switched telephone network at only a few points in the United States and do not interconnect directly with most local wireline carriers. Routing emergency MSS calls to the appropriate local emergency service providers may therefore present special challenges. To route MSS calls automatically to the

² Section 1 of the Communications Act, 47 U.S.C. 151.

¹⁰ Establishment of Policies and Service Rules for the Mobile Satellite Service in the 2 GHz Band, Report and Order, 1B Docket No. 99-81, paragraph 125, FCC 00-302, (rel. Aug. 25, 2000), 65 FR 59140 (October 4, 2000) ("2 GHz Report and Order").

¹¹ *Id.* Paragraph 125.

most appropriate PSAP may require location information for each call and a national database to correlate callers' geographic positions with the service areas of local PSAPs and identify locations where no PSAP operates. Alternatively, emergency MSS calls might be routed to central operators, who could redirect the calls to the appropriate emergency response agencies in the caller's area. In some cases, public safety needs may best be met by routing MSS emergency calls to someone other than a local PSAP, for instance to the Coast Guard.

For terrestrial wireless emergency 911 calls, several technologies are being developed to identify the caller's location, including solutions that employ equipment in the wireless network and technologies employing upgraded handsets, with features such as Global Positioning System (GPS) capability.¹² Location solutions relying on facilities in terrestrial networks may not be available for MSS providers, however, and incorporation of handset-based position determination might affect MSS providers and terrestrial services differently with regard to such matters as handset performance, bulk, weight, battery life, cost, and price.

The National Telecommunications and Information Administration (NTIA) and the National Emergency Number Association (NENA) have recommended that we seek input on these issues from an ad hoc fact-finding committee. We request comment on this suggestion and, if this approach appears useful, how it might best be implemented.¹³ For example, would it be more productive to postpone consideration of information gathered from this Public Notice until after such a group has provided a report to the Commission identifying or addressing relevant issues? We note that a Consensus Agreement that helped form the basis of the wireless 911 rules was developed by a voluntary ad hoc group with representatives of both the public safety and the wireless communities.

Specific Issues

Scope. The 911 rules for terrestrial wireless systems apply only to commercial mobile radio service involving provision of "real-time, two-way switched voice service * * *

utiliz[ing] an in-network switching facility which enables the subscriber to reuse frequencies and accomplish seamless handoffs of subscriber calls." ¹⁴ Should 911 rules for satellite services, if adopted, be limited to the same extent? Are any MSS services analogous to the maritime and aeronautical services that are exempt from the 911 requirements for terrestrial wireless systems? ¹⁵ Does the rationale for exempting "SMR licensees offering mainly dispatch services to specialized customers in a more localized, non-cellular system configuration" ¹⁶ apply to any MSS providers?

If the Commission were to adopt 911 rules for MSS, should it adopt uniform requirements for all covered MSS, or should it develop varying requirements for different types of MSS systems or services? Should the rules distinguish, for instance, between provision of service to callers with single-mode MSS terminals and service to callers equipped with dual-mode terminals incorporating cellular or PCS transceivers?

Are there safety needs that MSS systems are uniquely or especially capable of meeting? How do MSS providers currently serve those or other public safety needs, or plan to serve them? ¹⁷ Are there relevant differences in the public safety needs that different MSS services and providers provide?

Basic 911 issues. Would it serve the public interest to require MSS licensees to provide basic 911 service ¹⁸ at this time? If not, please explain in detail why the public interest would not be served. If so, should MSS licensees be required to route 911 calls directly to PSAPs in the caller's vicinity, or should they have the option of initially routing the calls to special operators at central emergency-call bureaus for relay to PSAPs based on information obtained from the callers? What would be the impact, if any, of requiring basic 911 automatic routing on the cost and price of, and demand for, MSS?

Has a nationwide database been developed that emergency-call operators could use to ascertain which PSAP to contact in any given instance? If so, does the database include long-distance

telephone numbers for contacting emergency-call handlers at each PSAP? ¹⁹

If the Commission were to adopt a basic 911 requirement for MSS, how much lead time would be needed for compliance? How much more lead time, if any, would MSS providers need for achieving compliance with a rule requiring provision of basic 911 by automatic routing to PSAPs than with a rule permitting implementation by means of operator-assisted connection?

E911 issues. Should the Commission require MSS licensees to implement Automatic Number Identification (ANI) ²⁰ for 911 calls and, if so, by what date? Would compliance with such a requirement be more problematic for MSS providers than for terrestrial wireless carriers subject to the ANI requirement in Section 20.18(d) of the Commission's rules and, if so, why? How much lead-time would be appropriate?

Is there any reason why implementation of *handset-based* Automatic Location Identification (ALI) ²¹ would be more problematic for MSS licensees than for terrestrial wireless carriers? Has handset-based ALI technology been developed for terrestrial wireless systems that is readily adaptable for use in MSS systems? Is it likely that such technology would be available to MSS licensees from competing commercial suppliers at prices comparable to prices charged for supplying equivalent technology to terrestrial carriers?

To what extent would incorporation, either internal or external (e.g., GPS), of components for reception and correlation of satellite radiolocation signals affect the size, weight, battery life, and/or per-unit cost of new MSS handsets? What expenses, if any, aside from additional handset costs, would ALI implementation entail for MSS providers? How would implementation of ALI affect market demand for MSS and the commercial viability of MSS?

Is it feasible for some MSS systems to provide ALI without installing separate

¹² The Global Position System (GPS) is a network of U.S. government satellites that transmit signals that can be used to calculate the location of receivers.

¹³ Comments of National Emergency Number Association in IB Docket No. 99-67, filed May 3, 1999 at page 2; Reply Comments of the National Telecommunications and Information Administration in IB Docket No. 99-67, filed July 21, 1999, at page 10.

¹⁴ 47 CFR 20.18(a).

¹⁵ Wireless E911 Order, at paragraph 82.

¹⁶ *Id.* at paragraph 81.

¹⁷ Although the Coast Guard has provided information on these points in previous comments, we would welcome additional comments in this regard, particularly from service providers. See Comments of the United States Coast Guard in IB Docket No. 99-67, Attachment 1 ("Search and Rescue Disaster Support MSS Capabilities Comparison Developed by the ISCAR CMSS Working Group"), filed June 21, 1999.

¹⁸ See 47 CFR 20.18(b).

¹⁹ In earlier comments, The Association of Public-Safety Communications Officials International, Inc. (APCO) and the National Emergency Number Association (NENA) have acknowledged that development of a national PSAP database is necessary to enable GMPCS licensees to provide 911 services. In reply comments filed in July 1999 NENA reported that it was compiling a national PSAP database but had not finished the task.

²⁰ ANI, i.e., Automatic Number Identification, in this context, means automatic transmission of a callback number that a call-handler at a PSAP could dial to re-establish contact with a 911 caller in the event of a broken connection. See 47 CFR 20.3.

²¹ ALI, i.e., Automatic Location Identification, means automatic transmission of information specifying the caller's location.

satellite radiolocation receivers (*e.g.*, GPS) in user terminals?²² If so, what degree of accuracy can be achieved by this means, expressed in terms allowing comparison with the accuracy specifications for terrestrial wireless systems in section 20.18 of the Commission's rules? How would the cost of implementing ALI by this means compare with the cost of implementation based on reception of satellite radionavigation signals?

Would it serve the public interest to adopt a flexible rule requiring MSS providers to make their systems ALI-capable and offer ALI-capable terminals for sale or lease to customers who want them without barring continued provision of non-ALI-capable terminals to customers who prefer them? How would adoption of such a rule affect the cost, price, and demand for MSS?

How much lead-time should the Commission allow for meeting a flexible or other E911 ALI requirement for MSS, if adopted?

Compliance with other 911 and E911 rules and policies. If the Commission were to adopt 911 rules for GMPCS, would there be any need to devise special regulatory policies regarding any of the matters listed below, or should uniform policies apply alike to GMPCS and terrestrial wireless 911 services in these respects?

- Call priority (discussed in Wireless E911 Order at paragraphs 117–19)
- Calls from unauthorized and unidentified users (see Wireless E911 Recon Order at paragraphs 13–41)
- ALI interoperability (see Wireless E911 Third Report and Order at paragraphs 59–61)
- Compliance verification (*see id.* paragraphs 83–85 and OET Bulletin No. 71, *Guidelines for Testing and Verifying the Accuracy of E911 Location Systems*, <http://www.fcc.gov/oet/info/documents/bulletins>)
- Coordination with LECs and PSAPs (see Wireless E911 Second Recon Order at paragraphs 75–103 and Public Notice, DA 00–1875, in Docket No. 94–102 (released August 16, 2000), 65 FR 51831 (August 25, 2000).)
- TTY access

²² Orbcomm, a Little LEO licensee, has reported that it can automatically ascertain the location of a user terminal that has remained stationary for ten minutes within a 500-meter error radius 95% of the time, using calculations based on Doppler variations in the signals received from its low-orbit satellites. Comments of Orbital Communications Corporation in IB Docket No. 99–67, filed May 3, 1999. Globalstar, L.P. asserted that its Big LEO system has inherent position-location capability with an error radius of approximately 10 kilometers and that it expects to improve positioning accuracy over time. Comments of Globalstar, L.P. in IB Docket No. 99–81, filed July, 26, 1999.

• Waivers (see Wireless E911 Fourth Memorandum Opinion and Order²³ at paragraphs 42–45)

• Cooperation with the Coast Guard.²⁴

Consumer notification. Should the Commission adopt a disclosure rule requiring manufacturers or sellers of GMPCS terminals that cannot be used for 911 emergency calls or with full E911 features to apprise users and potential purchasers of the functional limitations? If so, should the Commission require the notice to be affixed to the equipment or would another means of notification suffice?²⁵

International issues. Three years ago, the Commission urged the public safety community and participants in the MSS industry “to continue their efforts to develop and establish . . . standards [for emergency calling] along with the international standards bodies.”²⁶ What pertinent efforts, if any, have interested parties put forth, and with what result? What remains to be done, and how might the Commission promote its accomplishment?

What specific effect(s), if any, would FCC adoption of 911 requirements for MSS systems, including a requirement allowing operator-assisted connection, have on the use of U.S.-certified GMPCS terminals for calling in other countries and on the use of terminals imported from other countries for emergency calling in the U.S.? How likely would it be that other countries will adopt inconsistent emergency calling requirements or different protocols for ALI signals, and, if so, what issues and difficulties would be raised? Would it be feasible, in that event, to achieve systemwide ALI compatibility in a global or regional MSS system by means of processing at the gateway stations? How might such regulatory divergence affect handset design and marketing and what bearing would it have on domestic

²³ FCC 00–326 (released September 8, 2000) 65 FR 58657 (October 2, 2000).

²⁴ The Coast Guard has recommended adoption of a rule requiring providers of two-way mobile radio services to furnish coverage maps on request showing the areas where they provide emergency-calling service in order to facilitate enforcement of certain Coast Guard regulations. Comments of the U.S. Coast Guard in IB Docket No. 99–67, filed June 21, 1999.

²⁵ Compare Establishment of Policies and Service Rules for the Mobile Satellite Service in the 2 GHz Band, FCC 00–302 (released August 25, 2000) at paragraph 126, 65 FR 59140 (October 4, 2000) (imposing interim requirement to affix notification stickers to 2 GHz GMPCS handsets without 911 capability) with Wireless E911 Recon Order, *supra*, at paragraph 80 (allowing affected carriers to choose among various ways of notifying dispatch customers that their 911 calls will not be directly routed to PSAPs).

²⁶ Wireless E911 Recon Order, at paragraph 89.

enforcement of technical and/or legal requirements for GMPCS handsets?

Would there be any need for special provisions pertaining to emergency MSS calls placed from within the U.S. but routed via foreign gateway stations?

Procedural Matters

Pursuant to Sections 1.415 and 1.419 of the Commission's rules, 47 CFR 1.415, 1.419, interested persons may file Supplemental Comments limited to the issues addressed in this Public Notice no later than February 26, 2001. Supplemental Comments should reference IB Docket No. 99–67 and the DA number shown on this Public Notice. Supplemental Comments may be filed using the Commission's Electronic Comment Filing System (ECFS).²⁷ Supplemental Comments filed through the ECFS can be sent as an electronic file via Internet to <http://www.fcc.gov/e-file/ecfs.html>. In completing the ECFS transmittal screen, parties responding should include their full name, mailing address, and the applicable docket number, IB Docket No. 99–67.

The Commission presented an Initial Regulatory Flexibility Analysis, as required by the Regulatory Flexibility Act (RFA),²⁸ in the Notice of Proposed Rulemaking in IB Docket 99–67, 64 FR 16687 (April 6, 1999).²⁹ If commenters believe that the proposals discussed in this Public Notice require additional RFA analysis, they may state their reasons for concluding so in their Supplemental Comments.

For *ex parte* purposes, this proceeding continues to be a “permit-but-disclose” proceeding, in accordance with section 1.1200(a) of the Commission's rules, and is subject to the requirements set forth in section 1.1206(b) of the Commission's rules.

²⁹ 14 FCC Rcd at 5871, paragraph 101.

DEPARTMENT OF THE INTERIOR**Fish and Wildlife Service****50 CFR Part 17****RIN 1018-AG23****Endangered and Threatened Wildlife and Plants; Proposed Endangered Status for 12 Species of Picture-wing Flies From the Hawaiian Islands****AGENCY:** Fish and Wildlife Service, Interior.**ACTION:** Proposed rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), propose endangered status pursuant to the Endangered Species Act of 1973, as amended (Act), for 12 species of Hawaiian picture-wing flies—*Drosophila aglaia*, *D. differens*, *D. hemipeza*, *D. heteroneura*, *D. montgomeryi*, *D. mullia*, *D. musaphilia*, *D. neoclavisetae*, *D. obatai*, *D. ochrobasis*, *D. substenoptera*, and *D. tarphytrichia*. These species are found on one or more of the following Hawaiian Islands: Kaua'i, O'ahu, Moloka'i, Maui, and Hawai'i. These 12 species face substantial threats from one or more of the following: habitat degradation, loss of host plants, biological pest control, and predation from alien arthropods. Due to the restricted distributions and small populations, three species (*D. heteroneura*, *D. mullia*, and *D. neoclavisetae*) are in danger of extinction from naturally occurring random events. This proposal, if made final, would implement the protection provisions provided by the Act for these Hawaiian picture-wings.

DATES: Comments from all interested parties must be received by March 19, 2001. Requests for public hearings must be received by March 5, 2001.

ADDRESSES: If you wish to comment, you may submit your comments and materials concerning this proposal by any one of several methods.

(1) You may submit written comments to the Field Supervisor, U.S. Fish and Wildlife Service, Pacific Islands Office, P.O. Box 50088, Honolulu, HI 96850-0001.

(2) You may send comments by e-mail to pwflies_pr@fws.gov (see

SUPPLEMENTARY INFORMATION for file formats and other information about electronic filing); or

(3) You may hand-deliver comments to our Pacific Islands Office at 300 Ala Moana Blvd., Room 3-122, Honolulu, HI.

Comments and materials received, as well as supporting documentation used

in the preparation of this proposed rule, will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Paul Henson, Field Supervisor, at the above address (telephone 808/541-3441, facsimile 808/541-2756).

SUPPLEMENTARY INFORMATION:**Background**

Many of the major ecological zones of the earth are represented in Hawai'i, from coral reef systems through rain forests to high alpine deserts, in less than 10,800 square kilometers (6,500 square miles) of land. The range of topographies creates a great diversity of climates. Windward (northeastern) slopes can receive up to 1,000 centimeters (cm) (400 inches (in.)) of rain per year, while some leeward coasts that lie in the rain shadow of the high volcanoes are classified as deserts, receiving as little as 25 cm (10 in.) of rain annually. This topographic and climatic regime has given rise to a rich diversity of plant communities, including coastal, dryland, montane, subalpine, and alpine; dry, mesic, and wet; and herblands, grasslands, shrublands, forests, and mixed communities (Gagne and Cuddihy 1990). These habitats and plant communities in turn support one of the most unique arthropod faunas in the world, with an estimated 10,000 endemic species (Howarth 1990). Unusual characters of the arthropod fauna of Hawai'i include the presence of relict species; the absence of social insects, such as ants and termites; endemic genera; extremely small geographic ranges; adaptation of species to very specific conditions or environments; novel ecological shifts; flightlessness; and loss of certain antipredator behaviors (Zimmerman 1948, 1970, Simon *et al.* 1984, Howarth 1990).

Perhaps the most remarkable group of Hawaiian insects, and that which most typifies insect evolution in Hawai'i, is the flies in the family Drosophilidae (Williamson 1981). To date, 511 species of Hawaiian Drosophilidae have been named and described. An additional 250-300 species are already in the collection at the University of Hawai'i and await identification and description, and new species are still being discovered from localities not previously sampled. It is estimated that as many as 1,000 species may be present in native Hawaiian ecosystems (Kaneshiro 1993). The Drosophilidae family in Hawai'i represents one of the most remarkable cases of specific

adaptation to local conditions that has been found in any group of animals over the entire world (Hardy and Kaneshiro 1981). They are distributed throughout the high islands of the Hawaiian archipelago, each species displaying not only a highly characteristic trait of being found only on a single island, but also extraordinary physical diversity and adaptations that show their intimate ecological relationship to the native flora (Carson and Yoon 1982).

Drosophilidae are similar in structure to other flies in that adults have three main body parts: a head, thorax, and abdomen. A pair of antennae arises from the front of the head, between the eyes. The single pair of wings and three pairs of legs are attached to the thorax. The abdomen is composed of multiple segments. The general life cycle of Hawaiian Drosophilidae is typical of that of most flies: after mating, females lay eggs from which larvae (immature stage) hatch; as larvae grow they molt (shed their skin) through three successive stages (instars); when fully grown, the larvae change into pupae (a resting form) in which they metamorphose and emerge as adults.

The Hawaiian Drosophilidae have also developed and adapted ecologically to a tremendous diversity of ecosystems ranging from desert-like habitats where the soil is powdery dry, to rain forests with lush, tree-fern jungles, and in swampland perpetually shadowed by rain clouds and with vegetation burdened with dripping, moss-laden branches. While the larval stages of most species are saprophytic (feeding on decaying vegetation, such as rotting leaves, bark, flowers, and fruits), some have become highly specialized, being carnivorous on egg masses of spiders, or feeding on green algae growing underwater on boulders in streams. As a group, the Hawaiian Drosophilidae appear to be widespread and can be found in most of the natural communities in Hawai'i.

Unlike most Hawaiian insects that remain obscure, typically known only from their original taxonomic descriptions, most aspects of Hawaiian Drosophilidae biology have been researched, including their internal and external morphology, behavior, ecology, physiology, biochemistry, the banding sequence of giant chromosomes, as well as detailed analyses of the structure of the DNA molecules. More than 80 research scientists and over 350 undergraduates, graduate students, and post-doctoral fellows have participated in research on the Hawaiian Drosophilidae, resulting in over 600 scientific publications on the biology of these flies. The Hawaiian Drosophilidae

is arguably the most intensively studied group of all terrestrial Hawaiian organisms.

Research on Hawaiian Drosophilidae has resulted in the development and testing of new theories of evolutionary biology (Bradley *et al.* 1991, Carson 1971, 1982a, Kaneshiro 1976, 1980, 1987, 1989). Ideas on the development of species and island evolution developed from studies on Hawaiian Drosophilidae are now referenced in most modern textbooks of biology and evolution (*e.g.*, Ridley 1993). These flies have also been the subject of numerous television programs produced by the BBC (British Broadcasting Corporation), NOVA, National Geographic Society, and other educational film makers. The BBC, in conjunction with the Open University in England, has also produced several programs focused on the research of the Hawaiian Drosophilidae, and these programs are being used in educational courses about evolution.

The Hawaiian Drosophila Project at the University of Hawai'i has coordinated and cooperated in most of the research on the Hawaiian Drosophilidae. It has also maintained extensive collection records of these species. These records form the basis for much of the data used to develop this proposed rulemaking. Three decades of collection work are maintained in permanent files of the Hawaiian Drosophila Project within the University of Hawai'i's Center for Conservation Research and Training. Also, collection

notes of the individual researchers on the project contain extensive records of host plant associations of most of these species. Understanding the host plant association is important due to the fact that all of these flies appear to be closely linked with one or more particular host plant species. These host plant species provide necessary habitat requirements for the flies, including shelter, food, and areas for courtship. The host plants, and suitable habitat for the host plants, are absolutely essential for the flies' survival and recovery.

Biologists have observed a general decline of the Hawaiian Drosophilidae along with other components of the native ecosystem. As noted by Spieth (1980), during the early part of the century, the Tantalus area behind the city of Honolulu was the major spot for collecting *Drosophila* species. By 1963, the majority of the native *Drosophila* species in this area had been exterminated, apparently due to intrusion of exotic vegetation and predation by ants. Quantitative sampling since 1971 has demonstrated dramatic declines in the abundance of some species and in other cases local extirpations (Foote and Carson 1995). A review of the data collected by the Hawai'i Drosophila Project and assessment of the threats to remaining populations suggests that at least 12 species of these flies are presently threatened with extinction.

All 12 species in this proposed rulemaking belong to the species group commonly known as the picture-wings

Drosophila. This group consists of 106 known species, most of which are large with elaborate markings on otherwise clear wings of both sexes, the pattern of which varies among species (Hardy and Kaneshiro 1981, Carson 1992). The picture-wing *Drosophila* have been referred to as the "birds of paradise" of the insect world because of the males' extremely elaborate and spectacular courtship displays and territorial defense behavior. Males occupy territories that serve as mating arenas to which receptive females are attracted for mating. The males fight among themselves for the best territories and establish a dominance hierarchy like some birds and mammals. Native Hawaiians apparently did not differentiate among the different species, but referred to flies collectively as *nalo*. Recognizing that some or all of these species may belong in the genus *Idiomyia* (Grimaldi 1990), we accept the most recent taxonomic description of the Hawaiian taxa as *Drosophila* (Nishida 1994) and will refer to the species in this proposed rule collectively as "Hawaiian picture-winged *Drosophila*," or "Hawaiian picture-wings." There has also been no traditional Hawaiian or European use of common names for individual species of Hawaiian picture-wings.

Each species of Hawaiian picture-wing in this proposed rulemaking is found only on a single island, and each breeds only in a single or a few related species of plants (see Table 1).

TABLE 1.—SUMMARY OF ISLAND DISTRIBUTION OF THE PROPOSED SPECIES

| Species | Kaua'i | O'ahu | Moloka'i | Mau'i | Hawai'i | Primary host plants |

Discussion of the 12 Species Proposed for Listing

Drosophila aglaia

Drosophila aglaia was first collected in 1946 on Mount Ka'ala on the island of O'ahu, and described by Elmo Hardy in 1965 (Hardy 1965). *Drosophila aglaia* is a small species, 4.0 mm (0.15 in.) in length, with wings 5.0 mm (0.2 in.) long. It has a yellow head that is approximately one-third wider than long. The eyes are brown, and the antennae are yellow, tinged with brown. The thorax is clear yellow with three broad brown stripes on the top, and the legs are yellow. The abdomen is brown with a large yellow spot on each of the hind corners. The wings are predominantly clear with irregular but characteristic brown markings, and are about two and three-quarter times longer than wide.

Drosophila aglaia is known only from six localities in the Wai'anae Mountains of O'ahu. It has been recorded on land owned by the State of Hawai'i Department of Land and Natural Resources (DLNR) at Makaleha Valley, Peacock Flats Trail, and Pu'u Kaua. Additionally, this species is known from private land holdings at Palikea Ridge, Pu'u Kaua, and Kalua'a gulch, and is also found on Federal land owned by the United States Army at Pu'u Pane. The occurrence of *D. aglaia* is restricted to the patchy distribution of its host plant, *Urera glabra*, a small endemic tree. The larvae of *D. aglaia* develop in the bark and stem of *U. glabra*. This tree does not form large stands, but is scattered throughout slopes and valley bottoms in mesic and wet forest habitat on all the main islands. In the Wai'anae Mountains on O'ahu, this tree occurs infrequently in mesic forest. Because *D. aglaia* is reliant on an infrequently occurring host plant, it is difficult to estimate the size of the land area on which this species occurs. Each site is probably less than several acres. The major threats to *D. aglaia* are predation by ants and habitat degradation from feral ungulates, alien plants, and fire.

Drosophila differens

Drosophila differens was described by Elmo Hardy and Kenneth Kaneshiro (1975) from specimens collected at South Hanalilolilo, Moloka'i, in 1972. Previous to the description, *D. differens* was referred to as "*Idiomyia planitibia* from Moloka'i." This species is large, approximately 7.0 mm (0.3 in.) in length, with wings 8.3 mm (0.33 in.) long. *Drosophila differens* looks very similar to *D. planitibia* of Mau'i, but can be differentiated from *D. planitibia* by

its entirely or predominantly yellow face. There is also a difference in the markings found on the leading edge of the wings. In *D. planitibia* males, the marking extends about two-thirds the distance to the tip of the wings, while in *D. differens* males, it extends nearly to the marking at the tip of the wing. Hybridization experiments have demonstrated that *D. planitibia* from Mau'i and *D. differens* from Moloka'i represent distinct species as they are incapable of inter-breeding (Kaneshiro and Kaneshiro 1995). Crosses have been done in both directions and have resulted in fertile females, but sterile males. Other than differences in color, no morphological characters separate these species, and they are, therefore, considered to be sibling species.

Drosophila differens is restricted to the island of Moloka'i where it is known from three populations on private land: Kaunu O Hua, Pu'u Kolekole, and south Hanalilolilo where it was last observed on July 22, 1986. Montgomery (1975) found *D. differens* to breed in the bark, stems, and leaves of *Clermontia* spp. in wet rainforest habitat. This species is endangered by habitat degradation from feral ungulates and alien weeds, and predation by ants and alien wasps.

Drosophila hemipeza

Elmo Hardy (1965) described *Drosophila hemipeza* from specimens collected at Pūpūkea, O'ahu, in 1952. *Drosophila hemipeza* is most closely related to *D. planitibia* and *D. differens*. The key differences among these species is in the color of the face, which in *D. hemipeza* is pale yellow and densely covered with white fuzz. The thorax of *D. hemipeza* is predominantly yellow with two brown stripes on the top, and the legs are entirely yellow. This species is 5.0 mm (0.2 in.) long; the front legs are very slender with short straight bristles; and the wings are 6.0 mm (0.2 in.) in length, slender, and somewhat pointed.

Drosophila hemipeza is restricted to the island of O'ahu where it is known from six localities. In the Wai'anae Mountains, it is known from privately owned land at Palikea Ridge, Kalua'a Gulch, and Mauna Kapu. The species is also known from State of Hawai'i DLNR land in Makaleha and Wai'anae Valleys as well as from City and County of Honolulu holdings in Wai'anae Valley. The only occurrence of this species in the Ko'olau Range is from City and County of Honolulu property at Pauoa Flats on Mt. Tantalus.

Montgomery (1975) determined that *Drosophila hemipeza* utilizes several different mesic forest plants as larval breeding substrates. It breeds in the bark

of *Urera kaalae*, a Federal endangered species (56 FR 55770), in the stems of *Lobelia* spp., and in the bark and stems of *Cyanea* spp., in mesic forest habitat. This Hawaiian picture-wing is endangered by habitat degradation from feral ungulates, alien weeds, and fire, and predation by ants and alien wasps.

Drosophila heteroneura

R.C.L. Perkins described *Idiomyia heteroneura*, based on specimens from 'Ōla'a on Hawai'i island (Perkins 1910). This taxon was later transferred to the genus *Drosophila* (Hardy 1969), forming its presently accepted name, *D. heteroneura*. *Drosophila heteroneura* has very large spots on the bases of the wings. However, the most characteristic feature of this species is the broad head of the male with the eyes situated laterally, thus giving it a hammer-head appearance. The hammer-head and entirely yellow face differentiate it from the closely related species, *D. silvestris*. The thorax is predominantly yellow with several black streaks and markings on top. The legs are yellow except for slight tinges of brown on the ends of the middle and hind femora and tibiae. The wings are hyaline (transparent) and are very similar in markings and venation to those of *D. silvestris*, except that the marking in the front margin of the wing of *D. heteroneura* extends nearly to the marking at the end of the wing. The abdomen is shining black with a large yellow spot on the top of each segment. This species is about 5.7 mm (0.22 in.) in length with wings approximately 7.0 mm (0.3 in.) long.

Drosophila heteroneura is restricted to the island of Hawai'i where it was historically known from 16 localities, on 4 of the island's 5 volcanoes (Hualālai, Mauna Kea, Mauna Loa, and Kilauea). This species has never been found on the Kohala Mountains. The species was believed to be extinct in the late 1980s, until it was rediscovered on private acreage at Hualālai Volcano in 1993. The remaining population is extremely small, with a 90 percent reduction from historical abundance (Kaneshiro and Kaneshiro 1995).

Drosophila heteroneura breeds primarily in the bark and stems of *Clermontia* spp. and *Delissea* spp., but it is also known to utilize *Cheirodendron* spp. in open rain forest habitat. This Hawaiian picture-wing is endangered by habitat degradation from ungulates and alien weeds, predation by ants and alien wasps, and an extremely small remaining population.

Drosophila montgomeryi

Named after Dr. Steven L. Montgomery in honor of his work on

Hawaiian picture-wings, *Drosophila montgomeryi* was described by Elmo Hardy and Kenneth Kaneshiro (1971) from specimens collected in the Wai'anae Mountains of O'ahu in 1970. This species morphologically appears to be most closely related to *D. pisonia* from the island of Hawai'i. It can be distinguished by the narrow, pale brown stripe on each side of the top of the thorax, the long hairs on the front legs, and the second antennal segment, which is yellow, tinged with brown on the top.

Drosophila montgomeryi is restricted to the Wai'anae Mountains on the island of O'ahu, where it is known from private holdings at Pu'u Kaua and Kalua'a Gulch, and State of Hawai'i DLNR property at Pu'u Kaua and Alaihehe Gulch. Montgomery (1975) reported that the larvae of this species feed in the decaying bark of *Urera kaalae*, which grows on slopes and in gulches of diverse mesic forest. This Hawaiian picture-wing is endangered by habitat degradation from feral ungulates, alien weeds, and fire, and predation by ants and alien wasps.

Drosophila mulli

Drosophila mulli was described by William Perreira and Kenneth Kaneshiro (1990) and named for the eminent Hawaiian naturalist, William P. Mull, who first discovered this species. The head of *D. mulli* is yellow on the front, covered with a light, silvery grey fuzz. The face of the male is characteristically white, while that of the female is brown. The top of the thorax is brownish yellow and lacks conspicuous markings or stripes. The legs are predominantly yellow, and the front legs of males bear three distinct rows of long, curled hairs. The wings are two and one-half times longer than wide with distinct brown markings at the base and the tip. The length of the body is 4.3–5.0 mm (0.17–0.2 in.), and the wings are 4.3–4.8 mm (0.17–0.19 in.) long.

Drosophila mulli is restricted to the island of Hawai'i and is known only from the State of Hawai'i DLNR-owned 'Ōla'a Forest Reserve at an elevation of 985 meters (m) (3,200 feet (ft)). Adults are found only on the undersides of leaves of *Pritchardia beccariana*, an endemic fan palm, but the larval feeding site is still unknown. Attempts to rear this species from decaying parts of *P. beccariana* have been unsuccessful (W.P. Mull, Volcano, Hawai'i, pers. comm., 1995). However, because of the extremely localized population within a relatively small patch of *P. beccariana*, that a strong association between *D. mulli* and this plant is likely. This

Hawaiian picture-wing is endangered by habitat degradation from feral pigs and alien weeds, limited numbers, and predation by ants and alien wasps.

Drosophila musaphilia

Elmo Hardy (1965) formally described *Drosophila musaphilia* from specimens at Kōke'e, Kaua'i, in 1952. Although Hardy (1965) indicated that *D. musaphilia* is very similar to *D. villosipedis*, based on both chromosomal data, as well as comparison of the male genitalia, *D. musaphilia* is clearly most closely related to *D. hawaiiensis* (Kaneshiro et al. 1995).

Drosophila musaphilia is characterized by a predominantly black thorax with gray fuzz and a very narrow gray stripe extending down the top. The legs are dark brown to yellow, with the front tibia devoid of ornamentation, and the tips of the legs have abundant long black hairs on top. The wings are three times longer than wide with characteristic markings of the *D. hawaiiensis* group. The abdomen is dark brown to black and densely covered with brown fuzz. The body length is about 5.0 mm (0.2 in.) and the wings 5.25 mm (0.207 in.) long.

Drosophila musaphilia is restricted to the island of Kaua'i where it is known from State of Hawai'i DLNR-owned land at Alexander Reservoir, Kōke'e State Park, and Halemanu. This species is extremely rare and has been observed only five times in the last 25 years. Montgomery (1975) determined that the host plant for *D. musaphilia* is *Acacia koa*. The females lay their eggs, and the larvae develop in the sap seeping from injured trees. This Hawaiian picture-wing is endangered by habitat degradation from feral ungulates, alien weeds, hurricanes, and fire, and predation by ants and alien wasps.

Drosophila neoclavistae

Drosophila neoclavistae was described by William Perreira and Kenneth Kaneshiro (1990) from specimens collected at Pu'u Kukui, West Mau'i, in 1969. The species appears to be restricted to a ridge top at an elevation of 1,371 m (4,500 ft) (Kaneshiro and Kaneshiro 1995). It was named for its obvious affinities with *D. clavistae* from East Mau'i. Both species are similar in wing and thoracic markings as well as sharing one of the most bizarre courtship dances in the family. The male bends its abdomen up over its head, produces a bubble of liquid from its anal gland believed to be a sex pheromone, and then vibrates the abdomen, fanning the scent toward the female. Both *D. neoclavistae* and *D.*

clavistae are members of the *D. adiantola* species group (Perreira and Kaneshiro 1990), and, while other species in this group perform similar mating behaviors, they are highly exaggerated in *D. clavistae* and *D. neoclavistae*.

Drosophila neoclavistae is between 6.0–6.4 mm (0.2–0.25 in.) in length, with wings 6.5–7.0 mm (0.26–0.3 in.) long. It is distinguished by its amber brown head and yellow face, with the middle portion raised to form a prominent ridge. The thorax is predominantly reddish brown with a distinct brown median stripe, bordered on each side by two brown stripes. The legs are yellow, with brown on the femora and a distinct brown band on the tips of the tibiae. The wings are broad and rounded, more than twice as long as wide, and with the front portion covered with brown markings and large clear spots tinged light yellow. It shares with *D. clavistae* an extra crossvein in the wing, which sets both these species apart from the other species of the *D. adiantola* species group. The abdomen is dark brown and black with numerous long hairs on the hind segments of the male.

Drosophila neoclavistae is restricted to the island of Mau'i where it is known only from State of Hawai'i DLNR property at Pu'u Kukui. The host plant of this species has not yet been confirmed, although it is believed to be associated with *Cyanea* sp.. All collections of this species have come from within a small patch of *Cyanea* spp., and many other species in the *D. adiantola* species group utilize these and other plants in the family Campanulaceae. This Hawaiian picture-wing is endangered by habitat degradation from feral ungulates and alien weeds, limited numbers, and predation by ants and alien wasps.

Drosophila obatai

Drosophila obatai was described by Elmo Hardy and Kenneth Kaneshiro in 1972, from specimens collected in the Wai'anae Mountains of O'ahu. This species was named for Mr. John Obata, who has made significant contributions to the study of Hawaiian *Drosophila* because of his knowledge of the native plants and habitats where these insects are found. *Drosophila obatai* resembles *D. sodomae* from Mau'i and Moloka'i, and is distinguished by small differences in wing markings and the black coloration of the abdomen.

Drosophila obatai is restricted to the island of O'ahu where it is known from State of Hawai'i DLNR-owned land at Makaleha Valley in the Mokul'ia Forest Reserve in the Wai'anae Mountains, and

Wailupe Gulch located in the Honolulu Watershed Forest Reserve in the southern Ko'olau Mountains. This species is also known from Federal land owned by the Army at Pu'u Pane, and from City and County of Honolulu and private holdings at Wai'ālae Nui.

Drosophila obatai use *Pleomele forbesii* as a host plant (Montgomery 1975). This host plant, growing on slopes in dry forest and diverse mesic forest, occurs singly or in small clusters and does not form large stands of many individuals (Wagner et al. 1990). Threats to this Hawaiian picture-wing include habitat degradation from feral ungulates, alien weeds, and fire, and predation by ants and alien wasps.

Drosophila ochrobasis

Drosophila ochrobasis was originally described by Elmo Hardy and Kenneth Kaneshiro (1968) based on a specimen collected from Pu'u Hualālai at an elevation of 1,692 m (5,550 ft). Based on chromosomal studies, *D. ochrobasis* appears to be most closely related to *D. setosimentum* (Kaneshiro et al. 1995).

Both the body and wings are approximately 4.6 mm (0.18 in.) in length. The head is yellow in front and brown on top, and the face is white with a prominent ridge running down the middle. The thorax is yellow except for a large brown spot on each side. The legs are yellow tinged with brown. In males, the basal three-fifths of the wing is predominantly clear to translucent with faint transverse streaks of brown. The outer two-thirds of the wing is dark brown with large clear spots similar to that portion of the wings in *Drosophila setosimentum*. The females of *D. ochrobasis* are virtually indistinguishable from those of *D. setosimentum* females.

Drosophila ochrobasis is restricted to the island of Hawai'i and has been found on State of Hawai'i DLNR property at Kīpuka and Alakahi Stream. It has also been observed at Kīpuka Pāhipa and Hualālai, both of which are privately owned. *Drosophila ochrobasis* was collected almost every year from 1967 to 1975, sometimes in large numbers, but has now virtually disappeared (Kaneshiro and Kaneshiro 1995). It was last observed at Kīpuka on February 14, 1986. This species has been reported to utilize several host plants, including *Myrsine* spp., *Clermontia* spp., and *Marattia* spp. (Montgomery 1975). Threats to this Hawaiian picture-wing include habitat degradation from ungulates and alien weeds, and predation by ants and alien wasps.

Drosophila substenoptera

Elmo Hardy described *Idiomyia substenoptera* in 1965. He then later determined the genus *Idiomyia* to be synonymous with *Drosophila* (Hardy 1969), thus creating the current name of *Drosophila substenoptera*. This species is closely related to *D. planitibia* and other closely related flies (Kaneshiro et al. 1995) but is quite distinctive from all the other species in this group because of characteristic markings on the wings, the narrow wing shape, and the complex structures of the male genitalia. *Drosophila substenoptera* is predominantly yellow with two black stripes extending down the entire length of the top surface of the thorax. The legs are yellow and lack long hairs on the dorsal surfaces. Body length is 4.35 mm (0.171 in.), and the wings are 5.0–5.3 mm (0.2–0.21 in.) long.

Drosophila substenoptera is restricted to the island of O'ahu where it is known from the following private holdings: Wiliwili Nui Ridge, Castle Trail, Hālawā Ridge Trail, and Palikea Ridge.

Drosophila substenoptera is also found on State of Hawai'i DLNR property at Mt. Ka'ala and the DuPont trail as well as on City and County of Honolulu owned acreage at Ka'au Crater. This species has never been abundant at any of these locations, but now appears to be extant only on the summit of Mt. Ka'ala, despite intensive efforts to relocate it at other sites. Montgomery (1975) determined that this Hawaiian picture-wing breeds in the bark of *Cheirodendron* spp. and *Tetraplasandra* spp. trees in wet forest habitat. Threats to this species include habitat degradation from feral ungulates and alien weeds, and predation by ants and alien wasps.

Drosophila tarphytrichia

Drosophila tarphytrichia was described by Elmo Hardy (1965) from specimens collected from Mānoa Falls on O'ahu, in 1949. This species is closely related to *D. vespiseta* based on the structure of the male genitalia (Kaneshiro et al. 1995), but can be differentiated by distinct wing markings and the ornamentation of the front legs of the male. The thorax is almost entirely yellow to red with a tinge of brown on the top. The legs are yellow, with the tip of the front leg strongly flattened laterally and with a dense clump of black hairs. This species is 3.70 mm (0.148 in.) long with wings 4.0 mm (0.2 in.) long.

Drosophila tarphytrichia is restricted to the island of O'ahu where it was historically known from both the Ko'olau and Wai'ānae mountain ranges.

It is now apparently extinct in the Ko'olau range and presently known from four localities in the Wai'ānae Mountains. Three populations are found on privately owned lands at Mauna Kapu, Palikea ridge, and Kalua'a Gulch. The fourth is known from private and State of Hawai'i DLNR land at Pu'u Kāua. This species breeds on the stems and branches of *Charpentiera* spp. trees in mesic forest habitat (Montgomery 1975). Threats to this species include habitat degradation from feral ungulates and alien weeds, and predation by ants and alien wasps.

Previous Federal Action

Ten of these proposed species were classified as candidates for listing in the February 28, 1996, Notice of Review of Plant and Animal Taxa That Are Candidates for Listing as Endangered or Threatened Species (Notice of Review) (61 FR 7596). The remaining two species, *Drosophila differens* and *D. ochrobasis*, were classified as candidates for listing in the Notice of Review dated September 19, 1997 (62 FR 49398). Candidates are those taxa for which the Service has on file substantial information on biological vulnerability and threats to support preparation of listing proposals.

The processing of this proposed rule conforms with our Listing Priority Guidance published in the **Federal Register** on October 22, 1999 (64 FR 57114). The guidance clarifies the order in which we will process rulemakings. Highest priority is processing emergency listing rules for any species determined to face a significant and imminent risk to its well-being (Priority 1). Second priority (Priority 2) is processing final determinations on proposed additions to the lists of endangered and threatened wildlife and plants. Third priority (Priority 3) is processing new proposals to add species to the lists. The processing of administrative petition findings (petitions filed under section 4 of the Act) is the fourth priority (Priority 4). The processing of this proposed rule is a Priority 3 action.

Summary of Factors Affecting These Species

The procedures for adding species to the Federal Lists are found in section 4 of the Endangered Species Act (16 U.S.C. 1531 et seq.) and the accompanying regulations (50 CFR part 424). A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). Threats to these 12 species are summarized in Table 2.

TABLE 2. SUMMARY OF THREATS TO 12 HAWAIIAN PICTURE-WING FLIES

| Species | Threats | | | | | | | |
|---------------------------------------|--------------------|-----------------------|-------|-------|--------|-------|---------------|------------------|

* Fewer than three populations

The five factors and their application to *Drosophila aglaia*, *D. differens*, *D. hemipeza*, *D. heteroneura*, *D. montgomeryi*, *D. mulli*, *D. musaphilia*, *D. neoclavisetae*, *D. obatai*, *D. ochrobasis*, *D. substenoptera*, and *D. tarphytrichia* are as follows:

A. The Present or Threatened Destruction, Modification, or Curtailment of its Habitat or Range

Native vegetation on all the main Hawaiian islands has undergone extreme alteration because of past and present land management practices, including ranching, deliberate introduction of alien plants and animals, and agricultural development (Cuddihy and Stone 1990). Some of the primary threats facing the 12 Hawaiian picture-wing species proposed for listing are ongoing and threatened destruction and adverse alteration of habitat by feral animals and alien plants.

All 12 of the proposed species are endangered by feral animals to various degrees. The early human inhabitants of the Hawaiian Islands introduced Polynesian pigs (*Sus spp.*), and more recently European settlers introduced more ungulate species, such as goats (*Capra hircus*), axis deer (*Axis axis*), black-tailed deer (*Odocoileus hemionus*), cattle (*Bos taurus*), and other domesticated pigs (*S. scrofa*), for food, commercial ranching activities, and hunting. Over the 200 years following the introduction of these animals, their numbers increased, and the adverse impacts of these feral ungulates on native vegetation have become increasingly apparent. Beyond the direct effect of trampling and grazing native plants, these feral ungulates have contributed significantly to the heavy

erosion taking place on most of the main Hawaiian islands.

Pigs that were introduced to the Hawaiian Islands have escaped domestication and successfully established feral populations in wet and mesic forests and grasslands of Kaua'i, O'ahu, Moloka'i, Maui, and Hawai'i. Their presence on these islands threatens the existence of at least 11 of the proposed Hawaiian picture-wing species (see Table 2). Foote and Carson (1995) experimentally demonstrated the detrimental impact of feral pigs on Hawaiian picture-wings by showing that areas that had been fenced to exclude pigs supported higher numbers of flies and the plants they require for habitat. Conversely, areas of the same habitat that were not fenced were altered by pig-foraging activities resulting in the direct destruction of host plants. Furthermore, the foraging activities modified the habitat by making it more suitable for invasive plants that could crowd out host plants. While foraging, pigs root and trample the forest floor, encouraging the establishment of alien plants in the newly disturbed soil. Pigs also disperse alien plant seeds through their feces and on their bodies, accelerating the spread of alien plants through native forest (Cuddihy and Stone 1990, Stone 1985).

Goats native to the Middle East and India were first successfully introduced to the Hawaiian Islands in 1792. Feral goats now occupy a wide variety of habitats from lowland dry forests to montane grasslands on Kaua'i, O'ahu, Moloka'i, Maui, and Hawai'i, where they consume native vegetation, trample roots and seedlings, accelerate erosion, and promote the invasion of alien plants (Stone 1985, van Riper and van Riper 1982). Goats are significantly degrading

the habitat of at least seven species proposed in this rule (see Table 2). On Kaua'i, goats contribute to the substantial decline of *Drosophila musaphilia*. On O'ahu, encroaching urbanization and hunting pressure tend to concentrate the goat population in the dry upper slopes of the Wai'anae Mountains, where populations of *D. aglaia*, *D. hemipeza*, *D. montgomeryi*, *D. obatai*, and *D. tarphytrichia* exist (Kaneshiro and Kaneshiro 1995). The goat population in the Wai'anae area is apparently increasing, becoming an even greater threat to the native habitat there. On Moloka'i, at least one population of *D. differens* at Pu'u Kolekole is presently endangered by goats.

Eight axis deer were introduced to the island of Moloka'i in 1868. By the turn of the century, their numbers had increased to thousands of animals (Tomich 1986). The herds had so damaged the vegetation on Moloka'i that professional hunters were hired to control their numbers (Tomich 1986). However, by then, the native vegetation had suffered irreparable damage from overgrazing by axis deer. These deer continue to degrade the habitat by trampling and overgrazing vegetation, which removes ground cover and exposes the soil to erosion. Activity of deer on Moloka'i has resulted in loss of habitat for *Drosophila differens*. The axis deer population is not presently managed by the State of Hawai'i DLNR or any other agency.

Black-tailed deer were first introduced to Kaua'i in 1961 for the purpose of sport hunting, and today probably number well over 500 animals. The deer are presently confined to the western side of the island, where they feed on a variety of native and alien

plants (van Riper and van Riper 1982). The presence of these deer on Kaua'i is endangering some *Drosophila musaphilia* habitat.

Large-scale ranching of cattle in the Hawaiian Islands began in the middle of the 19th century on the islands of Kaua'i, O'ahu, Maui, and Hawai'i. Large ranches, tens of thousands of acres in size, developed on East Maui and Hawai'i (Cuddihy and Stone 1990) where most of the State's large ranches still exist today. Degradation of native forests used for ranching activities became evident soon after full-scale ranching began. The negative impact of cattle on Hawai'i's ecosystem is similar to that described for goats and deer (Cuddihy and Stone 1990, Stone 1985). Cattle grazing continues in several lowland regions in the northern portion of the Wai'anae Mountains of O'ahu. On Maui, cattle ranching is the primary agricultural activity in many areas and presently threatens populations of *Drosophila heteroneura* and *D. ochrobasis*.

Most of the plants that serve as breeding sites for these proposed Hawaiian picture-wings occur as understory vegetation beneath the canopy of the *Metrosideros polymorpha* ('ohi'a) and *Acacia koa*, and are affected by competition with alien weeds. All of the 12 Hawaiian picture-wing species being proposed for listing are endangered by loss of host plants due to competition with one or more alien plant species. The most significant of these alien plants appear to be *Schinus terebinthifolius* (Christmasberry), *Psidium cattleianum* (strawberry guava), *Melinis minutiflora* (molasses grass), *Pennisetum setaceum* (fountain grass), *Clidemia hirta* (Koster's curse), *Lantana camara* (lantana), *Passiflora mollissima* (banana poka), *Rubus argutus* (prickly Florida blackberry), and *R. ellipticus* (Himalayan raspberry).

Many noxious alien plants, such as *Schinus terebinthifolius*, have invaded the dry to mesic lowland regions of the Hawaiian Islands. Introduced to Hawai'i before 1911, *S. terebinthifolius* forms dense thickets that shade out and displace other plants (Cuddihy and Stone 1990). This fast-growing tree or shrub is found in lowland areas of the major Hawaiian Islands and is currently expanding its range (Smith 1985). *Schinus terebinthifolius* is now a major component of the mesic forests of the Wai'anae and Ko'olau mountains of O'ahu and currently threatens the habitat of *Drosophila aglaia*, *D. hemipeza*, *D. montgomeryi*, *D. obatai*, and *D. tarphytrichia*.

Psidium cattleianum, an invasive shrub or small tree native to tropical

America, has become naturalized on all of the main Hawaiian islands. Like *Schinus terebinthifolius*, *P. cattleianum* is capable of forming dense stands that exclude other plant species (Cuddihy and Stone 1990). This alien plant grows primarily in mesic and wet habitats and provides food for several alien animal species, including feral pigs and game birds, which disperse the plant's seeds through the forest (Smith 1985, Wagner *et al.* 1985). *Psidium cattleianum* is considered one of the greatest alien plant threats to Hawai'i's rainforests. *Psidium cattleianum* is a major invader of forests in the Wai'anae and Ko'olau Mountains of O'ahu, where it often forms single-species stands. It poses a threat to all proposed species of Hawaiian picture-wings on O'ahu. *Psidium cattleianum* also threatens *D. musaphilia* on Kaua'i, *D. differens* on Moloka'i, *D. neoclavisetae* on Maui, and *D. heteroneura*, *D. mulli*, and *D. ochrobasis* on the island of Hawai'i.

First introduced to the Hawaiian Islands as cattle fodder, *Melinis minutiflora* (molasses grass) was later planted for erosion control (Cuddihy and Stone 1990). This alien grass quickly spread to dry and mesic forests previously disturbed by ungulates. *Melinis minutiflora* produces a dense mat capable of smothering plants (Smith 1985), essentially preventing seedling growth and native plant reproduction (Cuddihy and Stone 1990). Because it burns readily and often grows at the border of forests, this grass tends to carry fire into areas with woody native plants (Cuddihy and Stone 1990, Smith 1985). It is able to spread prolifically after a fire and effectively compete with less fire-adapted native plant species, ultimately creating a stand of alien grass where forest once stood. *Melinis minutiflora* is becoming a major threat to six of the proposed species on four islands. On Kaua'i it threatens the habitat of *Drosophila musaphilia*. In the Wai'anae Mountains of O'ahu, *M. minutiflora* threatens the habitat of *D. aglaia*, *D. hemipeza*, *D. montgomeryi*, *D. obatai*, and *D. tarphytrichia*.

Pennisetum setaceum has greatly increased fire risk in some regions, especially on the dry slopes of Hual'apai, K'lauea, and Mauna Loa volcanoes on the island of Hawai'i. The effects of *P. setaceum* invasion are similar to those discussed above for *Melinis minutiflora*. *Pennisetum setaceum* threatens the native vegetation on the leeward slopes of Hual'apai in a region where *Drosophila heteroneura* and *D. ochrobasis* occur.

Clidemia hirta, a noxious shrub native to tropical America, was first reported on O'ahu in 1941. It had spread through

much of the Ko'olau Mountains by the early 1960s, and spread to the Wai'anae Mountains by 1970 (Cuddihy and Stone 1990). It poses a serious threat to *Drosophila hemipeza*, *D. obatai*, *D. substenoptera*, and *D. tarphytrichia* by displacing native plants used by these Hawaiian picture-wings as breeding sites.

Lantana camara, a native of the West Indies, became naturalized in dry to mesic forests and shrublands of the Hawaiian Islands before 1871 (Cuddihy and Stone 1990). This shrub often forms thick cover and produces chemicals that inhibit the growth of other plant species (Smith 1985). On Kaua'i, *L. camara* is a major component of the vegetation around the east and west rims of Waimea Canyon and the western ridges, and threatens the habitat of *Drosophila musaphilia*. It poses a threat to all proposed species of Hawaiian picture-wings on O'ahu.

Rubus argutus was introduced to the Hawaiian Islands in the late 1800s (Haselwood and Motter 1976). The fruit and seeds of this plant are easily spread by birds to open areas where this plant can form dense, impenetrable thickets (Smith 1985). On Kaua'i, the habitat of *Drosophila musaphilia* is endangered by this noxious weed.

Passiflora mollissima, a vine in the passionflower family, was introduced to the islands in the 1920s, probably as an ornamental. This vine is extremely detrimental to certain wet forest habitats of Kaua'i, Maui, and Hawai'i. Heavy growth of this vine can cause damage or death to the native trees by overloading branches, causing breakage, or by forming a dense canopy cover, intercepting sunlight and shading out native plants below. This weed threatens *Drosophila musaphilia* on Kaua'i, *D. neoclavisetae* on Maui, and *D. heteroneura*, *D. mulli*, and *D. ochrobasis* on the island of Hawai'i.

A recent introduction to the Hawaiian Islands, *Rubus ellipticus* is rapidly becoming a major weed pest in wet forests, pastures, and other open areas on the island of Hawai'i. It forms large thorny thickets and displaces native plants. Its ability to invade the understory of wet forests enables it to fill a niche presently unoccupied by any other major wet forest weed in Hawai'i. This has resulted in an extremely rapid population expansion of this alien plant in recent years. *Rubus ellipticus* threatens the habitat of *Drosophila heteroneura*, *D. mulli*, and *D. ochrobasis*.

Fire threatens species of Hawaiian picture-wings living in dry to mesic grassland, shrubland, and forests on two islands. On Kaua'i, fire is a significant

threat to *Drosophila musaphilia*. Hurricane Iniki, in 1992, resulted in an enormous fuel load of downed woody debris and significantly raised the potential for serious fires on the western slopes of Kaua'i (Hawai'i DLNR-Department of Forestry and Wildlife 1993). On O'ahu, fire is a potential threat to *D. montgomeryi*, *D. aglaia*, and *D. obatai* in the Wai'anae Mountains. The effects of fires on native Hawaiian vegetation are largely deleterious, tipping the competitive balance toward alien species. Unlike native plant species, many alien plant species recover quickly and increase in cover following fires (Cudihy and Stone 1990). Hawaiian picture-wing habitat that is damaged or destroyed by fire is likely to be invaded and revegetated by alien plants that cannot be used as host plants by picture-wings.

Two Hawaiian picture wings, *Drosophila obatai* and *D. aglaia*, occur on Federal property at Pu'u Pane, a part of the United States Army's Schofield Barracks Military Reservation. The gently sloping lands below Pu'u Pane are used as a live firing range, and ordnance-induced fires are a common occurrence. Although firebreak roads have been constructed around the perimeter of the firing range, uncontrollable fire still remains a threat to these species and their habitat.

B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

Overutilization is not a threat to any of the proposed Hawaiian picture-wings. While these and other species are valuable and popular as scientific research subjects, only a small number of researchers actively engage in field collections of these taxa. The individuals involved in this activity are professional biologists, knowledgeable and cognizant of the biology and conservation status of these animals. Because of the special collecting techniques involved, the use of these flies by more people for any purpose is highly unlikely. In addition, the collection of small numbers of adult flies would have little impact on the viability of a population, and such collection is necessary for accurate identification and conservation research.

C. Disease or Predation

Over 2,500 alien arthropods are now established in Hawai'i (Howarth 1990, Howarth *et al.* 1995, Nishida 1994), with a continuing establishment rate of 10-20 new species per year (Beardsley 1962, 1979). Many of these alien species have severe effects on the native

Hawaiian insect fauna (Asquith 1995). Species of social Hymenoptera (ants and some wasps) and parasitic wasps pose the greatest threat to the Hawaiian picture-wings. Ants and other social insects frequently dominate the ecologies of tropical ecosystems and strongly influence the evolution of certain plants and animals. However, all of the native Hawaiian arthropods, including the Hawaiian picture-wings, evolved without the predation influence of ants or social wasps, and the subsequent arrival of these new groups to the Hawaiian islands has been devastating to the relatively defenseless native Hawaiian invertebrate flora.

Ants can be particularly destructive predators because of their high densities, recruitment behavior, aggressiveness, and broad range of diet (Reimer 1993). These attributes allow some ants to affect prey populations independent of prey density; thus ants can locate and destroy isolated populations and individuals (Nafus 1993). At least 36 species of ants are known to be established in the Hawaiian Islands, and particularly aggressive species have had severe effects on the native insect fauna (Zimmerman 1948). By the late 1870s, the big-headed ant (*Pheidole megacephala*) was present in Hawai'i, and its predation on native insects was noted by the early Hawaiian naturalist R.C.L. Perkins (1913), "It may be said that no native Hawaiian Coleoptera insect can resist this predator, and it is practically useless to attempt to collect where it is well established. Just on the limits of its range, one may occasionally meet with a few native beetles (e.g., species of *Plagithmysus*), often with these ants attached to their legs and bodies, but sooner or later they are quite exterminated from these localities." With few exceptions, native insects have been eliminated from areas where the big-headed ant is present (Perkins 1913, Gagne 1979, Gillespie and Reimer 1993), and it has been documented to completely exterminate populations of native insects.

The Argentine ant (*Iridomyrmex humilis*) was discovered on the island of O'ahu in 1940 and is now established on all the main islands. Unlike the big-headed ant, the Argentine ant is primarily confined to higher elevations (Reimer *et al.* 1990). This species has been demonstrated to reduce populations or even eliminate native arthropods at high elevations in Haleakala National Park on Maui (Cole *et al.* 1992). While this species does not disperse by flight, colonies are moved about with soil and construction material; a colony was recently

discovered on an isolated peak on the island of O'ahu under a radio tower.

The long-legged ant (*Anoplolepis longipes*) appeared in Hawai'i in 1952 and now occurs on O'ahu, Maui, and Hawai'i (Reimer *et al.* 1990). It inhabits low-elevation (less than 600 m (2,000 ft)), rocky areas of moderate rainfall (less than 250 cm (100 in.) annually) (Reimer *et al.* 1990). Direct observations indicate that Hawaiian arthropods are susceptible to predation by this species (Gillespie and Reimer 1993), and Hardy (1979) documented the disappearance of most native insects from Kipahulu Stream on Maui after the area was invaded by the long-legged ant.

At least two species of fire ants, *Solenopsis geminita* and *S. papuana*, are also important threats (Reagan 1986; Gillespie and Reimer 1993) and occur on all the major islands (Reimer *et al.* 1990). *Solenopsis geminita* is known to be a significant predator on pest fruit flies (Diptera: Tephritidae) in Hawai'i (Wong and Wong 1988). *Solenopsis papuana* is the only abundant, aggressive ant that has invaded intact mesic forest above 600 m (2,000 ft) and is still expanding its range in Hawai'i (Reimer 1993).

Numerous other ant species are recognized as threats to native invertebrates, and additional species become established almost yearly. While the larvae of most of the Hawaiian picture-wings feed deep in the substrate of the host plant, they emerge and move away to pupate in the ground, thus exposing themselves to predation by ants. Upon newly emerging as adults, these flies are particularly susceptible to predation. Adult picture-wings have been observed with ants attached to their legs (Kaneshiro and Kaneshiro 1995).

Another group of social insects that are voracious predators and were originally absent from Hawai'i are yellowjacket wasps (Hymenoptera: Vespidae). In 1977, an aggressive race of the western yellowjacket (*Paravespula pennsylvanica*) became established in Hawai'i and is now abundant at most higher elevations (Gambino *et al.* 1990). In Haleakala National Park on Maui, yellowjackets were found to forage predominantly on native arthropods (Gambino *et al.* 1987, 1990, Gambino and Loope 1992). Overwintering yellowjacket colonies in Hawai'i can produce over half a million foragers that consume tens of millions of arthropods, and evidence exists for localized reduction in native arthropod abundance (Gambino and Loope 1992). Yellowjackets have been observed preying on Hawaiian picture-wings (Kaneshiro and Kaneshiro 1995), and

the establishment of this species on the island of Hawai'i corresponded with a significant decline in several species of Hawaiian picture-wings (Carson 1982b, 1986, Foote and Carson 1995).

Yellowjackets pose a serious threat to all Hawaiian picture-wing species in this proposed rulemaking.

Hawai'i also has a limited number of native parasitic Hymenoptera (wasps), with only species of Eucoliidae recorded to utilize Hawaiian picture-wings as hosts. Several species of alien braconid wasps, *Diaschasmimorpha tryoni*, *D. longicaudatus*, *Opius vandenboschi*, and *Biosteres arisanus*, were purposefully introduced into Hawai'i to control several species of pest tephritid fruit flies (Funasaki *et al.* 1988). However, none of these parasitic wasps are specific to the pest flies, but are known to attack other species of flies, including native Hawaiian Tephritidae. While these wasps have not been recorded parasitizing Hawaiian picture-wings, and may not successfully develop in Drosophilidae, females will sting any fly larva available and can cause significant mortality (T. Duan, University of Hawai'i, pers. comm., 1995). Large extensive releases of these wasps or introductions of new species pose potential threats to Hawaiian picture-wings.

D. The Inadequacy of Existing Regulatory Mechanisms

Currently, no Federal, State, or local laws, treaties, and/or regulations specifically apply to the 12 proposed species of Hawaiian picture-wings. Some of the species may indirectly receive some protection under Federal and State laws because they utilize host plants that are protected under the Federal Endangered Species Act and the State of Hawai'i's Endangered Species Act. This indirect protection, however, is not sufficient since the species of Hawaiian picture-wings that utilize protected host plants may not be physically present on the host plants at all times and because some threats to these Hawaiian picture-wings can occur regardless of their presence on a protected host plant.

As stated above, alien parasitic wasps pose a threat to the Hawaiian picture-wings. Some alien wasp species have been introduced by Federal and State agencies for biological control of pest flies. The U.S. Environmental Protection Agency (EPA), under the authority of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), regulates biological control agents as pesticides. However, EPA only regulates microorganisms (*i.e.*, bacteria, fungi, protozoa, and viruses). EPA has

exempted all other organisms from requirements of FIFRA, because it has determined that they are regulated by the U.S. Department of Agriculture's Animal and Plant Health Inspection Service (USDA-APHIS). The State of Hawai'i requires that new introductions be reviewed by special committees before release (HRS Chapt. 150A), and current USDA-APHIS policy is to submit permit application materials, including an environmental assessment or environmental impact statement, to the Service's Pacific Islands Office for review under section 7 of the Act and National Environmental Policy Act (NEPA). However, predicting from laboratory studies the impacts introduced species may have on an ecosystem is difficult (Kauffman and Nichols 1992) and the purposeful release or augmentation of any Dipteran predator or parasitoid is a potential threat to these 12 species of Hawaiian picture-wing flies.

Federal listing would automatically invoke listing under Hawai'i State law, which prohibits taking and encourages conservation by State government agencies. Hawai'i's Endangered Species Act (HRS, Sect. 195D-4(a)) states, "Any species of aquatic life, wildlife, or land plant that has been determined to be an endangered species pursuant to the (Federal) Endangered Species Act shall be deemed to be an endangered species under the provisions of this chapter and any indigenous species of aquatic life, wildlife, or land plant that has been determined to be a threatened species pursuant to the (Federal) Endangered Species Act shall be deemed to be a threatened species under the provisions of this chapter." State regulations prohibit the removal, destruction, or damage of federally listed animals found on State lands (HRS, Sect. 195D-4(e)). Further, the State may enter into agreements with Federal agencies to administer and manage any area required for the conservation, management, enhancement, or protection of endangered species (HRS, Sect. 195D-5(c)). Funds for these activities could be made available under section 6 (Cooperation with the States) of the Act. Federal listing of these species will, therefore, trigger the protection available under State law.

E. Other Natural or Manmade Factors Affecting Its Continued Existence

The small number of populations of *Drosophila neoclavisetae*, *D. mulli*, and *D. heteroneura* puts these species at risk of extinction from naturally occurring, yet relatively common, events such as hurricanes and landslides. A hurricane could cause total population loss by

causing direct mortality, habitat destruction or modification, and the spread of invasive alien plants. The continued existence of these picture-wings is further complicated by their limited habitat. *Drosophila mulli* is only found at one location on the island of Hawai'i within a localized patch of *Pritchardia beccariana*. Adults are found only on the undersides of this plant, and further associations between *D. mulli* and this host plant are likely. *Drosophila neoclavisetae* is restricted to a ridgetop on the island of Maui where it has been found only within a small patch of endemic *Cyanea* spp. *Drosophila heteroneura* was believed to be extinct until it was rediscovered on private acreage at Hualalai Volcano in 1993. This remaining population is extremely small, with a 90 percent reduction from historical abundance (Kaneshiro and Kaneshiro 1995). Naturally occurring random events such as hurricanes or landslides may destroy vital *P. beccariana* or *Cyanea* spp., thus placing *D. mulli* and *D. neoclavisetae* at significant risk of extinction by eliminating the only habitat in which they have been found. Additionally, the destruction of native plants opens a niche for the establishment of introduced alien plant species. Once alien species are established, it is difficult for native plants, including host plants for *Drosophila* spp., to recover and thrive successfully.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by the 12 species in determining to propose this rule. Based on this evaluation, the proposed action is to list *Drosophila aglaia*, *D. differens*, *D. hemipeza*, *D. heteroneura*, *D. montgomeryi*, *D. mulli*, *D. musaphilia*, *D. neoclavisetae*, *D. obatai*, *D. ochrobasis*, *D. substenoptera*, and *D. tarphytrichia*, as endangered. All 12 species are endangered by one or more of the following: habitat degradation by pigs, goats, deer, cattle, and alien plants; habitat loss from fire; predation by ants and alien wasps; and biological pest control. Three species are known from less than three populations, making them susceptible to extinction from naturally occurring random events. Because these 12 species are in danger of extinction throughout all or a significant portion of their ranges, they fit the definition of endangered as defined in the Act. Therefore, the Service proposes to list these species as endangered.

Critical Habitat

In the last few years, a series of court decisions has overturned our

determinations regarding a variety of species that designation of critical habitat would not be prudent (e.g., *Natural Resources Defense Council v. U.S. Department of the Interior* 113 F. 3d 1121 (9th Cir. 1997); *Conservation Council for Hawaii v. Babbitt*, 2 F. Supp. 2d 1280 (D. Hawaii 1998)). Based on the standards applied in those judicial opinions, we have examined the question of whether critical habitat for the 12 species of *Drosophila* flies would be prudent.

Although the 12 species have small population sizes, they do not appear to be vulnerable to unrestricted collection, vandalism, or other intentional disturbance at this time. We remain concerned that these threats might be exacerbated by the publication of critical habitat maps and further dissemination of locational information. However, we have examined the evidence available and have not found specific evidence of taking, vandalism, collection, or trade of this species or any similarly situated species. Consequently, consistent with applicable regulations (50 CFR 424.12(a)(1)(i)) and recent case law, we do not expect that the identification of critical habitat will increase the degree of threat to this species of taking or other human activity.

In the absence of a finding that critical habitat would increase threats to a species, if any benefits would result from critical habitat designation, then a prudent finding is warranted. In the case of these species, some benefits may result from designation of critical habitat. The primary regulatory effect of critical habitat is the section 7 requirement that Federal agencies refrain from taking any action that destroys or adversely modifies critical habitat. While a critical habitat designation for habitat currently occupied by these species would not be likely to change the section 7 consultation outcome, because an action that destroys or adversely modifies such critical habitat would also be likely to result in jeopardy to the species, in some instances section 7 consultation might be triggered only if critical habitat is designated. Examples include unoccupied habitat or occupied habitat that may become unoccupied in the future. Designating critical habitat may also provide some educational or informational benefits. Therefore, we propose that critical habitat is prudent for *Drosophila aglaia*, *D. differens*, *D. hemipeza*, *D. heteroneura*, *D. montgomeryi*, *D. mulli*, *D. musaphilia*, *D. neoclavisetae*, *D. obatai*, *D. ochrobasis*, *D. substenoptera*, and *D. tarphytrichia*.

Critical habitat is not determinable when one or both of the following situations exist: the information needed to analyze the impacts of the designation is lacking, or the biological needs of the species are not sufficiently well known to permit identification of an area as critical habitat (50 CFR 424.12). Currently, we have found that critical habitat for the 12 *Drosophila* flies is not determinable based on our inadequate knowledge about the relationship of the flies to their primary and secondary host plant(s), the distributions of these host plant(s), the bacteria and fungal communities necessary for successful *Drosophila* larval development, and the relationship of these flies to other native and nonnative flies.

As discussed in the Background section of this proposed rule, each of the twelve species of *Drosophila* proposed for listing is restricted geographically to a single island; six species are reported from Oahu, three species are reported from the island of Hawaii, and one species, each, is reported from Kauai, Molokai, and Maui. All twelve species appear to have highly specialized breeding sites; they use small sections of fermenting or rotting areas on their host plant(s). The host plants are also, in many cases, "single-island endemics". Some, in fact, have already been independently listed as endangered or threatened and their locations are available through various government and privately-sponsored databases and from individual botanists. Unfortunately, information on the specific locations of other host plants may not be known, making determination of critical habitat difficult. In addition, we do not currently understand the relationship between the primary and the secondary host plant(s) and their associated *Drosophila* species. Factors that determine host suitability may include host plant size, the size and age of a rotting area upon which the larvae feed, the position of the rotting area with respect to the surrounding vegetation, soil moisture, relative humidity, frequency of rainfall and fog drip, and the presence or absence of other detritus (decaying organic matter) feeders, such as slugs and earthworms. However, it is not clear from currently available information which, or if all, of these factor(s) are essential for the long-term conservation of each *Drosophila* species.

We are also unable to determine critical habitat for these flies based on the lack of information on the bacteria and fungal communities necessary for successful *Drosophila* larval development. The larvae of all twelve

Drosophila species are microbivores (fungus feeders) and little is known about their bacteria and fungal requirements or about the ability of host plant species to support them. This information is needed to determine what primary constituent elements are needed for fly larvae to survive.

Finally, we are currently unable to determine the inter-specific relationships between these species and other, more common species of *Drosophila*, introduced tipulids (crane flies), and other non-native fly species. Preliminary research strongly suggests that inter-generic competition is potentially an important limiting factor for the picture-wing *Drosophila* and may inhibit or limit their use of certain host plants. Additional information on these interrelationships will assist in determining what impacts these relationships have on the habitat requirements of these 12 flies.

When we find that critical habitat is not determinable, our regulations (50 CFR 424.17) provide that, within one year of the date of the final rule listing the species, we must publish a final rule designating critical habitat, based on the best information available at the time. Due to a limited listing budget, we plan to employ a priority system for deciding which outstanding critical habitat designations should be addressed first. We will focus our efforts on those designations that will provide the most conservation benefit, taking into consideration the efficacy of critical habitat designation in addressing the threats to the species, and the magnitude and immediacy of those threats. Therefore, if these species are listed, we will develop a proposal to designate critical habitat for the 12 species of *Drosophila* flies as soon as feasible, considering our workload priorities, as outlined in our priority system, and available funding.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain activities. Recognition through listing encourages public awareness and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Act provides for possible land acquisition and cooperation with the State and requires that recovery actions be carried out for all listed species. Funding may be available through section 6 of the Act for the State to conduct recovery activities. The

protection required of Federal agencies and the prohibitions against certain activities involving listed animals are discussed, in part, below.

Listing the 12 *Drosophila* species provides for the development and implementation of recovery plans for these species. These plans will bring together Federal, State, and regional agency efforts for the conservation of the species. Recovery plans will establish a framework for agencies to coordinate their recovery efforts. The plans will set recovery priorities and estimate the costs of the tasks necessary to accomplish the priorities. They will also describe the site-specific management actions necessary to achieve conservation and survival of these species.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(4) of the Act requires Federal agencies to confer informally with us on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) requires Federal agencies to insure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with us.

Federal agency actions that may require conference and/or consultation as described in the preceding paragraph include, but are not limited to: Army Corps of Engineers involvement in projects, such as the construction of roads, bridges, and dredging projects, subject to section 404 of the Clean Water Act (33 U.S.C. 1344 *et seq.*) and section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 401 *et seq.*); U.S. Environmental Protection Agency authorized discharges under the National Pollutant Discharge Elimination System (NPDES); U.S. Department of Agriculture involved in release or permitting release of biological control agents under the Plant Pest Act; military training and activity carried out by the U.S. Department of Defense; and projects by the Natural Resources Conservation Service and U.S. Department of Housing and Urban Development.

The Act and its implementing regulations set forth a series of general prohibitions and exceptions that apply to all endangered wildlife. The prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.21 for endangered species, make it illegal for any person subject to the jurisdiction of the United States to take (includes harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect; or to attempt any of these), import or export, ship in interstate or foreign commerce in the course of a commercial activity, or sell or offer for sale in interstate or foreign commerce any endangered wildlife species. It is also illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving endangered wildlife under certain circumstances. Regulations governing permits are codified at 50 CFR 17.22 and 17.23. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, and/or for incidental take in the course of otherwise lawful activities. Requests for copies of the regulations regarding listed wildlife and inquiries about permits and prohibitions may be addressed to the U.S. Fish and Wildlife Service, Endangered Species Permits, 911 Northeast 11th Avenue, Portland, Oregon 97232-4181 (telephone 503/231-6241; facsimile 503/231-6243).

As published in the **Federal Register** on July 1, 1994, (59 FR 34272), our policy is to identify, to the maximum extent practicable at the time a species is listed, those activities that would or would not be likely to constitute a violation of section 9 of the Act. The intent of this policy is to increase public awareness of the effect of the listing on proposed and ongoing activities within a species' range. Likely activities that we believe could potentially result in a violation of section 9 of the Act include, but are not limited to, the following: road and firebreak construction; military troop movements; loss of habitat due to fire resulting from the use of military ammunition; intentional release or augmentation of biological control agents; introduction of other alien species; and collection of individuals for any purpose without a permit. Activities that we believe would not likely result in a violation of section 9 of the Act include, but are not limited to, non-destructive activities in areas occupied by these species, such as hiking, collecting non-host plants for cultural usage (e.g., hula halau), and

hunting. Activities that occur under a valid incidental take permit or in accordance with a section 7 consultation would not violate section 9.

Questions regarding whether specific activities will constitute a violation of section 9 of the Act should be directed to the Manager of the Pacific Islands Ecoregion (see **ADDRESSES** section).

If these Hawaiian picture-wing flies are listed under the Act, the State of Hawai'i Endangered Species Act (HRS, Sect. 195D-4(a)) is automatically invoked, prohibiting taking and encouraging conservation by State government agencies. Further, the State may enter into agreements with Federal agencies to administer and manage any area required for the conservation, management, enhancement, or protection of endangered species (HRS, Sect. 195D-5(c)). Funds for these activities could be made available under section 6 of the Act (State Cooperative Agreements). Thus, the Federal protection afforded to these species by listing them as endangered species will be reinforced and supplemented by protection under State law.

Public Comments Solicited

We intend that any final action resulting from this proposal will be as accurate and as effective as possible. Therefore, comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning this proposed rule are hereby solicited. Comments particularly are sought concerning:

- (1) Biological, commercial, or other relevant data concerning any threat (or lack thereof) to these species;
- (2) The location of any additional populations of these species;
- (3) Identification of habitat that should be designated as critical habitat and the reasons why this habitat should be determined to be critical habitat pursuant to section 4 of the Act or any reasons why critical habitat should not be designated;
- (4) Additional information concerning the range, distribution, and population size of these species; and
- (5) Current or planned activities in the subject area and their possible impacts on these species.

Final issuance of regulations on these species will take into consideration the comments and any additional information received by the Service, and such communications may lead to a final regulation that differs from this proposal. In accordance with interagency policy published on July 1,

1994 (59 FR 34270), upon publication of this proposed rule in the **Federal Register** we will solicit expert reviews by at least three specialists regarding pertinent scientific or commercial data and assumptions relating to the taxonomic, biological, and ecological information for the three species. The purpose of such a review is to ensure that listing decisions are based on scientifically sound data, assumptions, and analyses, including the input of appropriate experts. We will summarize the opinions of these reviewers in the final decision document. The final determination may differ from this proposal based upon the information we receive.

You may request a public hearing on this proposal. Your request for a hearing must be made in writing and filed within 45 days of the date of publication of this proposal in the **Federal Register**. Address your requests to the Field Supervisor (see **ADDRESSES** section).

Our practice is to make comments, including names and home addresses of respondents, available for public review during regular business hours. Individual respondents may request that we withhold their home address from the rulemaking record, which we will honor to the extent allowable by law. In some circumstances, we would withhold from the rulemaking record a respondent's identity, as allowable by law. If you wish for us to withhold your name and/or address, you must state this request prominently at the beginning of your comment. However,

we will not consider anonymous comments. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public inspection in their entirety.

Electronic Access and Filing

You may send comments by e-mail to pwflies_pr@fws.gov. Please submit these comments as an ASCII file and avoid the use of special characters and any form of encryption. Please also include "Attn: 1018-AG23" and your name and return address in your e-mail message. If you do not receive a confirmation from the system that we have received your e-mail message, contact us directly by calling our Pacific Islands Office at phone number 808-541-3441.

National Environmental Policy Act

We have determined that environmental assessments and environmental impact statements, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Act. We published a notice outlining our reasons for this determination in the **Federal Register** on October 25, 1983 (48 FR 49244).

Proposed Regulation Promulgation

Accordingly, the Service hereby proposes to amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

PART 17—[AMENDED]

1. The authority citation for Part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500, unless otherwise noted.

2. Section 17.11(h) is amended by adding the following, in alphabetical order under the family indicated, to the List of Endangered and Threatened Wildlife to read as follows:

§ 17.11 Endangered and threatened wildlife.

* * * * *

(h) * * *

50 CFR Part 679

[I.D. 010301D]

RIN 0648-AL95

Fisheries of the Exclusive Economic Zone Off Alaska; Amendments to Alaska Groundfish and Crab Fishery Management Plans to Revise the License Limitation Program

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability of amendments to fishery management plans; request for comments.

SUMMARY: The North Pacific Fishery Management Council (Council) has submitted Amendment 60 to the Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area, Amendment 58 to the Fishery Management Plan for Groundfish of the Gulf of Alaska and Amendment 10 to the Fishery Management Plan for the Commercial King and Tanner Crab Fisheries in the Bering Sea and the Aleutian Islands (FMPs). These plan amendments are necessary to implement changes to the License Limitation Program (LLP) as recommended by the Council and are intended to further the objectives of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) and the FMPs. **DATES:** Comments on Amendments 60, 58, and 10 must be submitted by March 19, 2001.

ADDRESSES: Comments on the proposed plan amendments should be submitted to Sue Salvesson, Assistant Regional Administrator for Sustainable Fisheries, Alaska Region, NMFS, P.O. Box 21668, Juneau, Alaska, 99802, Attn: Lori

Gravel, or delivered to the Federal Building, 709 West 9th Street, Juneau, AK. Comments may also be sent by facsimile (fax) to 907-586-7465. Comments will not be accepted if submitted via e-mail or Internet. Copies of Amendments 60, 58, and 10 and the Environmental Assessment/Regulatory Impact Review/Initial Regulatory Flexibility Analysis prepared for the proposed plan amendments are available from the North Pacific Fishery Management Council, 605 West 4th Ave., Suite 306, Anchorage, AK 99501-2252; telephone 907-271-2809.

FOR FURTHER INFORMATION CONTACT: Jim Hale, 907-586-7228.

SUPPLEMENTARY INFORMATION:

Background

The Magnuson-Stevens Act requires that each Regional Fishery Management Council submit any fishery management plan or plan amendment it prepares to NMFS for review and approval, disapproval, or partial approval. The Magnuson-Stevens Act also requires that NMFS, after receiving a fishery management plan or plan amendment, immediately publish a notice in the **Federal Register** that the fishery management plan or plan amendment is available for public review and comment. This action constitutes such notice for Amendments 60, 58, and 10 to the FMPs. NMFS will consider public comments received during the comment period in determining whether to approve these proposed plan amendments. To be considered, a comment must be received by the close of business on the last day of the comment period.

In June 1995, the Council recommended that NMFS implement the LLP to address concerns of excess capital in the groundfish and crab fisheries off Alaska. The LLP is the second stage of a multi-staged process to reduce capacity in the affected fisheries. The LLP will replace the Vessel Moratorium Program (VMP), a program implemented by NMFS on January 1, 1996, to impose a temporary moratorium on the entry of new capacity in the groundfish and crab fisheries off Alaska and to define the class of entities that would be eligible for licenses under the LLP. The VMP expired on December 31, 1999 (64 FR

3651). The final rule implementing the LLP specifies that fishing will begin under the LLP on January 1, 2000 (63 FR 52642, October 1, 1998).

If approved, Amendments 60, 58, and 10 would make several changes to the final rule implementing the LLP. First, the Council recommended that recent participation criteria be added to the eligibility requirements for a crab species license. Originally, a person applying for a crab species license had to demonstrate that documented harvests were made from a qualifying vessel during two periods, the general qualification period (GQP) and the endorsement qualification period (EQP). If approved, Amendment 10 would add a third period, the recent participation period (RPP), in which a person would have to demonstrate that documented harvests of crab were made from a qualifying vessel. The RPP was added to the eligibility requirements for a crab species license because of the Council's concern that a crab species license could be issued to a person whose eligibility was based on participation that has been inactive since 1995. These "latent licenses" could be transferred to persons who would become active in the fishery. Such transfers would be contrary to the purpose of the LLP because it would create the potential to increase fishing effort above the current levels in the crab fisheries. Except under specific exemptions provided in the FMP amendments, the RPP would require that a person demonstrate that at least one documented harvest of any crab species was made during the period beginning January 1, 1996, through February 7, 1998.

The Council's second recommendation is to require that the vessel designated on the LLP license be transferred with the LLP license, if that LLP license was issued based on documented harvests made from a vessel without a Federal Fisheries Permit. A Federal Fisheries Permit is required for any vessel that participates in a Federal groundfish fishery off Alaska. If a vessel did not participate in Federal groundfish fisheries off Alaska, its qualifying documented harvests must have occurred in waters of the State of

Alaska or other waters shoreward of the exclusive economic zone (EEZ) off Alaska. Groundfish fisheries in state waters or other waters shoreward of the EEZ off Alaska will not be managed under the LLP. The Council reasoned that if a person is licensed to participate in a Federally managed fishery on the basis of participation in a State-managed fishery, certain restrictions should be placed on that license. Therefore, NMFS would restrict the transfer of a license issued to a vessel without a Federal Fishery Permit unless the licensed vessel is transferred with the license. The Council did not consider it a hardship to the license recipient to directly link the transfer of a license to the vessel, whether the recipient decides to keep or to transfer the license and vessel.

Third, the Council recommended that a gear designation be added to a groundfish license. The gear designation is intended to prevent movement between the trawl sector and the non-trawl sector. A license would be issued with a "trawl," "non-trawl," or "trawl/non-trawl" gear designation based on gear participation before June 17, 1995, with two exceptions. Under the first exception, a person could exercise a one-time option to switch gear designations if that person used a new gear between June 18, 1995, and February 7, 1998. For example, a person used only trawl gear before June 17, 1995. However, in 1997, that person used pot gear to catch Pacific cod. The use of a new gear in 1997 would allow the person to exercise a one-time option to change the gear designation from trawl gear to non-trawl gear. A person could not qualify for a trawl/non-trawl gear designation by use of this exception. Under the second exception, a person could request a gear designation change based on a significant financial investment. To qualify under the second exception, a

person would have to (1) demonstrate that a significant financial investment was made in converting a vessel or purchasing fishing gear on or before February 7, 1998, and (2) demonstrate that a documented harvest was made from the qualifying vessel with the new gear type on or before December 31, 1998. A significant financial investment is defined as at least \$100,000 toward vessel conversion or gear to change from a non-trawl to a trawl gear designation, or having acquired groundline, hooks or pots, and hauling equipment to change from a trawl to a non-trawl gear designation.

Fourth, the Council recommended that a community development quota (CDQ) vessel exemption, which originally had no ending date for eligibility, be limited to a specific time period (November 18, 1992, through October 9, 1998). The exemption was intended to facilitate the ability of CDQ organizations to enter and conduct groundfish fisheries through the purchase of new vessels that may not meet eligibility criteria. Concerns over excess capacity in the groundfish fisheries, and acknowledgment that CDQ organizations are integrating into the existing fishing industry at a reasonable pace, prompted the Council's recommendation. Further support for limiting this exemption came from public testimony that CDQ organizations did not use this exemption under the VMP.

Fifth, the Council recommended that limited processing ability, defined as 1 metric ton of round fish per day, be granted to a person deploying a vessel that is less than 60 ft (18.3 m) length overall, based on a groundfish license with a catcher vessel designation. This limited processing exemption is intended to assist small catcher vessels in exploiting niche markets not otherwise available.

Sixth, although not formally part of Amendments 60/58/10, the Council recommended that the name of the vessel to be deployed by the LLP license holder must be designated on the license. The Council recommended this change to address concerns about the movement of license holders among vessels contributing to excess capacity in the fisheries. The ability to move among vessels would have contributed to excess capacity by allowing a license holder to deploy a second vessel to fish while the first vessel was in port, or by allowing a license holder to alternate between vessels in different fisheries in different geographical locations. In both cases, a license holder could engage in uninterrupted fishing because breaks for unloading, vessel repairs, or running time could be eliminated through the use of another vessel. The Council recommended that NMFS make this change as a regulatory amendment.

Public comments will be accepted on these proposed amendments through the end of the comment period specified in this notification. A proposed rule that would implement the amendments may be published in the Federal Register for public comment following NMFS's evaluation under the Magnuson-Stevens Act procedures. All comments received by the end of the comment period specified in this notice, whether specifically directed to the amendments or to the proposed rule, will be considered in the decision to approve, disapprove, or partially approve these amendments.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: January 11, 2001.

Bruce C. Morehead,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Vol. 66, No. 11

Wednesday, January 17, 2001

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Agricultural Research Service

Notice of Federal Invention Available for Licensing and Intent To Grant an Exclusive License

AGENCY: Agricultural Research Service, USDA.

ACTION: Notice of availability and intent.

SUMMARY: Notice is hereby given that a Federally owned invention, U.S. Patent Application No. 09/304,352 filed May 4, 1999, entitled "Chemical Compositions That Attract Arthropods," is available for licensing and the U.S. Department of Agriculture, Agricultural Research Service, intends to grant to the University of Florida Research Foundation, Inc., of Gainesville, Florida, an exclusive license to this invention.

DATES: Comments must be received on or before April 17, 2001.

ADDRESSES: Send comments to: USDA, ARS, Office of Technology Transfer, 5601 Sunnyside Avenue, Room 4-1158, Beltsville, Maryland 20705-5131.

FOR FURTHER INFORMATION CONTACT: June Blalock of the Office of Technology Transfer at the Beltsville address given above; telephone: 301-504-5257.

SUPPLEMENTARY INFORMATION: The Federal Government's patent rights to this invention are assigned to the United States of America, as represented by the Secretary of Agriculture. The prospective exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within ninety (90) days from the date of this published Notice, the Agricultural Research Service receives written evidence and argument which establishes that the grant of the license would not be consistent with the

requirements of 35 U.S.C. 209 and 37 CFR 404.7.

Richard M. Parry, Jr.,
Assistant Administrator.

BILLING CODE 3410-03-P

DEPARTMENT OF AGRICULTURE

Agricultural Research Service

Notice of Intent to Grant Exclusive License

AGENCY: Agricultural Research Service, USDA.

ACTION: Notice of intent.

SUMMARY: Notice is hereby given that the U.S. Department of Agriculture, Agricultural Research Service (USDA), intends to grant to Viral Therapeutics of Ithaca, New York, an exclusive license to the invention disclosed in U.S. Patent No. 6,017,713 issued on January 25, 2000, entitled "Ferritin Formation as a Predictor of Iron Availability in Foods." Notice of Availability was published in the **Federal Register** on November 3, 1999.

DATES: Comments must be received on or before March 19, 2001.

ADDRESSES: Send comments to: USDA, ARS, Office of Technology Transfer, 5601 Sunnyside Avenue, Rm. 4-1158, Beltsville, Maryland 20705-5131.

FOR FURTHER INFORMATION CONTACT: June Blalock of the Office of Technology Transfer at the Beltsville address given above; telephone: 301-504-5989.

SUPPLEMENTARY INFORMATION: The Federal Government's patent rights in this invention are assigned to the United States of America, as represented by the Secretary of Agriculture. It is in the public interest to so license the U.S. Government's rights in this invention as Viral Therapeutics has submitted a complete and sufficient application for a license. The prospective exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within sixty (60) days from the date of this published Notice, the Agricultural Research Service receives written evidence and argument which establishes that the grant of the license would not be consistent with the

requirements of 35 U.S.C. 209 and 37 CFR 404.7.

Richard M. Parry, Jr.,
Assistant Administrator.

BILLING CODE 3410-03-P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 00-091-2]

Secretary's Advisory Committee on Foreign Animal and Poultry Diseases; Solicitation for Membership

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of intent.

SUMMARY: We are giving notice that the Secretary anticipates reestablishing the Advisory Committee on Foreign Animal and Poultry Diseases for a 2-year period. The Secretary is soliciting nominations for membership for this Committee. This is the second notice calling for nominations. Previous nominations need not be resubmitted.

DATES: Consideration will be given to nominations received on or before March 5, 2001.

ADDRESSES: Nominations should be addressed to the person listed under **FOR FURTHER INFORMATION CONTACT**.

FOR FURTHER INFORMATION CONTACT: Dr. Joe Annelli, Chief Staff Veterinarian, Emergency Programs, VS, APHIS, 4700 River Road Unit 41, Riverdale, MD 20737-1231; (301) 734-8073.

SUPPLEMENTARY INFORMATION: The Secretary's Advisory Committee on Foreign Animal and Poultry Diseases (the Committee) advises the Secretary of Agriculture on actions necessary to keep foreign diseases of livestock and poultry from being introduced into the United States. In addition, the Committee advises on contingency planning and on maintaining a state of preparedness to deal with these diseases, if introduced.

The Committee Chairperson and Vice Chairperson shall be elected by the Committee from among its members.

Terms expired for the current members of the Committee in December 2000. We are soliciting nominations from interested organizations and individuals to replace members on the

Committee. An organization may nominate individuals from within or outside its membership. This is a second notice soliciting nominations. Previous nominations need not be resubmitted. The Secretary will select members to obtain the broadest possible representation on the Committee, in accordance with the Federal Advisory Committee Act (Pub. L. No. 92-463) and U.S. Department of Agriculture (USDA) Regulation 1041-1. Equal opportunity practices, in line with USDA policies, will be followed in all appointments to the Committee. To ensure that the recommendations of the Committee have taken into account the needs of the diverse groups served by the Department, membership should include, to the extent practicable, individuals with demonstrated ability to represent minorities, women, and persons with disabilities.

Done in Washington, DC, this 10th day of January 2001.

Bobby R. Acord,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-U

DEPARTMENT OF AGRICULTURE

Forest Service

Pink Stone Fire Recovery; Kootenai National Forest, Lincoln County, MT

AGENCY: Forest Service USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: In August, 2000, two lightning-caused wildfires burned about 16,100 acres in the Pinkham and Sutton Creek drainages between 7 and 14 miles southwest of Eureka, Montana. The fires threatened private property and resulted in significant tree mortality and increased future fuel levels. Increases in spring-time peak water flows in a few streams are expected to approach maximum levels allowed by the Kootenai Forest Plan as a result of vegetation loss. The USDA Forest Service will prepare an Environmental Impact Statement (EIS) for the Pink Stone Fire Recovery Decision Area, which encompasses the two fire areas. The EIS will disclose the effects of fire recovery opportunities designed to meet the Purpose and Need for taking action, which is to (1) reduce existing and future fuel accumulations, the corresponding risk of reburn, and the risk to private property; (2) recover the economic value of fire-killed timber; (3) restore vegetative species diversity

appropriate to the sites; and (4) restore affected watersheds to properly functioning conditions.

Fuel reduction and economic opportunities would be accomplished through salvage harvest of fire-killed timber and jackpot burning of harvest-created slash. Vegetation and watershed restoration opportunities would be accomplished through hand planting and natural regeneration in harvested, riparian and burned areas, and improving water drainage systems through road, ditch and culvert improvements. Additional fire recovery opportunities proposed include visual quality improvements using unit shapes and sizes designed to imitate patterns created by the fires, improvements to fire-affected trails, and provisions for adequate snag and coarse woody debris following recovery treatments.

The Proposed Action would reduce existing and future fuels and recover the economic value of burned timber on about 4,003 acres of land burned during the fires, producing about 89,488 hundred cubic feet (CCF), or 36.7 million board feet (MMBF), of forest product. Treatment types include about 1,663 acres of regeneration harvest, 1,522 acres of shelterwood harvest, 464 acres of seed tree harvest, and 354 acres of commercial thinning using tractor, cable and forwarder harvest systems. Jackpot burning would be used to reduce residual fuels. Watershed recovery actions would include about 315 acres of riparian planting, about 2,791 acres of hand planting in addition to expected natural regeneration, and roadside drainage improvements on approximately 76 miles of forest roads. Visual quality improvements involve unit size, shapes and treatments that imitate fire patterns and decrease the visual effect of previous unit edges and fire-killed trees. Fire-created trail hazards on three trails would be removed.

The Proposed Action would require Kootenai National Forest Plan project-specific exceptions to harvest in big game movement corridors and to temporarily exceed open road density standards in Management Area 12 (Big Game Summer Range with Timber Management). The Proposed Action would also create openings over 40 acres, which is allowable under catastrophic conditions such as large wildfires.

The proposed activities are considered together because they represent either connected or cumulative actions as defined by the Council on Environmental Quality (40 CFR 1508.23).

The EIS will tier to the Kootenai National Forest Land and Resource Management Plan, as amended, and the Final Environmental Impact Statement (FEIS), and Record of Decision (ROD) of September 1987, which provides overall guidance for forest management of the area.

DATES: Written comments and suggestions should be received on or before February 16, 2001.

ADDRESSES: The Responsible Official is Bob Castaneda, the Kootenai National Forest Supervisor, 1101 U.S. Highway 2 West, Libby, MT 59923. Written comments and suggestions concerning the scope of the analysis should be sent to Glen M. McNitt, District Ranger, Rexford Ranger District, 1299 U.S. Highway 93 N, Eureka, MT 59917.

FOR FURTHER INFORMATION CONTACT: Ron Komac, Acting NEPA Coordinator, Rexford Ranger District, Phone: (406) 296-2536.

SUPPLEMENTARY INFORMATION: The Decision Area is located on the Rexford Ranger District of the Kootenai National Forest in northwest Montana. Two fire areas, the Stone Hill Fire (10,960 acres) and the Lydia Fire (5,434 acres) make up the almost 16,200-acre Decision Area. All but some high-elevation ridgetops have favorable climate and good site conditions for forest vegetation. Proposed activities within the Decision Area include all or portions of T34-35N; R27-29W.

Average annual precipitation ranges from 14 to 100 inches. At higher elevations, most precipitation falls as snow. The Decision Area contains a combination of open-grown ponderosa pine and Douglas-fir in the lower elevations adjacent to Lake Koocanusa in the Stone Hill fire area; upland areas in both fires that contain multistoried western larch/Douglas-fir intermixed with lodgepole pine; and mid to high to elevation areas in both fires that produce Englemann spruce, subalpine fir and lodgepole pine stands.

Some of the Stone Hill portion of the Decision Area is highly visible from a designated Scenic Byway (State Highway 37 and Forest Development Road #228) and from the Webb Mountain rental lookout.

The Kootenai National Forest Land and Resource Management Plan provides overall management objectives in individual delineated management areas (MAs). Almost all of the proposed fire recovery activities occur in MA 12 and 15. Briefly described, MA 12 is managed to maintain or enhance the summer range habitat effectiveness for big game species and produce a programmed yield of timber. MA 15

focuses upon timber production using various silvicultural practices while providing for other resource values. Planting disease-resistant white-bark in suitable habitat and removing trail hazards along three trails are recovery activities proposed in MA 2 (non-motorized recreation, no timber harvest).

Purpose and Need

The Purpose and Need for taking action in the Decision Area is to (1) reduce existing and future fuel accumulations, the corresponding risk of reburn, and the risk to private property by removing dead and dying trees and jackpot burning residual fuels; (2) recover the economic value of fire-killed timber by harvesting merchantable trees; (3) restore vegetative species diversity by hand planting a variety of species appropriate to the sites in addition to natural regeneration; and (4) restore affected watersheds to properly functioning conditions by providing short- and long-term large woody debris recruitment, improving road-related drainage problems, and reducing the risk of additional watershed impacts from future reburns.

Proposed Activities

The Forest Service proposes to reduce existing and accumulating fuels and recover the economic value of burned timber on about 4,003 acres of fire-affected forest lands. About 1,663 acres of regeneration harvest would occur, where all trees would be harvested except about 5 moderately sized reserve trees. About 464 acres of seed tree harvest would occur, where 5–20 reserve trees would be retained to provide a seed source for natural regeneration. About 1,522 acres would be treated with a shelterwood harvest, where about 20–50 reserve trees per acre would be retained. Commercial thinning would occur on about 354 acres, with 30–100 trees per acre remaining. These treatments would recover an expected 89,488 CCF (36.7 MMBF) of commercial forest product from the fire-affected areas. A tractor harvest system would be used on about 1,270 acres where access and slope were favorable. On about 98 acres a cable system would be used, mostly due to steep slopes. A forwarder harvest system would be used on about 471 acres due to long skidding distances, steep slopes and soil concerns. Approximately 0.4 miles of temporary road would be needed to access one unit to be harvested with ground-based systems. This temporary road would be removed from the landscape after harvest activities were

accomplished. No underburning is proposed due to the effects of the fires, however, residual fuels after the fires and harvest-generated fuels would be piled and burned as necessary (referred to as jackpot burning). Restoring vegetation as soon as possible would be supported by about 2,791 acres of hand planting western larch, western white pine and ponderosa pine in addition to expected natural regeneration. Selected sites over about 650 acres of high elevation land would be planted with disease-resistant white-barked pine. In addition to reforestation, watershed recovery actions would include providing species diversity and future large woody debris recruitment by planting aspen, black cottonwood, western redcedar, Englemann spruce and western hemlock up to 100 feet on both sides of about 13 miles of streams, or about 315 acres of riparian habitat; improving inadequate road-related drainage by upgrading roads to current Best Management Practices, increasing the size of stream crossing culverts, and improving road drainage; and reducing fuels in order to reduce the risk of additional impacts to watersheds from a future reburn. Visual quality improvements involve unit size, shapes and treatments that imitate fire patterns and decrease the visual effect of previous unit edges and fire-killed trees. Fire-created hazards on portions of three trails totaling about 7 miles would be removed.

The proposed activities were focused in high fire severity areas where large openings were created or will eventually be created by the fires. The Proposed Action contains 32 units that would exceed 40 acres and create immediate openings, ranging from 45 to 246 acres. Many are adjacent to other pre-fire openings or other Proposed Action units, and cumulatively with fire-affected stands could eventually result in very large openings exceeding 1,000 acres or more.

The proposal also includes 1.1 mile of permanent road construction, 0.4 miles of temporary road construction, and approximately 67 miles of reconstruction to meet Best Management Practices requirements. The temporary road would be obliterated following management actions.

Implementation of this proposal would require opening several miles of road currently restricted to public access. Depending on sale scheduling, some roads may be open to the public during activities. Restrictions for motorized access would be restored following the conclusion of the management activities.

Forest Plan Amendments

The proposed action includes several project-specific forest plan amendments and a programmatic amendment to meet the goals of the Kootenai National Forest Plan:

A project-specific amendment to MA 12 Wildlife and Fish Standard #7 and Timber Standard #2 would be needed to allow harvest adjacent to existing openings in big game movement corridors in MA 12. The wildfires burned around some pre-fire openings, removing cover in corridors and creating larger openings. The Proposed Action would remove much of the burned material that previously provided corridor cover. Surviving live trees and some snags and down woody material would be left to provide wildlife habitat and maintain soil productivity. In the larger openings, patches and corridors would be left to provide some level of security for big game movement through the fire areas.

A project-specific amendment to allow MA 12 open road densities would be needed to temporarily exceed the MA 12 Facilities Standard #3 of 1.15 miles/square mile (as previously amended by the Pinkham Timber Sale and Associated Activities Record of Decision, 1999). In order to recover forest products in a timely manner, several roads may be opened at the same time which would increase open road densities above the current standard. Open road densities would return to existing MA standards following activities.

Range of Alternatives

The Forest Service will consider a range of alternatives to the Proposed Action. One of these will be a “no action” alternative, in which none of the proposed activities would be implemented. Additional alternatives will be considered to achieve the project’s purpose and need for action and to respond to specific resource issues and public concerns.

Preliminary Issues

Several issues of concern have been identified. These are briefly described below:

Future fire risk: The Lydia and Stone Hill fires killed many trees over large areas. Over the next 20 years most of these dead trees will fall over, creating high fuel levels. Reburns are anticipated with this kind of fuel load in intensities higher than what would normally be expected. In the aftermath of threats to private property this summer, public comments expressed concern over fuel loads and the potential for fires to again

threaten private land ownership. There are also internal concerns that such a reburn would cause more severe effects to soils, watershed resources, vegetation and specialized habitat such as old-growth, snags and coarse woody debris.

Timber supply: Many preliminary public comments expressed concern that the value of burned timber will be lost if nothing is done to recover the area. Additional comments have voiced concern over the time frame proposed for addressing fire recovery, and expressed the urgency to recover the economic value of affected trees in a timely manner.

Water quality: Streams in or downstream of the fire areas have been impacted by past management and large wildfires. Several streams are nearing maximum allowable peak flow levels. Although the Proposed Action is expected to have long-term benefits, there are concerns that cumulative effects of past harvest, the fires and the Proposed Action may have short-term negative impacts to some watersheds.

Lynx habitat: Both fire areas impacted suitable habitat for Canada lynx. Coarse woody debris is an important component of denning habitat, and if a reburn does not occur, the fire areas are expected to produce denning and foraging habitat in about 15 years. Some comments expressed concern that post-fire recovery of timber products would reduce or remove important denning habitat.

Visual recovery: The Stone Hill fire is highly visible from a designated Scenic Byway and several scenic viewpoints. Preliminary comments have expressed concern over the visual appearance of burned landscapes, including blackened bark, red needles and large areas of dead and dying trees. Other comments expressed concern about the potential for management activities to create sharp lines or unnatural patterns and decrease visual quality.

Permanent road construction: The Lydia fire burned through a large area which currently has no suitable road access. About 1.1 mile of permanent road construction is proposed to provide reasonable access to the proposed treatment areas. There is a public concern that the Forest Service does not have enough funding to justify building a permanent road and maintaining it through time.

Decisions To Be Made

The Kootenai Forest Supervisor will decide the following:

- Whether or not to reduce existing and expected fuels created by the fires in order to reduce the risk of a reburn, and if so, identify the selection and site-

specific location of such actions, and the fuel treatments necessary to reduce those fuels.

- Whether or not to recover the economic value of burned trees in a timely manner, and if so, identify the selection, site-specific location and timing of such actions, and appropriate timber management practices (silvicultural prescription, logging system, fuels treatment, and reforestation), road construction/reconstruction necessary to provide access, and appropriate mitigation measures.

- Whether or not hand planting should be used to supplement natural regeneration and increase diversity in burned, harvested and riparian areas, and if so, identify the selection and site-specific locations of such actions, and the appropriate species and reforestation methods needed.

- Whether or not short-term impacts to watersheds should be allowed in order to improve long-term watershed conditions.

- Whether or not watershed recovery activities (large woody debris recruitment provisions, improved road drainages, reduced risk of reburn) to improve long-term conditions should be implemented, and if so, identify the selection and site-specific locations of such actions.

- Whether or not project-specific Forest Plan exceptions are necessary to meet the specific purpose and need of this project, and whether those exceptions are significant under NFMA.

- What, if any, specific-project monitoring requirements would be needed to assure mitigation measures are implemented and effective.

Public Involvement and Scoping

In November, 2000 preliminary efforts were made to involve the public in considering management opportunities within the Pink Stone Fire Recovery Decision Area. Comments received prior to this notice will be included in the documentation for the EIS. The public is encouraged to take part in the process and is encouraged to visit with Forest Service officials at any time during the analysis and prior to the decision. The Forest Service will be seeking information, comments, and assistance from Federal, State, and local agencies, Indian tribes, individuals, and organizations who may be interested in, or affected by, the Proposed Action. The input will be used in preparation of the draft and final EIS.

The scoping process will assist in identifying potential issues, identifying major issues to be analyzed in depth, identifying alternatives to the proposed

action, and identifying potential environmental effects of this project and alternatives (i.e., direct, indirect, and cumulative effects and connected actions).

Estimated Dates for Filing

While public participation in this analysis is welcome at any time, comments received within 30 days of the publication of this notice will be especially useful in the preparation of the Draft EIS. The Draft EIS is expected to be filed with the Environmental Protection Agency (EPA) and to be available for public review by April, 2001. At that time EPA will publish a Notice of Availability of the draft EIS in the **Federal Register**. The comment period on the draft EIS will be 45 days from the date the EPA publishes the Notice of Availability in the **Federal Register**.

The final EIS is scheduled to be completed by September, 2001. In the final EIS, the Forest Service is required to respond to comments and responses received during the comment period that pertain to the environmental consequences discussed in the draft EIS, and applicable laws, regulations, and policies considered in making a decision regarding the proposal.

Reviewer's Obligations

The Forest Service believes it is important to give reviewers notice at this early stage of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions (*Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 [1978]). Also, environmental objections that could be raised at the draft environmental impact statement stage may be waived or dismissed by the courts (*City of Angoon v. Hodel*, 803, F.2d 1016, 1022 [9th Cir. 1986] and *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 [E.D. Wis. 1980]). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 30-day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider and respond to them in the final EIS.

To be most helpful in assisting the Forest Service to identify and consider issues and concerns on the Proposed Action, comments on the draft EIS

should be as specific as possible and may address the adequacy of the statement or the merit of the alternatives discussed. Reference to specific pages or chapters of the draft EIS would also be helpful. Reviewers may wish to refer to the Council on Environmental Quality regulations (40 CFR 1503.3) for implementing the procedural provisions of the National Environmental Policy Act.

Responsible Official

As the Forest Supervisor of the Kootenai National Forest, 1101 U.S. Highway 2 West, Libby, MT 59923, I am the Responsible Official. As the Responsible Official I will decide if the proposed project will be implemented. I will document the decision and reasons for the decision in the Record of Decision. I have delegated the responsibility for preparing the EIS to Glen M. McNitt, District Ranger, Rexford Ranger District.

Dated: January 10, 2001.

Greg Kujawa,

Planning, Public Affairs, Recreation and Heritage Staff Officer, Kootenai National Forest.

[FR Doc. 01-1295 Filed 1-16-01; 8:45 am]

BILLING CODE 3410-11-M

DEPARTMENT OF AGRICULTURE

National Agricultural Statistics Service

Notice of Intent to Seek Approval to Extend an Information Collection

AGENCY: National Agricultural Statistics Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (Pub. L. No. 104-13) and Office of Management and Budget regulations at 5 CFR part 1320 (60 FR 44978, August 29, 1995), this notice announces the intent of the National Agricultural Statistics Service (NASS) to extend a currently approved information collection, the Milk and Milk Products Surveys.

DATES: Comments on this notice must be received by March 23, 2001 to be assured of consideration.

ADDITIONAL INFORMATION OR COMMENTS: Contact Rich Allen, Associate Administrator, National Agricultural Statistics Service, U.S. Department of Agriculture, Room 4117 South Building, 1400 Independence Avenue SW, Washington, D.C. 20250-2000, (202) 720-4333.

SUPPLEMENTARY INFORMATION:

Title: Milk and Milk Products Surveys.

OMB Control Number: 0535-0020.

Expiration Date of Approval: 03/31/01.

Type of Request: Intent to Seek Approval to Extend an Information Collection.

Abstract: The primary objective of the National Agricultural Statistics Service is to prepare and issue state and national estimates of crop and livestock production. The Milk and Milk Products Surveys obtain basic agricultural statistics on milk production and manufactured dairy products from farmers and processing plants throughout the nation. Data are gathered for milk production, dairy products, evaporated and condensed milk, manufactured dry milk, and manufactured whey products. Milk production and manufactured dairy products statistics are used by the U.S. Department of Agriculture to help administer programs and by the dairy industry in planning, pricing, and projecting supplies of milk and milk products. This is a request to extend approval for the information collection for 3 years, including the recent addition of cream/milkfat to the dairy product prices surveys.

These data will be collected under the authority of 7 U.S.C. 2204(a). Individually identifiable data collected under this authority are governed by section 1770 of the Food Security Act of 1985, 7 U.S.C. 2276, which requires USDA to afford strict confidentiality to non-aggregated data provided by respondents.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 8 minutes per response.

Respondents: Farms and businesses.

Estimated Number of Respondents: 44,689.

Estimated Total Annual Burden on Respondents: 24,223 hours.

Copies of this information collection and related instructions can be obtained without charge from Ginny McBride, the Agency OMB Clearance Officer, at (202) 720-5778.

Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and

clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. Comments may be sent to: Ginny McBride, Agency OMB Clearance Officer, U.S. Department of Agriculture, Room 5336A South Building, 1400 Independence Avenue SW., Washington, DC 20250-2009 or gmcbride@nass.usda.gov.

All responses to this notice will become a matter of public record and be summarized in the request for OMB approval.

Signed at Washington, D.C., January 2, 2001.

Rich Allen,

Associate Administrator.

[FR Doc. 01-1266 Filed 1-16-01; 8:45 am]

BILLING CODE 3410-20-P

DEPARTMENT OF COMMERCE

[I.D. 011001C]

Submission for OMB Review; Comment Request

The Department of Commerce has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Licensing of Private Land Remote-Sensing Space Systems.

Form Number(s): None.

OMB Approval Number: 0648-0174.

Type of Request: Regular submission.

Burden Hours: 314.

Number of Respondents: 13.

Average Hours Per Response: 40

hours for a license application, 10 hours for a license amendments, 2 hours for a notification of a foreign agreement, 1 hour for an executive summary, 2 hours for a notification of the demise of a systems or of a decision to discontinue operations, 2 hours for a notification of any operational deviation, 5 hours for a submission of a data collection restriction plan, 3 hours for submission of an operational plan for restricting collection or dissemination of information of Israeli territory, 3 hours for submission of a data flow diagram, 1 hour for submission of satellite subsystem drawings, 3 hours for submission of final imaging system specifications, 2 hours for submission of

spacecraft operational information, 2 hours for notification of a disposition/orbital debris change, 2 hours for notification of planned purges of information, 3 hours for an operational quarterly report, 8 hours for an annual compliance audit, and 10 hours for an annual operational audit.

Needs and Uses: NOAA has established requirements for the licensing of private operators of remote-sensing space systems. The information in applications and subsequent reports is needed to ensure compliance with the Land Remote-Sensing Policy Act of 1992 and with the national security and international obligations of the United States.

Affected Public: Business and other for-profit organizations.

Frequency: On occasion, quarterly, annually.

Respondent's Obligation: Mandatory.

OMB Desk Officer: David Rostker, (202) 395-3897.

Copies of the above information collection proposal can be obtained by calling or writing Madeleine Clayton, Departmental Forms Clearance Officer, (202) 482-3129, Department of Commerce, Room 6086, 14th and Constitution Avenue, NW, Washington, DC 20230 (or via the Internet at MClayton@doc.gov).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to David Rostker, OMB Desk Officer, Room 10202, New Executive Office Building, Washington, DC 20503.

Dated: January 9, 2001.

Gwellnar Banks,

Management Analyst, Office of the Chief Information Officer.

[FR Doc. 01-1372 Filed 1-16-01; 8:45am]

BILLING CODE 3510-HR-S

DEPARTMENT OF COMMERCE

[I.D. 011001D]

Submission for OMB Review; Comment Request

The Department of Commerce has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Applications and Reporting Requirements for Small Takes of Marine Mammals by Specified Activities Under the Marine Mammal Protection Act.

Form Number(s): None.

OMB Approval Number: 0648-0151.

Type of Request: Regular submission.

Burden Hours: 7,512.

Number of Respondents: 44.

Average Hours Per Response: 483 hours for a request for new or renewal of regulations, 25.8 hours for an application for a Letter of Authorization, 200 hours for an application for Incidental Harassment Authorizations, 120 hours for a report for Incidental Harassment, and 93.6 hours for a report under a Letter of Authorization.

Needs and Uses: The taking by harassment, injury, or mortality of marine mammals is prohibited by the Marine Mammal Protection Act (MMPA) unless exempted or authorized by permit. The small-take program authorized the taking of marine mammals incidental to maritime activities (military, oil industry, shipping). It is the responsibility of the activity to determine if it might have a "taking" and, if it does, to apply for an authorization. Applications are necessary for NMFS to know that an authorization is needed and to determine whether authorization can be made under the MMPA. Reporting requirements are mandated by the MMPA and are necessary to ensure that determinations made in regard to the impact on marine mammals are valid.

Affected Public: Business and other for-profit organization, not-for-profit institutions, Federal government, and State, Local, or Tribal government.

Frequency: On occasion, annual, 90 days.

Respondent's Obligation: Mandatory.

OMB Desk Officer: David Rostker, (202) 395-3897.

Copies of the above information collection proposal can be obtained by calling or writing Madeleine Clayton, Departmental Forms Clearance Officer, (202) 482-3129, Department of Commerce, Room 6086, 14th and Constitution Avenue, NW, Washington, DC 20230 (or via the Internet at MClayton@doc.gov).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to David Rostker, OMB Desk Officer, Room 10202, New Executive Office Building, Washington, DC 20503.

Dated: January 9, 2001

BILLING CODE 3510-22-S

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act of 1995, Public Law 104-13.

Bureau: International Trade Administration.

Title: Information for Certification Under FAQ 6 of the Safe Harbor Privacy Principles.

Agency Form Number: N/A.

OMB Number: 0625-0239.

Type of Request: Regular Submission.

Burden: 550 hours.

Number of Respondents: 1500.

Avg. Hours Per Response: 20-40 minutes.

Needs and Uses: In response to the European Commission Directive on Data Protection that restricts transfers of personal information from Europe to countries whose privacy practices are not deemed "adequate," the U.S. Department of Commerce has developed a "safe harbor" framework that will allow U.S. organizations to satisfy the European Directive's requirements and ensure that personal data flows to the United States are not interrupted. In this process, the Department of Commerce repeatedly consulted with U.S. organizations affected by the European directive and interested non-government organizations. On July 27, 2000, the European Commission issued its decision in accordance with Article 25.6 of the Directive that the Safe Harbor Privacy Principles provide adequate privacy protection. The safe harbor framework bridges the differences between the European Union (EU) and U.S. approaches to privacy protection. Under the safe harbor privacy framework, information is being collected in order to create a list of the organizations that have self-certified to the Principles. Organizations that have signed up to this list are deemed "adequate" under the Directive and do not have to provide further documentation to European officials. This list will be used by European Union organizations to determine whether further information and contracts will be needed for a U.S. organization to receive personally identifiable information. The decision to enter the safe harbor is entirely voluntary. Organizations that decide to participate in the safe harbor must comply with the safe harbor's requirements and publicly declare that they do so. To be assured of safe harbor

benefits, an organization needs to self certify annually to the Department of Commerce in writing that it agrees to adhere to the safe harbor's requirements, which includes elements such as notice, choice, access, and enforcement. It must also state in its published privacy policy statement that it adheres to the safe harbor. This list will be used by European Union organizations to determine whether further information and contracts will be needed by a U.S. organization to receive personally identifiable information. It will be used by the European Data Protection Authorities to determine whether a company is providing "adequate" protection, and whether a company has requested to cooperate with the Data Protection Authority. The list will also be accessed when there is a complaint logged in the EU against a U.S. organization, and used by the Federal Trade Commission and the Department of Transportation to determine whether a company is part of the safe harbor. It will be accessed if a company is practicing "unfair and deceptive" practices and has misrepresented itself to the public. In addition, the list will be used by the Department of Commerce and the European Commission to determine if organizations are signing up to the list on a regular basis.

Affected Public: Businesses or other for-profit.

Frequency: Annually.

Respondent's Obligation: Voluntary.

OMB Desk Officer: David Rostker, (202) 395-7340.

Copies of the above information collection proposal can be obtained by calling or writing Madeleine Clayton, Departmental Forms Clearance Officer, (202) 482-3129, Department of Commerce, Room 6086, 14th and Constitution, NW., Washington, DC 20230 (or via the Internet at MClayton@doc.gov).

Written comments and recommendations for the proposed information collection should be sent to David Rostker, OMB Desk Officer, Room 10202, New Executive Office Building, Washington, DC 20503 within 30 days of the publication of this notice in the **Federal Register**.

Dated: January 11, 2001.

Madeleine Clayton,

Departmental Forms Clearance Officer, Office of the Chief Information Officer.

[FR Doc. 01-1386 Filed 1-16-01; 8:45 am]

BILLING CODE 3510-DR-P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket 1-2001]

Foreign-Trade Zone 82—Mobile, AL; Application for Subzone Status Austal USA, LLC (Shipbuilding and Repair)

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the City of Mobile, Alabama, grantee of FTZ 82, requesting special-purpose subzone status for the shipbuilding facility of Austal USA LLC (Austal) [an Austal Holdings, Inc. (of Australia)/Bender Shipbuilding, Inc. joint venture] in Mobile, Alabama. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR part 400). It was formally filed on January 9, 2001.

The Austal shipyard (13 acres, 200,000 sq.ft.) is located at 100 Dunlap Drive in Mobile, Alabama. The facility (150 employees) is used for the construction of aluminum commercial and military vessels for domestic and international customers. Foreign components that may be used at the Austal shipyard (representing up to 9% of vessel value) include propulsion units, engines and control systems, generators, pumps, air-conditioning systems, pipes, iron and steel mill products, aluminum bars/rods/profiles/plates/sheets/wire/tanks/containers, solenoids, valves, multimeters, signaling equipment, articles of rubber, twine, glass, prefabricated structures, stoves/ranges, electric motors, navigation and electronic equipment, propellers, transmission shafts, lighting and electrical equipment, panels, consoles, printed circuit assemblies, regulating/controlling equipment, and telephonic apparatus (2000 duty rate range: free—14.9%, *ad valorem*).

FTZ procedures would exempt Austal from Customs duty payments on the foreign components (except steel mill products) used in export activity. On its domestic sales, the company would be able to choose the duty rate that applies to finished oceangoing vessels (duty free) for the foreign-origin components noted above. The manufacturing activity conducted under FTZ procedures would be subject to the "standard shipyard restriction" applicable to foreign-origin steel mill products (*e.g.*, angles, pipe, plate), which requires that Customs duties be paid on such items. The application indicates that the savings from FTZ procedures would help improve the facility's international competitiveness.

In accordance with the Board's regulations, a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment on the application is invited from interested parties. Submissions (original and three copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is March 19, 2001. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period (to April 3, 2001).

A copy of the application will be available for public inspection at the following locations:

Office of the Port Director, U.S. Customs Service, Suite 3004, 150 North Royal Street, Mobile, AL 36602

Office of the Executive Secretary, Foreign-Trade Zones Board, room 4008, U.S. Department of Commerce, 14th Street & Constitution Avenue, NW., Washington, DC 20230

Dated: January 9, 2001.

Dennis Puccinelli,

Executive Secretary.

[FR Doc. 01-1384 Filed 1-16-01; 8:45 am]

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket 2-2001]

Foreign-Trade Zone 29—Louisville, KY; Application for Subzone ISP Chemicals Inc. (Chemical Plant) Calvert City, KY

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Louisville & Jefferson County Riverport Authority, grantee of FTZ 29, requesting special-purpose subzone status for the chemical plant facilities of ISP Chemicals Inc., located in Calvert City, Kentucky. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR part 400). It was formally filed on January 9, 2001.

The facility is located on Highway 95, Calvert City, Kentucky. The application is requesting the use of zone procedures only for the portion of the facility that processes butanediol (B1D) into butyrolactone (BLO). This portion of the facility (4 acres, 525 employees) has the capacity to produce 210,000 pounds per day of BLO (HTS 2932.29.50 and 3824.90.47; duty rate 3.7%). Some 60 percent of the B1D is sourced from

abroad (HTS 2905.39.10; duty rate 7.9%).

FTZ procedures would exempt ISP from Customs duty payments on the foreign components used in export production. Some 35 percent of the BLO produced from the imported B1D in 1999 was exported. On its domestic sales, ISP would be able to choose the duty rates during Customs entry procedures that apply to BLO (3.7%) for the foreign input noted above. The request indicates that the savings from FTZ procedures would help improve the plant's international competitiveness.

In accordance with the Board's regulations, a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is March 19, 2001. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to April 3, 2001.

A copy of the application and the accompanying exhibits will be available for public inspection at each of the following locations:

U.S. Department of Commerce, Export Assistance Center, 601 West Broadway, Room, 634B, Louisville, KY 40202

Office of the Executive Secretary, Foreign-Trade Zones Board, Room 4008, U.S. Department of Commerce, 14th and Pennsylvania Avenue, NW., Washington, DC 20230

Dated: January 10, 2001.

Dennis Puccinelli,

Executive Secretary.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Order No. 1135]

Expansion of Foreign-Trade Zone 46, Cincinnati, OH Area

Pursuant to its authority under the Foreign-Trade Zones Act (the Act) of June 18, 1934, as amended (19 U.S.C. 81a-81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

WHEREAS, the Greater Cincinnati Foreign Trade Zone, Inc. (GCFTZ), grantee of FTZ 46, submitted an

application to the Board for authority to expand FTZ 46—Site 3 (Clermont County Industrial Park) to include three additional parcels (FTZ Doc. 44-2000, filed 7-27-00);

WHEREAS, notice inviting public comment was given in the **Federal Register** (64 FR 47712, 8-3-00) and the application has been processed pursuant to the FTZ Act and the Board's regulations; and,

WHEREAS, the Board adopts the findings and recommendations of the examiner's report, and finds that the requirements of the Act and the Board's regulations are satisfied, and that the proposal is in the public interest;

NOW, THEREFORE, the Board hereby authorizes the grantee to expand its zone as requested in the application, subject to the Act and the Board's regulations, including Section 400.28.

Signed at Washington, DC, this 29th day of December 2000.

Richard W. Moreland,

Acting Assistant Secretary of Commerce for Import Administration, Alternate Chairman, Foreign-Trade Zones Board.

Pierre V. Duy,

Acting Executive Secretary.

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Final Results of Countervailing Duty Administrative Reviews.

SUMMARY: On September 8, 2000, the Department of Commerce (the Department) published in the **Federal Register** its preliminary results of administrative reviews of the countervailing duty order on certain cut-to-length carbon steel plate from Germany for the periods calendar year 1997 and calendar year 1998 (65 FR 54496). The Department has now completed these administrative reviews in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act). For information on the net subsidy for each reviewed company, and for all non-reviewed companies, please see the "Final Results of Review" section of this notice. We will instruct the U.S.

Customs Service (Customs) to assess countervailing duties as detailed in the "Final Results of Review" section of this notice.

EFFECTIVE DATE: January 17, 2001.

FOR FURTHER INFORMATION CONTACT:

Robert Copyak, Office of AD/CVD Enforcement VI, Group II, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482-2786.

SUPPLEMENTARY INFORMATION:

Background

Pursuant to 19 CFR 351.213(b), these administrative reviews cover only those producers or exporters of the subject merchandise for which the administrative reviews were specifically requested. Accordingly, these administrative reviews cover exporter Novosteel SA and producer Reiner Brach GmbH and Co. KG. We received timely allegations of additional subsidies, including allegations of upstream subsidies. We initiated examinations of three of these alleged subsidy programs and determined not to initiate examinations of the alleged upstream subsidy programs. See memorandum to Melissa G. Skinner, Director, Office of AD/CVD Enforcement VI, from Team, entitled *1997 and 1998 Administrative Reviews of the Countervailing Duty Order on Certain Cut-to-Length Carbon Steel Plate from Germany: Memorandum Regarding Affiliation, Cross-ownership, Upstream Subsidy Allegations, and Other Subsidy Allegations*, dated August 23, 2000. (This memorandum is on file in public version form in the public file room of room B-099 of the main Commerce building.) These administrative reviews cover 39 programs and the periods calendar year 1997 and calendar year 1998.

On September 8, 2000, the Department published in the **Federal Register** its preliminary results of administrative reviews. See *Certain Cut-to-Length Carbon Steel Plate From Germany; Preliminary Results of Countervailing Duty Administrative Reviews*, 65 FR 54496 (*Preliminary Results*). We invited interested parties to comment on the *Preliminary Results*. We received comments on October 10, 2000, and on October 27, 2000.

Applicable Statute and Regulations

Unless otherwise indicated, all citations to the statute are references to the provisions of the Act, as amended by the Uruguay Round Agreements Act (URAA) effective January 1, 1995. The

Department is conducting these administrative reviews in accordance with section 751(a) of the Act. In addition, unless otherwise indicated, all citations to the Department's regulations reference 19 CFR part 351 (1999).

Scope of the Review

The merchandise subject to these administrative reviews includes hot-rolled carbon steel universal mill plates (*i.e.*, flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 millimeters but not exceeding 1,250 millimeters and of a thickness of not less than 4 millimeters, not in coils and without patterns in relief), of rectangular shape, neither clad, plated nor coated with metal, whether or not painted, varnished, or coated with plastics or other nonmetallic substances; and certain hot-rolled carbon steel flat-rolled products in straight lengths, of rectangular shape, hot rolled, neither clad, plated, nor coated with metal, whether or not painted, varnished, or coated with plastics or other nonmetallic substances, 4.75 millimeters or more in thickness and of a width which exceeds 150 millimeters and measures at least twice the thickness, as currently classifiable in the HTSUS under item numbers (7208.40.3030), (7208.40.3060), (7208.51.0030), (7208.51.0045), (7208.51.0060), (7208.52.0000), (7208.53.0000), (7208.90.0000), (7210.70.3000), (7210.90.9000), (7211.13.0000), (7211.14.0030), (7211.14.0045), (7211.90.0000), (7212.40.1000), (7212.40.5000), (7212.50.0000). Included in these administrative reviews are flat-rolled products of non-rectangular cross-section where such cross-section is achieved subsequent to the rolling process (*i.e.*, products which have been "worked after rolling")—for example, products which have been beveled or rounded at the edges. Excluded from these reviews is grade X-70 plate. Also excluded from these administrative reviews is certain carbon cut-to-length steel plate with a maximum thickness of 80 mm in steel grades BS 7191, 355 EM, and 355 EMZ, as amended by Sable Offshore Energy Project specification XB MOO Y 15 0001, types 1 and 2.

Analysis of Programs

Programs Determined To Be Not Used

We examined the following programs and determined, based on the questionnaire responses, that the producer and/or exporter of the subject merchandise did not apply for or receive benefits under these programs during the periods of review:

1. Capital Investment Grants
2. Investment Premium Act
3. Joint Scheme: Improvement of Regional Economic Structure—GA Investment Grants and Other GA Subsidies
4. Ruhr District Action Program
5. Aid for Closure of Steel Operations
6. Joint Program: Upswing East
7. Freight Programs under the Special Subsidies for Companies in the Zonal Border Area
8. Loan Guarantees under Treuhandanstalt Subsidies
9. Long-term Loans from the Kreditanstalt für Wiederaufbau (KfW)
10. Tax Programs under Special Subsidies for Companies in the Zonal Border Area
11. Structural Improvement Aids
12. ECSC Article 54 Loans
13. ECSC Article 54 Interest Rebates
14. ECSC Redeployment Aid Under Article 56(2)(b)
15. ECSC Article 54 Loans
16. ECSC Article 54 Interest Rebates
17. Loans with Reduced Interest Rates under the Steel Restructuring Plan
18. Federal and State Government Loan Guarantees under the Steel Restructuring Plan
19. Special Ruhr Plan
20. Zukunftsinitiative Montaregionen (ZIM)
21. Kreditanstalt für Wiederaufbau (KfW) Investment Loans for Eastern Germany
22. Deutsche Ausgleichsbank Investment Loans for Eastern Germany
23. European Recovery Program Loans for Eastern Germany
24. Loan Guarantee Program Loans for Eastern Germany
25. Peine-Salzgitter Profit Transfer Agreement and Other Operation Loss Subsidies
26. Elimination of Duisburg Harbor Tolls
27. Export Credits at Preferential Rates
28. Miscellaneous Tax Subsidies
29. Loans from the Government of Nordrhein-Westfalen
30. Tax Subsidies for Eastern Germany
31. European Investment Bank Loans and Loan Guarantees
32. New Community Instrument Loans
33. European Regional Development Fund Aid
34. Nordrhein-Westfalen's Air Pollution Control Program
35. ECSC Article 54 Loan Guarantees
36. ECSC Article 56 Conversion Loans
37. European Social Funds Grants
38. Assistance Measures for the Companies within the Steel Industry to Partially Compensate for Costs of the Social Plans
39. Social Aid for the Workers in the Coal and Steel Industries

Analysis of Comments Received

The comments submitted by interested parties are addressed in the "Issues and Decision Memorandum" (Decision Memorandum) from Holly A. Kuga, Acting Deputy Assistant Secretary, Import Administration, to Troy H. Cribb, Assistant Secretary for Import Administration, dated January 8, 2000, which is hereby adopted by this notice. A list of the issues addressed is attached to this notice as Appendix I. The Decision Memorandum is a public document which is on file in room B-099 of the Main Commerce Building and can be accessed via the internet at the website <http://ia.ita.doc.gov/frn> and under the heading "Germany." The paper copy and electronic version of the Decision Memorandum are identical in content.

Final Results of Administrative Reviews

In accordance with 19 CFR 351.221(b)(5), we calculated an individual subsidy rate for the producer/exporter subject to these administrative reviews. For the periods calendar year 1997 and calendar year 1998, we determine the net subsidy for Novosteel SA/Reiner Brach GmbH and Co. KG to be 0.00 percent *ad valorem*.

As provided for in the Act and 19 CFR 351.106(c)(1), any rate less than 0.5 percent *ad valorem* in an administrative review is *de minimis*. Accordingly, no countervailing duties will be assessed. The Department will instruct Customs to liquidate, without regard to countervailing duties, shipments of the subject merchandise from Novosteel SA produced by Reiner Brach GmbH and Co. KG, exported on or after January 1, 1997 through December 31, 1997 and January 1, 1998 through December 31, 1998. Also, the cash deposits for this producer will be zero.

Because the URAA replaced the general rule in favor of a country-wide rate with a general rule in favor of individual rates for investigated and reviewed companies, the procedures for establishing countervailing duty rates, including those for non-reviewed companies, are now essentially the same as those in antidumping cases, except as provided for in section 777A(e)(2)(B) of the Act. The requested review will normally cover only those companies specifically named. See 19 CFR 351.213(b). Pursuant to 19 CFR 351.212(c), for all companies for which a review was not requested, duties must be assessed at the cash deposit rate, and cash deposits must continue to be collected, at the rate previously ordered. As such, the countervailing duty cash deposit rate applicable to a company

can no longer change, except pursuant to a request for a review of that company. *See Federal-Mogul Corporation and The Torrington Company v. United States*, 822 F.Supp. 782 (CIT 1993) and *Floral Trade Council v. United States*, 822 F.Supp. 766 (CIT 1993) (interpreting 19 CFR 353.22(e), the prior antidumping regulation on automatic assessment, which was identical to 19 CFR 355.22(g)). Therefore, the cash deposit rates for all companies except those covered by these reviews will be unchanged by the results of these reviews.

We will instruct Customs to continue to collect cash deposits for non-reviewed companies at the most recent company-specific or country-wide rate applicable to the company. Accordingly, the cash deposit rates that will be applied to non-reviewed companies covered by this order will be the rate for that company established in the most recently completed administrative proceeding conducted under the URAA. If such a review has not been conducted, the rate established in the most recently completed administrative proceeding pursuant to the statutory provisions that were in effect prior to the URAA amendments is applicable. *See Final Affirmative Countervailing Duty Determinations: Certain Steel Products from Germany*, 58 FR 37315 (July 9, 1993). This rate shall apply to the non-reviewed companies until a review of a company assigned these rates is requested. In addition, for the periods calendar year 1997 and calendar year 1998, the assessment rates applicable to all non-reviewed companies covered by this order are the cash deposit rates in effect at the time of entry.

This notice serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

These administrative reviews and this notice are issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: January 8, 2001.

Troy H. Cribb,
Assistant Secretary for Import
Administration.

APPENDIX 1—Issues Discussed in Decision Memorandum

Analysis of Comments

1. Upstream Subsidy Allegations
2. Need to Conduct Verification
3. Attribution of Subsidies

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 011001A]

Small-craft Facility Questionnaire

AGENCY: National Oceanic and Atmospheric Administration (NOAA).

ACTION: Proposed information collection; comment request.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104-13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before March 19, 2001.

ADDRESSES: Direct all written comments to Madeleine Clayton, Departmental Forms Clearance Officer, Department of Commerce, Room 6086, 14th and Constitution Avenue NW, Washington, DC 20230 (or via Internet at MClayton@doc.gov).

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Lyn Preston, Chief, Nautical Data Branch, Marine Chart Division, N/CS26, Room 7350, 1315 East-West Highway, Silver Spring, MD 20910-3282 (phone 301-713-2737, ext. 123 or e-mail Lyn.Preston@noaa.gov).

SUPPLEMENTARY INFORMATION:

I. Abstract

NOAA's National Ocean Services produces nautical charts to ensure safe navigation. Small-craft charts are designed for recreational boaters and include information on local marine facilities and the services they provide (fuel, repairs, etc.). Information must be

gathered from marinas to update the information provided to the public.

II. Method of Collection

Forms are sent to marinas when the relevant chart is to be updated. Forms are also made available at boat shows.

III. Data

OMB Number: 0648-0021.

Form Number: NOAA Form 77-1.

Type of Review: Regular submission.

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 1,600.

Estimated Time Per Response: 8 minutes.

Estimated Total Annual Burden Hours: 213.

Estimated Total Annual Cost to Public: \$0.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: January 9, 2001

Gwellnar Banks,

Management Analyst, Office of the Chief Information Officer.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 011001B]

Observer Workshop Survey

AGENCY: National Oceanic and Atmospheric Administration (NOAA).

ACTION: Proposed information collection; comment request.

SUMMARY: The Department of Commerce, as part of its continuing

effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104-13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before March 19, 2001.

ADDRESSES: Direct all written comments to Madeleine Clayton, Departmental Forms Clearance Officer, Department of Commerce, Room 6086, 14th and Constitution Avenue NW, Washington, DC 20230 (or via Internet at MClayton@doc.gov).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Vicki Cornish or Margaret Toner, NMFS, F/ST1, 1315 East-West Highway, Silver Spring, MD 20910 (phone 301-713-2328, ext. 163).

SUPPLEMENTARY INFORMATION:

I. Abstract

NOAA Fisheries hosted two observer workshops, in 1998 and 2000, which brought together managers and scientists from the United States, Canada and other countries to share ideas and resolve key issues of common interest regarding fishery observer programs. In 2002, NOAA Fisheries will be hosting another observer workshop. The purpose of the collection is to gather information from participants in the previous workshops and from new potential participants in order to plan the format and content for the next observer workshop such that it will provide the greatest benefit to the performance of the NOAA Fisheries observer program.

II. Method of Collection

The information will be collected by having a survey form available on a NOAA web site.

III. Data

OMB Number: None.

Form Number: None.

Type of Review: Regular submission.

Affected Public: State, local, or tribal government; business and other for-profit organizations; not-for-profit institutions, individuals.

Estimated Number of Respondents: 350 (every two years).

Estimated Time Per Response: 15 minutes.

Estimated Total Annual Burden Hours: 44.

Estimated Total Annual Cost to Public: \$0.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: January 9, 2001.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 011001E]

Coast Pilot Report

AGENCY: National Oceanic and Atmospheric Administration (NOAA).

ACTION: Proposed information collection; comment request.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104-13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before March 19, 2001.

ADDRESSES: Direct all written comments to Madeleine Clayton, Departmental Forms Clearance Officer, Department of Commerce, Room 6086, 14th and Constitution Avenue NW, Washington DC 20230 (or via Internet at MClayton@doc.gov).

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Oren Stembel, N/CS51, Room 7532, 1315 East-West Highway, Silver Spring, MD 20910-3282 (phone 301-713-2750, ext. 204; e-mail Oren.Stembel@noaa.gov).

SUPPLEMENTARY INFORMATION:

I. Abstract

NOAA produces the U.S. Coast Pilot, a series of nine books that supplement marine nautical charts. The Coast Pilot contains information essential to navigators in U.S. coastal and intra-coastal waters but that cannot be shown graphically on charts. The Coast Pilot Report form is offered to the public as a means for recommending changes to the publication.

II. Method of Collection

A paper form is used.

III. Data

OMB Number: 0648-0007.

Form Number: NOAA Form 77-6.

Type of Review: Regular submission.

Affected Public: Individuals or households.

Estimated Number of Respondents: 100.

Estimated Time Per Response: 30 minutes.

Estimated Total Annual Burden Hours: 50.

Estimated Total Annual Cost to Public: \$0.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

BILLING CODE 3510-JT-S

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 010901C]

Marine Mammals: Draft Environmental Assessment on Allocating Gray Whales to the Makah Tribe for the years 2001 and 2002

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability and request for comments.

SUMMARY: NMFS announces the availability of a Draft Environmental Assessment (EA) that examines the environmental consequences of issuing the International Whaling Commission (IWC) quota for gray whales to the Makah Tribe for the years 2001 and 2002. NMFS has not identified a preferred alternative in this draft EA and is soliciting comments on the draft EA. The Draft EA considers four alternatives regarding the issuance of the IWC quota to the Makah Tribe.

DATES: Comments on the EA must be received by February 16, 2001. A public hearing on this draft EA will be held in Seattle, WA on Thursday, February 1, 2001, at 6:00 p.m. The public hearing will be held at the Sand Point Magnuson Park Auditorium, 74th Street Entrance, 7400 Sand Point Way NE, Seattle, Washington.

ADDRESSES: Comments on the draft EA should be addressed to Cathy E. Campbell, NOAA/NMFS, Office of Protected Resources, 13th Floor, 1315 East-West Hwy, Silver Spring, MD 20910. Mark the outside of the envelope with "Comments on Makah EA." Comments received over the Internet or by electronic mail will not be accepted. Copies of the EA and directions to the public hearing may be obtained over the internet at <http://www.nmfs.noaa.gov/prot-res/prot-res.html> under "New Arrivals".

FOR FURTHER INFORMATION CONTACT: Cathy Campbell, 301-713-2322.

SUPPLEMENTARY INFORMATION: Prior to the 1997 Annual International Whaling Commission (IWC) Meeting, NMFS formally analyzed the environmental

impacts of a decision to support or not support whaling, and to determine whether an annual subsistence quota of up to five Eastern Pacific gray whales would significantly affect the quality of the human environment. A draft EA was distributed for public comment on August 22, 1997. After reviewing and addressing the comments received, NMFS issued a final EA and Finding of No Significant Impact on October 17, 1997.

At its 1997 annual meeting, the IWC approved a quota of 620 gray whales for an aboriginal subsistence harvest during the years 1998 through 2002. The basis for the quota was a joint request by the Russian Federation (for a total of 600 whales) and the United States (for a total of 20 whales). In 1998 and 1999, NOAA granted an allocation of up to five whales a year to the Makah Indian Tribe, whose subsistence and ceremonial needs had been the foundation of the U.S. request to the IWC.

U.S. Congressman Jack Metcalf, Breach Marine Protection, and several other plaintiffs brought a lawsuit, *Metcalf v. Daley*, in October 1997, alleging that the U.S. Government had violated the National Environmental Policy Act (NEPA), the Whaling Convention Act, and other statutes. In September 1998, the U.S. District Court for the Western District of Washington ruled in favor of the U.S. Government on all issues.

On June 9, 2000, the Ninth Circuit Court of Appeals overturned one aspect of that decision, ruling that the 1997 EA should have been completed before the U.S. and the Makah Tribe entered into a cooperative agreement. That agreement had provided that, if the Tribe prepared an adequate needs statement documenting a cultural and subsistence need to harvest gray whales, NOAA would request a quota of gray whales from the IWC. Two judges on a three-judge panel held that the timing of the EA, which was completed after the 1996 agreement was signed and before the 1997 annual meeting of the IWC, may have predisposed the preparers to find that the whaling proposal would not significantly affect the environment. The Court ordered NOAA to set aside that finding and comply with NEPA under circumstances that would ensure an objective evaluation of the environmental consequences of the gray whale harvest.

Following the Court action, NOAA rescinded its cooperative agreement with the Makah Tribe on August 11, 2000. NOAA subsequently set the gray whale quota for 2000 at zero (65 FR

75186, December 1, 2000), pending completion of its NEPA analysis.

The National Environmental Policy Act (NEPA) requires that federal agencies conduct an environmental analysis of their actions to determine if the actions may affect the environment. Accordingly, NMFS prepared a draft EA that explores the environmental consequences of four alternatives: (1) Granting the Makah Tribe the IWC quota with restrictions to target the hunt on migrating whales (similar to the 1999 regime); (2) Granting the Makah Tribe the IWC quota with restrictions that would allow a limited hunt on the gray whale summer feeding aggregation; (3) Granting the Makah Tribe the IWC quota without time-area restrictions; and (4) (No Action) - not granting the Makah Tribe the IWC quota.

The draft EA was prepared in accordance with NEPA and implementing regulations at 40 CFR parts 1500 through 1508 and NOAA guidelines concerning implementation of NEPA found in NOAA Administrative Order 216-6.

NMFS is soliciting public comments on this draft EA. Oral and written comments may be presented at the public hearing [see **DATES** and **ADDRESSES**]. Written comments on the draft EA may also be sent to the previously listed address by February 16, 2001. Further details or a copy of the EA can be obtained from the internet address above [see **ADDRESSES**].

Special Accommodations

The public hearing will be physically accessible to those with disabilities. Requests for sign language interpretation or other aids should be directed to C. Campbell at least 10 days prior to the hearing date (see **ADDRESSES**).

Dated: January 10, 2001.

Wanda L. Cain,

Acting Director, Office of Protected Resources, National Marine Fisheries Service.

[FR Doc. 01-1354 Filed 1-11-01; 3:33 pm]

BILLING CODE: 3510-22-S

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 120400B]

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Fishery Management Plan for the Dolphin and Wahoo Fishery of the Atlantic, Caribbean, and Gulf of Mexico

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and

Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of intent to prepare a draft environmental impact statement (DEIS); request for comments.

SUMMARY: The South Atlantic Fishery Management Council (South Atlantic Council) intends to prepare a DEIS to assess the impacts on the natural and human environment of the dolphin and wahoo fishery and of the management measures proposed for this fishery under the draft Fishery Management Plan for the Dolphin and Wahoo Fishery of the Atlantic, Caribbean and Gulf of Mexico. The purpose of this notice is to solicit public comments on the scope of the issues to be addressed in the DEIS.

ADDRESSES: Written comments on the scope of the DEIS and requests for additional information on the management measures proposed for the management of dolphin and wahoo in the Atlantic Ocean, Caribbean Sea, and Gulf of Mexico should be sent to the South Atlantic Fishery Management Council, One Southpark Circle, Suite 306, Charleston, SC 29407-4699; phone: 843-571-4366; fax: 843-769-4520.

DATES: Written comments on the scope of the issues to be addressed by the DEIS should be received by the Council by February 16, 2001.

FOR FURTHER INFORMATION CONTACT: Kim Iverson, 843-571-4366, or Steve Branstetter, 727-570-5305.

SUPPLEMENTARY INFORMATION: The South Atlantic Council is jointly preparing with the Gulf of Mexico Fishery Management Council (Gulf of Mexico Council) and the Caribbean Fishery Management Council (Caribbean Council) a draft Fishery Management Plan for the Dolphin and Wahoo Fishery of the Atlantic, Caribbean and Gulf of Mexico (FMP). The New England Fishery Management Council and the Mid-Atlantic Fishery Management Council are also cooperating in the FMP preparation.

The South Atlantic, Gulf of Mexico, and Caribbean Councils intend that the FMP take a precautionary approach in conserving the dolphin and wahoo fishery resources throughout their range in the exclusive economic zone (EEZ) of the Atlantic, Gulf of Mexico, and Caribbean Sea. The FMP would have management objectives for the achievement of optimum yield from the dolphin and wahoo resources and the maintenance of current allocations among user groups. A draft environmental impact statement (DEIS) will be integrated into the draft FMP document.

The DEIS will describe the FMP's proposed management measures and their reasonable alternatives and will assess the environmental impacts of these proposed and alternative measures. Based on considerable previous public input (see reference below to public hearings held to date on a preliminary draft of the FMP/DEIS), the South Atlantic, Gulf of Mexico, and Caribbean Councils have already identified a number of proposed FMP measures and their alternatives. The proposed management units for dolphin and wahoo would be defined as the populations of each species throughout their full management range in the Atlantic, Gulf of Mexico, and Caribbean EEZ. Alternative management units considered will include the establishment of three separate units for each species based on each Council's geographical area of jurisdiction. The DEIS will assess the environmental impacts of the FMP's considered options for requiring dealer, vessel, and operator permits to participate in the fishery as well as the effects of any qualifying criteria, such as prior levels of participation in the fishery, for obtaining and maintaining permits. The DEIS will also evaluate the environmental impacts of the FMP's considered alternatives for reporting requirements. The DEIS will assess the impacts of the FMP's proposed and alternative biologically acceptable values, based on either biomass or fishing mortality rates, that define maximum sustainable yield, optimum yield, and overfishing and overfished conditions. The FMP and DEIS will identify and describe essential fish habitat (EFH) and EFH Habitat Areas of Particular Concern (EFH HAPCs) for dolphin and wahoo. The DEIS will assess the environmental impacts associated with the proposed and alternative EFH and EFH HAPCs; EFH/EFH HAPCs alternatives considered may include specific locales that are important to the continued health of the dolphin and wahoo stocks or areas of importance to a critical life stage of these species.

The FMP would establish a framework procedure allowing the South Atlantic, Gulf of Mexico, and Caribbean Councils to recommend new management measures and adjustments for existing measures, within specified limits, that could be approved and implemented (under the framework procedure) without having to amend the FMP. Also, the South Atlantic, Gulf of Mexico, and Caribbean Councils intend that the FMP provide each Council with the authority to recommend

independently the establishment of harvesting restrictions for its respective area of jurisdiction. Such area-specific measures generally would be proposed, approved, and implemented under the FMP's framework procedure. The environmental impacts of measures proposed later under the framework procedure would be assessed at the time of proposal.

To maintain healthy stocks of both dolphin and wahoo in the Atlantic, the South Atlantic Council intends that the FMP initially propose commercial trip limits, recreational bag and boat limits, minimum size limits, and allowable gears for the dolphin and wahoo fishery within its area of the EEZ. The Gulf of Mexico Council is considering several measures that would apply only to the Gulf of Mexico EEZ; these include establishment of specific dates for the fishing year and prohibition of the sale of recreationally caught fish. The DEIS will assess the environmental impacts of all of the FMP's proposed area-specific measures and their considered alternatives.

The DEIS will evaluate the impacts of the FMP's proposed allocation of the majority of the catch to the recreational sector. This allocation is intended to preserve the historical contribution of the recreational sector to the total fishery. To ensure economic stability for the established commercial fishery, the FMP would propose a restriction on or a prohibition of the sale of fish caught in the recreational fishery.

Based on input received during 17 public hearings held to date on a preliminary draft of the FMP/DEIS, the South Atlantic Council intends to prepare a revised draft FMP and to finalize the DEIS covering its environmental impacts. Because of the previous considerable opportunities for public input, the South Atlantic Council has scheduled no specific scoping meetings for the DEIS. However, the South Atlantic Council is requesting written comments on the scope of the issues to be addressed in the DEIS.

Once the South Atlantic Council completes the DEIS, it will submit it to NMFS for filing with the Environmental Protection Agency (EPA). EPA will publish in the **Federal Register** a notice of availability of the DEIS for public comment. This procedure is pursuant to the Council on Environmental Quality's regulations for implementing the procedural provisions of The National Environmental Policy Act (NEPA; 40 CFR Parts 1500-1508) and to NOAA's Administrative Order 216-6 regarding NOAA's compliance with NEPA.

The South Atlantic, Gulf of Mexico, and Caribbean Fishery Management

Councils intend to consider public comments received on the DEIS before adopting final management measures for a final FMP. The South Atlantic Council intends to prepare a final environmental impact statement (FEIS) in support of the final FMP. The three Councils would then submit the final FMP/FEIS to NMFS for Secretarial review, approval, and implementation under the Magnuson-Stevens Act. During Secretarial review, NMFS will file the FEIS with EPA for announcement of a final comment period on the FEIS (again, through publication of a notice in the **Federal Register**). This comment period will be concurrent with the Secretarial review period, during which NMFS will invite public comment on the final FMP and proposed implementing regulations (Secretarial review comment periods are announced through publication in the **Federal Register**). NMFS will consider all public comment received during the Secretarial review period, whether on the FMP, FEIS, or proposed regulations, prior to taking final agency action to approve, disapprove, or partially approve the FMP.

Copies of the draft FMP may be obtained by contacting Kim Iverson at the Council (see **ADDRESSES**).

Authority: 16 U.S.C. 1801 *et seq.*

Dated: January 10, 2001.

Bruce C. Morehead,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-S

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[Docket No. 000202023-1001-02; I.D. No.110200C]

RIN 0648-ZA78

Announcement of Funding Opportunity to Submit Proposals for the Coastal Ecosystem Research Project in the Northern Gulf of Mexico

AGENCY: Center for Sponsored Coastal Ocean Research/Coastal Ocean Program (CSCOR/COP), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Announcement of funding opportunity for financial assistance for project grants and cooperative agreements.

SUMMARY: The purpose of this document is to advise the public that CSCOR/COP

is soliciting 1-year and 2-year proposals for modeling, monitoring and retrospective studies of coastal ecosystem research in the Northern Gulf of Mexico (N-GOMEX). Funding is contingent upon the availability of Federal appropriations. It is anticipated that projects funded under this announcement will have an August 1, 2001, start date.

DATES: The deadline for receipt of proposals at the COP office is 3 p.m., EST, March 14, 2001. Note that late-arriving applications provided to a delivery service, on or before, March 13, 2001, with delivery guaranteed before 3 p.m., EST, on March 14, 2001, will be accepted for review if the applicant can document that the application was provided to the delivery service with delivery to the address listed below (see **ADDRESSES**) guaranteed prior to the specified closing date and time; and in any event, the proposals are received in the COP office by 3 p.m. EST, no later than two business days following the closing date.

ADDRESSES: Submit the original and 10 copies of your proposal to Coastal Ocean Program Office (N-GOMEX 2001), SSMC13, 9th Floor, Station 9700, 1315 East-West Highway, Silver Spring, MD 20910. NOAA and COP Standard Form Applications with instructions are accessible on the COP Internet site (<http://www.cop.noaa.gov>) under the COP Grants Support Section, Part D, Application Forms for Initial Proposal Submission. Forms may be viewed, and in most cases, filled in by computer. All forms must be printed, completed, and mailed to CSCOR/COP with original signatures. Blue ink for original signatures is recommended but not required. If you are unable to access this information, you may call CSCOR/COP at 301-713-3338 to leave a mailing request.

FOR FURTHER INFORMATION CONTACT:

Technical Information: Kenric Osgood, N-GOMEX 2001 Program Manager, COP Office, 301-713-3338/ext 135, Internet: Kenric.Osgood@noaa.gov

Business Management Information: Leslie McDonald, COP Grants Administrator, 301-713-3338/ext 137, Internet: Leslie.McDonald@noaa.gov

See **SUPPLEMENTARY INFORMATION** under the heading, ELECTRONIC ACCESS, for a listing of web sites pertaining to period hypoxia in the northern Gulf of Mexico.

SUPPLEMENTARY INFORMATION:

Electronic Access

The following web sites furnish results of studies concerning the periodic hypoxia associated with the

northern Gulf of Mexico: <http://www.aoml.noaa.gov/ocd/necop/>, for results from the Nutrient Enhanced Coastal Ocean Productivity (NECOP) study and, <http://www.nos.noaa.gov/Products/pubs-hypox.html> for Gulf of Mexico hypoxia reports produced by the Committee on Environment and Natural Resources (CENR). Hard copies of reports from these studies can be obtained from the COP office.

A workshop report, U.S. GLOBEC report No. 19, is available from the following address or homepage: U.S. GLOBEC Coordinating Office, UMCES, Chesapeake Biological Laboratory, P.O. Box 38, Solomons, MD 20688; Phone: 410-326-7370; Fax: 410-326-7341; Internet: fogarty@usglobec.org and <http://www.usglobec.org>.

A listing of ongoing projects in the northern Gulf of Mexico funded by the COP are provided within the COP Internet Site at <http://www.cop.noaa.gov/projects/GMX.htm>

Background

Program Description

For complete Program Description and Other Requirements for the COP, see the General Grant Administration Terms and Conditions of the Coastal Ocean Program published in the **Federal Register** (65 FR 62706, October 19, 2000) and at the COP home page.

Coastal regions dominated by large rivers are disproportionately important to the biological production of the world's oceans, primarily because these rivers carry large amounts of "new" nitrogen. An important river-dominated coastal ecosystem in the U.S., which supports high primary and secondary production, is the one dominated by the Mississippi River in the northern Gulf of Mexico. Approximately 20 percent of the U.S. commercial fishery landings by dollar value are from the northern Gulf. Major recreational fisheries also exist in this region.

There is a strong relationship between riverine inputs (especially nutrients) and primary production, followed in turn by zooplankton production and fish production in a classic nutrient-phytoplankton-zooplankton-fish (NPZF) food web. Anthropogenic nitrogen loadings from the Mississippi River to the Gulf of Mexico have increased dramatically during the past several decades, which has led to changes in the ecosystem of the northern Gulf, including (1) an initial increase in overall biological production; (2) the annual development of an extensive zone of bottom water hypoxia during the summer stratified period; and (3) an apparent shift from a balanced pelagic/

demersal fish community to one significantly more dominated by pelagic fisheries.

Several past and present programs have studied the seasonal hypoxia associated with the northern Gulf of Mexico. Notably, from 1990 to 1997, the COP supported a study on Nutrient Enhanced Coastal Ocean Productivity (NECOP); and the Committee on Environment and Natural Resources (CENR) recently completed an integrated assessment of Gulf of Mexico hypoxia. Results and reports of these studies can be found on the web sites or obtained from CSCOR/COP as listed under "Electronic Access" in the **SUPPLEMENTARY INFORMATION** section of this document.

A workshop was held in January 1999 to discuss relationships between the Mississippi River, the production of marine populations, and ecosystem parameters in the Gulf of Mexico; and to discuss how these relationships might be affected by changes in weather and climate. A report of the workshop, U.S. GLOBEC report No. 19, is available from the address or homepage provided under "Electronic Access" in the **SUPPLEMENTARY INFORMATION** section of this document.

This solicitation for proposals will augment the initial phase of a program, started in fiscal year 2000, to examine the inter-relationships driving the Mississippi River-dominated Gulf of Mexico ecosystem. Abstracts of ongoing studies funded by CSCOR/COP in the northern Gulf of Mexico are available on the COP internet site that is provided in this document under "Electronic Access" in the **SUPPLEMENTARY INFORMATION** section of this document. The planned suite of studies will enable improved predictions about future effects of nutrient loading, eutrophication, hypoxia, and climate change on the Gulf of Mexico ecosystem.

In order to fully develop a predictive capability, a more intensive 5-7 year program is being planned when additional funding becomes available. This complete program will include monitoring, retrospective studies, modeling and process field studies to identify relationships among ecosystem constituents.

The process studies will be nested within monitoring efforts which identify and measure important ecosystem components, and retrospective and modeling efforts which will place the field measurements into broader temporal and theoretical context.

The overall goal of the entire program is to understand and ultimately predict how changes in the physical, chemical

and biological environment, including changes in climate, nutrient loading and hypoxia, will affect populations of marine animal species, especially economically and ecologically important species, in the northern Gulf of Mexico. The projects conducted as a result of this current solicitation for proposals will help guide the evolution of the future program.

Structure of the Research Program

CSCOR/COP intends to expand the initial research program, which was initiated in fiscal year 2000, with additional projects. Possible types of new projects include, in priority order, modeling, monitoring and retrospective studies. Subsequent announcements may solicit further proposals in these areas and for process field studies in the region, depending on the outcome of the proposed research solicited here and the levels of future appropriated funding.

Modeling studies are needed to provide a framework for studies in the northern Gulf of Mexico. Modeling activities will be used to guide further program development and identify important processes for the extensive fieldwork anticipated to follow this preliminary phase. Modeling studies may include: models that simulate impacts of varying nutrient flux on productivity and trophic response in the northern Gulf of Mexico ecosystem, including impacts to and responses of commercially and recreationally important fisheries; NPZF models; physical-biological coupled models of processes in the Gulf ecosystem influenced by the Mississippi River discharge, including transport and population dynamics of key zooplankton and fishery populations; models of oceanographic and climate influences on nutrients and their impact on Gulf productivity; models of biogeochemical cycling of nutrients within the Gulf and its relationship to the dynamics of organic carbon flux in the Gulf; and models of water column stability and hypoxic zone dynamics.

It is desirable for the modeling studies to be integrative or designed so that they can be fitted with other models to form an integrative whole. The goal is to build a predictive capability for the northern Gulf of Mexico ecosystem.

Proposed monitoring studies should provide calibration and validation data for modeling activities, but not duplicate ongoing activities. Monitoring studies could include shipboard surveys, multi-disciplinary mooring observations, drifters, and analysis of regional satellite data. Possible monitoring activities responsive to this announcement include physical or

chemical observations or biological observations of distribution and abundance of key species, and their relation to hypoxia.

Proposed retrospective analyses should provide quantitative and detailed information on issues relevant to the objectives listed in the recent CENR reports. Examples include retrospective analyses of biological data concerning key animal populations; retrospective analyses of the coupling between transport and population dynamics of key species; and retrospective analyses of coupling between climate, drainage basin, and shelf oceanography. A better definition of the past, current, and potential impacts of hypoxia on both commercially and ecologically important species and ecosystems is needed.

Part I: Schedule and Proposal Submission

This announcement requests full proposals only. The provisions for proposal preparation provided here are mandatory. Proposals received after the published deadline or proposals that deviate from the prescribed format will be returned to the sender without further consideration. Information regarding this announcement, additional background information, and required Federal forms are available on the COP home page.

Full Proposals

Applications submitted in response to this announcement require an original proposal and 10 proposal copies at time of submission. This includes color or high-resolution graphics, unusually-sized materials (not 8.5" x 11" or 21.6 cm x 28 cm), or otherwise unusual materials submitted as part of the proposal. For color graphics, submit either color originals or color copies. The stated requirements for the number of proposal copies provide for a timely review process. Facsimile transmissions and electronic mail submission of full proposals will not be accepted.

Required Elements

All recipients must follow the instructions in the preparation of the CSCOR/COP application forms referenced later in this document in Part II: Further Supplementary Information, (10) Application forms. Each proposal must also include the following seven elements:

(1) *Signed summary title page*: The title page should be signed by the Principal Investigator (PI) and the institutional representative. The Summary Title page identifies the

project's title starting with the acronym N-GOMEX 2001, a short title (less than 50 characters), and the lead PI's name and affiliation, complete address, phone, FAX, and E-mail information. The requested budget for each fiscal year should be included on the Summary Title page. Multi-institution proposals must include signed Summary Title pages from each institution.

(2) *One-page abstract/project summary*: The Project Summary (Abstract) Form, which is to be submitted at time of application, must include an introduction of the problem, rationale, scientific objectives and/or hypotheses to be tested, and a brief summary of work to be completed. The prescribed COP format for the Project Summary Form can be found on the COP Internet site under the COP Grants Support section, Part D.

The summary should appear on a separate page, headed with the proposal title, institution(s), investigator(s), total proposed cost, and budget period. It should be written in the third person. The summary is used to help compare proposals quickly and allows the respondents to summarize these key points in their own words.

(3) *Statement of work/project description*: The proposed statement of work/project must be completely described, including identification of the problem, scientific objectives, proposed methodology, relevance to the program goals, and its scientific priorities. The project description section (including Relevant Results from Prior Support) should not exceed fifteen pages. Page limits are inclusive of figures and other visual materials, but exclusive of references and milestone chart.

Project management should be clearly identified with a description of the functions of each PI within a team. Environmental data must be submitted to the NOAA National Oceanographic Data Center. It is important to provide a full scientific justification for the research; do not simply reiterate justifications presented in this document. This section should also include:

- (a) The objective for the period of proposed work and its expected significance;
- (b) The relation to the present state of knowledge in the field and relation to previous work and work in progress by the proposing principal investigator(s);
- (c) A discussion of how the proposed project lends value to the program goals, and
- (d) Potential coordination with other investigators.

(e) References cited: Reference information is required. Each reference must include the name(s) of all authors in the same sequence in which they appear in the publications, the article title, volume number, page numbers, and year of publications. While there is no page limitation, this section should include bibliographic citations only and should not be used to provide parenthetical information outside of the 15-page project description.

(4) *Milestone chart*: Provide time lines of major tasks covering the duration of the proposed project, up to 24 months.

(5) *Budget and Application Forms*: Both NOAA and COP-specific application forms may be obtained at the COP Grants website. Forms may be viewed, and in most cases, filled in by computer. All forms must be printed, completed, and mailed to CSCOR/COP; original signatures in blue ink are encouraged. If applicants are unable to access this information they may call the CSCOR/COP grants administrator listed in the section **FOR FURTHER INFORMATION CONTACT**.

At time of proposal submission, all applicants must submit the Standard Form, SF-424 (Rev 7-97) Application for Federal Assistance, to indicate the total amount of funding proposed for the whole project period. Applicants must also submit a COP Summary Proposal Budget Form for each fiscal year increment. Multi-institution proposals must include a Summary Proposal Budget Form for each institution. Use of this budget form will provide for a detailed annual budget and for the level of detail required by the COP program staff to evaluate the effort to be invested by investigators and staff on a specific project. The COP budget form is compatible with forms in use by other agencies that participate in joint projects with COP and can be found on the COP home page under COP Grants Support, Part D. All applications must include a budget narrative and a justification to support all proposed budget categories. Ship time needs should be identified in the proposed budget. The SF-424A, Budget Information (Non-Construction) Form, will be requested only from those applicants subsequently recommended for award.

(6) *Biographical sketch*: Abbreviated curriculum vitae, two pages per investigator, must be included with each proposal. Include a list of up to five publications most closely related to the proposed project and up to five other significant publications. A list of all persons (including their organizational affiliation), in alphabetical order, who have collaborated on a project, book, article,

or paper within the last 48 months must be included. If there are no collaborators, this should be so indicated. Students, post-doctoral associates, and graduate and postgraduate advisors of the PI must also be disclosed. This information is needed to help identify potential conflicts of interest or bias in the selection of reviewers.

(7) *Proposal format and assembly*: The original proposal should be clamped in the upper left-hand corner, but left unbound. The 10 copies can be stapled in the upper left-hand corner or bound on the left edge. The page margin must be one inch (2.5 cm) at the top, bottom, left and right, and the type face standard 12 points size must be clear and easily legible.

Part II: Further Supplementary Information

(1) *Program authorities*: For a list of all program authorities for the Coastal Ocean Program, see General Grant Administration Terms and Conditions of the Coastal Ocean Program published in the Federal Register (65 FR 62706, October 19, 2000) and at the COP home page. The specific authority cited for this announcement is 33 U.S.C. 1442.

(2) *Catalog of Federal Domestic Assistance Number*: 11.478 Coastal Ocean Program and 47.050 for the Directorate for Geosciences, National Science Foundation.

(3) *Program description*: For complete COP program descriptions, see General Grant Administration Terms and Conditions of the Coastal Ocean Program published in the **Federal Register** (65 FR 62706, October 19, 2000).

(4) *Funding availability*: Funding is contingent upon the availability of Federal appropriations. It is estimated that approximately \$400,000 per fiscal year will be available for supporting studies proposed by submissions to this announcement. Priority for these funds will be given to proposals that promote balanced coverage of the science objectives stated under **SUPPLEMENTARY INFORMATION**, Structure of the Research Program.

If an application is selected for funding, NOAA has no obligation to provide any additional prospective funding in connection with that award in subsequent years. Renewal of an award to increase funding or extend the period of performance is based on satisfactory performance and is at the total discretion of the funding agency.

Publication of this document does not obligate the COP to any specific award or to any part of the entire amount of funds available. Recipients and

subrecipients are subject to all Federal laws and agency policies, regulations, and procedures applicable to Federal financial assistance awards.

(5) *Matching requirements:* None.

(6) *Type of funding instrument:* Project Grants for non-Federal applicants; interagency transfer agreements or other appropriate mechanisms other than project grants or cooperative agreements for Federal applicants.

(7) *Eligibility criteria:* For complete eligibility criteria for the COP, see COP's General Grant Administration Terms and Conditions annual document in the **Federal Register** (65 FR 62706, October 19, 2000) and the COP home page. Eligible applicants are institutions of higher education, not-for-profit institutions, international organizations, state, local and Indian tribal governments and Federal agencies. COP will accept proposals that include foreign researchers as collaborators with a researcher who is affiliated with a U.S. academic institution, Federal agency, or other non-profit organization.

Applications from non-Federal and Federal applicants will be competed against each other. Proposals selected for funding from non-Federal applicants will be funded through a project grant or cooperative agreement under the terms of this notice. Proposals selected for funding from NOAA employees shall be effected by an intra-agency fund transfer. Proposals selected for funding from a non-NOAA Federal agency will be funded through an inter-agency transfer. PLEASE NOTE: Before non-NOAA Federal applicants may be funded, they must demonstrate that they have legal authority to receive funds from another Federal agency in excess of their appropriation. Because this announcement is not proposing to procure goods or services from applicants, the Economy Act (31 USC 1535) is not an appropriate legal basis.

(8) *Award period:* Full proposals should cover a project period of up to 2 years, with a start date of August 1, 2001. Multi-year project period funding may be funded incrementally on an annual basis; but once awarded, multi-year projects will not compete for funding in subsequent years. Each award shall require a Statement of Work which represents substantial accomplishments that can be easily separated into annual increments if prospective funding is not made available, or is discontinued.

(9) *Indirect costs:* If indirect costs are proposed, the total dollar amount of the indirect costs proposed in an application must not exceed the indirect cost rate negotiated and approved by a

cognizant Federal agency prior to the proposed effective date of the award.

(10) *Application forms:* For complete information on application forms for the COP, see COP's General Grant Administration Terms and Conditions document in the **Federal Register** (65 FR 62706, October 19, 2000); the COP home page; and the information given under *Required Elements*, paragraph (5) Budget.

(11) *Project funding priorities:* For description of project funding priorities, see COP's General Grant Administration Terms and Conditions document in the **Federal Register** (65 FR 62706, October 19, 2000) and at the COP home page.

(12) *Evaluation criteria:* For complete information on evaluation criteria, see COP's General Grant Administration Terms and Condition document in the **Federal Register** (65 FR 62706, October 19, 2000) and at the COP home page.

(13) *Selection procedures:* For complete information on selection procedures, see COP's General Grant Administration Terms and Conditions Document in the **Federal Register** (65 FR 62706, October 19, 2000) and at the COP home page. All proposals received under this specific Document will be evaluated and ranked individually in accordance with the assigned weights of the above evaluation criteria by independent peer mail review.

(14) *Other requirements:* For a complete description of other requirements, see COP's General Grant Administration Terms and Conditions document in the **Federal Register** (65 FR 62706, October 19, 2000) and at the COP home page.

(15) *Pursuant to Executive Orders 12876, 12900 and 13021, the Department of Commerce, National Oceanic and Atmospheric Administration (DOC/NOAA) is strongly committed to broadening the participation of Historically Black Colleges and Universities, Hispanic Serving Institutions and Tribal Colleges and Universities in its educational and research programs. The DOC/NOAA vision, mission and goals are to achieve full participation by Minority Serving Institutions (MSI) in order to advance the development of human potential, to strengthen the nation's capacity to provide high-quality education, and to increase opportunities for MSIs to participate in, and benefit from, Federal financial assistance programs. DOC/NOAA encourages all applicants to include meaningful participation of MSIs.*

(16) Applicants are hereby notified that they are encouraged, to the greatest practicable extent, to purchase American-made equipment and

products with funding provided under this program.

(17) *Intergovernmental Review:* Applications under this program are not subject to Executive Order 12372, "Intergovernmental Review of Federal Programs."

(18) This notification involves collection-of-information requirements subject to the Paperwork Reduction Act (PRA). The use of Standard Forms 424, 424A, 424B, and SF-LLL has been approved by the Office of Management and Budget (OMB) under control numbers 0348-0043, 0348-0044, 0348-0040 and 0348-0046.

The following requirements have been approved by OMB under control number 0648-0384; a Summary Proposal Budget Form (30 minutes per response), a Project Summary Form (30 minutes per response), a standardized format for the annual Performance Report (5 hours per response), a standardized format for the Final Report (10 hours per response), and the submission of up to 20 copies of proposals (10 minutes per response). The response estimates include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding these requirements and the burden estimate, or any other aspect of this collection of information, including suggestions for reducing this burden, to Leslie.McDonald@noaa.gov. Copies of these forms and formats can be found on the COP home page under Grants Support sections, Parts D and F.

Notwithstanding any other provision of law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act, unless that collection displays a currently valid OMB control number.

Dated: January 10, 2001.

John Oliver

Director, Management and Budget Office,
National Ocean Service.

BILLING CODE 3510-JS-S

DEPARTMENT OF COMMERCE**National Oceanic and Atmospheric Administration****[I.D. 010901G]****Mid-Atlantic Fishery Management Council; Public Meeting**

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Mid-Atlantic Fishery Management Council's (Council) Black Sea Bass Advisors and other members of the commercial fishing industry will hold a public meeting.

DATES: The meeting will be held on Thursday, February 1, 2001, from 10 a.m. until 4 p.m.

ADDRESSES: This meeting will be held at the Sheraton International Hotel, BWI Airport, 7032 Elm Road, Baltimore, MD; telephone: 410-859-3300.

Council address: Mid-Atlantic Fishery Management Council, Room 2115, 300 S. New Street, Dover, DE 19904.

FOR FURTHER INFORMATION CONTACT: Daniel T. Furlong, Executive Director, Mid-Atlantic Fishery Management Council; telephone: 302-674-2331, ext. 19.

SUPPLEMENTARY INFORMATION: The purpose of this meeting is to discuss the problems and possible solutions associated with the commercial management system for black sea bass.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Joanna Davis at the Mid-Atlantic Council Office at least 5 days prior to the meeting date.

Dated: January 10, 2001.

Richard W. Surdi,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
[FR Doc. 01-1377 Filed 1-16-01; 8:45 am]

BILLING CODE 3510-22-S

DEPARTMENT OF COMMERCE**National Oceanic and Atmospheric Administration****[I.D. 010901F]****Pacific Fishery Management Council; Public Meeting**

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Pacific Fishery Management Council's (Council) Groundfish Management Team (GMT) will hold a working meeting which is open to the public.

DATES: The GMT working meeting will begin Tuesday, February 6, 2001 at 8 a.m. and may go into the evening until business for the day is completed. The meeting will reconvene from 8 a.m. to 5 p.m. Wednesday, February 7 and Thursday, February 8, from 8 a.m. to 4 p.m.

ADDRESSES: The meeting will be held at the Council office, Conference Room, 2130 SW Fifth Avenue, Suite 224, Portland, OR; telephone: 503-326-6352.

Council address: Pacific Fishery Management Council, 2130 SW Fifth Avenue, Suite 224, Portland, OR 97201.

FOR FURTHER INFORMATION CONTACT: Jim Glock, Groundfish Fishery Management Coordinator; telephone: (503) 326-6352.

SUPPLEMENTARY INFORMATION: The primary purpose of the GMT meeting is to review the groundfish management measures in place for the summer months and prepare recommendations for Council consideration, respond to assignments relating to implementation of the Council's groundfish strategic plan, and address other assignments relating to the groundfish management. The following specific items comprise the draft agenda (1) evaluate 2001 trip limits and other management measures; (2) assignments relating to the groundfish strategic plan, which may include limited entry for the open access fishery and permit stacking for limited entry trawl vessels; (3) complete and/or review rebuilding plans for canary rockfish, cowcod, lingcod, Pacific Ocean perch; (4) begin preparation of widow and darkblotched

rockfish rebuilding plans; (5) evaluate management options for 2001; (6) review the fixed gear sablefish permit stacking proposal and analysis; (7) elect chair and vice chair for 2001; and (8) prepare a draft work plan for 2001.

Although non-emergency issues not contained in this agenda may come before the GMT for discussion, those issues may not be the subject of formal GMT action during this meeting. GMT action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the GMT's intent to take final action to address the emergency.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Ms. Carolyn Porter at (503) 326-6352 at least 5 days prior to the meeting date.

Dated: January 10, 2001.

DEPARTMENT OF COMMERCE**National Oceanic and Atmospheric Administration****[I.D. 010901D]****South Atlantic Fishery Management Council; Public Meeting**

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The South Atlantic Fishery Management Council (Council) will hold a meeting of its Marine Reserves Committee in Charleston, SC.

DATES: The Marine Reserves Committee will meet February 6, 2001, from 7 p.m. until 9 p.m., on February 7, from 8:30 a.m. until 5 p.m., and on February 8, from 8:30 a.m. until 10:30 a.m.

ADDRESSES: These meetings will be held at the Town and Country Inn, 2008 Savannah Highway, Charleston, SC 29407; telephone: 843-571-1000.

FOR FURTHER INFORMATION CONTACT: Kim Iverson, Public Information Officer;

telephone: (843) 571-4366; fax: (843) 769-4520; email: kim.iverson@noaa.gov.

SUPPLEMENTARY INFORMATION: The Marine Reserves Committee will meet to develop recommendations to send to the full Council. The Committee will review the Council's current definition of a marine reserve, review the Council's goals for marine reserves, establish criteria necessary to meet the goals and draft an outline for the scoping document that will be used in the next phase of the process for utilizing marine reserves.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council office (see **ADDRESSES**) by February 1, 2001.

Dated: January 10, 2001.

Richard W. Surdi,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-S

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Amendment of Coverage of Import Limits for Certain Part-Categories Produced or Manufactured in the People's Republic of China and Uruguay

January 10, 2001.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs amending coverage for import limits.

EFFECTIVE DATE: December 1, 2000.

FOR FURTHER INFORMATION CONTACT: Lori E. Mennitt, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482-3400.

SUPPLEMENTARY INFORMATION:

Authority: Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended.

Certain tariff and statistical annotations have been amended in the Harmonized Tariff Schedule of the United States (HTS) in implementing Title V of the Trade and Development Act of 2000 (Public Law 106-2000). To facilitate implementation of the Uruguay Round Agreement on Textiles and Clothing and other textile agreements based upon the HTS, the tariff numbers in part-Category 410 B, which apply to imports from China and Uruguay, are being changed, as is a number in Category 440-M, which applies to imports from China. This change applies to imports entered for consumption or withdrawn from warehouse for consumption on and after December 1, 2000, regardless of the date of export.

In the letter published below, the Chairman of CITA directs the Commissioner of Customs to amend import controls for 2000 and 2001 for China and Uruguay and the current visa arrangement for China.

Richard B. Steinkamp,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

January 10, 2001.

*Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.*

Dear Commissioner: This directive amends, but does not cancel, the directives issued to you on December 6, 1999, and December 20, 2000, by the Chairman, Committee for the Implementation of Textile Agreements, which established import controls for the People's Republic of China for agreement years 2000 and 2001, respectively. This directive also amends, but does not cancel, the directive issued to you on March 27, 1997, by the Chairman, Committee for the Implementation of Textile Agreements. That directive established an export visa arrangement for certain silk apparel, cotton, wool, man-made fiber, silk blend, and other vegetable fiber textiles and textile products, produced or manufactured in the People's Republic of China.

In addition, this directive amends, but does not cancel, the directives issued to you on October 21, 1999, and on November 2, 2000, by the Chairman, Committee for the Implementation of Textile Agreements, which established import controls for Uruguay for agreement years 2000 and 2001, respectively.

Effective on December 1, 2000, you are directed to make the changes shown below in the aforementioned directives for products entered in the United States for consumption

or withdrawn from warehouse for consumption on and after December 1, 2000, for part-Categories 410-B and 440-M, regardless of the date of export:

| Category | HTS change |
|-------------|---|
| 410-B | |
| | Delete 5112.11.2030 and replace with 5112.11.3030 and 5112.11.3060. |
| | Delete 5112.11.2060 and replace with 5112.11.6030 and 5112.11.6060. |
| | Delete 5112.19.9010 and replace with 5112.19.6010 and 5112.19.9510. |
| | Delete 5112.19.9020 and replace with 5112.19.6020 and 5112.19.9520. |
| | Delete 5112.19.9030 and replace with 5112.19.6030 and 5112.19.9530. |
| | Delete 5112.19.9040 and replace with 5112.19.6040 and 5112.19.9540. |
| | Delete 5112.19.9050 and replace with 5112.19.6050 and 5112.19.9550. |
| | Delete 5112.19.9060 and replace with 5112.19.6060 and 5112.19.9560. |
| 440-M | Delete 6203.21.0030 and replace with 6203.21.9030. |

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Richard B. Steinkamp,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-F

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Amendment of Coverage of an Import Limit and Visa and Certification Requirements for a Certain Part-Category Produced or Manufactured in the People's Republic of China

January 10, 2001.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs amending coverage for an import limit and visa and certification requirements.

EFFECTIVE DATE: January 1, 2001.

FOR FURTHER INFORMATION CONTACT: Lori E. Mennitt, International Trade Specialist, Office of Textiles and

Apparel, U.S. Department of Commerce, (202) 482-3400.

SUPPLEMENTARY INFORMATION:

Authority: Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended.

To facilitate implementation of the Bilateral Textile Memorandum of Understanding dated February 1, 1997 between the Governments of the United States and the People's Republic of China (see 64 FR 69228, published on December 10, 1999) and the export visa arrangement dated February 1, 1997 (see 62 FR 15465, published on April 1, 1997) based upon the Harmonized Tariff Schedule (HTS), a certain HTS classification number is being changed for products in part-Category 666-C which are entered into the United States for consumption or withdrawn from warehouse for consumption on and after January 1, 2001, regardless of the date of export.

In the letter published below, the Chairman of CITA directs the Commissioner of Customs to amend all import controls and all visa and certification requirements for products exported from China in part-Category 666-C.

Richard B. Steinkamp,
Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

January 10, 2001.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on December 6, 1999 by the Chairman, Committee for the Implementation of Textile Agreements, which includes man-made fiber textile products in part-Category 666-C, produced or manufactured in China and imported into the United States on and after January 1, 2001, regardless of the date of export.

Also, this directive amends, but does not cancel, the directive issued to you on March 27, 1997 establishing visa and certification requirements for part-Category 666-C.

Effective on January 1, 2001, you are directed to make the changes shown below in the aforementioned directives for products entered in the United States for consumption or withdrawn from warehouse for consumption on and after January 1, 2001 for part-Category 666-C, regardless of the date of export:

| Category | HTS change |
|-------------|--|
| 666 C | Replace 6303.92.2000 with and 6303.92.2010 6303.92.2020. |

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C.553(a)(1).

Sincerely,
Richard B. Steinkamp,
Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-F

CONSUMER PRODUCT SAFETY COMMISSION

[CPSC Docket No. 01-C0003]

Tensor Corporation, Provisional Acceptance of a Settlement Agreement and Order

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: It is the policy of the Commission to publish settlements which it provisionally accepts under the Consumer Product Safety Act in the **Federal Register** in accordance with the terms of 16 CFR § 1118.20. Published below is a provisionally-accepted Settlement Agreement with Tensor Corporation, continuing a civil penalty of \$125,000.

DATES: Any interested person may ask the Commission not to accept this agreement or otherwise comment on its contents by filing a written request with the Office of the Secretary by February 1, 2001.

ADDRESSES: Persons wishing to comment on this Settlement Agreement should send written comments to the Comment 01-C0003, Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207.

FOR FURTHER INFORMATION CONTACT: William J. Moore, Jr., Trial Attorney, Office of Compliance and Enforcement, Consumer Product Safety Commission, Washington, D.C. 20207; telephone (301) 504-0626, 1348.

SUPPLEMENTARY INFORMATION: The text of the Agreement and Order appears below.

Dated: January 10, 2001.

Sadye E. Dunn,
Secretary.

Settlement Agreement and Order

1. This Settlement Agreement, made by and between the staff ("the staff") of the U.S. Consumer Product Safety Commission (the "Commission") and Tensor Corporation ("Tensor"), a corporation, in accordance with 16 CFR

1118.20 of the Commission's Procedures for Investigations, Inspections, and Inquiries under the Consumer Product Safety Act ("CPSA"), is a settlement of the staff allegations set forth below.

The Parties

2. The Commission is an independent federal regulatory agency responsible for the enforcement of the Consumer Product Safety Act, 15 U.S.C. 2051-2084.

3. Tensor is a corporation organized and existing under the laws of the Commonwealth of Massachusetts. Its principal office is located at 100 Everett Avenue, Chelsea, Massachusetts.

Staff Allegations

4. Section 15(b) of the CPSA, 15 U.S.C. 2064(b), requires a manufacturer of a consumer product distributed in commerce who obtains information which reasonably supports the conclusion that such product contains a defect which could create a substantial product hazard, or creates an unreasonable risk of serious injury or death, to immediately inform the Commission of the defect or risk.

5. Between May 1993 and December 1996, Tensor manufactured and sold throughout the United States approximately 600,000 "Halogen Floor Lamps, models LT609A, LT609N, and LT609P," equipped with 500 watt halogen light bulbs (hereinafter "halogen lamps").

6. A halogen lamp is a "consumer product" and Tensor is a "manufacturer" of a "consumer product", which is "distributed in commerce" as those terms are defined in Sections 3 (a)(1),(4), (11) and (12) of the CPSA, 15 U.S.C. 2052 (a)(1),(4), (11) and (12).

7. The halogen lamps are defective because the 500 watt halogen bulbs contained therein can spontaneously explode during normal use, creating a risk of fire, serious injury and death.

8. Between late 1993 and December 1996, Tensor received approximately 330 incidents of exploding halogen bulbs, some causing extensive property damage and personal injuries.

9. Not until June 1996, after receiving a letter from the staff requesting information about bulb explosion incidents, did Tensor provide any information about the exploding halogen lamp bulbs. The information initially provided by Tensor was very limited however.

10. Tensor's acts and omissions constitute a violation of its duty under Section 15(b) of the CPSA, 15 U.S.C. 2064(b), to report information that its lamps contained defects which could

create a substantial product hazard and that said lamps created an unreasonable risk of serious injury or death. Tensor thereby committed a prohibited act under Section 19(a)(4) of the CPSA, 15 U.S.C. 2068(a)(4).

11. The staff alleges this violation, this prohibited act, was committed "knowingly" as that term is defined in Section 20 (d) of the CPSC, 15 U.S.C. 2069 (d), and Tensor is subject to civil penalties under Section 19 of the CPSA, 15 U.S.C. 2068.

Allegations of Tensor

12. Tensor denies all the staff allegations numbered four through eleven above. It denies that the halogen lamps contained a defect that created a substantial product hazard or an unreasonable risk of serious injury or death pursuant to Section 15 of the CPSA, 15 U.S.C. 2064.

13. Tensor further denies that it violated the reporting requirements of Section 15(b) of the CPSA, 15 U.S.C. 2064(b), or that it committed a prohibited act, knowingly or otherwise, as defined in Sections 19(a)(4) and 20(d) of the CPSA, 15 U.S.C. 2068(a)(4) and 2069(d). Tensor alleges, among other things, that it had no duty to report the halogen lamps but that it did report information in a timely and appropriate manner.

Agreement of the Parties

14. The Commission has jurisdiction over this matter and over Tensor under the CPSA, 15 U.S.C. 2051 *et seq.*

15. This Settlement Agreement and Order is in resolution of all staff's allegations concerning Tensor's failure to report any incidents or defects associated with exploding or shattering halogen bulbs through March 27, 2000, the date on which the staff examined documents at Tensor's headquarters. This Settlement Agreement and Order does not constitute an admission by Tensor that the law has been violated.

16. Tensor agrees to pay a civil penalty in the amount of one hundred twenty-five thousand and no/dollars (\$125,000.00), payable to the "U.S. Treasury" and delivered to the attention of William J. Moore, Jr. as follows: if hand delivered, to Office of Compliance, Legal Division, 4330 East West Highway, Bethesda, MD 20814; if by U.S. Mail, to CPSC, Washington, DC 20207. Tensor shall pay sixty-two thousand five hundred dollars (\$62,500.00) within 10 calendar days of receiving service of the final Settlement Agreement and Order, and sixty-two thousand five hundred dollars (\$62,500.00) to be paid no later than one year from the date on which this

Settlement Agreement and Order became final. If Tensor fails to make a full payment on schedule, the unpaid balance of the entire civil penalty shall be due and payable immediately and interest on the unpaid balance shall accrue and be paid at the federal legal rate of interest under the provisions of 28 U.S.C. 1961 (a) and (b), from the date the payment was due under the terms of this Settlement Agreement and Order.

17. Tensor knowingly, voluntarily and completely waives any rights it may have in the above captioned case (1) to the issuance of a Complaint in this matter; (2) to an administrative or judicial hearing with respect to the staff allegations cited herein; (3) to judicial review or other challenge or contest of the validity of the Settlement Agreement or the Commission's Order; (4) to a determination by the Commission as to whether a violation of Section 15(b) of the CPSA, 15 U.S.C. 2064(b), has occurred, and (5) to a statement of findings of fact and conclusions of law with regard to the staff allegations.

18. Upon provisional acceptance of this Settlement Agreement and Order by the Commission, this Settlement Agreement and Order shall be placed on the public record and shall be published in the **Federal Register** in accordance with 16 CFR 1118.20. If the Commission does not receive any meritorious written request not to accept the Settlement Agreement and Order within 15 days, the Settlement Agreement and Order shall be deemed finally accepted on the 16th day after the date it is published in the **Federal Register**, in accordance with 16 CFR 1118.20(f).

19. The Settlement Agreement and Order becomes effective upon its final acceptance by the Commission.

20. The Commission may publicize the terms of the Settlement Agreement and Order.

21. Tensor agrees to the entry of the attached Order, which is incorporated herein by reference, and agrees to be bound by its terms.

22. The Commission's Order in this matter is issued under the provisions of the CPSA, 15 U.S.C. 2051 *et seq.* and a violation of this Order may subject Tensor to appropriate legal action.

23. This Settlement Agreement and Order is binding upon Tensor, its parent and each of its assigns or successors.

24. Agreements, understandings, representations, or interpretations made outside this Settlement Agreement and Order may not be used to vary or to contradict its terms.

25. If, after the effective date hereof, any provision of this Settlement Agreement and Order is held to be illegal, invalid, or unenforceable under

present or future laws effective during the terms of the Settlement Agreement and Order, such provision shall be fully severable. The rest of the Settlement Agreement and Order shall remain in full effect, unless the Commission and Tensor determine that severing the provision materially impacts the purpose of the Settlement Agreement and Order.

26. This Settlement Agreement and Order shall not be waived, changed, amended, modified, or otherwise altered, except in writing executed by the party against whom such amendment, modification, alteration, or waiver is sought to be enforced and approved by the Commission.

27. This Settlement Agreement may be used in interpreting the Order. Agreements, understandings, representations, or interpretations made outside of this Settlement Agreement and Order may not be used to vary or contradict its terms.

Dated: September 22, 2000.
Tensor Corporation.

Roger Sherman,
President.

The U.S. Consumer Product Safety
Commission.

Alan H. Schoem,
Assistant Executive Director, Office of
Compliance.

Eric L. Stone,
Director, Legal Division, Office of
Compliance.

Dated: September 19, 2000.

William J. Moore, Jr.,
Trial Attorney.

Belinda V. Mitchell,
Trial Attorney, Legal Division, Office of
Compliance.

Order

Under consideration of the Settlement Agreement entered into between Tensor Corporation, a corporation, and the staff of the U.S. Consumer Product Safety Commission; and the Commission having jurisdiction over the subject matter and Tensor Corporation, and it appearing that the Settlement Agreement and Order is in the public interest, it is

Ordered, that the Settlement Agreement be, and hereby is, accepted, and it is

Further Ordered, That Tensor Corporation, shall pay the Commission a civil penalty in the amount of *One Hundred Twenty-Five Thousand and 00/100* dollars, (\$125,000.00) payable to the U.S. Treasury as follows: delivered to the Commission, sixty-two thousand five hundred dollars (\$62,500.00) within 10 calendar days of the service of the Final Order upon Tensor Corporation

and sixty-two thousand five hundred dollars (\$62,500.00) to be paid one year from the date on which this Settlement Agreement and Order became final.

Upon failing to make a payment or upon making a payment that is at least five days late, the outstanding balance of the civil penalty shall become due and payable by Tensor Corporation, and the interest on the outstanding balance shall accrue and be paid at the federal legal rate under the provisions of 27 U.S.C. sections 1961 (a) and (b).

In the Matter of Tensor Corporation
[CPSC DOCKET NO. 01-C0003]

Provisionally accepted and
Provisional Order issued on the 10th
day of January, 2001.

By Order of the Commission.

Sadye E. Dunn,

*Secretary, U.S. Consumer Product Safety
Commission.*

BILLING CODE 6355-01-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Proposed Collection; Comment Request

AGENCY: Department of Defense, Office of the Under Secretary of Defense (Acquisition, Technology, and Logistics)/Defense Technical Information Center.

ACTION: Notice.

In compliance with section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Office of the Under Secretary of Defense (Acquisition, Technology, and Logistics)/Defense Technical Information Center (DTIC), announces the proposed extension of a currently approved collection and seeks public comment on the provisions thereof. Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by March 19, 2001.

ADDRESSES: Interested parties should submit written comments and recommendations on the proposed information collection to: ATTN: DTIC-BC, Defense Technical Information Center, 8725 John J. Kingman Road, Suite 0944, Fort Belvoir, VA 22060-6218; E-mail comments submitted via the Internet should be addressed to: laxe@dtic.mil.

FOR FURTHER INFORMATION CONTACT: To request further information on this proposed information collection, or to obtain a copy of the proposal and associated collection instrument, please write to the above address or call Ms. Linda Axe at (703) 767-8194.

Title, Associated Form, and OMB Number: Registration for Scientific and Technical Information Services, DD Form 1540, OMB Control Number 0704-0264.

Needs and Uses: The data that the Defense Technical Information Center handles is controlled, either because of distribution limitations or security classification. For this reason, all potential users are required to register for service. DODI 3200.14, Principles and Operational Parameters of the DOD Scientific and Technical Information Program, mandates the registration procedure. Federal Government agencies and their contractors are required to complete the DD Form 1540, Registration for Scientific and Technical Information Services (OMB Number 0704-0264). The contractor community completes a separate DD Form 1540 for each contract or grant and registration is valid until the contract expires.

Affected Public: Businesses or other for-profit; Small Businesses or organizations; Non-profit institutions.

Annual Burden Hours: 833.

Number of Annual Respondents: 2,000.

Annual Responses to Respondent: 1.

Average Burden Per Response: 25 minutes.

Frequency: On occasion.

SUPPLEMENTARY INFORMATION:

Summary of Information Collection

The DOD Scientific and Technical Information Program (STIP) requires the exchange of scientific and technical information within and among Federal Government agencies and their contractors. The DD Form 1540 serves as a registration tool for Federal Government agencies and their contractors to access DTIC services. The contractors, subcontractors, and potential contractors are required to obtain certification from designated approving officials. Federal Government agencies need certification from

approving officials and security offices only when requesting access to classified data. All collected information is verified by DTIC's Marketing and Registration Division.

Dated: January 10, 2001.

Patricia L. Toppings,

*Alternate OSD Federal Register Liaison
Officer, Department of Defense.*

[FR Doc. 01-1316 Filed 1-16-01; 8:45 am]

BILLING CODE 5001-10-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Submission for OMB Review; Comment Request

ACTION: Notice.

The Department of Defense will submit to OMB for emergency processing, the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Title and OMB Number: Foreign Sourcing for Defense Application; OMB Number 0704-[To Be Determined].

Type of Request: New Collection; Emergency processing requested with a shortened public comment period ending February 7, 2001. An approval date by February 15, 2001 has been requested.

Number of Respondents: 3,205.

Responses Per Respondent: 1.

Annual Responses: 3,205.

Average Burden Per Response: 5 hours.

Annual Burden Hours: 16,025.

Needs and Uses: The information is required for the Department of Defense (DoD) to evaluate, for certain defense programs, the: (1) Extent of foreign sourcing within the defense products; (2) impact such foreign sourcing has on military readiness and the related domestic industrial infrastructure; and, (3) extent to which DoD or contractor policies, procedures, practices, or actions encourage or discourage consideration of foreign sources for defense products. The evaluation is required by section 831 of the National Defense Authorization Act for Fiscal Year 2001. Section 831 requires the Secretary of Defense to conduct a study analyzing the impact that foreign sources have on six specific defense systems to include the AH-64D Apache helicopter, F/A-18E/F aircraft, M1A2 Abrams tank, AIM 120 AMRAAM missile, Patriot missile ground station, and Hellfire missile. To ensure it can address emerging foreign sourcing issues, DoD will also evaluate foreign

sourcing on the Joint Direct Attack Munition and the Advanced Amphibious Assault Vehicle. Section 831 requires that the information to be analyzed shall be collected from prime contractors and first and second tier subcontractors.

Affected Public: Business or Other For-Profit.

Frequency: One-Time.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Mr. Lew Oleinick. Written comments and recommendations on the proposed information collection should be sent to Mr. Oleinick at the Office of Management and Budget, Desk Officer for Acquisitions (DoD), Room 10236, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. Robert Cushing. Written requests for copies of the information collection proposal should be sent to Mr. Cushing, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302, or by fax at (703) 604-6270.

Dated: January 8, 2001.

Patricia L. Toppings,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 01-1318 Filed 1-16-01; 8:45 am]

BILLING CODE 5001-10-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Submission for OMB Review; Comment Request

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance, the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Title, Form, and OMB Number:

Application for Department of Defense Common Access Card—DEERS Enrollment; DD Form 1172-2; OMB Number 0704-0415.

Type of Request: Extension.

Number of Respondents: 300,000.

Responses Per Respondent: 1.

Annual Responses: 300,000.

Average Burden Per Response: 20 minutes.

Annual Burden Hours: 100,000.

Needs and Uses: This information collection is needed to obtain the necessary data to establish eligibility for the DoD Common Access Card for those individuals not pre-enrolled in the DEERS, and to maintain a centralized database of eligible individuals. This

information is used to establish eligibility for the DoD Common Access Card for individuals either employed by or associated with the Department of Defense; is used to control access to DoD facilities and systems; and it provides a source of data for demographic reports and mobilization dependent support.

Affected Public: Individuals or Households.

Frequency: On Occasion.

Respondent's Obligation: Required to Obtain or Retain Benefits.

OMB Desk Officer: Mr. Edward C. Springer. Written comments and recommendations of the proposed information collection should be sent to Mr. Springer at the Office of Management and Budget, Desk Officer for DoD, Room 10236, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. Robert Cushing. Written requests for copies of the information collection proposal should be sent to Mr. Cushing, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302.

Dated: January 10, 2001.

Number of Respondents: 3,600.

Responses per Respondent: 1.

Annual Responses: 3,600.

Average Burden Per Response: 30 minutes.

Annual Burden Hours: 1,800.

Needs and Uses: The Information collection requirement is necessary to ensure that the security and operational integrity of military airfields are maintained; to identify the aircraft operator and the aircraft to be operated; to avoid competition with the private

sector by establishing the purpose for use of military airfields; and to ensure the U.S. Government is not held liable if the civil aircraft becomes involved in an accident or incident while using military airfields, facilities, and services.

Affected Public: Business or Other For-Profit; Not-For-Profit Institutions; Individuals or Households.

Frequency: On Occasion.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Mr. Edward C. Springer. Written comments and recommendations on the proposed information collection should be sent to Mr. Springer at the Office of Management and Budget, Desk Officer for DoD, Room 10236, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. Robert Cushing. Written requests for copies of the information collection proposal should be sent to Mr. Cushing, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302.

Dated: January 8, 2001.

Patricia L. Toppings,

Alternate OSD Federal Register, Liaison Officer, Department of Defense.

BILLING CODE 5001-10-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Submission for OMB Review; Comment Request

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance, the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Title, Form Number, and OMB

Number: Description of Vessels, Description of Operations; ENG Form 3931, 3932; OMB Number 0710-0009.

Type of Request: Revision.

Number of Respondents: 2,500.

Responses Per Respondent: 1.

Annual Responses: 2,500.

Average Burden Per Response: 48 minutes.

Annual Burden Hours: 2,000.

Needs and Uses: The data collected provide information on vessel operators and their American Flag vessels operating or available for operation on the inland waterways of the United States in the transportation of freight and passengers. The information provides accurate U.S. Flag fleet

statistics for use by the Army Corps of Engineers and other agencies, such as the U.S. Coast Guard and Federal and State agencies involved in transportation.

Affected Public: Business or Other For-Profit.

Frequency: Annually.

Respondent's Obligation: Mandatory.

OMB Desk Officer: Mr. Jim Laity.

Written comments and recommendations on the proposed information collection should be sent to Mr. Laity at the Office of Management and Budget, Desk Officer for the U.S. Army Corps of Engineers, Room 10202, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. Robert Cushing. Written requests for copies of the information collection proposal should be sent to Mr. Cushing, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302.

Dated: January 8, 2001.

Patricia L. Toppings,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001-10-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Submission for OMB Review; Comment Request

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance, the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Title, Form, and OMB Number:

Personnel Security Clearance Change Notification; DISCO Form 562; OMB Number 0704-[To Be Determined].

Type of Request: New Collection.

Number of Respondents: 11,290.

Responses Per Respondent: 20.

Annual Responses: 225,800.

Average Burden Per Response: 12 minutes.

Annual Burden Hours: 45,160.

Needs and Uses: The DISCO Form 562 is used by contractors participating in the National Industrial Security Program to report various changes in employee personnel clearance status or identification information. The execution of the form is a factor in making a determination as to whether a contractor employee is eligible to have a security clearance.

Affected Public: Business or Other For-Profit; Not-For-Profit Institutions.

Frequency: On Occasion.

Respondents Obligation: Required to Obtain or Retain Benefits.

OMB Desk Officer: Mr. Edward C. Springer.

Written comments and recommendations on the proposed information collection should be sent to Mr. Springer at the Office of Management and Budget, Desk Officer for DoD, Room 10236, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. Robert Cushing. Written requests for copies of the information collection proposal should be sent to Mr. Cushing, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302.

Dated: January 8, 2001.

Patricia L. Toppings,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Intelligence Agency, Science and Technology Advisory Board Closed Panel Meeting

AGENCY: Defense Intelligence Agency, Department of Defense.

ACTION: Notice.

SUMMARY: Pursuant to the provisions of subsection (d) of section 10 of Public Law 92-463, as amended by section 5 of Public Law 94-409, notice is hereby given that a closed meeting of the DIA Science and Technology Advisory Board has been scheduled as follows:

DATES: January 9, and 10, 2001 (800 am to 1600 pm).

ADDRESSES: The Defense Intelligence Agency, 200 MacDill BLVD, Washington, DC, 20340.

FOR FURTHER INFORMATION CONTACT:

Victoria J. Prescott, Executive Secretary, DIA Science and Technology Advisory Board, Washington, DC 20340-1328 (202) 231-4930.

SUPPLEMENTARY INFORMATION: The entire meeting is devoted to the discussion of classified information as defined in section 552b(c)(1), title 5 of the U.S. Code, and therefore will be closed to the public. The Board will receive briefings on and discuss several current critical intelligence issues and advise the Director, DIA, on related scientific and technical matters.

Dated: January 10, 2001.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Office of the Secretary of Defense

Meeting of the DOD Advisory Group on Electron Devices

AGENCY: Advisory Group on Election Devices, Department of Defense.

ACTION: Notice.

SUMMARY: The DoD Advisory Group on Electron Devices (AGED) announces a closed session meeting.

DATES: The meeting will be held at 0900, Tuesday, February 13, 2001.

ADDRESSES: The meeting will be held at Palisades Institute for Research Services, 1745 Jefferson Davis Highway, Suite 500, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: Mr. Eliot Cohen, AGED Secretariat, 1745 Jefferson Davis Highway, Crystal Square Four, Suite 500, Arlington, Virginia 22202.

SUPPLEMENTARY INFORMATION: The mission of the Advisory Group is to provide advice to the Under Secretary of Defense for Acquisition and Technology, to the Director of Defense Research and Engineering (DDR&E), and through the DDR&E to the Director, Defense Advanced Research Projects Agency and the Military Departments in planning and managing an effective and economical research and development program in the area of electron devices.

The AGED meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. The agenda for this meeting will include programs on Radiation Hardened Devices, Microwave Tubes, Displays and Lasers. The review will include details of classified defense programs throughout.

In accordance with Section 10(d) of Pub. L. No. 92-463, as amended (5 U.S.C. App. § 10(d) (1994)), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1994), and that accordingly, this meeting will be closed to the public.

Dated: January 10, 2001.

L.M. Bynum,

Alternate, OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001-10-M

DEPARTMENT OF DEFENSE**Office of the Secretary of Defense****Meeting of the DOD Advisory Group on Electron Devices**

AGENCY: Advisory Group on Electron Devices, Department of Defense.

ACTION: Notice.

SUMMARY: Working Group A (Microwave Devices) of the DoD Advisory Group on

Electron Devices (AGED) announces a closed session meeting.

DATES: The meeting will be held at 0900, Thursday, February 15, 2001.

ADDRESSES: The meeting will be held at Palisades Institute for Research Services, Inc. 1745 Jefferson Davis Highway, Suite 500, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: David Cox, AGED Secretariat, 1745 Jefferson Davis Highway, Crystal Square Four, Suite 500, Arlington, Virginia 22202.

SUPPLEMENTARY INFORMATION: The mission of the Advisory Group is to provide advice to the Under Secretary of Defense for Acquisition and Technology, to the Director of Defense Research and Engineering (DDR&E), and through the DDR&E to the Director, Defense Advanced Research Projects Agency (ARPA) and the Military Departments in planning and managing an effective and economical research and development program in the area of electron devices.

The Working Group A meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. This microwave device area includes programs on developments and research related to microwave tubes, solid state microwave devices, electronic warfare devices, millimeter wave devices, and passive devices. The review will include details of classified defense programs throughout.

In accordance with Section 10(d) of Pub. L. No. 92-463, as amended (5 U.S.C. App. § 10(d) (1994)), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1994), and that accordingly, this meeting will be closed to the public.

Dated: January 10, 2001.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001-10-M

DEPARTMENT OF DEFENSE

Office of the Secretary of Defense

Department of Defense Wage Committee; Notice of Closed Meetings

Pursuant to the provisions of section 10 of Public Law 92-463, the Federal Advisory Committee Act, notice is hereby given that closed meetings of the Department of Defense Wage Committee will be held on February 6, 2001; February 13, 2001; February 20, 2001; and February 27, 2001, at 10:00 a.m. in

Room A105, The Nash Building, 1400 Key Boulevard, Rosslyn Virginia.

Under the provisions of section 10(d) of Public Law 92-463, the Department of Defense has determined that the meetings meet the criteria to close meetings to the public because the matters to be considered are related to internal rules and practices of the Department of Defense and the detailed wage data to be considered were obtained from officials of private establishments with a guarantee that the data will be held in confidence.

However, members of the public who may wish to do so are invited to submit material in writing to the chairman concerning matters believed to be deserving of the Committee's attention.

Additional information concerning the meetings may be obtained by writing to the Chairman, Department of Defense Wage Committee, 4000 Defense Pentagon, Washington, DC 20301-4000.

Dated: January 10, 2001.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001-10-M

DEPARTMENT OF ENERGY

Energy Employees Occupational Illness Compensation Act of 2000; List of Covered Facilities

AGENCY: Department of Energy.

ACTION: Notice of listing of covered facilities.

SUMMARY: The Energy Employees Occupational Illness Compensation Act of 2000 ("Act"), Public Law 106-398, establishes a program to provide compensation to individuals who developed illnesses as a result of their employment in nuclear weapons production-related activities and at certain federally-owned facilities in which radioactive materials were used. On December 7, 2000, the President issued Executive Order 13179 ("Order") directing the Department of Energy ("Department" or "DOE") to list covered facilities in the **Federal Register**. This notice responds to both the Act and the Order.

FOR FURTHER INFORMATION CONTACT:

Office of Worker Advocacy, 1-877-447-9756.

ADDRESSES: The Department welcomes comments on this list. Individuals who wish to suggest additional facilities for inclusion on the list, indicate why one or more facilities should be removed from the list, or provide other

information may contact: Office of Worker Advocacy (EH-8), U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, email: worker_advocacy@eh.doe.gov, toll-free: 1-877-447-9756.

SUPPLEMENTARY INFORMATION:

Purpose: The Energy Employees Occupational Illness Compensation Act of 2000 ("Act"), Public Law 106-398, establishes a program to provide compensation to individuals who developed illnesses as a result of their employment in nuclear weapons production-related activities and at certain federally-owned facilities in which radioactive materials were used. On December 7, 2000, the President issued Executive Order 13179 ("Order") directing the Department of Energy ("Department" or "DOE") to list covered facilities in the **Federal Register**. Section 2. c. vii of the Order instructs the Department to list three types of facilities:

(1) Atomic weapons employer facilities, as defined in section 3621 (4) of the Act;

(2) Department of Energy facilities, as defined by section 3621 (12) of the Act; and

(3) Beryllium vendors, as defined by section 3621 (6) of the Act.

Compensation options and mechanisms are defined differently for each of these facility categories. The atomic weapons employer category includes facilities in which the primary work was not related to atomic weapons, and consequently these facilities are not commonly known as atomic weapons facilities. Their inclusion in this list is consistent with the Act, and is not intended as a classification for any other purpose.

The list at the end of this notice represents the Department's best efforts to date to compile a list of facilities in these three categories. Reconstructing the operational history of the nuclear weapons system over a sixty-year period is a complex and sometimes imprecise undertaking. Some list entries are based on records that contain the names and addresses of companies and facilities at the time work was performed for the Department and its predecessor federal agencies. The list may identify a corporate headquarters facility as a production location, or may contain some inadvertent duplication because of changes in names, ownership, and addresses. Similarly, attempts to minimize duplication may have resulted in the inadvertent omission of subsidiaries and satellite locations that should be included. Accordingly, the

Department is continuing its research efforts in order to better understand past production activities, and DOE intends to update this list at least once annually so long as new information becomes available. The public is invited to comment on the list and to provide additional information.

In addition to continuing its research efforts, the Department is developing information dissemination mechanisms to make facility-specific data available to the public, including a publicly accessible database of site-related information. This database will help ensure that the Department keeps track of facilities involved in atomic weapons and other work potentially resulting in contamination or exposure. The site database will include, among other information, the type of nuclear weapons-related production work done, the dates such work occurred, and available health and safety data concerning the facility. The listing of facility name and location in this notice represents only a first step in providing information to the public.

The Act does not cover workers involved in uranium mining and milling, or those who worked in support of naval nuclear propulsion programs. Consequently, facilities associated with this type of work are not listed in this notice. Some workers who became ill as a result of their employment at these facilities may be covered by other programs such as the Radiation Exposure Compensation Act (RECA), the Federal Exposure Compensation Act (FECA), or other jurisdictions' worker compensation programs.

Introduction to the Covered Facility List

The list that follows covers the three categories of employers defined by the Act: atomic weapons employers ("AWE"), Department of Energy facilities ("DOE"), and beryllium vendors ("BE"). Some facilities fall into more than one category. For example, if a private contractor facility handled both radioactive materials and beryllium, it will have "AWE" and "BE" in the "facility type" column. For another example, a facility will have both "DOE" and "AWE" codes if ownership changed between the DOE and another entity. The Department intends to provide facility-specific explanations of the applicability of these categories through the database mentioned above.

Each of the categories is defined below:

1. Atomic Weapons Employers

Section 3621 (4) of the Act defines an atomic weapons employer as "an entity that—

(A) processed or produced, for the use by the United States, material that emitted radiation and was used in the production of an atomic weapon, excluding uranium mining and milling; and

(B) is designated as an atomic weapons employer for purposes of this title by the Secretary of Energy."

Most facilities listed as an AWE conducted nuclear weapons-related work for a limited period of time or in certain select areas of the plant. For example, some sites worked with radioactive materials to evaluate processing machinery that was being considered for use in atomic weapons production. Radioactive materials may not have been used as a routine part of the facility's operations. The Act covers those workers who became sick as a consequence of their work in support of nuclear weapons production activities, and was not intended to cover all workers at each site named.

The lines between research, atomic weapons production, and non-weapons production are often difficult to draw. For the purposes of this notice, and as directed by the Act, only those facilities whose work involved radioactive material that was connected to the weapons production chain are included. Available information about many of these facilities is incomplete or unclear, and the Department welcomes comments or additional information regarding facilities that may have supported atomic weapons production that are not on this list, as well as information that clarifies the work done at facilities named below.

2. Department of Energy Facilities

Section 3621 (12) of the Act defines a DOE facility as "any building, structure, or premise, including the grounds upon which such building, structure, or premise is located—

(A) in which operations are, or have been, conducted by, or on behalf of, the Department of Energy (except for buildings, structures, premises, grounds, or operations covered by Executive Order 12344, pertaining to the Naval Nuclear Propulsion Program); and

(B) with regard to which the Department of Energy has or had—

(i) A proprietary interest; or
(ii) Entered into a contract with an entity to provide management and operation, environmental remediation services, construction, or maintenance services."

Consistent with this definition, the Department has taken a broad view of where operations have been conducted by DOE or its predecessor agencies. The list includes any facility handling radioactive materials or beryllium in which the Department had management and operations, management and integration, environmental remediation, or construction and maintenance contracts. This broad definition includes many facilities which are not generally thought of as Departmental facilities, as well as facilities which are not necessarily involved with weapons-related work. For example, some universities and private companies are included because the Department contracted for environmental remediation services at these sites, even though the Department did not own the facility. Also, some DOE-owned laboratories are included because they do work involving radioactive materials, even though that work is not related to nuclear weapons production.

The Act covers production workers at the gaseous diffusion plants at Paducah, KY and Piketon, OH. Production workers at these facilities are covered for work conducted until July 28, 1998, when the facilities were privatized under the control of the United States Enrichment Corporation (USEC, Inc.)

The listing of Department of Energy facilities is only intended for the context of implementing this Act and does not create or imply any new Departmental obligations or ownership at any of the facilities named on this list.

3. Beryllium Vendors

Section 3621(6) of the Act defines beryllium vendor as the following:

"(A) Atomics International.

(B) Brush Wellman, Incorporated, and its predecessor, Brush Beryllium Company.

(C) General Atomics.

(D) General Electric Company.

(E) NGK Metals Corporation and its predecessors, Kawecki-Berylco, Cabot Corporation, BerylCo, and Beryllium Corporation of America.

(F) Nuclear Materials and Equipment Corporation.

(G) StarMet Corporation, and its predecessor, Nuclear Metals, Incorporated.

(H) Wyman Gordan, Incorporated.

(I) Any other vendor, processor, or producer of beryllium or related products designated as a beryllium vendor for purposes of this title under Section 3622."

Beryllium metal has been an important material for atomic weapons production, and it was used at many places throughout the production

system. The list indicates private firms that processed, produced, or provided beryllium metal for the Department, as defined by the Act. This information is

drawn from a variety of historical documents, and much data remains incomplete. The Department welcomes

comments or additional information about its beryllium vendors.

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP00-544-001]

Carnegie Interstate Pipeline Company; Notice of Compliance Filing

January 10, 2001.

Take notice that on November 13, 2000, Carnegie Interstate Pipeline Company (CIPCO) tendered for filing as part of its FERC Gas Tariff, Original Volume No. 1, the following tariff sheets, with an effective date of October 1, 2000:

Second Revised Sheet No. 76

Second Revised Sheet No. 87

CIPCO states that the purpose of this filing is to comply with the Commission's Order issued on October 26, 2000.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Section 385.211 of the Commission's Rules and

Regulations. All such protests must be filed on or before January 17, 2001.

Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room. This filing may be viewed on the web at <http://www.ferc.fed.us/online/rims.htm> (call 202-208-2222 for assistance). Comments and protests may be filed electronically via the internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site at <http://www.ferc.fed.us/efi/doorbell.htm>.

David P. Boergers,

Secretary.

BILLING CODE 6717-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EL01-27-000]

Dominion Retail, Inc., Complainant, vs. FirstEnergy Corp., Cleveland Electric Illuminating Company, Ohio Edison Company, Toledo Edison Company, and American Transmission Systems, Inc., Respondent; Notice of Complaint

January 10, 2001.

Take notice that on January 9, 2001, the above listed entity, Dominion Retail, Inc. (Dominion Retail or Complainant), tendered for filing a complaint under the Federal Energy Regulatory Commission's (Commission) fast-track procedures against FirstEnergy Corp., Cleveland Electric Illuminating Company, Ohio Edison Company, Toledo Edison Company and American Transmission Systems, Inc. (FirstEnergy).

Complainant has requested that the Commission: (1) find that this complaint merits Fast Track Processing as provided by Section 206(h) of the Commission's Rules of Practice and Procedures; (2) find that the exclusion of FirstEnergy's marketing affiliates from the conditions contained in Paragraph V of the Stipulation and Recommendation is in violation of Section 205 of the Federal Power Act; and of the Commission's Rules related

to affiliated entities, and of FirstEnergy's Code of Conduct as filed with and approved by this Commission; (3) find that the conditions imposed upon affiliated marketers in Paragraph V of the Stipulation and Recommendation is in violation of Section 205 of the Federal Power Act, or in the alternative, that FirstEnergy's interpretation and application of those conditions so as to disqualify Dominion Retail from qualifying to receive an allocation of MSG power is in violation of Section 205 of the Federal Power Act; and (4) provide such other and further relief as may be appropriate under the circumstances.

Any person desiring to be heard or to protest this filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests must be filed on or before January 29, 2001. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room. This filing may also be viewed on the Internet at <http://www.ferc.fed.us/online/rims.htm> (call 202-208-2222 for assistance. Answers to the complaint shall also be due on or before January 29, 2001. Comments and protests may be filed electronically via the internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site at <http://www.ferc.fed.us/efi/doorbell.htm>.

David P. Boergers,
Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP00-337-001]

Kern River Gas Transmission Company; Notice of Proposed Pro Forma Changes in FERC Gas Tariff

January 10, 2001.

Take notice that on January 5, 2001, Kern River Gas Transmission Company

(Kern River) tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following pro forma tariff sheets:

Sheet No. 76, Sheet No. 106, Sheet No. 125, Sheet No. 125-A, Sheet No. 126, Sheet No. 135, Sheet No. 147, Sheet No. 148, Sheet No. 200, Sheet No. 201, Sheet No. 202, Sheet No. 501, Sheet No. 601, Sheet No. 701, Sheet No. 815, Sheet No. 825, Sheet No. 826, and Sheet No. 901

Kern River states that the purpose of this filing is to submit pro forma tariff sheets reflecting a proposed segmentation policy to be added to Kern River's tariff.

Kern River states that it has served copy of this filing upon each person designated on the official service list compiled by the Secretary in this proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests must be filed on or before January 19, 2001. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room. This filing may be viewed on the web at <http://www.ferc.fed.us/online/rims.htm> (call 202-208-2222 for assistance). [Docket No. ER01-372-001]

New England Power Company; Notice of Filing

January 10, 2001.

Take notice that on December 29, 2000, New England Power Company (NEP), pursuant to section 205 of the Federal Power Act, 16 U.S.C. 824d (1994) and section 35.13 of the Commission's Rules and Regulations, 18

CFR 35.13, withdraws its service agreement filed with the Commission on November 6, 2000 in Docket No. ER01-372-000, and submits for filing a First Revised Service Agreement No. 124 between NEP and ANP Bellingham Energy Company for Firm Local Generation Delivery Service under NEP's Open Access Transmission Tariff, FERC Electric Tariff, Original Volume No. 9.

Copies of the filing were served upon ANP Bellingham Energy Company and regulators in the Commonwealth of Massachusetts.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions and protests should be filed on or before January 19, 2001. Protests will be considered by the Commission to determine the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. BILLING CODE 6717-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER01-904-000]

North Carolina Power Holdings, LLC; Notice of Filing

January 10, 2001.

Take notice that on January 8, 2001, North Carolina Power Holdings, LLC (NCPH), tendered for filing an application for waivers and blanket approvals under various regulations of the Commission and for an order accepting NCPH's FEFC Electric Rate Schedule No. 1 and accompanying Code of Conduct.

NCPH requests waiver of the 60-day prior notice requirement to permit NCPH's Rate Schedule and Code of Conduct to be effective January 19, 2001.

NCPH intends to engage in electric power and energy transactions as a marketer. In transactions where NCPH sells electric energy, it proposes to make such sales on rates, terms and conditions to be mutually agreed to with the purchasing party. NCPH's proposed Rate Schedule also permits it to reassign transmission capacity.

Any person desiring to be heard or to protest such filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions and protests should be filed on or before January 18, 2001. Protests will be considered by the Commission to determine the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the Internet at <http://www.ferc.fed.us/online/rims.htm> (call 202-208-2222 for assistance). Comments and protests may be filed electronically via the internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site at <http://www.ferc.fed.us/efi/doorbell.htm>.

Linwood A. Watson, Jr.,

Acting Secretary.

[FR Doc. 01-1311 Filed 1-16-01; 8:45 am]

BILLING CODE 6717-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP01-63-000]

Trunkline LNG Company; Notice of Application

January 10, 2001.

Take notice that on January 5, 2001, Trunkline LNG Company (Trunkline LNG), P.O. Box 4967, Houston, Texas 77210-4967, filed an application with the Commission in Docket No. CP01-63-000 pursuant to section 7 of the Natural Gas Act (NGA) for a certificate of public convenience and necessity requesting authorization to perform minor modifications to its liquefied

natural gas (LNG) terminal near Lake Charles, Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection. This filing may be viewed on the web at <http://www.ferc.fed.us/online/htm> (call 202-208-2222 for assistance).

Specifically, Trunkline LNG requests authorization to install approximately 80 feet of 16-inch insulated stainless steel by-pass piping and valve actuator around the existing recondenser to increase the LNG throughput to the second stage pumps; modify the seven vaporizer air blowers and motors by replacing the existing air blowers with new air blowers and removing the existing 359 HP motors, installing new 500 HP motors to increase the air capabilities and, installing new burner nozzles and NO_x controls on vaporizers to reduce emissions. Trunkline LNG states that the proposed modifications will eliminate operational bottlenecks in the re-gasification process and permit the terminal to increase the daily sendout capability from 700 MMscf/d to 1 Bscf/d at an estimated cost of approximately \$1.25 million.

Any questions regarding this application should be directed to William W. Grygar, Vice President of Rates and Regulatory Affairs, 5444 Westheimer Road, Houston, Texas 77056-5306 at (713) 989-7000.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before January 31, 2001, file with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC, 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the Trunkline LNG and by all other parties. A party must submit 14 copies of filings made with the Commission and must mail a copy to the Trunkline LNG and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition

to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenters will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commenters will not be required to serve copies of filed documents on all other parties. However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission may issue a preliminary determination on non-environmental issues prior to the completion of its review of the environmental aspects of the project. This preliminary determination typically considers such issues as the need for the project and its economic effect on existing customers of the Trunkline LNG, on other pipelines in the area, and on landowners and communities. For example, the Commission considers the extent to which the Trunkline LNG may need to exercise eminent domain to obtain rights-of-way for the proposed project and balances that against the non-environmental benefits to be provided by the project. Therefore, if a person has comments on community and landowner impacts from this proposal, it is important either to file comments or to intervene as early in the process as possible.

Comments and protests may be filed electronically via the internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(ii) and the instructions on the Commission's web site at <http://www.ferc.fed.us/efi/doorbell.htm>.

If the Commission decides to set the application for a formal hearing before an Administrative Law Judge, the Commission will issue another notice describing that process. At the end of

the Commission's review process, a final Commission order approving or denying a certificate will be issued.

David P. Boergers,
Secretary.

BILLING CODE 6717-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP99-381-007]

Wyoming Interstate Company, Ltd.; Notice of Compliance Filing

January 10, 2001.

Take notice that on January 5, 2001, Wyoming Interstate Company, Ltd. (WIC) tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 2, the sheets listed on Appendix A and Appendix B to the filing, to become effective on the dates indicated on each sheet.

WIC asserts that the purpose of this filing is to comply with the Commission's order issued September 27, 2000 in Docket No. RP99-381 approving settlement and granting interlocutory appeal. Specifically, this filing reflects the transportation rates from January 1, 2000 forward for consenting and contesting parties.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room. This filing may be viewed on the web at <http://www.ferc.fed.us/online/rims.htm> (call 202-208-2222 for assistance). Comments and protests may be filed electronically via the internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site at <http://www.ferc.fed.us/efi/doorbell.htm>.

David P. Boergers,
Secretary.

[FR Doc. 01-1256 Filed 1-16-01; 8:45 am]

BILLING CODE 6717-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EC01-34-000, et al.]

Delmarva Power & Light Company, et al.; Electric Rate and Corporate Regulation Filings

January 9, 2001.

Take notice that the following filings have been made with the Commission:

1. Delmarva Power & Light Company and Conectiv Energy Supply, Inc.

[Docket No. EC01-34-000]

Take notice that on January 5, 2001, Delmarva Power & Light Company (Delmarva) and Conectiv Energy Supply, Inc. (CESI) (collectively Applicant) submitted Exhibit H to supplement their application under the provisions of Section 203 of the Federal Power Act involving the assignment of Delmarva's rights and obligations under certain wholesale power sales agreements (Agreements) to CESI. Exhibit H includes the executed assignment and assumption agreement between Delmarva and CESI.

The Applicants state that copies of this joint application have been served upon Delmarva's counterparties in the Agreements and the pertinent state regulatory commissions.

Comment date: January 19, 2001, in accordance with Standard Paragraph E at the end of this notice.

2. Calumet Energy Team, LLC

[Docket No. EG01-26-000]

Take notice that on December 15, 2000, Calumet Energy Team, LLC, c/o Wisvest Corporation, N16 W23217 Stone Ridge Drive, Suite 100, Waukesha, WI 53188, filed with the Federal Energy Regulatory Commission an amended application for determination of exempt wholesale generator status pursuant to section 32(a)(1) of the Public Utility Holding Company Act of 1935. The applicant is a limited liability company organized under the laws of the State of Delaware that is engaged directly and exclusively in developing, owning, and operating a gas-fired, nominally 300 MW simple-cycle peaking power plant in Chicago, Illinois. The applicant's power plant will be an eligible facility.

Comment date: January 23, 2001, in accordance with Standard Paragraph E at the end of this notice. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application.

3. City of Ketchikan, Alaska

[Docket No. EL01-26-000]

Take notice that on January 2, 2001, the City of Ketchikan, Alaska, d/b/a Ketchikan Public Utilities (Petitioner or Ketchikan), submitted an Application for Limited Waiver of Regulations Implementing PURPA § 210, or in the Alternative, Request for Confirmation of Treatment of Avoided Cost, pursuant to Section 402 of the Commission's Regulations under Sections 201 and 210 of the Public Utility Regulatory Policies Act of 1978 (PURPA). Ketchikan is seeking a limited waiver of any obligation that it may have under PURPA to displace purchases from the Four Dam Pool Initial Project, with purchases from a project certified under PURPA as a qualifying facility. Alternatively, Ketchikan requests that the Commission confirm that a proper calculation of "avoided costs" under PURPA reflect the avoided costs of the Four Dam Pool Initial Project Joint Action Agency, and any waivers necessary to permit the requested confirmation of the avoided cost calculation.

Comment date: February 8, 2001, in accordance with Standard Paragraph E at the end of this notice.

4. ISO New England Inc.

[Docket No. EL00-62-016]

Take notice that on December 28, 2000, ISO New England Inc. submitted an Interim Report of Compliance in response to the Commission's June 28, 2000 Order in this proceeding.

Copies of said filing have been served upon all parties to this proceeding and upon the utility regulatory agencies of the six New England States.

Comment date: February 8, 2001, in accordance with Standard Paragraph E at the end of this notice.

5. ISO New England Inc.

[Docket Nos. EL00-62-017 and EL00-62-018]

Take notice that on January 2, 2001, ISO New England Inc. made a compliance filing as required in the Commission's December 15, 2000 Order in these proceedings. Copies of said filing have been served upon all parties to this proceeding, upon NEPOOL Participants, as well as upon the utility regulatory agencies of the six New England States.

Comment date: February 8, 2001, in accordance with Standard Paragraph E at the end of this notice.

6. Potomac Electric Power Company

[Docket No. ER00-3727-002]

Take notice that on December 22, 2000, Potomac Electric Power Company (Pepco), tendered for filing an executed Service Agreement No. 20 under Pepco's FERC Electric Tariff, First Revised Volume No. 5 with Southern Company Energy Marketing L.P. (SCEM). The unexecuted service agreement had been previously accepted for filing by the Commission in Potomac Electric Power Company, et al, 93 FERC ¶ 61,240 (2000).

The service agreement became effective on December 19, 2000.

Comment date: January 19, 2001, in accordance with Standard Paragraph E at the end of this notice.

7. Cinergy Services, Inc.

[Docket No. ER01-500-001]

Take notice that on December 27, 2000, Cinergy Services, Inc. (Cinergy), tendered for filing a Service Agreement under Cinergy's Resale, Assignment or Transfer of Transmission Rights and Ancillary Service Rights Tariff (Tariff) entered into between Cinergy and Wabash Valley Power Association, Inc.

Comment date: January 19, 2001, in accordance with Standard Paragraph E at the end of this notice.

8. Outback Power Marketing Inc.

[Docket No. ER01-297-001]

Take notice that on January 5, 2001, Outback Power Marketing Inc. (OPMI), tendered for filing with the Federal Energy Regulatory Commission a compliance filing pursuant to the Commission's order in OPMI Docket No. ER01-297-000 (Letter Order issued December 12, 2000).

Outback Power Marketing Inc. stated that it served a copy of its filing upon each person designated on the official service list compiled by the Secretary in this proceeding.

Comment date: January 26, 2001, in accordance with Standard Paragraph E at the end of this notice.

9. Fulton Cogeneration Associates, L.P.

[Docket No. ER01-324-001]

Take notice that on January 4, 2001, Fulton Cogeneration Associates, L.P. (Fulton), tendered for filing First Revised Sheet No. 1, FERC Electric Tariff, Original Volume No. 1.

Comment date: January 25, 2001, in accordance with Standard Paragraph E at the end of this notice.

10. Mississippi Power Company

[Docket No. ER01-866-000]

Take notice that on January 2, 2001, Mississippi Power Company

(Mississippi), tendered for filing a request for a waiver of certain requirements of the Fuel Adjustment Clause of its FERC Electric Tariff, First Revised Volume I (Tariff), to allow Mississippi Power to pass through the fuel adjustment clause its displaced energy cost instead of the cost of test energy from its new combined cycle units, Plant Daniel 3 & 4.

Copies of the filing were served on all customers taking service under the Tariff and on the Mississippi Public Service Commission and the Mississippi Public Utilities Staff.

Comment date: January 23, 2001, in accordance with Standard Paragraph E at the end of this notice.

11. Indeck Pepperell Power Associates

[Docket No. ER01-867-000]

Take notice that on January 2, 2001, Indeck Pepperell Power Associates, Inc. (Indeck Pepperell), tendered for filing with the Federal Energy Regulatory Commission a Power Purchase and Sale Transaction (Transaction) between Indeck Pepperell and Calpine Energy Services, L.P. (Calpine), dated January 28, 2000, for service under Rate Schedule FERC No. 1.

Indeck Pepperell requests that the Service Agreement be made effective as of January 1, 2001.

Comment date: January 23, 2001, in accordance with Standard Paragraph E at the end of this notice.

12. Western Resources, Inc.

[Docket No. ER01-868-000]

Take notice that on January 2, 2001, Western Resources, Inc. (WR), tendered for filing a Service Agreement between WR and East Kentucky Power Cooperative (EKPC). WR states that the purpose of this agreement is to permit EKPC to take service under WR's Market Based Power Sales Tariff on file with the Commission.

This agreement is proposed to be effective December 5, 2000.

Copies of the filing were served upon EKPC and the Kansas Corporation Commission.

Comment date: January 23, 2001, in accordance with Standard Paragraph E at the end of this notice.

13. Geothermal Properties, Inc.

[Docket No. ER01-869-000]

Take notice that on January 2, 2001, Geothermal Properties, Inc. (GPI), petitioned the Commission for acceptance of GPI Rate Schedule FERC No. 1; the granting of certain blanket approvals, including the authority to sell electricity at market-based rates; and the waiver of certain Commission Regulations.

GPI intends to engage in wholesale electric power and energy purchases and sales as a marketer through a wholly-owned, special purpose vehicle. GPI is not currently in the business of generating or transmitting electric power, however, GPI intends to continue the exploration and development of its geothermal leases within the Coso KGRA with a view towards developing 10 MW of capacity by December 2002 and a minimum of 40 MW of capacity by December 2004. GPI is an affiliate of the Grace Family (Grace), which has been involved in geothermal projects in The Geysers area of California having total capacity of 240 MW.

Comment date: January 23, 2001, in accordance with Standard Paragraph E at the end of this notice.

14. Alliant Energy Corporate Services, Inc.

[Docket No. ER01-870-000]

Take notice that on January 2, 2001, Alliant Energy Corporate Services, Inc. (Alliant Energy) on behalf of IES Utilities Inc. (IESU) and Wisconsin Power & Light (WPL), tendered for filing a Negotiated Capacity Transaction (Agreement) between IESU and WPL for the period January 1, 2001 through January 31, 2001. The Agreement was negotiated to provide service under the Alliant Energy System Coordination and Operating Agreement among IES Utilities Inc., Interstate Power Company, Wisconsin Power & Light Company and Alliant Energy.

Comment date: January 23, 2001, in accordance with Standard Paragraph E at the end of this notice.

15. Cabrillo Power I LLC and Cabrillo Power II LLC

[Docket No. ER01-887-000]

Take notice that on January 3, 2001, Cabrillo Power I LLC and Cabrillo Power II LLC, tendered for filing their Reliability Must Run (RMR) Agreements conformed to the terms of the Second Stipulation in Docket No. ER98-445, et al., and the Commission's Order No. 614.

This filing has been served on the California ISO, San Diego Gas & Electric Company, the California Electricity Oversight Board and the California Public Utilities Commission.

Pursuant to the terms of the Second Stipulation, these changes should be made effective as of June 1, 1999.

Comment date: January 24, 2001, in accordance with Standard Paragraph E at the end of this notice.

16. California Independent System Operator Corporation

[Docket No. ER01-871-000]

Take notice that on January 3, 2001, the California Independent System Operator Corporation (ISO), tendered for filing and acceptance a Utility Distribution Company Operating Agreement (UDC Operating Agreement) between the ISO and the City of Vernon, California (Vernon).

The ISO requested waiver of the Commission's 60-day prior notice requirement to allow the UDC Operating Agreement to be made effective as of January 1, 2001, the date on which Vernon has requested to become a Participating TO.

The ISO states that this filing has been served upon all parties in this proceeding.

Comment date: January 24, 2001, in accordance with Standard Paragraph E at the end of this notice.

17. Central Maine Power Company

[Docket No. ER01-872-000]

Take notice that on January 3, 2001, Central Maine Power Company (CMP), tendered for filing a service agreement for Long Term Firm Local Point-to-Point Transmission Service entered into with Regional Waste System, Inc. Service will be provided pursuant to CMP's Open Access Transmission Tariff, designated rate schedule CMP—FERC Electric Tariff, Original Volume No. 3, as supplemented.

Comment date: January 24, 2001, in accordance with Standard Paragraph E at the end of this notice.

18. Entergy Services, Inc.

[Docket No. ER01-873-000]

Take notice that on January 3, 2001, Entergy Services, Inc., on behalf of Entergy Arkansas, Inc., Entergy Gulf States, Inc., Entergy Louisiana, Inc., Entergy Mississippi, Inc., and Entergy New Orleans, Inc., (collectively, the Entergy Operating Companies) tendered for filing a Non-Firm Point-To-Point Transmission Service Agreement and a Short-Term Firm Point-To-Point Transmission Service Agreement both between Entergy Services, Inc., as agent for the Entergy Operating Companies, and The Legacy Energy Group, LLC.

Comment date: January 24, 2001, in accordance with Standard Paragraph E at the end of this notice.

19. California Independent System Operator Corporation

[Docket No. ER01-889-000]

Take notice that on January 4, 2001, the California Independent System Operator Corporation (ISO), tendered for

filing Amendment No. 36 to the ISO Tariff. The ISO states that Amendment No. 36 is intended to provide a temporary exemption from creditworthiness requirements for Schedule Coordinators that had an Approved Credit Rating on January 3, 2001, and are either Original Participating Transmission Owners or schedule on behalf of Original Participating Transmission Owners. The ISO will extend the temporary exemption on a day to day basis, but in no event beyond March 3, 2001.

The ISO states that this filing has been served on the California Public Utilities Commission, the California Electricity Oversight Board and all California ISO Scheduling Coordinators.

Comment date: January 25, 2001, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest such filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of these filings are on file with the Commission and are available for public inspection. This filing may also be viewed on the Internet at <http://www.ferc.fed.us/online/rims.htm> (call 202-208-2222 for assistance).

David P. Boergers,

Secretary.

[FR Doc. 01-1254 Filed 1-16-01; 8:45 am]

BILLING CODE 6717-01-P

ENVIRONMENTAL PROTECTION AGENCY

[PF-959; FRL-6599-5]

Notice of Filing a Pesticide Petition to Establish a Tolerance for a Certain Pesticide Chemical in or on Food

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the initial filing of a pesticide petition proposing the establishment of

regulations for residues of a certain pesticide chemical in or on various food commodities.

DATES: Comments, identified by docket control number PF-959, must be received on or before February 16, 2001.

ADDRESSES: Comments may be submitted by mail, electronically, or in person. Please follow the detailed instructions for each method as provided in Unit I.C. of the

SUPPLEMENTARY INFORMATION. To ensure proper receipt by EPA, it is imperative that you identify docket control number PF-959 in the subject line on the first page of your response.

FOR FURTHER INFORMATION CONTACT: By mail: Mary Waller, Registration Division (7505C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (703) 308-9354; e-mail address: waller.mary@epa.gov.

SUPPLEMENTARY INFORMATION:**I. General Information****A. Does this Action Apply to Me?**

You may be affected by this action if you are an agricultural producer, food manufacturer or pesticide manufacturer. Potentially affected categories and entities may include, but are not limited to:

| Cat-egories | NAICS | Examples of poten-tially affected entities |
|-------------|----------------------------|--|
| Industry | 111 112 311 32532 | Crop production Animal production Food manufacturing Pesticide manufac-turing |

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in the table could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether or not this action might apply to certain entities. If you have questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Additional Information, Including Copies of this Document and Other Related Documents?

1. *Electronically.* You may obtain electronic copies of this document, and

certain other related documents that might be available electronically, from the EPA Internet Home Page at <http://www.epa.gov/>. To access this document, on the Home Page select "Laws and Regulations," "Regulations and Proposed Rules," and then look up the entry for this document under the "Federal Register—Environmental Documents." You can also go directly to the **Federal Register** listings at <http://www.epa.gov/fedrgstr/>.

2. *In person.* The Agency has established an official record for this action under docket control number PF-959. The official record consists of the documents specifically referenced in this action, any public comments received during an applicable comment period, and other information related to this action, including any information claimed as confidential business information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period, is available for inspection in the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305-5805.

C. How and to Whom Do I Submit Comments?

You may submit comments through the mail, in person, or electronically. To ensure proper receipt by EPA, it is imperative that you identify docket control number PF-959 in the subject line on the first page of your response.

1. *By mail.* Submit your comments to: Public Information and Records Integrity Branch (PIRIB), Information Resources and Services Division (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460.

2. *In person or by courier.* Deliver your comments to: Public Information and Records Integrity Branch (PIRIB), Information Resources and Services Division (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA. The PIRIB is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The

PIRIB telephone number is (703) 305-5805.

3. *Electronically.* You may submit your comments electronically by e-mail to: "opp-docket@epa.gov," or you can submit a computer disk as described above. Do not submit any information electronically that you consider to be CBI. Avoid the use of special characters and any form of encryption. Electronic submissions will be accepted in Wordperfect 6.1/8.0 or ASCII file format. All comments in electronic form must be identified by docket control number PF-959. Electronic comments may also be filed online at many Federal Depository Libraries.

D. How Should I Handle CBI That I Want to Submit to the Agency?

Do not submit any information electronically that you consider to be CBI. You may claim information that you submit to EPA in response to this document as CBI by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public version of the official record. Information not marked confidential will be included in the public version of the official record without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person identified under **FOR FURTHER INFORMATION CONTACT**.

E. What Should I Consider as I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Provide specific examples to illustrate your concerns.
6. Make sure to submit your comments by the deadline in this notice.
7. To ensure proper receipt by EPA, be sure to identify the docket control number assigned to this action in the subject line on the first page of your

response. You may also provide the name, date, and **Federal Register** citation.

II. What Action is the Agency Taking?

EPA has received a pesticide petition as follows proposing the establishment and/or amendment of regulations for residues of a certain pesticide chemical in or on various food commodities under section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a. EPA has determined that this petition contains data or information regarding the elements set forth in section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data supports granting of the petition. Additional data may be needed before EPA rules on the petition.

List of Subjects

Environmental protection, Agricultural commodities, Feed additives, Food additives, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: January 2, 2001.

James Jones,

Director, Registration Division, Office of Pesticide Programs.

Summary of Petition

Petitioner summary of the pesticide petition is printed below as required by section 408(d)(3) of the FFDCA. The summary of the petition was prepared by the petitioner and represents the views of the petitioner. EPA is publishing the petition summary verbatim without editing it in any way. The petition summary announces the availability of a description of the analytical method available to EPA for the detection and measurement of the pesticide chemical residues or an explanation of why no such method is needed.

Gowan Company

PP 7F4879

EPA has received a pesticide petition (PP 7F4879) from Gowan Company, P.O. Box 5569, Yuma, AZ 85366-5569 proposing, pursuant to section 408(d) of the FFDCA, 21 U.S.C. 346a(d), to amend 40 CFR part 180 by establishing a tolerance for residues of dicloran (2,6-dichloro-4-nitroaniline) in or on the raw agricultural commodities peanuts at 3 parts per million (ppm), in peanut oil at 6 ppm. EPA received an amendment for two additional tolerances. The existing tolerances for dicloran on carrots is limited to residues resulting from post-harvest use only and the existing tolerance for dicloran on tomatoes is

limited to residues from pre-harvest use only. Gowan has proposed to expand the tolerances to permit residues resulting from pre-harvest use on carrots and post-harvest use on tomatoes. No numerical change in the current tolerance of 10 ppm on carrots and 5 ppm on tomatoes is proposed. EPA has determined that the petition contains data or information regarding the elements set forth in section 408(d)(2) of the FFDCA; however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the petition. Additional data may be needed before EPA rules on the petition.

A. Residue Chemistry

1. *Plant metabolism.* The metabolism of dicloran in peaches, lettuce and potatoes has been studied. Parent compound and numerous metabolites derived by hydroxylation and acetylation of the nitro group, along with deamination and hydroxylation of the amino group, were seen in all crops. Glutathione conjugation with simultaneous removal of one or both chlorine atoms was shown to occur.

2. *Analytical method.* An adequate analytical method (EC GLC) is available for enforcement purposes. Parent compound is the only analyte in the tolerance expression.

3. *Magnitude of residues.* Twenty-five residue trials were conducted over 4 years. Average residues of 0.61 ppm were observed in peanuts and the highest average residue observed was 2.85 ppm. An average concentration factor of 1.6X in refined peanut oil was observed.

Five pre-harvest and three combined pre-harvest plus post-harvest carrot residue trials were conducted. Residues from the proposed pre-harvest use pattern were in all cases well below the existing post-harvest tolerance of 10 ppm.

Post-harvest tomato residue studies were conducted. Variables including dilution rates, application techniques and the composition and concentration of various wax emulsions were investigated. It was concluded that the proposed post-harvest use pattern will result in residues which are below the existing tolerance of 5 ppm for pre-harvest use.

B. Toxicological Profile

1. *Acute toxicity.* The acute oral LD₅₀ of technical dicloran is greater than 10,000 milligrams/kilograms (mg/kg), the acute dermal LD₅₀ is greater than 2,000 mg/kg, and the 4-hour acute inhalation LC₅₀ is greater than 2 milligrams/liter (mg/L). Dicloran is not

a dermal irritant but is a sensitizer. Dicloran is a mild eye irritant.

2. *Genotoxicity.* The following genotoxicity tests were conducted: gene mutation (Ames tests), structural chromosome aberration (*in vivo* cytogenetic assay using human lymphocytes) and unscheduled DNA synthesis using rat hepatocytes. Results were generally negative; however, some Ames tests with the bacterium *S. typhimurium* showed a positive response. Ames tests with *E. coli* were negative. In view of the results of mammalian chronic, oncogenic and developmental studies, however, it is considered that the results of the positive Ames tests are not relevant to human toxicity.

3. *Reproductive and developmental toxicity.* In a rabbit developmental toxicity study, the maternal no observed adverse effect level (NOAEL) was 8 mg/kg/day and the maternal lowest observed adverse effect level (LOAEL) as 20 mg/kg/day. The developmental NOAEL was greater than or equal to 50 mg/kg/day, the highest dose tested.

In a rat developmental toxicity study, the maternal and embryotoxic NOAEL was 100 mg/kg/day, and the maternal and embryotoxic LOAEL was 200 mg/kg/day. The teratological NOAEL was greater than or equal to 400 mg/kg/day, the highest dose tested (HDT).

In a 2-generation rat reproduction study, the NOAEL for systemic toxicity was 250 ppm (21 mg/kg/day) on the basis of reduced bodyweight gain and increased liver and kidney weights. The NOAEL for reproductive and developmental toxicity was also 250 ppm on the basis of reduced pup weights. No other reproductive or developmental parameters were affected at any treatment level. The highest dose tested was 1,250 ppm (110 mg/kg/day).

4. *Subchronic toxicity.* In 90-day rat studies, the NOAEL was determined to be 500 ppm in the diet (44 mg/kg/day), and the LOAEL was based upon increased liver weights in both sexes and centrilobular hepatocyte enlargement in males. Similar effects, as well as an increase in blood cholesterol concentration, were observed in 90-day mouse studies, and the NOAEL was 15 mg/kg/day.

5. *Chronic toxicity.* EPA has established the reference dose (RfD) for dicloran at 0.025 mg/kg/day. The RfD for dicloran is based on a 2-year dog feeding study with a NOAEL of 2.5 mg/kg/day and an uncertainty factor of 100. The effect of concern was increased liver weight and histological changes in hepatocytes.

6. *Animal metabolism.* Dicloran is rapidly excreted by rats, goats, and

hens. Numerous metabolites derived by reduction, acetylation, hydroxylation, deamination and dechlorination were observed.

7. *Carcinogenicity.* In an 80-week mouse study, dicloran was not oncogenic when administered at dose levels up to 600 ppm (103 mg/kg/day). Heptotoxicity indicated this to be the approximate maximum tolerance dose. In a 2-year rat study, dicloran was not oncogenic when administered at 1,000 ppm (59 mg/kg/day for males and 71 mg/kg/day for females).

8. *Endocrine disruption.* Developmental toxicity studies in rats and rabbits and a reproduction study in rats gave no indication of any effects on endocrine function related to development and reproduction. Subchronic and chronic treatment did not induce any morphological changes in endocrine organs and tissues.

C. Aggregate Exposure

1. *Dietary exposure—i. Chronic exposure.* In a theoretical maximum residue concentration (TMRC) worst-case analysis, it was assumed that dicloran is used on 100% of the acreage of all crops on which it is registered, and that residues on these crops are equal to the tolerance levels. It was calculated that the chronic dietary exposure to the general U.S. population would be 0.0265 mg/kg/day, or 106% of the chronic RfD. For non-nursing infants, the most highly exposed subgroup, the chronic dietary exposure from all crops is calculated to be 409% of the RfD.

Actual dietary chronic exposure is known to be much lower. The U.S. Department of Agriculture, the U.S. Food and Drug Administration, and California have monitored residues of dicloran in foods, and tens of thousands of analyses have been performed. These databases are readily examined using the Agency's own dietary exposure software, DEEM. It is concluded that the current actual chronic dietary exposure to dicloran from all foods is less than 0.002 mg/kg/day (less than 8% of the RfD) for non-nursing infants, the most highly exposed subgroup, and less than 0.001 mg/kg/day (less than 4% of the RfD) for the general U.S. population and all other subgroups.

Novigen Sciences DEEM software was used to perform a theoretical maximum residue concentration (TMRC) analysis for peanuts, carrots, and tomatoes. Actual results of peanut and tomato processing studies with dicloran were incorporated. Dietary exposure was calculated to be equivalent to 24% of the RfD for the U.S. population, 14% for non-nursing infants and 49% for

children 1–6, the most heavily-exposed population subgroup. Given these assumptions, the total dietary exposure from all current and proposed uses would be equivalent to no more than 28% of the RfD for the U.S. population, 22% for non-nursing infants and 53% for children 1–6. These levels of exposure are acceptable.

ii. *Acute exposure.* No developmental or reproductive effects have been observed which indicate special perinatal sensitivity. Therefore, an analysis of acute exposure has not been conducted.

a. *Food.* Dicloran is registered for use on apricots, snap beans, carrots, celery, sweet cherries, cucumbers, endive, garlic, grapes, lettuce, nectarines, onions, peaches, plums, potatoes, rhubarb, sweet potatoes and tomatoes. (See 40 CFR 180.200 for specific tolerances.) The metabolism of dicloran in plants and animals is adequately understood for the purposes of these tolerances. There is a practical analytical method for detecting and measuring levels of dicloran in or on food with a limit of detection that allows monitoring of food with residues at or above the levels set in this tolerance.

b. *Drinking water.* Dicloran was not reported in the Agency's survey of pesticides in ground water from 1971–1991, nor in the Agency's 1988–1990 survey of pesticides in drinking water wells. The compound has not been reported in surface water. A small scale prospective ground water study suggests that the average residue in ground water is well below 0.001 ppm. The Agency has not conducted a detailed analysis of potential exposure to dicloran via drinking water; however, it is believed that chronic exposure from this source is very small.

2. *Non-dietary exposure.* Dicloran has no aquatic, lawn or residential uses.

D. Cumulative Effects

At this time the Agency has not reviewed available information concerning the potentially cumulative effects of dicloran and other substances that may have a common mechanism of toxicity. For purposes of this petition only, the Agency is considering only the potential risks of dicloran in its aggregate exposure.

E. Safety Determination

1. *U.S. population—Chronic risk.* If it is assumed that all crops on which dicloran is registered are treated, and if all residues on crops are assumed to be equal to the tolerance levels, then it can be calculated that the theoretical maximum residue concentration

(TMRC) is equal to 106% of the RfD for the general U.S. population and 408% of the RfD for non-nursing infants, the most highly exposed group.

Actual chronic risk is known to be much lower. Using anticipated residue concentrations, it was concluded that chronic dietary exposure to dicloran will be no more than 28% of the RfD. Exposures from drinking water and all other routes is expected to be negligible.

2. *Infants and children.* In assessing the potential for additional sensitivity of infants and children to residues of dicloran, EPA considered data from developmental toxicity studies in the rat and rabbit and reproduction studies in the rat. The developmental toxicity studies are designed to evaluate adverse effects on the developing organism resulting from pesticide exposure during prenatal development to one or both parents. Reproduction studies provide information relating to effects from exposure to the pesticide on the reproductive capability of mating animals and data on systemic toxicity.

No teratological effects have been observed with dicloran. The lowest embryotoxic NOAEL in these studies was 100 mg/kg/day, compared to a chronic NOAEL of 2.5 mg/kg/day. There is no indication of special perinatal sensitivity in the absence of maternal toxicity and thus no suggestion of special sensitivity of infants and children. It is concluded that there is a reasonable certainty of no harm to infants and children from aggregate exposure to dicloran residues.

F. International Tolerances

There are no Codex, Canadian or Mexican maximum residue levels for dicloran in peanuts. Although no numerical revisions of existing tolerance levels are proposed for carrots or tomatoes, it is noted that Canadian MRL's of 5 ppm exist for both carrots and tomatoes. Codex MRL's of 10 ppm for carrots and 0.5 ppm for tomatoes exist.

[FR Doc. 01–1352 Filed 1–16–01; 8:45 am]

BILLING CODE 6560–50–F

ENVIRONMENTAL PROTECTION AGENCY

[PF–986; FRL–6755–1]

Notice of Filing a Pesticide Petition to Establish a Tolerance for a Certain Pesticide Chemical in or on Food

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the initial filing of a pesticide petition proposing the establishment of regulations for residues of a certain pesticide chemical in or on various food commodities.

DATES: Comments, identified by docket control number PF–986, must be received on or before February 16, 2001.

ADDRESSES: Comments may be submitted by mail, electronically, or in person. Please follow the detailed instructions for each method as provided in Unit I.C. of the

SUPPLEMENTARY INFORMATION. To ensure proper receipt by EPA, it is imperative that you identify docket control number PF–961 in the subject line on the first page of your response.

FOR FURTHER INFORMATION CONTACT: By mail: Sharlene Matten, Biopesticides and Pollution Prevention Division (7511C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (703) 605–0514; e-mail address: matten.sharlene@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be affected by this action if you are an agricultural producer, food manufacturer or pesticide manufacturer. Potentially affected categories and entities may include, but are not limited to:

| Categories | NAICS codes | Examples of potentially affected entities |
|------------|----------------------------|---|
| Industry | 111 112 311 32532 | Crop production Animal production Food manufacturing Pesticide manufacturing |

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in the table could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether or not this action might apply to certain entities. If you have questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Additional Information, Including Copies of this Document and Other Related Documents?

1. *Electronically.* You may obtain electronic copies of this document, and certain other related documents that might be available electronically, from the EPA Internet Home Page at <http://www.epa.gov/>. To access this document, on the Home Page select "Laws and Regulations" and then look up the entry for this document under the "**Federal Register**—Environmental Documents." You can also go directly to the **Federal Register** listings at <http://www.epa.gov/fedrgstr/>.

2. *In person.* The Agency has established an official record for this action under docket control number PF-986. The official record consists of the documents specifically referenced in this action, any public comments received during an applicable comment period, and other information related to this action, including any information claimed as confidential business information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period, is available for inspection in the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305-5805.

C. How and to Whom Do I Submit Comments?

You may submit comments through the mail, in person, or electronically. To ensure proper receipt by EPA, it is imperative that you identify docket control number PF-986 in the subject line on the first page of your response.

1. *By mail.* Submit your comments to: Public Information and Records Integrity Branch (PIRIB), Information Resources and Services Division (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460.

2. *In person or by courier.* Deliver your comments to: Public Information and Records Integrity Branch (PIRIB), Information Resources and Services Division (7502C), Office of Pesticide

Programs (OPP), Environmental Protection Agency, Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA. The PIRIB is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305-5805.

3. *Electronically.* You may submit your comments electronically by e-mail to: "opp-docket@epa.gov", or you can submit a computer disk as described above. Do not submit any information electronically that you consider to be CBI. Avoid the use of special characters and any form of encryption. Electronic submissions will be accepted in Wordperfect 6.1/8.0 or ASCII file format. All comments in electronic form must be identified by docket control number PF-986. Electronic comments may also be filed online at many Federal Depository Libraries.

D. How Should I Handle CBI That I Want to Submit to the Agency?

Do not submit any information electronically that you consider to be CBI. You may claim information that you submit to EPA in response to this document as CBI by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public version of the official record. Information not marked confidential will be included in the public version of the official record without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person identified under **FOR FURTHER INFORMATION CONTACT**.

E. What Should I Consider as I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Provide specific examples to illustrate your concerns.

6. Make sure to submit your comments by the deadline in this notice.

7. To ensure proper receipt by EPA, be sure to identify the docket control number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

II. What Action is the Agency Taking?

EPA has received a pesticide petition as follows proposing the establishment and/or amendment of regulations for residues of certain pesticide chemical in or on various food commodities under section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a. EPA has determined that this petition contains data or information regarding the elements set forth in section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the petition. Additional data may be needed before EPA rules on the petition.

List of Subjects

Environmental protection, Agricultural commodities, Feed additives, Food additives, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: January 5, 2001.

Janet L. Andersen,

Director, Biopesticides and Pollution Prevention Division, Office of Pesticide Programs.

Summary of Petition

The petitioner summary of the pesticide petition is printed below as required by section 408(d)(3) of the FFDCA. The summary of the petition was prepared by the petitioner and represents the view of the petitioner. The petition summary announces the availability of a description of the analytical methods available to EPA for the detection and measurement of the pesticide chemical residues or an explanation of why no such method is needed.

EPA has received a pesticide petition PP 0F6191 from Platte Chemical Company, j419 18th Street, Greeley, CO 80632-0667, proposing pursuant to section 408(d) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a(d), to amend 40 CFR part 180 to establish an exemption from the requirement of a tolerance for the microbial pesticide *Alternaria destruens*.

Pursuant to section 408(d)(2)(A)(i) of the FFDCA, as amended, Platte

Chemical Company has submitted the following summary of information, data, and arguments in support of their pesticide petition. This summary was prepared by Platte Chemical Company and EPA has not fully evaluated the merits of the pesticide petition. The summary may have been edited by EPA if the terminology used was unclear, the summary contained extraneous material, or the summary unintentionally made the reader conclude that the findings reflected EPA's position and not the position of the petitioner.

Platte Chemical Company

PP 0F6191

A. Product Name and Proposed Use Practices

Alternaria destruens is a naturally occurring fungus that is pathogenic to *Cuscuta* spp., often referred to as dodder, swamp dodder, largeseed dodder, field dodder or small seed dodder. The active ingredient will infect and suppress dodder at early stages of growth. Dodder is a leafless, rootless weed that is parasitic on cranberries and other crops, directly reducing vigor. Dodder generally germinates in late spring, twining stems around the host to derive its nutrients from that plant.

Two formulations of *Alternaria destruens* are proposed, one for the control of emerging dodder and one for the control of dodder that has attached to and infested the host plant. Smolder L G, a granular product, is proposed for use on known sites of dodder infestation, as it emerges in the spring, to suppress dodder growth and seed production. Smolder L WP, a sprayable product, is proposed for use on growing dodder, as spot or area treatment to control further growth. Use sites include vegetables, fruits, field crops and non-agricultural areas such as uncultivated rights-of-way, roadsides and fallow areas.

B. Product Identity/Chemistry

1. *Identity of the pesticide and corresponding residues.* *Alternaria destruens* is a naturally occurring fungus that is pathogenic to *Cuscuta* spp., often referred to as dodder, swamp dodder, largeseed dodder, field dodder or small seed dodder. The active ingredient will infect and suppress dodder at early stages of growth. *Alternaria destruens* requires adequate moisture and temperature during the infection period (3 to 4 hours). In very dry or drought conditions, when dew is absent, the onset of the infection process might be delayed until moisture conditions return. *Alternaria destruens*

has been shown to survive in nature only on live or dead tissue of the host weed species. Survival on soil or non-susceptible plant tissue would be limited.

2. *A statement of why an analytical method for detecting and measuring the levels of the pesticide residue are not needed.* An analytical method for residues is not applicable. The use of *Alternaria destruens* calls for application to field crops at an early stage for control of dodder species. Consequently, there is a considerable time lag between application and harvesting of crops. Since survival of the organism is in part dependent on existence of the host plant, it is unlikely that application will result in the presence of *Alternaria destruens* in food crops. Residues of *Alternaria destruens* are not expected on agricultural commodities.

C. Mammalian Toxicological Profile

The active ingredient *Alternaria destruens* has been evaluated for toxicity through oral, dermal, pulmonary, intraperitoneal, and eye routes of exposure. The results of the studies have indicated there are no significant human health risks.

For the active ingredient, acute oral toxicity/pathogenicity in rats is greater than 1×10^7 cfu/animal, acute pulmonary toxicity/pathogenicity in rats is greater than 5×10^5 cfu/animal, and acute intraperitoneal toxicity/pathogenicity in rats is greater than 9.6×10^6 cfu/animal. No pathogenic or infective effects were observed in the studies. For the end-use wettable powder formulation, acute dermal toxicity in rats is greater than 5,000 mg/kg (Toxicity Category IV), acute inhalation toxicity in rats is greater than 2.03 mg/l (Toxicity Category IV), minimal eye irritation in rabbits was observed at a dose of 0.1 ml (Toxicity Category III) and no skin irritation in rabbits was observed at a dose of 0.5 ml (Toxicity Category IV). Since its discovery, no incidents of hypersensitivity have been reported by researchers, manufacturers or users.

D. Aggregate Exposure

1. *Dietary exposure—i. Food.* Dietary exposure from use of *Alternaria destruens*, as proposed, is minimal. The use of *Alternaria destruens* calls for application to field crops at an early stage for control of dodder species. Consequently, there is a considerable time lag between application and harvesting of crops. Since survival of the organism is in part dependent on existence of the host plant, it is unlikely that application will result in the

presence of *Alternaria destruens* in food crops. Residues of *Alternaria destruens* are not expected on agricultural commodities.

ii. *Drinking water.* Similarly, exposure to humans from residues of *Alternaria destruens* in consumed drinking water would be unlikely. *Alternaria destruens* is a naturally-occurring microorganism known to exist in terrestrial habitats in the presence of a host plant, it is not known to grow or thrive in aquatic environments.

2. *Non-dietary exposure.* The potential for non-dietary exposure to the general population, including infants and children, is unlikely as the proposed use sites are agricultural settings. However, non-dietary exposures would not be expected to pose any quantifiable risk due to a lack of residues of toxicological concern.

Person Protective Equipment (PPE) mitigates the potential for exposure to applicators and handlers of the proposed products, when used in agricultural settings.

E. Cumulative Exposure

It is not expected that, when used as proposed, *Alternaria destruens* would result in residues that would remain in human food items.

F. Safety Determination

1. *U.S. population.* *Alternaria destruens* is not pathogenic or infective to mammals. There have been no reports of toxins or secondary metabolites associated with the organism, and acute toxicity studies have shown that *Alternaria destruens* is non-toxic, non-pathogenic, and non-irritating. Residues of *Alternaria destruens* are not expected on agricultural commodities, and therefore, exposure to the general U.S. population, from the proposed uses, is not anticipated.

2. *Infants and children.* As mentioned above, residues of *Alternaria destruens* are not expected on agricultural commodities. There is a reasonable certainty of no harm for infants and children from exposure to *Alternaria destruens* from the proposed uses.

G. Effects on the Immune and Endocrine Systems

Alternaria destruens is a naturally-occurring microorganism. To date there is no evidence to suggest that *Alternaria destruens* functions in a manner similar to any known hormone, or that it acts as an endocrine disrupter.

H. Existing Tolerances

There is no U.S. EPA Tolerance for *Alternaria destruens*.

I. International Tolerances

A Codex Alimentarium Commission Maximum Residue Level (MRL) is not required for *Alternaria destruens*.

[FR Doc. 01-1353 Filed 1-16-01; 8:45 am]

BILLING CODE 6560-50-S

ENVIRONMENTAL PROTECTION AGENCY

[OPP-50873; FRL-6740-2]

Issuance of Experimental Use Permits

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted experimental use permits (EUPs) to the following pesticide applicants and amended certain previously granted EUPs. An EUP permits use of a pesticide for experimental or research purposes only in accordance with the limitations in the permit.

FOR FURTHER INFORMATION CONTACT: By mail: Biopesticides and Pollution Prevention Division (7511C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460.

In person or by telephone: Contact the designated person at the following address at the office location, telephone number, or e-mail address cited in each EUP: 1921 Jefferson Davis Hwy., Arlington, VA.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general. Although this action may be of particular interest to those persons who conduct or sponsor research on pesticides, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the information in this action, consult the designated contact person listed for the individual EUP.

B. How Can I Get Additional Information, Including Copies of this Document and Other Related Documents?

You may obtain electronic copies of this document from the EPA Internet Home Page at <http://www.epa.gov/>. On the Home Page select "Laws and Regulations," "Regulations and Proposed Rules," and then look up the entry for this document under the "Federal Register—Environmental Documents." You can also go directly to

the **Federal Register** listings at <http://www.epa.gov/fedrgstr/>.

II. EUPs

EPA has issued the following EUPs: 524-EUP-90, 524-EUP-92, and 524-EUP-93. Issuance. Monsanto Company, 700 Chesterfield Parkway North, St. Louis, MO 63198. The issuance of these EUPs allows the use of the plant-pesticides *Bacillus thuringiensis* Cry3Bb protein and the genetic material necessary for its production (vector ZMIR14L) in corn, *Bacillus thuringiensis* Cry3Bb protein and the genetic material necessary for its production (vector ZMIR12L) in corn, and *Bacillus thuringiensis* Cry3Bb protein and the genetic material necessary for its production (vector ZMIR13L) in corn, respectively. A notice of receipt for these EUPs was published in the **Federal Register** on December 8, 1999 (64 FR 68681) (FRL-6398-3). The EUPs were granted on April 6, 2000 and amended on May 15, 2000. 524-EUP-90 allows the planting of 1,343 acres of corn to test and evaluate genetically modified corn that has been developed to provide control of corn rootworm (*Diabrotica spp.*). The program is authorized only in the States of California, Colorado, Georgia, Hawaii, Illinois, Indiana, Iowa, Louisiana, Kansas, Michigan, Minnesota, Missouri, North Carolina, Nebraska, New York, North Dakota, Ohio, Oklahoma, Pennsylvania, Puerto Rico, South Dakota, Tennessee, Texas, Virginia, and Wisconsin. 524-EUP-92 allows the planting of 416 acres of corn to test and evaluate genetically modified corn that has been developed to provide control of corn rootworm (*Diabrotica spp.*). The program is authorized only in the States of California, Georgia, Hawaii, Illinois, Indiana, Iowa, Louisiana, Kansas, Michigan, Minnesota, Missouri, North Carolina, Nebraska, Oklahoma, Puerto Rico, South Dakota, Tennessee, Texas, Virginia, and Wisconsin. 524-EUP-93 allows the planting of 1,092 acres of corn to test and evaluate genetically modified corn that has been developed to provide control of corn rootworm (*Diabrotica spp.*). The program is authorized only in the States of California, Colorado, Georgia, Hawaii, Illinois, Indiana, Iowa, Louisiana, Kansas, Michigan, Minnesota, Missouri, North Carolina, Nebraska, New York, North Dakota, Ohio, Oklahoma, Pennsylvania, Puerto Rico, South Dakota, Tennessee, Texas, Virginia, and Wisconsin. These EUPs are effective from April 6, 2000 to April 31, 2001. These permits are issued with the limitation that all treated crops will be genetically contained and destroyed or

used for research purposes only. Nine comments were received in reply to the **Federal Register** notice announcing receipt of these applications. Non-target insect risks, ecological effects of biopesticides, the need for a transparent and scientifically rigorous process for setting conditions for registration and use of independent expert advice, insect resistance management, contamination levels of neighboring crops, and the participation of land grant university corn IPM experts in the EUP were concerns expressed during the comment period. Health, environmental, and agricultural benefits of corn rootworm protected Bt corn were also noted.

Insect resistance management and non-target organism research will be part of the testing taking place under these EUPs. Researchers will be looking at field and population levels for a wide variety of soil and surface dwelling organisms, including all major coleopteran species that are found in corn systems. This will include work on insects like collembola, carabids, and other soil invertebrates like earthworms. Land grant university researchers are involved in many of these investigations. Testing is not permitted in the vicinity of endangered beetle habitats. Based on the information submitted, no significant or irreversible hazards from Cry3Bb corn to non-target organisms are anticipated for the duration of these limited acreage programs. These EUPs are crop destruct and genetically contained. (Mike Mendelsohn; Rm. 910W16, Crystal Mall #2; telephone number: (703) 308-8715; e-mail address: mendelsohn.mike@epa.gov).

68467-EUP-2. Extensions/Amendments. Mycogen Seeds c/o Dow AgroSciences LLC, 9330 Zionsville Road, Indianapolis, IN 46268. The amendments and extensions to this EUP allow the use of the plant-pesticide *Bacillus thuringiensis* Cry1F protein and the genetic material necessary for its production (plasmid insert PHI8999) in corn plants. Notice of the original issuance of the EUP was published in the **Federal Register** on May 5, 1999 (64 FR 24161) (FRL-6078-2). Notices of receipt for several amendments were published in the **Federal Register** on February 25, 2000 (65 FR 10081) (FRL-6492-1) and on March 3, 2000 (65 FR 11575) (FRL-6495-8). On May 11, 1999, the EUP was amended to modify the containment provisions. On June 18, 1999, the EUP was amended to switch acreage between different protocols in the program at the same sites. On January 27, 2000, the EUP was amended to permit the planting of 55 acres in Puerto Rico for agronomic observation

and Liberty herbicide tolerance studies. On February 4, 2000, the EUP was amended to permit the planting of 5 acres in Hawaii for agronomic observation studies. Planting dates for all amendments mentioned above remained the same as permitted in the original EUP issuance and genetic isolation and crop destruct provisions still applied. On March 31, 2000, the EUP was extended/amended to allow the planting of 145 acres of field corn to evaluate the control of European corn borer, Southwestern corn borer, fall armyworm and black cutworm; to perform agronomic and herbicide tolerance observations; and to do breeding and observation. The program is authorized only in the States of Colorado, Georgia, Hawaii, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Mississippi, Missouri, North Carolina, Nebraska, North Dakota, Pennsylvania, Ohio, Puerto Rico, South Dakota, Tennessee, Texas, and Wisconsin. This amendment/extension of the EUP is effective from March 31, 2000 to March 31, 2001. This amendment/extension to the permit is issued with the limitation that all treated crops will be genetically contained and destroyed or used for research purposes only. On April 21, 2000, the EUP was extended/amended to allow the planting of an additional 947 acres of field corn to evaluate the control of European corn borer, Southwestern corn borer, fall armyworm and black cutworm; to perform agronomic and herbicide tolerance observations; to do hybrid production, breeding and observation; to study anthesis length; and to study insect resistance management. Additional acreage under this amendment/extension to the program is authorized only in the States of Hawaii, Iowa, Minnesota, and Nebraska. This amendment/extension of the EUP is effective from April 21, 2000 to March 31, 2001. This amendment/extension to the permit is issued with the limitation that all treated crops will be genetically contained and destroyed or used for research purposes only. Thirteen comments were received in reply to the **Federal Register** notice announcing receipt of this amendment/extension. Comments raised concerns about the labeling of food resulting from Bt corn, food safety, pollen shed/drift contamination of adjacent organic crops, the development of resistance to foliar Bt, the impact of testing on the Hawaiian environment, the impact on Bt corn on farmers in Puerto Rico, and the impact to non-target insects. Based on the information submitted, no

significant or irreversible hazards from Cry1F corn to non-target organisms are anticipated for the duration of this limited acreage program. This EUP and the extension/amendments are crop destruct and genetically contained. (Mike Mendelsohn; Rm. 910W16, Crystal Mall #2; telephone number: (703) 308-8715; e-mail address: mendelsohn.mike@epa.gov).

Persons wishing to review these EUPs are referred to the designated contact person. Inquiries concerning these permits should be directed to the persons cited above. It is suggested that interested persons call before visiting the EPA office, so that the appropriate file may be made available for inspection purposes from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

Authority: 7 U.S.C. 136.

List of Subjects

Environmental protection,
Experimental use permits.

Dated: January 10, 2001.

Janet L. Andersen,

*Director, Biopesticides and Pollution
Prevention Division, Office of Pesticide

[FR Doc. 01-1351 Filed 1-16-01; 8:45 am]

BILLING CODE 6560-50-S

ENVIRONMENTAL PROTECTION AGENCY

[FRL-6933-5]

Accidental Release Prevention Requirements; Risk Management Programs Under the Clean Air Act Section 112(r)(7); Distribution of Off- Site Consequence Analysis Information; Development of Read- Only Information Technology System and Qualified Researcher System

AGENCY: Environmental Protection
Agency.

ACTION: Notice of availability.

SUMMARY: The Environmental Protection Agency (EPA) is developing two systems for providing access to information about the potential off-site consequences of accidental chemical releases from industrial facilities. One system would provide the public with "read-only" access to the information in electronic database form. The other system would provide qualified researchers with access to the information in paper or electronic database form. Both systems are required by section 112(r) of the Clean Air Act, as revised by the Chemical

Safety Information, Site Security and Fuels Regulatory Relief Act (CSISSFRR) of 1999. In this document we describe draft plans for these systems and request public comment on the plans and related issues.

DATES: Comments should be submitted by March 19, 2001.

ADDRESSES: Comments should be mailed to: Environmental Protection Agency, Office of Air and Radiation, Docket and Information Center, Ariel Rios Building, M6102, 1200 Pennsylvania Avenue, NW., Washington DC, 20460, Attn: Docket No. A-2000-58. By Federal Express or Courier: Waterside Mall, Room M1500, 401 M Street, SW, Washington DC 20460, Attn: Docket No. A-2000-58. Comments may be submitted on a disk in Wordperfect or Word formats. Please submit comments in duplicate. The draft plan for a qualified researcher system and supporting information used to develop that plan and the draft plan for a "read-only" information system are contained in Docket No. A-2000-58. The docket is available for public inspection and copying between 8 a.m. and 5:30 p.m., Monday through Friday (except government holidays), at Waterside Mall, Room M1500, 401 M Street, S.W., Washington, DC 20460. A reasonable fee may be charged for copying. The draft qualified researcher plan and the supporting information are also available on the Internet at <http://www.epa.gov/ceppo> or by calling the Emergency Planning and Community Right-to-Know Hotline at (800) 424-9346 (in the Washington, DC metropolitan area, (703) 412-9810).

FOR FURTHER INFORMATION CONTACT: Dorothy McManus, Program Analyst, (202) 564-8606, or Vanessa Rodriguez, Chemical Engineer, (202) 564-7913, Chemical Emergency Preparedness and Prevention Office, Environmental Protection Agency (5104), 1200 Pennsylvania Avenue, NW., Washington, DC 20460.

SUPPLEMENTARY INFORMATION:

I. Background

Section 112(r)(7) of the Clean Air Act (CAA) establishes a program for the prevention and mitigation of industrial chemical accidents that could harm the surrounding community and environment. Facilities subject to the program are required to prepare risk management plans (RMPs) that include an analysis of the potential off-site consequences of hypothetical worst-case and alternative scenario chemical releases.

Under section 112(r)(7) as originally enacted, RMPs—including the off-site

consequence analysis (OCA) portions—were to be available to the public. However, concerns were raised that potential Internet distribution of the OCA portions of RMPs would pose law enforcement and national security risks. In response to these concerns, CSISSFRRRA was enacted in 1999. CSISSFRRRA amended the Clean Air Act by adding a new subparagraph (H) to section 112(r)(7).

Under CAA section 112(r)(7)(H)(ii), EPA assessed the benefits of public access to the OCA portions of the RMPs and EPA's database compiled from those portions ("OCA information"), while the Department of Justice (DOJ) assessed the risks of Internet dissemination of the same information. Based on the assessments, both agencies issued a rule on August 4, 2000, governing the distribution of paper copies of OCA information (65 FR 48108) to the public.

The rule, which is fully described and explained in the **Federal Register** notice cited above, provides two ways for the public to obtain limited access to paper copies of OCA information. First, at 50 or more federal reading rooms located across the country, any member of the public may view a paper copy of the OCA information for the facilities located in the jurisdiction of the Local Emergency Planning Committee (LEPCs) where the person lives or works. (LEPCs are established under the federal Emergency Planning and Community Right-to-Know Act (EPCRA) and generally cover one or more counties.) In addition, a member of the public may see a paper copy of the OCA information for up to 10 facilities per month without regard to where the facility is located. Reading rooms may allow the public to read and take notes from, but not remove or mechanically copy, the paper copies of OCA information.

The rule's second avenue for the public to obtain paper copies of OCA information is through state and local agencies. The rule authorizes LEPCs and related local and state agencies to provide the public with read-only access to a paper copy of the OCA information for local facilities.

Apart from the rule, CSISSFRRRA provides several other avenues for the public to access OCA information. In particular, CAA section 112(r)(7)(H)(viii) requires EPA, "[i]n consultation with the Attorney General and the heads of other appropriate Federal agencies, [to] establish an information technology system that provides for the availability to the public of off-site consequence analysis information by means of a central data

base under the control of the Federal Government that contains information that users may read, but that provides no means by which an electronic or mechanical copy of the information may be made." This provision, in short, calls on EPA to provide public access to OCA information for all facilities in electronic, read-only form.

CSISSFRRRA also includes a provision for making OCA information available to "qualified researchers." CAA section 112(r)(7)(H)(vii) requires EPA, "[i]n consultation with the Attorney General, [to] develop and implement a system for providing [OCA] information, including facility identification, to any qualified researcher, including a qualified researcher from industry or any public interest group." That section further provides that "[t]he system shall not allow the researcher to disseminate, or make available on the Internet, the [OCA] information, or any portion of the [OCA] information, received" under the system.

II. Draft System for Public Information Technology System

A. Description of Draft System

After consulting with DOJ and other appropriate agencies, EPA is considering an information technology (IT) system that would provide the public with read-only access to OCA information in electronic form by means of stand-alone or restricted computers. The computers would contain a database compiled from all of the RMPs submitted to EPA. The database would include the OCA portions of RMPs along with information about facilities' accident prevention programs, accident history and emergency response plans.

An IT system computer would provide no more than read-only access by having all of its external communication ports and disk drives removed or physically disabled so that there would be no way to attach the computer to a printer or other external device. Essentially, the only items on the computer would be a monitor, hard disk, and CD-ROM reader. There also would be locks on the case of the computer so that the hard drive could not be removed and stolen, and the case would be bolted to the desk or located in a locked room, so that the computer could not be stolen.

The same precautions would maintain EPA control of the IT system's database. That database would not be connected to EPA's central database because of the potential for hacking. However, EPA would periodically update the IT system's database to keep it reasonably current.

To make the IT system user-friendly, EPA would equip it with software that would allow users to query on various types of information, such as chemical name and industry sector. For example, users could ask the system to pull up the RMPs, including OCA information, for facilities that use a particular chemical or belong to the same industry sector. At the same time, the software would not allow queries on any OCA data elements.

EPA would introduce the IT system in one location at EPA Headquarters in Washington, D.C. That location would be open to the public during normal working hours on Mondays through Fridays. Currently, members of the public visiting EPA's headquarters must sign in and show identification to gain entry to the building. The same would be true for users of the IT system.

B. Facility Identification Issue

An important remaining issue in EPA's development of an IT system is whether the system should identify facilities by providing the name and address. The system would include all of the data in the OCA sections of RMPs (sections 2 through 5). It would also include the information in RMPs about prevention programs, accident history and emergency response plans. Members of the public using the system would thus be able to view OCA information in the context of a facility's overall risk management program. They would also be allowed to view an unlimited number of facilities' information. The issue is whether the system should reveal the names or locations of facilities.

As noted above, EPA and DOJ issued a rule that provides any member of the public with read-only access to paper copies of OCA information for facilities in the LEPC jurisdiction where the person lives or works and for up to 10 facilities per month regardless of where the facility is located. The agencies based the rule on assessments of the risks and benefits of broad public dissemination of OCA information, including facility identification. The agencies concluded that posting of a large OCA database on the Internet would pose a significant national security and law enforcement risk, while public access to OCA information would provide significant chemical safety benefits. The agencies thus decided to reduce the risk of Internet posting while preserving the public availability of OCA information by providing any member of the public with read-only access to paper copies of OCA information for a limited number of facilities.

In light of the rule and assessments underlying it, EPA is considering whether the IT system should include facility identification information. A database including that information would provide users with an efficient means of identifying and learning about facilities that may put them at risk. At the same time, such a database could undercut the security purposes that the rule's limits on public access to paper copies of OCA information are intended to serve. A database excluding the information, while not permitting users to access RMPs for named facilities, could allow users to identify and study trends in chemical safety among facilities using the same chemical or process. It could also allow users to identify facilities similar to ones for which the user had obtained read-only access to OCA information in paper form. Comparing similar facilities would allow members of the public to assess a particular facility's chemical safety practices.

EPA requests comment on the issue of whether the IT system should include facility identification information and how useful such a system would be without that information. EPA also requests comment on whether we could address any security concerns raised by an IT system with facility identification information by limiting the number of outlets for the system and adequately securing those outlets.

III. Draft System for Qualified Researcher Access to OCA Information

A. Description of Draft System

EPA has developed draft guidance, in consultation with DOJ, for implementing a qualified researcher (QR) system. The draft guidance describes the background of the RMP program, CSISSFRRA and the QR provision, the factors EPA considered relevant to developing a QR system, and the potential terms of the system itself.

As noted above, CSISSFRRA requires that the QR system not allow researchers to disseminate the OCA information, or any portion of the OCA information, they receive under the system. This restriction reflects the fact that under the system, qualified researchers are to receive the most comprehensive and manipulable form of OCA information—EPA's OCA database containing OCA data and identification information for all covered facilities. QR access to EPA's OCA database thus entails some risk of a large OCA database becoming broadly available, the same risk the rule for public access is designed to address. Consequently, EPA has sought to develop a system that

would adequately screen applicants to identify only bona fide researchers and preclude the release of OCA information in a form or to an extent that could pose that same risk.

The system described in the draft QR guidance contains potential criteria for identifying a QR, including experience in conducting research in relevant subject matter areas and ability to protect OCA information from dissemination. The draft system also calls for any QR to sign a consent agreement acknowledging that dissemination of OCA information except as authorized by law is a crime and committing the QR to protect OCA information from unauthorized dissemination. The draft consent agreement provides for significant financial penalties for failure to meet its terms.

A copy of the draft guidance is contained in Docket No. A-2000-58 and may be viewed at EPA's website or obtained by calling the EPCRA Hotline. The addresses and numbers for these outlets are provided in the "Addresses" section of this notice.

B. Facility Identification Issue

Like the IT system, the QR system raises an issue related to facility identification. As noted above, a QR will have access to OCA information, including facility identification information. A QR will also be subject to the prohibition in CSISSFRRA and the public access rule against distributing OCA information except as authorized by the law and regulations. The question EPA must still address is whether a QR should be allowed to publish OCA data, as distinct from "OCA information," for identified facilities.

"OCA information" is defined by CSISSFRRA and the public access rule as the OCA portions of RMPs and any EPA database derived from those portions. CSISSFRRA and the rule make clear that while OCA information may not be disseminated to the public except in specified ways, there is no restriction on the dissemination of the data reported in the OCA portions of RMPs so long as the data is conveyed in a format different than the OCA portions of RMPs or EPA's OCA database. (The rule captures this distinction by defining a new term, "OCA data elements," to refer to OCA data in a format other than the restricted RMP and EPA database formats.) The distinction reflects that fact that the RMP and EPA database formats are relatively easy to post on the Internet and thus pose the greatest risk of broad dissemination of a large OCA database.

At the same time, the QR provision in CSISSFRRA provides that the system "shall not allow the researcher to disseminate * * * the [OCA] information, or any portion of the [OCA] information," the researcher receives under the system. There is also concern that a QR could potentially defeat the purpose of the statutory and regulatory limits on the dissemination of "OCA information" by publishing OCA data for a large number of identified facilities. We are thus considering whether the QR system should place limits on a QR's ability to publish OCA data for identified facilities. Among the limits being considered are a bar on publication of OCA data for identified facilities and a numerical limit on the number of identified facilities for which OCA data could be published. Under either of these alternatives, there would be no limit on the amount of OCA data that a QR could publish *without* facility identification. We are also considering the alternative of not restricting the publication of OCA data for identified facilities.

We request comment on this issue and the alternatives being considered for addressing it. In particular, we would like to know why researchers might find it necessary to publish OCA data for identified facilities and the number of facilities that might be involved. Our review of past publications on chemical safety indicates that much useful research on chemical safety has been published without naming the facilities that were studied. We are aware, however, that some researchers, especially those affiliated with public interest groups, are interested in identifying facilities in an industry or geographical area that have notably good or bad safety records or programs. We are therefore interested in receiving comments on how useful a QR system would be if it were to include one or the other of the restrictions being considered.

In considering this question, it should be noted that CSISSFRRA and the rule prohibit "covered persons," including a QR, from publishing statewide or national rankings of RMP facilities based on OCA information. This prohibition is likely to lead researchers themselves to limit the number of facilities they identify, with or without OCA data. It is also worth noting that the draft QR system defines "research" as more than regurgitation or reformatting of available information. Consequently, a QR applicant must show that he or she needs OCA information to learn something new, such as industry averages and ranges. In short, an applicant cannot obtain OCA

information merely to publicize OCA data. We welcome comments on whether the QR system should include restrictions on publication of OCA data for identified facilities and, if so, what those restrictions should be. We also welcome comment on any other aspect of the draft guidance.

Dated: December 28, 2000.

Timothy Fields, Jr.,

Assistant Administrator for Solid Waste and Emergency Response.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[OPP-34191A FRL-6756-8]

PR Notice on Worker Risk Mitigation for Organophosphate Pesticides; Notice of Availability

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the availability of a Pesticide Registration (PR) Notice describing EPA's approach for managing risk to workers who may be exposed to organophosphate (OP) pesticide products by mixing, loading, applying, flagging, or otherwise handling OP pesticides, or are exposed to residues of these pesticides while performing tasks in recently treated areas. This approach generally provides for basic protective measures such as closed mixing and loading systems, enclosed cab equipment, or personal protective equipment, as well as increased restricted-entry intervals for occupational situations where revised risk assessments indicate that they are necessary and where these measures are feasible. Further, this PR Notice outlines the steps that EPA intends to take to address situations where baseline mitigation measures are not feasible, or situations where maximum feasible mitigation is still inadequate to protect workers.

FOR FURTHER INFORMATION CONTACT: Jacqueline Gwaltney, Special Review and Reregistration Division (7508C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (703) 305-6792; fax number: (703) 308-8041; e-mail address: gwaltney.jackie@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general. This action may, however, be of interest to environmental, human health, agricultural, and agricultural worker advocates; pesticide users; and persons who are or may be required to conduct testing of chemical substances under Federal Food, Drug and Cosmetic Act (FFDCA), or the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). Since other entities may also be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Additional Information, Including Copies of this Document and Other Related Documents?

1. *Electronically.* You may obtain electronic copies of this document, and certain other related documents that might be available electronically, from the EPA Internet Home Page at <http://www.epa.gov/>. To access this document, on the Home Page select "Laws and Regulations," "Regulations and Proposed Rules," and then look up the entry for this document under the **Federal Register**—Environmental Documents. You can also go directly to the **Federal Register** listings at <http://www.epa.gov/fedrgstr/>.

The OP worker risk mitigation PR notice is available on the Home Page for the Office of Pesticide Programs at <http://www.epa.gov/PR-Notices/pr2000-9.pdf>. EPA's response to public comments received on the August 6, 1999, draft PR notice is available at <http://www.epa.gov/PR-Notices/draftprworker-response.htm>. You may access information about the organophosphate pesticides at <http://www.epa.gov/pesticides/op>.

2. *In person.* The Agency has established an official record for this action under docket control number OPP-34191A. EPA previously established an official record under docket control number OPP-34191 when the Agency published an FR notice on August 6, 1999 (64 FR 41934) (FRL-6093-8), announcing the availability of the draft OP worker risk mitigation PR notice for public comment. The official record consists of the documents specifically referenced in this action, any public comments received during an applicable comment period, and other information related to

this action, including any information claimed as confidential business information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period, is available for inspection in the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305-5805.

II. What Action is the Agency Taking?

This notice announces the availability of Pesticide Registration (PR) Notice 2000-9, which presents EPA's approach for managing risks from organophosphate (OP) pesticides to occupational users. The approach described in this PR Notice applies to workers who may be exposed to OP pesticide products by mixing, loading, applying, flagging, or otherwise handling them, or by performing tasks in recently treated areas. The PR Notice outlines the six steps that EPA will follow in assessing and managing the human health risks of an OP pesticide, to evaluate risks to workers and mitigate risks of concern. It explains the protective measures that the Agency is recommending to reduce OP worker risk including use of personal protective equipment; use of engineering controls such as closed mixing and loading systems and enclosed cabs and cockpits; application modifications such as reducing the rate or frequency of pesticide applications; mechanical harvesting; and longer Restricted Entry Intervals. The PR Notice also addresses situations where the maximum feasible mitigation still is inadequate to protect workers, or where the baseline risk mitigation measures are not feasible.

The guidance set forth in this PR Notice is intended to inform manufacturers, formulators, and users of the type of risk management decisions EPA is likely to develop for the OP pesticides. These chemicals are being reviewed by the Agency as part of the larger process of implementing the Food Quality Protection Act of 1996 amendments to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Federal Food, Drug, and Cosmetic Act (FFDCA). Implementation of the FQPA amendments has been the

subject of a joint effort by EPA, USDA, and interested stakeholders known as the Tolerance Reassessment Advisory Committee (TRAC), recently replaced by the Committee to Advise on Reassessment and Transition (CARAT). Among other initiatives, TRAC established a process for public participation in the review and refinement of risk assessments for the OP pesticides and for developing risk management options. USDA, stakeholders, and the public have the opportunity to participate by submitting comments on EPA's preliminary and revised risk assessments and by providing risk management proposals. During the final phase of this process, EPA prepares an Interim Reregistration Eligibility Decision (IRED) or a Report on FQPA Tolerance Reassessment Progress and Interim Risk Management Decision (TRED) document for each OP pesticide, to implement interim risk management measures. Worker risk mitigation is but one aspect of the comprehensive mitigation strategy that is developed in concluding each individual OP assessment.

In a number of cases, the OP risk assessments show that, even with maximum feasible personal protective equipment and engineering controls, including all provisions required by the Worker Protection Standard (WPS), risks to workers still exceed EPA's levels of concern. Although each OP risk management decision and any associated mitigation measures will be implemented on a case-by-case basis, the Agency is outlining its decision process in the PR Notice because early notification to registrants will help to ensure that occupational risk management decisions for the OPs will be approached consistently and implemented quickly and equitably. EPA encourages registrants to demonstrate stewardship of their OP pesticides by adopting the protective measures described in this PR Notice prior to the Agency's completion of IRED and TRED documents for the OP chemicals, and to develop new packaging and application technologies that reduce worker exposure to pesticides. Further mitigation may be needed when the Agency issues its final, cumulative decision on the OP class of chemicals.

The PR Notice does not impose binding obligations on registrants or the Agency. The measures described will be implemented as appropriate based on chemical-specific reviews, including risk/benefit balancing where necessary, through pesticide reregistration and other decision-making processes. EPA is proposing specific worker risk

mitigation measures for individual OP pesticides in completing interim risk management decisions for these chemicals, and will implement these measures shortly thereafter. The Agency envisions managing risks to workers exposed to other classes of pesticides posing similar risks, such as the carbamates, in a similar manner.

First Aid Statements on Pesticide Product Labels, Pesticide Registration Notice; Update to Guidance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces an update to EPA guidance regarding the format and content of first aid statements on all federally regulated pesticide product labels. This notice addresses what the Agency believes is the appropriate first aid language for pesticide product labels to ensure that they continue to adequately protect the public. This notice supersedes Pesticide Registration Notice 2000-3, published in the **Federal Register** on April 19, 2000.

FOR FURTHER INFORMATION CONTACT:

Amy Breedlove, Field and External Affairs Division (7506C), Policy and Regulatory Services Branch, Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (703) 308-9069; fax number: (703) 305-5884; e-mail address: breedlove.amy@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general. This action may, however, be of interest to people who are responsible for developing, reviewing, or approving first aid information on pesticide labels. Since other entities may also be interested, the Agency has not

attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Additional Information, Including Copies of this Document and Other Related Documents?

1. *Electronically.* You may obtain electronic copies of this document, and certain other related documents that might be available electronically, from the EPA Internet Home Page at <http://www.epa.gov/>. To access this document, on the Home Page select "Laws and Regulations," "Regulations and Proposed Rules," and then look up the entry for this document under the "Federal Register—Environmental Documents." You can also go directly to the **Federal Register** listings at <http://www.epa.gov/fedrgstr/>. You may also obtain copies of the PR Notice by going directly to the Home Page for the Office of Pesticide Programs at <http://www.epa.gov/pesticides>. Under "What's New," select "Draft PR Notices," then select PR Notice 2000-1 "First Aid Statements on Pesticide Product Labels."

2. *Fax on Demand.* You may request a faxed copy of the PR Notice titled "First Aid Statements on Pesticide Product Labels," by using a faxphone to call (202) 401-0527 and selecting item 6135. You may also follow the automated menu.

3. *In person.* The Agency has previously established an official record for this action under docket control number OPP-00652. The official record consists of the documents specifically referenced in this action, any public comments received during an applicable comment period, and other information related to this action, including any information claimed as confidential business information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period, is available for inspection in the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal

holidays. The PIRIB telephone number is (703) 305-5805.

II. What Action is the Agency Taking?

The Agency is publishing guidance for appropriate first aid language for pesticide product labels. The Agency has received updated information for first aid statements and believes current pesticide product labels should be revised to reflect this information. The Agency, as a result of comments submitted in response to an earlier PR notice published in the **Federal Register** on April 19, 2000 (65 FR 20978) (FRL-6552-2), has extended the deadline until October 1, 2003, for when the Agency expects to see these revised statements and has made other changes to clarify the Agency's intent.

Ward Transformer Superfund Site Notice of Prospective Purchaser Agreement Raleigh, Wake County, NC

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed settlement.

SUMMARY: Under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), the United States Environmental Protection Agency (EPA) proposes to enter into a "Prospective Purchaser Agreement" (P.A.) concerning property that has been potentially contaminated by releases from the Ward Transformer Superfund Site (Ward Site) in Raleigh, Wake County, North Carolina (P.A. Property). EPA proposes to enter into the P.A. with Brier Creek Commons LP (Brier Creek LP). The P.A. obligates Brier Creek LP to cooperate fully with any response action EPA may take on the P.A. Property. The P.A. resolves Brier Creek LP's potential liability for the Existing Contamination at the Ward Site and/or the P.A. Property which may otherwise result from it obtaining an easement across the P.A. Property and constructing a roadway. This protection

is contingent upon Brier Creek LP fulfilling its obligations under the P.A. EPA will consider public comments on the proposed settlement for thirty (30) days.

EPA may withdraw from or modify the proposed settlement should such comments disclose facts or considerations which indicate the proposed settlement is inappropriate, improper or inadequate. Copies of the proposed settlement are available from: Ms. Paula V. Bachelor, Waste Management Division, U.S. EPA, Region 4, Atlanta Federal Center, 61 Forsyth Street, SW., Atlanta, Georgia 30303-3104, 404/562-8887.

Written comments may be submitted to Ms. Bachelor at the address noted above within thirty (30) calendar days of the date of this publication.

Dated: December 27, 2000.

James T. Miller,

Acting Chief, CERCA Program Services Branch, Waste Management Division.

BILLING CODE 6560-50-P

GENERAL SERVICES ADMINISTRATION

Office for Civil Rights; Title VI of the Civil Rights Act of 1964; Limited English Proficiency Policy Guidance for Recipients of Federal Financial Assistance

AGENCY: Office of Civil Rights, GSA.

ACTION: Notice of policy guidance with request for comment.

SUMMARY: The General Services Administration (GSA) is publishing policy guidance on Title VI's prohibition against national origin discrimination as it affects limited English proficient persons. GSA provides this policy guidance for its recipients of Federal financial assistance to ensure meaningful access to federally assisted programs and activities for persons with Limited English Proficiency (LEP). This policy guidance does not create new obligations, but rather, clarifies existing responsibilities under Title VI of the Civil Rights Act of 1964, as amended, its implementing regulations and relevant case law.

DATES: This guidance is effective immediately. Comments must be submitted on or before March 20, 2001. The Office of Civil Rights (OCR) will review all comments and will determine what modifications to the policy guidance, if any, are necessary.

ADDRESSEES: Interested persons should submit written comments to Office of

Civil Rights (AK), Room 5127, General Services Administration, 1800 F Street, NW., Washington, DC 20405. Comments may also be submitted by e-mail at evelyn.britton@gsa.gov.

FOR FURTHER INFORMATION CONTACT:

James M. Taylor or K. Evelyn Britton, Office of Civil Rights, Room 5127, General Services Administration, 1800 F Street, NW., Washington, DC 20405, telephone 202-501-0767 or 1-800-662-6376; TDD 1-888-267-7660.

Arrangements to receive the policy guidance in an alternative format may be made by contacting the named individuals.

Dated: January 10, 2001.

Madeline Caliendo,

Associate Administrator, Office of Civil Rights, General Services Administration.

Policy Guidance

1. *Subject.* Limited English proficiency policy guidance for recipients of Federal financial assistance.

2. *Purpose.* General Services Administration (GSA) provides this policy guidance for its recipients of Federal financial assistance to ensure meaningful access to federally assisted programs and activities for persons with Limited English Proficiency (LEP). This policy guidance does not create new obligations, but rather, clarifies existing responsibilities under Title VI of the Civil Rights Act of 1964, as amended, its implementing regulations and relevant case law.

3. *Dates:* This guidance is effective immediately. Comments are welcome and must be submitted on or before sixty (60) days from the date of this publication. GSA will review all comments and will determine what modifications to the policy guidance, if any, are necessary.

4. *Policy.* To improve access to federally assisted programs and activities for persons who, as a result of national origin, are limited in their English proficiency.

5. *Action Required.* All recipients of Federal financial assistance from GSA are to develop an effective plan, in writing, for ensuring meaningful access to their programs and activities by LEP persons, consistent with this guidance.

6. *Background Information.* English is the predominant language of the United States. According to the 1990 Census, English is spoken by 95% of its residents. Of those U.S. residents who speak languages other than English at home, the 1990 Census reports that 57%

above the age of four speak English "well to very well."

The United States is also home to millions of national origin minority individuals who are LEP. That is, their primary language is not English and they cannot speak, read, write or understand the English language at a level that permits them to interact effectively with recipients of Federal financial assistance. Because of language differences and the inability to effectively speak or understand English, persons with LEP may be subject to exclusion from programs or activities, experience delays or denials of services/benefits, or receive care and services/benefits from recipients of Federal financial assistance based on inaccurate or incomplete information.

Executive Order 13166 (65 FR 50119) dated August 11, 2000 and policy guidance issued by Department of Justice (DOJ) on August 11, 2000 (65 FR 50123), address the responsibility of all recipients of Federal financial assistance to ensure meaningful access for persons with LEP. GSA refers to and incorporates DOJ's policy guidance for recipients as part of this policy guidance, and for the purpose of determining compliance with this policy guidance, within the scope of Title VI of the Civil Rights of 1964, as amended, its implementing regulations and relevant case law.

This policy guidance establishes a four-step process that recipients should follow in developing an effective LEP assistance plan. A key element in this process is stakeholder input. Therefore, recipients should coordinate with local community-based organizations (i.e., stakeholders) that represent populations of LEP persons. These organizations can provide valuable input and assistance in identifying and addressing the LEP needs of the serviced population. This coordinated effort will assist in developing a practical approach in providing appropriate LEP assistance that is reasonable and cost-effective.

Some organizations representing LEP persons may include the National Council of La Raza (NCLR), the League of United Latin American Citizens (LULAC), the National Council of Asian Pacific Americans (NCAPA), the Organization of Chinese Americans (OCA), the National Congress of American Indians (NCAI), the National Urban League (NUL), the National Association for the Advancement of Colored People (NAACP), Mexican American Legal Defense and Educational Fund, Arab American Anti-Discrimination Committee and National Coalition for Haitian Rights. This is not meant to be an exhaustive listing, and

different community-based or national origin minority organizations may be available in a recipient's serviced area.

7. Legal Authority. The legal authority for OCR's enforcement actions is Title VI of the Civil Rights Act of 1964, GSA's implementing regulations, and a consistent body of case law, and is further described below.

Section 601 of Title VI of the Civil Rights Act of 1964, 42 U.S.C. Section 2000d et. seq. states: "No person in the United States shall on the ground of race, color or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance."

State and local laws may provide additional obligations to serve LEP individuals, but cannot compel recipients of Federal financial assistance to violate Title VI. For instance, given our constitutional structure, State or local "English-only" laws do not relieve an entity that receives Federal funding from its responsibilities under Federal anti-discrimination laws. Entities in States and localities with "English-only" laws are certainly not required to accept Federal funding—but if they do, they have to comply with Title VI, including its prohibition against national origin discrimination by recipients of Federal assistance. Thus, failing to make federally assisted programs and activities accessible to individuals who are LEP will, in certain circumstances, violate Title VI.

GSA's implementation regulations provide, in part, at 41 CFR 101-6.204-1:

No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program to which this subpart applies.

Specific discriminatory actions prohibited are addressed at 41 CFR 101-6.204-2:

(a)(1) In connection with any program to which this subpart applies, a recipient may not, directly or through contractual or other arrangements, on the ground of race, color, or national origin:

(i) Deny an individual any services/benefits, financial aid, or other benefit provided under the program;

(ii) Provide any service, financial aid, or other benefit to any individual which is different, or is provided in a different manner, from that provided to others under the program;

(iii) Subject an individual to segregation or separate treatment in any matter related to his receipt of any service, financial aid, or other benefit under the program;

(iv) Restrict an individual in any way in the enjoyment of any advantage or privilege enjoyed by others receiving any service, financial aid, or other benefit under the program;

(v) Treat an individual differently from others in determining whether he satisfies any admission, enrollment, quota, eligibility, membership or other requirement or condition which individuals must meet in order to be provided any service, financial aid, or other benefit provided under the program;

(vi) Deny an individual an opportunity to participate in the program through the provision of services or otherwise, or afford him an opportunity to do so which is different from that afforded others under the program * * *

Furthermore, the DOJ coordination regulations for Title VI, located at 28 CFR 42.405(d)(1), provide that:

(1) Where a significant number or proportion of the population eligible to be served or likely to be directly affected by a federally assisted program (e.g., affected by relocation) needs service or information in a language other than English in order effectively to be informed of or to participate in the program, the recipient shall take reasonable steps, considering the scope of the program and the size and concentration of such population, to provide information in appropriate languages to such persons. This requirement applies with regard to written material of the type which is ordinarily distributed to the public.

Extensive case law affirms the obligation of recipients of Federal financial assistance to ensure that persons with LEP can meaningfully access federally assisted programs. Specifically, in the case of *Lau v. Nichols*, 414 U.S. 563 (1974), the U.S. Supreme Court ruled that a public school system's failure to provide English language instruction to students of Chinese ancestry who do not speak English denied the students a meaningful opportunity to participate in a public educational program in violation of Title VI of the Civil Rights Act of 1964.

More recently, the Eleventh Circuit in *Sandoval v. Hagan*, 197 F.3d 484 (11th Cir. 1999), cert. granted sub. Nom., *Alexander v. Sandoval*, 147 L. Ed. 2d 1051 (U.S. Sept. 26, 2000) (No. 99-1908), held that the State of Alabama's policy of administering a driver's license examination in English only was a facially neutral practice that had an adverse effect on the basis of national origin, in violation of Title VI. Title VI regulations prohibit both intentional discrimination and policies and practices that appear neutral but have a discriminatory effect. Thus, a recipient's policies or practices regarding the provision of benefits and services to persons with LEP need not be

intentional to be discriminatory, but may constitute a violation of Title VI where they have an adverse effect on the ability of national origin minorities to meaningfully access programs and services.

The DOJ states in its policy guidance that Title VI does not require recipients to remove language barriers when English is an essential aspect of the program, or there is another "substantial legitimate justification for the challenged practice." See Footnote 13 of DOJ's policy guidance.

8. *Federal Financial Assistance Programs.* GSA administers two major Federal financial assistance programs, in addition to other programs of Federal financial assistance, such as the direct transfer of personal property and the allotment of space in GSA buildings. The two major programs of Federal financial assistance are the Federal Surplus Personal Property Donation Programs and the Disposal of Federal Surplus Real Property for Public Use.

a. *Federal Surplus Personal Property Donation Program.* Enables certain non-Federal agencies, institutions, organizations and certain small businesses to obtain property that the Federal Government no longer needs. The personal property includes all types and categories of property, such as hand and machine tools, office machines and supplies, furniture, appliances, medical supplies, hardware, clothing, motor vehicles, boats, airplanes, construction equipment, textiles, communications and electronic equipment and gifts or decorations given to Government officials by foreign dignitaries.

(1) Federal surplus personal property may be donated to nonprofit educational and public health activities exempt from taxation under Section 501 of the Internal Revenue Code. The property must be used to aid education or public health, and includes programs for the homeless. Eligible recipients include nonprofit educational and public health activities, such as medical institutions, hospitals, clinics, health centers, and drug abuse treatment centers; schools, colleges and universities; schools for persons with mental or physical disabilities; child care centers; educational radio and televisions licensed by the Federal Communications Commission; museums attended by the public; and libraries. Nonprofit, tax-exempt organizations that provide food, shelter, or support services to homeless people may also be eligible to receive surplus property through the donation program (i.e., soup kitchens, day centers for the homeless, food banks, shelters for battered spouses, half-way houses).

(2) Additionally, public agencies involved in such activities as conservation, economic development, education, park and recreation programs, public safety, public health, programs for the elderly, and programs for the homeless may be eligible for donations of surplus personal property. Public agencies generally include States, their departments, divisions and other instrumentalities; political subdivisions of States, including cities, counties, and other local Government units and economic development districts; instrumentalities created by compact or other agreement between State or political subdivisions; and Indian tribes, bands, groups, pueblos, or communities located on State reservations.

b. *Disposal of Federal Surplus Real Property for Public Use.* Under existing Federal law, States and local government bodies and certain nonprofit institutions may acquire Federal surplus real property at discounts of up to 100% for various types of public use. These uses include: homeless services, airports/ports, correctional, educational, historic monument, parks/recreation, public health and wildlife conservation. These disposals are usually accomplished in coordination with other Federal agencies (i.e., Department of Education (DOE), Department of Health and Human Services (DHHS), Department of Transportation (DOT), Department of Interior (DOI), Department of Housing and Urban Development (HUD).

c. *GSA Personal Property Utilization Program.* Government regulations mandate that Federal agencies, to the fullest extent practicable, use excess personal property as the first source of supply in meeting their requirements. However, certain laws provide Federal agencies with the ability to directly transfer certain excess property to non-Federal entities. For example, Executive Order 12999 (61 FR 17227, 3 CFR, 1996 comp., p. 180) provides that all Federal agencies, to the extent permitted by law, shall give highest preference to schools and nonprofit organizations, including community-based educational organizations, in the transfer of educationally useful Federal equipment. Thus, GSA recipients in this program include schools and certain community-based educational organizations.

d. *Allotment of Space.* Under existing Federal law, GSA may allot space for little or no costs to Federal Credit Unions, vending stands operated by blind persons and child care centers.

9. *Definition of Terms.* The following definitions are provided for reference.

a. *Federal financial assistance.* Grants and loan of Federal funds; grants or

donation of Federal property and interests in property; detail of Federal personnel; sale and lease of, and the permission to use (on other than a casual or transient basis) Federal property or any interest in the property without consideration or at a nominal consideration, or at a consideration which is reduced for the purposes of assisting the recipient, or in recognition of the public interest to be served by the sale or lease to the recipient; or any Federal agreement, arrangement, or other contract which has as one of its purposes the provision of assistance.

b. *Recipient:* Any State or political subdivision, any instrumentality of a State or political subdivision, any public or private agency, institution, organization, or other entity, or any person to which Federal financial assistance is extended, directly or through another recipient, except that such term does not include any ultimate beneficiary of the assistance.

c. *Person with Limited English Proficiency:* A person whose primary language is not English and whose ability to speak, read, write or understand the English language does not permit effective interaction with recipients of Federal financial assistance.

d. *Vital Documents:* A document or information will be considered vital if it contains information that is critical for accessing the recipient's program(s) and/or activities, or is required by law. Thus, vital documents include, for example, applications; consent forms; letters and notices pertaining to the reduction, denial or termination of services or benefits; and letters or notices that require a response from the beneficiary or client. Generally, entire web sites need not be translated. Only the vital information or documents within the web site should be translated. See subparagraph 11b(3) below for further discussion about web sites.

e. *Beneficiary:* Individuals and/or entities that directly or indirectly receive an advantage through the operation of a Federal program, (i.e., one who is within the serviced population of the recipient of Federal financial assistance and who ultimately benefits from those services.)

10. *LEP Procedures and Guidelines:* Executive Order 13166 (65 FR 50119) provides for a flexible standard stating that recipients of Federal financial assistance are to take reasonable steps to ensure meaningful access to their programs and activities by LEP persons. Thus, it is important that all recipients take the following steps in determining their LEP responsibilities and providing

appropriate LEP assistance. These four steps are more fully explained below, and include: (1) Conduct an assessment of the serviced population, (2) develop written LEP assistance plans, (3) implement the LEP plan, and (4) monitor the effectiveness of the LEP plan.

a. *Step 1.* Conduct an assessment of the serviced population. This assessment includes identifying the types of service(s) being provided by the recipient and determining the serviced population (i.e., individuals served by the recipient's program(s) and activities).

b. *Step 2.* Develop written LEP assistance plans. These plans should address the recipient's LEP responsibilities and the types of LEP assistance that the recipient will provide, consistent with this policy guidance. Recipients are to develop a written plan based on a balanced analysis of the following four factors, to ensure meaningful access for eligible LEP persons.

(1) *Factor 1: Number or Proportion of LEP Persons.* One factor in determining the reasonableness of a recipient's efforts in providing LEP assistance is the number or proportion of people who will be excluded from the benefits or services absent efforts to remove language barriers. The key here is to focus on persons who are eligible to access the recipient's program or activity.

The steps reasonable for a recipient that serves one LEP person a year may be different than those expected of a recipient that serves several LEP persons per day. However, those who serve a few are still subject to the requirements of Title VI of the Civil Rights Act of 1964 and Executive Order 13166 (65 FR 50119). This plan need not be intricate, and may be as simple as being prepared to use one of the commercially available language lines to obtain interpreter services within a reasonable period of time.

Methods of obtaining estimates of serviced LEP population include taking a census of contacts with LEP persons over a given period of time or using demographic data of the service area. The 1990 U. S. Census information may be found at a local library or on the Internet at www.Census.gov. The 2000 Census data may not be available until the 2001–02 timeframe. In addition to the U. S. Census, other potential resources include State and local government offices; the Mayor's office; the local school superintendent's office; the State education department; the State social services department, and local hospitals; or other elected officials

offices. Combining these methods will probably result in the most realistic and accurate estimates.

Local or State Yellow Pages may also be helpful in identifying organizations that serve or represent particular language minority populations. Local national origin minority organizations may be able to provide, or assist in obtaining, certain demographic information regarding LEP populations in the local area. The information that can be obtained and the network established in coordinating this type of effort with members of local and State government offices and minority organizations may prove to be valuable resources for recipients into the future.

(2) *Factor 2: Frequency of Contact with the Program.* Frequency of contacts between the recipient's program or activity and LEP persons is another factor to be weighed. For example, if LEP persons must access the program or activity on a daily basis, the recipient has a greater LEP responsibility than if such contact is unpredictable or infrequent.

Recipients should take into account local or regional conditions when determining frequency of contact.

Although past experience may be helpful in determining the frequency of contact, it should not be used as the exclusive criteria since the lack of prior LEP notice and assistance may have contributed to such minimal or non-existent contact.

(3) *Factor 3: Nature and Importance of the Program.* The importance of the services or benefits provided to the beneficiaries will affect the determination of the reasonable steps required. More affirmative steps are required in those programs where the denial or delay of access may have life or death implications than in programs that are not as crucial to one's day-to-day existence. For example, fire protection services are of more importance to the serviced population than access to a museum.

Recipients must also consider the importance of the program or activity to the eligible LEP population, both immediately, as well as the long-term. (i.e., what is the short-term and long-term impact to the LEP population if translation assistance is not provided?)

(4) *Factor 4: Resources Available.* The resources available to a recipient of Federal financial assistance may impact the steps that recipients take. For example, a small recipient with limited resources may not need to take the same steps as a larger recipient to provide LEP assistance in programs that have a limited number of eligible LEP persons or where the contact is infrequent.

However, small recipients are still subject to this policy guidance, although the type of LEP mitigation measures may differ from that of larger recipients. Claims of limited resources from larger entities should be well substantiated.

A recipient that has limited resources may consider exploring whether State and local government offices provide translation assistance. These offices may provide resources for the recipient's use. Also, recipients may consider contacting local minority organizations for possible translation assistance.

c. *Step 3: Implement the LEP plan.* The key to successful implementation of an effective LEP assistance plan is to ensure that the serviced population is notified regarding the availability of free LEP assistance. Also, it is important that a recipient's staff is aware of LEP responsibilities and the recipient's LEP assistance plan.

(1) Notice of LEP assistance to be provided. Each recipient of Federal financial assistance is to notify the public of available LEP assistance at no cost to the LEP person. This may be done through a brochure or poster in the language(s) identified in the location(s) where the recipient's federally assisted service(s) and/or benefits are being provided. Posters should be placed in a conspicuous place to ensure LEP persons will see it. It may also include posting such notice on the recipient's internet site(s). Sample language to use for such notice is as follows: "Language assistance is available upon request if you cannot speak or write English very well."

(2) Ensure staff is aware of LEP responsibilities. Recipients are to ensure that GSA's policy regarding LEP responsibilities is communicated to all staff members whose duties may bring them in contact with LEP persons accessing the services and/or benefits of the recipient. This communication should ensure an understanding of the types of LEP assistance being offered by the recipient, and the mechanisms in place for the staff to use when a request for LEP assistance is made.

d. *Step 4: Monitor the effectiveness of the LEP plan.* LEP assistance requirements may change over a period of time. Therefore, it is important to regularly monitor, and when appropriate, adjust the LEP procedures to ensure meaningful access for persons with LEP. New programs, activities, forms, outreach documents, etc. should be considered for translation services as they arise. In addition, to be effective, it is crucial for recipients to re-assess language assistance services at least every three years to determine the effectiveness of existing assistance. This

assessment should include a review of LEP policies and procedures (i.e., the LEP plan) with the recipient's staff. Feedback from LEP persons and community-based organizations will also provide helpful insights into the effectiveness of LEP assistance procedures.

11. *Translation Requirements.* In determining what is reasonable, the analysis should address the appropriate mix of written and oral language assistance. This includes information provided using the Internet, video and audio. When applying the four factors as outlined above, decisions should be made regarding which documents must be translated, when is oral translation necessary and whether such assistance (i.e., oral or written translation) should be immediately available or provided within a reasonable period of time.

a. *Oral Communication:* Depending on the need, options for providing oral language assistance range from hiring bilingual staff or on-staff interpreters to contracting for interpreter services as needed, engaging community volunteers, or contracting with a telephone interpreter services. Oral communication between recipients and beneficiaries often is a necessary part of the exchange of information. Proper analysis should include looking at what kind of communication (oral or written) you normally provide to an English speaking person in order to fully communicate the program to them. Thus, there may be instances where simply providing written translation may not be providing meaningful access to persons with LEP in the same manner as that provided to non-LEP beneficiaries.

b. *Written Communication:* As part of its overall language assistance program, a recipient's LEP assistance plan should provide for the translation of certain written materials in languages other than English, where a significant number or percentage of the population eligible to be served or likely to be directly affected by the program, needs services or information in a language other than English to communicate effectively. See 28 CFR 42.405(d)(1).

(1) In determining what should be translated, identify vital documents and non-vital documents. Vital documents must be translated when a significant number or percentage of the population eligible to be served, or likely to be directly affected by the recipient's program(s) or activities, seeks services or information in a language other than English to communicate effectively. For many larger documents, translation of vital information contained within the document will suffice and the

documents need not be translated in their entirety. Non-vital documents/information need not be translated.

(2) OCR recognizes that it may sometimes be difficult to draw a distinction between vital and non-vital documents, particularly when considering outreach or awareness documents. Although meaningful access to a program or activity requires an awareness of the program's existence, OCR recognizes that it would be impossible, from a practical and cost-based perspective, to translate every piece of outreach material into every language. Title VI does not require this of its recipients. However, lack of awareness regarding the existence of a particular program may effectively deny LEP persons meaningful access. Thus, it is important that recipients continually survey and assess the needs of the eligible serviced populations in order to determine whether certain critical outreach materials should be translated into other languages.

(3) The same analysis is to be used in determining the translation of web site information, forms, etc. The decision to place a document or information on the Internet will not affect whether the document or information must be translated. For example, placement on the web site should not change the recipient's original assessment regarding the number or proportion of LEP persons that comprise the intended audience for that document or information. Generally, entire web sites need not be translated. Only the vital information or documents within the web site should be translated. The four-factor analysis as outlined above determines the appropriate language(s) for translation. If the four-factor analysis determines that written information or a document should be translated, the same written document or information should be translated on the recipient's web site—if the recipient's English version of the information or document is on the web site. A notice regarding the presence of a translated document or information on the web site should be posted at an initial entry point onto the site (usually the homepage).

(4) Oral translation assistance will be provided to those persons with LEP whose language does not exist in written form. This oral translation assistance will explain the contents of vital documents.

c. *Reliability of Translation Resources and Interpretive Services:* In order to provide effective services to LEP persons, it is important to ensure the use of competent interpreters. Although it is not a requirement, membership in or accreditation by the American

Translators Association (ATA) is one indicator regarding the reliability and professionalism of language assistance vendors. However, competency does not necessarily mean formal certification as an interpreter, although certification is helpful. Yet, competency refers to more than being bilingual. It refers to demonstrated proficiency in both English and the other language, orientation and training that includes the skills and ethics of interpreting (i.e., issues of confidentiality), fundamental knowledge in both languages of terms or concepts peculiar to the program or activity, and sensitivity to the LEP person's culture.

It is also important to note that in some circumstances, verbatim translation of materials may not accurately and appropriately convey the substance of what is contained in the written language. An effective way to address this concern is to reach out to community-based organizations to review translated materials to ensure that the translation is accurate and easily understood by LEP persons.

It is recommended that a different contractor conduct a second review of a translated document, when such document is of a highly technical or complex nature. Another method of ensuring reliability of such documents is to have the document translated back into English to determine if the source document lost important meaning in its foreign translation.

Generally, it is not acceptable for recipients to rely upon an LEP individual's family members or friends to provide the interpreter services. The recipient should meet its obligations under Title VI by supplying competent language services free of cost. In rare emergency situations, the recipient may have to rely on an LEP person's family members or other persons whose language skills and competency in interpreting have not been established. Proper planning by recipients is important in order to ensure that those situations rarely occur. Therefore, it is not acceptable to rely upon an LEP person to provide his/her own interpreter, unless the LEP person requests the use of his/her own interpreter or in the case of an emergency.

12. *Examples.* The following examples are being provided to facilitate the assessment, planning and implementation of a successful LEP plan.

a. *Examples of problem areas include:* Providing services and/or benefits to LEP persons that are more limited in scope or lower in quality than those provided to other individuals;

subjecting LEP persons to unreasonable delays; limiting participation in a recipient's program(s) or activities on the basis of English proficiency; providing services and/or benefits to LEP persons that are not as effective as those provided to persons proficient in English; failing to inform LEP persons of the right to receive free interpreter services; or requiring LEP persons to provide their own interpreter.

b. *Examples of satisfactory LEP assistance include:* Having policies and procedures in place for identifying and assessing the language needs of the recipient's serviced LEP population; providing a range of oral language assistance options, appropriate to each of the recipient's circumstances; providing notice to LEP persons of the right to free language services; communicating LEP responsibilities and available services to staff members; program monitoring; establishing a plan for providing written materials in languages other than English where a significant number or percentage of the affected population needs services or information in a language other than English.

c. *Examples of applying the 4 factors:* The following are examples of how meaningful access will be assessed by OCR:

(1) *Example 1.* A small child care center has three LEP parents (two who are Chinese and one who is Cuban) whose English-speaking children attend its child care center on a regular basis. The center has a staff of six, and has limited financial resources to afford to hire bilingual staff, contract with a professional interpreter service, or translate written documents. To accommodate the language needs of their LEP parents, the Center made arrangements with a Chinese and a Hispanic community organization for trained and competent volunteer interpreters, and with a telephone interpreter language line, to interpret during parent meetings and to orally translate written documents. There have been no client complaints of inordinate delays or other service related problems with respect to LEP clients.

Application of the 4 factors to Example 1: Factor 1: The center has three LEP parents (a small number); Factor 2: The frequency of contact is every day, but mostly for greeting; Factor 3: The nature and importance of the recipient's program to the serviced population relates to the health, safety and welfare of their children (i.e., child care); Factor 4: The child care center has limited resources and a small staff.

The assistance that the child care center is providing will probably be

considered appropriate, given the center's resources, the size of staff, and the size of the LEP population. Thus, OCR would find the center in compliance with Title VI.

(2) *Example 2.* A county social service program has a large budget and serves 500,000 beneficiaries. Of the beneficiaries eligible for its services/benefits, 3,500 are LEP Chinese persons, 4,000 are LEP Hispanic persons, 2000 are LEP Vietnamese persons and about 400 are LEP Laotian persons. The county frequently encounters an LEP client, but has no policy regarding language assistance to LEP persons other than telling LEP clients to bring their own interpreters. LEP clients are provided with application and consent forms in English and, if unaccompanied by their own interpreters, must solicit the help of other clients or must return at a later date with an interpreter.

Application of the 4 factors to Example 2: Factor 1: The eligible LEP population is significant; Factor 2: The frequency of contact is frequent; Factor 3: The nature and importance of the county's program relates to the social welfare of the community it serves; Factor 4: The county has a large budget.

Given the size of the county program, its resources, the size of the eligible LEP population, the frequency of contact and the nature of the program, OCR would likely find the county in violation of Title VI and would require it to develop a comprehensive language assistance program.

d. The intent of this guidance is to provide recipients with information regarding the requirements of Title VI and its implementing regulations for providing meaningful access for LEP persons to federally assisted services and/or benefits. The examples and framework outlined above are not intended to be exhaustive. Thus, recipients have considerable flexibility in determining how to comply with their legal obligation in meeting their LEP responsibilities, and are not required to use all of the suggested methods and options listed. However, recipients must establish and implement policies and procedures for providing language assistance sufficient to fulfill their Title VI responsibilities.

13. *Compliance.* All recipients must take reasonable steps (consistent with this policy guidance) to overcome language differences that result in barriers and provide the language assistance needed to ensure that persons with LEP have meaningful access to services and benefits.

a. The failure to take all of the steps as outlined herein will not necessarily mean that a recipient has failed to

provide meaningful access to LEP persons. OCR will make assessments on a case by case basis and will consider several factors in determining whether the steps taken by a recipient provide meaningful access. (i.e., nature and importance of recipient's services to the serviced population, recipient's size, availability of financial and other resources, and frequency of contact with LEP persons).

b. Those factors include the size of the recipient and the eligible LEP population, the nature of the program or service, the objectives of the program, the total resources available, the frequency with which particular languages are encountered, and the frequency with which LEP persons come into contact with the recipient's program.

c. There are instances where recipients of Federal financial assistance from GSA may also be recipients of Federal financial assistance from other Federal agencies. For instance, hospitals and health clinics may receive financial assistance from the Department of Health and Human Services (DHHS); schools and universities may receive financial assistance from the Department of Education (DOE); police departments and other law enforcement agencies/organizations may receive financial assistance from Department of Justice (DOJ). In order to avoid the potential for confusion with such recipient organizations as to their LEP responsibilities, OCR will apply, where appropriate, the Federal agency's LEP guidance that is more specific and/or stringent regarding LEP responsibilities and assistance.

14. *Enforcement.* OCR will enforce Title VI, and the recipient's responsibility to establish LEP procedures and provide appropriate LEP assistance, consistent with enforcement procedures as provided in Title VI regulations. These procedures include complaint investigations, compliance reviews, efforts to secure voluntary compliance, and technical assistance.

GSA's Title VI regulations provide that OCR will investigate whenever it receives a complaint, report or other information that alleges or indicates possible noncompliance with Title VI. If the investigation results in a finding of compliance, OCR will inform the recipient in writing of this determination, including the basis for the determination. If the investigation results in a finding of noncompliance, OCR will inform the recipient of the noncompliance through a Letter of Findings that identifies the areas of noncompliance and the steps that must be taken to correct the noncompliance,

and will attempt to secure voluntary compliance through informal means. If the matter cannot be resolved informally, the procedure for effecting compliance as described at 41 CFR 101–6.211–2, et. seq. will be followed.

15. *Technical Assistance.* A program of language assistance should provide for effective communication between the recipient and the person with LEP so as to facilitate participation in, and meaningful access to the services and/or benefits provided by the recipient. The key to ensuring meaningful access for LEP persons is effective communication.

OCR is available to provide assistance to recipients seeking to ensure that they operate an effective language assistance program. In addition, during its investigative process, OCR is available to provide technical assistance to enable recipients to come into voluntary compliance. OCR may be reached at 202–501-0767 or toll free 1–800–662–6376, or by mail at General Services Administration, Office of Civil Rights, Title VI, 1800 F Street NW, Suite 5127, Washington, DC, 20405, for further assistance. Arrangements to receive this policy guidance in alternative format may be made by contacting OCR.

Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 639–7090. Send written comments to CDC, Desk Officer; Human Resources and Housing Branch, New Executive Office Building, Room 10235; Washington, DC 20503. Written comments should be received within 30 days of this notice.

Proposed Project

Evaluating CDC Funded Health Department HIV Prevention Programs—New—The Centers for Disease Control and Prevention (CDC), National Center for HIV, STD, and TB Prevention (NCHSTP), proposes a collection of standardized HIV evaluation data from health department grantees to ensure

delivery of the best possible HIV prevention services. The CDC needs standardized evaluation data from health department grantees for the following reasons: (1) To determine the extent to which HIV prevention efforts have contributed to a reduction in HIV transmission, (2) to improve programs to better meet that goal, (3) to help focus technical assistance and support and (4) to be accountable to stakeholders by informing them of progress made in HIV prevention nationwide.

CDC and its prevention partners have specifically identified the types of standardized evaluation data they need to be accountable for the use of federal funds and to conduct systematic analysis of HIV prevention to improve policies and programs. Generally, evaluation data that are needed (but not yet available at the national level) include the types and quality of HIV prevention interventions provided by CDC health department grantees and their grantees, the characteristics of clients targeted and reached by the interventions, and the effects of interventions on client behavior and HIV transmission.

The annual burden hours are estimated to be 1248.

| Respondents | No. of respondents | No. of forms per jurisdiction | No. of responses per respondent (per yr.) | Average burden per response (in hrs.) |
|----------------------------------|--------------------|-------------------------------|---|---------------------------------------|
| Health Department Grantees | 65 | 16 | 1 | 1.2 |

Dated: January 10, 2001.
Nancy E. Cheal,
Acting Associate Director for Policy, Planning and Evaluation, Centers for Disease Control and Prevention (CDC).

Agency Forms Undergoing Paperwork Reduction Act Review; Correction

A notice announcing Jail STD Prevalence Monitoring System was

published in the **Federal Register** on November 6, 2000, (65 FR 66546). This notice is a correction.

On page 66546, in the third column of the notice, the last line of the last paragraph, the burden hours should be changed from 1248 to 3296.

On page 66546, at the end of the notice, the burden table should be replaced with the following table:

| Respondents | No. of respondents | Avg. No. of forms/respondent | No. of responses/respondent | Avg. burden/response (in hrs.) |
|---------------------------------------|-------------------------|------------------------------|-----------------------------|--------------------------------|
| State/local health departments ... | | 4 datasets/year | | |
| A. With access to electronic data | A. 8 health departments | | A. 3/dataset | A. 96 |
| B. Without access to electronic data. | B. 8 health departments | | B. 100/dataset | B. 3,200 |

All other information and requirements of the November 6, 2000, notice remain the same.

Dated: January 10, 2001.

Nancy E. Cheal,

Acting Associate Director for Policy, Planning and Evaluation, Centers for Disease Control and Prevention (CDC).

BILLING CODE 4163-18-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Advisory Committee; Notice of Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), announcement is made of the following National Advisory body scheduled to meet during the month of January 2001.

Name: Advisory Committee on Training in Primary Care Medicine and Dentistry

Date and Time: January 31, 2001; 8:30 a.m.-5:30 p.m.

Place: The Hilton Washington Embassy Row, 2015 Massachusetts Avenue, NW., Washington, D.C. 20036.

The meeting is open to the public.

Purpose: The Advisory Committee shall (1) provide advice and recommendations to the Secretary concerning policy and program development and other matters of significance concerning activities under section 747 of the Public Health Service Act; and (2) prepare and submit to the Secretary, the Committee on Health, Education, Labor and Pensions (formerly the Committee on Labor and Human Resources) of the Senate, and the Committee on Commerce of the House of Representatives a report describing the activities of the Advisory Committee, including findings and recommendations made by the Committee concerning the activities under section 747 of the PHS Act. The Advisory Committee will meet twice each year and submit its first report to the Secretary and the Congress by November 2001.

Agenda: Discussion of the focus of the programs and activities authorized under section 747 of the Public Health Service Act. Review of the work completed to date by the two workgroups will be reviewed. Funding issues and recommendations for the future will be addressed. There will be finalization of an outline and specific content areas to be included in the Committee's first report.

Anyone interested in obtaining a roster of members, minutes of the meeting, or other relevant information should write or contact

Dr. Stan Bastacky, Deputy Executive Secretary, Advisory Committee on Training in Primary Care Medicine and Dentistry, Parklawn Building, Room 9A-21, 5600 Fishers Lane, Rockville, Maryland 20857, phone (301) 443-6326, e-mail sbastacky@hrsa.gov. The web address for the Advisory Committee is http://158.72.83.3/bhpr/dm/new_advisory_committee_on_primair.htm.

Dated: January 9, 2001.

Jane M. Harrison,

Director, Division of Policy Review and Coordination.

BILLING CODE 4160-15-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the information collection plans, call the SAMHSA Reports Clearance Officer on (301) 443-7978.

Comments are invited on: (a) whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project

Evaluation of the CMHS/CSAT Collaborative Program On Homeless Families: Women With Psychiatric, Substance Use, Or Co-Occurring Disorders and Their Dependent

Children, Phase II—New—SAMHSA's Center for Mental Health Services (CMHS) and Center for Substance Abuse Treatment (CSAT), through a set of cooperative agreements, proposes to conduct a longitudinal, multi-site evaluation study assessing mental health, substance abuse, and trauma interventions received by homeless mothers with psychiatric, substance use, or co-occurring disorders and their dependent children. The study will advance knowledge on appropriate and effective approaches to improving families residential stability, overall functioning, and ultimate self-sufficiency.

Data collection will be conducted over a 33-month period. A total of 2,000 participants will be recruited from eight to ten sites. At each site, a documented treatment intervention will be tested in comparison to an alternative treatment condition. Participants will be interviewed at baseline (within two weeks of entering a program) as well as three additional times (3 months after program entry, 9 months after program entry, and 15 months after program entry). Trained interviewers will administer the interviews to participating mothers. Information on the children will be obtained from the mother.

Key outcomes for the mothers are increased residential stability, decreased substance use, decreased psychological distress, improved mental health functioning, increased trauma recovery, improved health, improved functioning as a parent, and decreased personal violence. Outcomes for the children are reduced emotional/behavioral problems and improved school attendance.

To reduce burden and increase uniformity across the study sites, a central Coordinating Center will develop and administer common data entry and tracking computer programs. A variety of quality control procedures will also be implemented to ensure the integrity and uniformity of the data collected. Data will be submitted to the Coordinating Center via electronic means. Training and technical assistance will be provided to all sites on data submission. Sites will be asked to follow uniform procedures for submitting their data.

The estimated response burden is as follows:

| Interview | Number of respondents | Responses per respondent | Burden per response (hrs.) | Total burden hours |
|------------------------------|-----------------------|--------------------------|----------------------------|--------------------|
| Baseline | 2,000 | 1 | 1.58 | 3,160 |
| Follow-Up 1 (3 months) | 2,000 | 1 | 1.25 | 2,500 |
| Follow-Up 2 (9 months) | 2,000 | 1 | 1.25 | 2,500 |

| Interview | Number of respondents | Responses per respondent | Burden per response (hrs.) | Total burden hours |
|-------------------------------|-----------------------|--------------------------|----------------------------|--------------------|
| Follow-Up 3 (15 months) | 2,000 | 1 | 1.25 | 2,500 |
| Total | 2,000 | | | 10,660 |
| 3-yr annual average | 2,000 | | | 3,553 |

Send comments to Nancy Pearce, SAMHSA Reports Clearance Officer, Room 16-105, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857. Written comments should be received within 60 days of this notice.

Dated: January 10, 2001.

Richard Kopanda,

Executive Officer, SAMHSA.

BILLING CODE 4162-20-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a list of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (301) 443-7978.

State Prevention Needs Assessments: Alcohol and Other Drugs—(OMB No. 0930-0185, Extension)—SAMHSA's Center for Substance Abuse Prevention (CSAP) has awarded contracts to eight

States in Cohorts III and IV of the State Prevention Needs Assessment Program to collect data to assess the nature and extent of substance abuse prevention services needs. The family of prevention needs assessment studies applies a core set of measures, instruments, and methodologies developed and standardized under prior State needs assessment state contracts. These needs assessment studies will permit cross-State comparison of risk and protection variables to assist State services planning and allocation of State Block Grant funds.

CSAP is seeking a one year extension of OMB approval for the Virginia student survey to allow the second administration of the student survey and for completion of the Hawaii Community Resource Assessment survey. The annual response burden for this extension is as follows:

| Respondent | Number of respondents | Average number of responses/respondent | Average burden/response (hours) | Total burden hours |
|---|-----------------------|--|---------------------------------|--------------------|
| Currently approved: | | | | |
| Student Survey | 27,120 | 1 | .75 | 20,340 |
| Young Adult Surveys | 5,870 | 1 | .50 | 2,935 |
| Community Resource Assessment Studies | 851 | 1 | 10 | 851 |
| Special Population Studies | 1,800 | 1 | .50 | 900 |
| Current Total | 35,641 | | | 25,026 |
| Virginia Student Survey Continuation | 3,400 | 1 | .75 | 2,550 |
| Hawaii Community Resource Assessment | 190 | 1 | 1.00 | 190 |
| New Total | 3,590 | | | 2,740 |

Written comments and recommendations concerning the proposed information collection should be sent within 30 days of this notice to: Stuart Shapiro, Human Resources and Housing Branch, Office of Management and Budget, New Executive Office Building, Room 10235, Washington, D.C. 20503.

Dated: January 10, 2001.

Richard Kopanda,

Executive Officer, SAMHSA.

Endangered and Threatened Species Permit Application

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of application.

The following applicant has applied for a permit to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*).

Permit Number TE839777

Applicant: Don R. Helms, Bellevue, Iowa

The applicant requests a permit to take (capture, handle and release) the following federally listed unionid mussel species in Illinois, Indiana, Iowa, Kentucky, Minnesota, Missouri, Ohio, West Virginia, and Wisconsin: Fanshell (*Cyprogenia stegaria*), Fat pocketbook (*Potamilus capax*), Higgins' eye pearlymussel (*Lampsilis higginsii*), Scaleshell mussel (*Leptodea leptodon*), and Winged mapleleaf mussel (*Quadrula fragosa*), Clubshell (*Pleurobema clava*), Cracking pearlymussel (*Hemistena lata*),

Northern riffleshell (*Epioblasma torulosa rangiana*), Orange-footed pimpleback pearlymussel (*Plethobasus cooperianus*), Pink mucket pearlymussel (*Lampsilis orbiculata*), Ring pink mussel (*Obovaria retusa*), Rough pigtoe (*Pleurobema plenum*), Tubercled-blossom pearlymussel (*Epioblasma torulosa torulosa*), Purple cat's paw pearlymussel (*Epioblasma obliquata obliquata*), White cat's paw pearlymussel (*Epioblasma obliquata perobliqua*), and White wartyback pearlymussel (*Plethobasus cicatricosus*). The applicant requests the permit to collect the threatened and endangered mussel species in all areas located within the Upper Mississippi, Illinois, and Ohio River watersheds. Activities are proposed for studies to identify populations of listed mussel species, develop methods to minimize or avoid project related impacts to those populations, and to identify new populations of listed unionid species. The scientific research is aimed at enhancement of survival of the species in the wild.

Written data or comments should be submitted to the Regional Director, U.S. Fish and Wildlife Service, Ecological Services Operations, 1 Federal Drive, Fort Snelling, Minnesota 55111-4056, and must be received within 30 days of the date of this publication.

Documents and other information submitted with this application are available for review by any party who requests a copy of such documents from the following office within 30 days of the date of publication of this notice: U.S. Fish and Wildlife Service, Ecological Services Operations, 1 Federal Drive, Fort Snelling, Minnesota 55111-4056, peter—fasbender@fws.gov, telephone (612) 713-5343, or FAX (612) 713-5292.

Dated: January 8, 2001.

Charlie Wooley,

Assistant Regional Director, Ecological Services, Region 3, Fort Snelling, Minnesota.

Notice of Availability of an Environmental Assessment/Habitat Conservation Plan

Notice of availability of an environmental assessment/habitat conservation plan and receipt of an application for a permit for the incidental take of the Houston toad (*Bufo houstonensis*) during construction

of one single-Family residence on approximately 0.5 acres of the 10.02-Acre property out of the Daniel M. Wisaman survey, abstract no. A-341, Bastrop County, Texas (Vasquez).

SUMMARY: Arturo and Yolanda Vasquez (Applicants) have applied to the U.S. Fish and Wildlife Service (Service) for an incidental take permit pursuant to section 10(a) of the Endangered Species Act (Act). The Applicants have been assigned permit number TE-037190-0. The requested permit, which is for a period of 5 years, would authorize the incidental take of the endangered Houston toad (*Bufo houstonensis*). The proposed take would occur as a result of the construction of one single-family residence on approximately 0.5 acres of the 10.02-acre property out of the Daniel M. Wisaman Survey, Abstract No. A-341, Bastrop County, Texas.

The Service has prepared the Environmental Assessment/Habitat Conservation Plan (EA/HCP) for the incidental take application. A determination of jeopardy to the species or a Finding of No Significant Impact (FONSI) will not be made until at least 30 days from the date of publication of this notice. This notice is provided pursuant to section 10(c) of the Act and National Environmental Policy Act regulations (40 CFR 1506.6).

DATES: Written comments on the application should be received on or before February 16, 2001.

ADDRESSES: Persons wishing to review the application may obtain a copy by writing to the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Room 4102, Albuquerque, New Mexico, 87103. Persons wishing to review the EA/HCP may obtain a copy by contacting Tannika Engelhard, U.S. Fish and Wildlife Service, 10711 Burnet Road, Suite 200, Austin, Texas 78758 (512/490-0057, Ex. 242). Documents will be available for public inspection by written request, by appointment only, during normal business hours (8:00 to 4:30) at the U.S. Fish and Wildlife Service, Austin, Texas. Written data or comments concerning the application and EA/HCP should be submitted to the Supervisor, U.S. Fish and Wildlife Service, Austin, Texas, at the above address. Please refer to permit number TE-037190-0 when submitting comments.

FOR FURTHER INFORMATION CONTACT:

Tannika Engelhard at the above U.S. Fish and Wildlife Service, Austin Office.

SUPPLEMENTARY INFORMATION: Section 9 of the Act prohibits the "taking" of endangered species such as the Houston

toad. However, the Service, under limited circumstances, may issue permits to take endangered wildlife species incidental to, and not the purpose of, otherwise lawful activities. Regulations governing permits for endangered species are at 50 CFR 17.22.

Applicant: Arturo and Yolanda Vasquez plan to construct a single-family residence on approximately 0.5 acres of the 10.02-acre property out of the Daniel M. Wisaman Survey, Abstract No. A-341, Bastrop County, Texas. This action will eliminate 0.5 acres or less of Houston toad habitat and result in indirect impacts within the lot. The Applicants propose to compensate for this incidental take of the Houston toad by providing \$2,000.00 to the National Fish and Wildlife Foundation for the specific purpose of land acquisition and management within Houston toad habitat, as identified by the Service.

Bryan Arroyo,

Acting Regional Director, Region 2, Albuquerque, New Mexico.

BILLING CODE 4510-55-U

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Availability of a Draft Environmental Assessment and Preliminary Finding of No Significant Impact, and Receipt of an Application for an Incidental Take Permit for Gopher Tortoises by the Board of Water and Sewer Commissioners of the City of Mobile, Mobile County, Alabama

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

The Board of Water and Sewer Commissioners of the City of Mobile ("Board" or "Applicant") has requested an incidental take permit (ITP) pursuant to section 10(a)(1)(B) of the Endangered Species Act of 1973 (U.S.C. 1531 *et seq.*), as amended (Act). The Applicant anticipates taking the threatened gopher tortoise (*Gopherus polyphemus*) over the next 99 years. The proposed taking is incidental to the establishment of a conservation bank to mitigate take of up to 128 tortoises for residential, commercial and other development by private property owners throughout Mobile County. Under the proposed plan, the Board will sell mitigation credits to private landowners seeking incidental take of occupied gopher tortoise habitat in Mobile County. The private landowners will pay a mutually agreeable mitigation fee to the Board and allow for the relocation of the affected tortoises to the conservation bank. For each tortoise taken, private landowners will be required to cover costs associated with protecting, managing, and monitoring 1.5 acres of habitat at the conservation bank.

A more detailed description of the mitigation and minimization measures to address the effects of the Project to the gopher tortoise is provided in the Applicant's habitat conservation plan (HCP), the Service's draft Environmental Assessment (EA), and in the **SUPPLEMENTARY INFORMATION** section below.

The Service announces the availability of a draft EA and HCP for the incidental take application. Copies of the draft EA and/or HCP may be obtained by making a request to the

Regional Office (see **ADDRESSES**). Requests must be in writing to be processed. This notice also advises the public that the Service has made a preliminary determination that issuing the ITP is not a major Federal action significantly affecting the quality of the human environment within the meaning of Section 102(2)(C) of the National Environmental Policy Act of 1969, as amended (NEPA). The preliminary Finding of No Significant Impact (FONSI) is based on information contained in the draft EA and HCP. The final determination will be made no sooner than 60 days from the date of this notice. This notice is provided pursuant to section 10 of the Act and NEPA regulations (40 CFR 1506.6).

The Service specifically requests information, views, and opinions from the public via this Notice on the federal action, including the identification of any other aspects of the human environment not already identified in the Service's draft EA. Further, the Service specifically solicits information regarding the adequacy of the HCP as measured against the Service's ITP issuance criteria found in 50 CFR Parts 13 and 17.

If you wish to comment, you may submit comments by any one of several methods. Please reference permit number TE035340-0 in such comments. You may mail comments to the Service's Regional Office (see **ADDRESSES**). You may also comment via the internet to "david_dell@fws.gov". Please submit comments over the internet as an ASCII file avoiding the use of special characters and any form of encryption. Please also include your name and return address in your internet message. If you do not receive a confirmation from the Service that we have received your internet message, contact us directly at either telephone number listed below (see **FURTHER INFORMATION**). Finally, you may hand deliver comments to either Service office listed below (see **ADDRESSES**). Our practice is to make comments, including names and home addresses of respondents, available for public review during regular business hours. Individual respondents may request that we withhold their home address from the administrative record. We will honor such requests to the extent allowable by law. There may also be other circumstances in which we would withhold from the administrative record a respondent's identity, as allowable by law. If you wish us to withhold your name and address, you must state this prominently at the beginning of your comments. We will not; however, consider anonymous comments. We

will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public inspection in their entirety.

DATES: Written comments on the ITP application, draft EA, and HCP should be sent to the Service's Regional Office (see **ADDRESSES**) and should be received on or before March 19, 2001.

ADDRESSES: Persons wishing to review the application, HCP, and EA may obtain a copy by writing the Service's Southeast Regional Office, Atlanta, Georgia. Documents will also be available for public inspection by appointment during normal business hours at the Regional Office, 1875 Century Boulevard, Suite 200, Atlanta, Georgia 30345 (Attn: Endangered Species Permits), or Field Supervisor, U.S. Fish and Wildlife Service, P. O. Drawer 1190, Daphne, Alabama 36526. Written data or comments concerning the application, or HCP should be submitted to the Regional Office. Please reference permit number TE035340-0 in requests of the documents discussed herein.

FOR FURTHER INFORMATION CONTACT: Mr. David Dell, Regional HCP Coordinator, (see **ADDRESSES** above), telephone: 404/679-7313, facsimile: 404/679-7081; or Ms. Barbara Allen, Fish and Wildlife Biologist, Daphne Field Office, Alabama (see **ADDRESSES** above), telephone: 334/441-5181.

SUPPLEMENTARY INFORMATION: The gopher tortoise was listed in 1987 as a threatened species in the western part of its geographic range, west of the Tombigbee and Mobile Rivers in Alabama, Mississippi and Louisiana. The gopher tortoise is a burrowing animal that historically inhabited fire-maintained longleaf pine communities on moderately well drained to xeric soils in the Coastal Plain. These longleaf pine communities consisted of relatively open fire-maintained forests, without a closed overstory, with a well developed herbaceous plant layer of grasses and forbs. About 80% of the original habitat for gopher tortoises was lost by the time the species was listed due to conversions to urban and agricultural land use. On remaining forests, management practices converting longleaf pine to densely planted pine stands for pulpwood production, fire exclusion, and infrequently prescribed fire further reduced the open forest with grasses and forbs that tortoises need for burrowing, nesting, and feeding. Over 19,000 gopher tortoises have been estimated to occur in the listed range.

The tortoise, however, is a long-lived animal with low reproductive rates. Remaining populations, though relatively widespread, are individually small, fragmented, and usually in poor habitat without adequate reproduction for a self-sustaining viable population.

In Mobile County, Alabama, development and fragmentation of tortoise habitat are a significant threat to the remaining tortoise population of the project area. The Applicant proposes to establish a conservation bank on land owned by the Board to benefit the federally threatened gopher tortoise. This HCP provides a mechanism to address development threats to the tortoise, to provide private landowners in Mobile County with viable gopher tortoise mitigation alternatives, and to provide the Board with a financial incentive to manage its lands for the benefit of this species.

Under section 9 of the Act and its implementing regulations, "taking" of endangered and threatened wildlife is prohibited. However, the Service, under limited circumstances, may issue permits to take such wildlife if the taking is incidental to and not the purpose of otherwise lawful activities. The Applicant has prepared an HCP as required for the incidental take permit application.

Under this HCP, the Board is applying for a 10(a)(1)(B) permit which would then be extended to private landowners who have tortoises on their property through a Certificate of Inclusion. Those landowners would purchase mitigation credit(s) from the Board after review and approval by the Service. After allowing for the relocation of affected tortoises onto Board property, they would have authorization to develop their property. The 222-acre conservation bank site occurs on lands (over 7,000 acres in total) owned by the Board that are permanently protected from development and that surround Big Creek Land in western Mobile County. A significant proportion of the site contains mature longleaf pine forest on well-drained, sandy soils. The site is in need of management activities that restore more open, longleaf-pine canopy conditions, reduce hardwood encroachment, reduce invasive exotic species, and restore more natural fire regimes. In addition, the resident tortoise population is significantly depleted, thus requiring translocation of tortoises to the site in order to establish a viable population. Should conservation banking prove to be a viable strategy for the Board and conservation of the tortoise, the Board is open to considering devoting more of

the remaining 7,000 acres to serve as a gopher tortoise conservation bank.

The EA considers the environmental consequences of 5 alternatives, including the proposed action and no-action alternatives. The proposed action alternative is the issuance of a permit under section 10(a) of the Act that would authorize incidental take of up to 128 gopher tortoises from private landowners who would be required to obtain a certificate of inclusion from the Board. The proposed action would require the Applicant to implement their Habitat Conservation Plan which requires that for each tortoise taken, 1.5 acres of longleaf pine habitat at the conservation bank is restored, protected, and managed for a period of 99 years. Under the no-action alternative, the Incidental Take Permit would not be issued. There will be no concerted effort to restore, enhance, or maintain longleaf pine forest at the conservation bank owned by the Board. There is no legal obligation under the ESA for private property owners to actively manage their property for the benefit of the gopher tortoise. In the absence of this proposed ITP, much of the occupied habitat in Mobile County will be lost to benign neglect as the canopy becomes too dense to support gopher tortoises. The third alternative is to offer financial incentives to protect existing gopher tortoise habitat on private lands. This would be a useful approach for those landowners with sizeable tracts of fire-maintained longleaf pine that contain occupied habitat or habitat that is readily restorable. For this reason, in part, the Service maintains the ability to deny Certificates of Inclusion under this HCP when the agency deems that large tracts of occupied, suitable gopher tortoise habitat in Mobile County can and should be addressed through other appropriate means. The fourth alternative is to require on-site mitigation by issuing individual HCPs to landowners in Mobile county, requiring each to mitigate such take on the property where take occurs.

As stated above, the Service has made a preliminary determination that the issuance of the ITP is not a major Federal action significantly affecting the quality of the human environment within the meaning of section 102(2)(C) of NEPA. This preliminary information may be revised due to public comment received in response to this notice and is based on information contained in the draft EA and HCP.

The Service will also evaluate whether the issuance of a section 10(a)(1)(B) ITP complies with section 7 of the Act by conducting an intra-Service section 7 consultation. The

results of the biological opinion, in combination with the above findings, will be used in the final analysis to determine whether or not to issue the ITP.

Dated: January 9, 2001.

Sam D. Hamilton,

Regional Director.

Bureau of Land Management

[AK-962-1410-HY-P]

Notice for Publication; F-14870-A; Alaska Native Claims Selection

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of section 14(a) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1613(a), will be issued to Kaktovik Inupiat Corporation for 60,000 square feet (1.3774 acres). The lands, located within T. 9 N., R. 34 E., Umiat Meridian, Alaska, are more particularly described as: Lot 6, Block 1, U.S. Survey No. 4234, Townsite of Kaktovik, Alaska.

Notice of the decision will be published once a week, for four (4) consecutive weeks, in the *Arctic Sounder*. Copies of the decision may be obtained by contacting the Alaska State Office of the Bureau of Land

Management, 222 West Seventh Avenue, #13, Anchorage, Alaska 99513-7599 ((907) 271-5960).

Any party claiming a property interest which is adversely affected by the decision, an agency of the Federal government or regional corporation, shall have until February 16, 2001 to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management at the address identified above, where the requirements for filing an appeal may be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR part 4, subpart E, shall be deemed to have waived their rights.

Ronald E. Royer,

Land Law Examiner, Branch of ANCSA Adjudication.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[MT-029-1610-DH CBMP]

Extension of Scoping Period, Montana

AGENCY: Bureau of Land Management, Miles City and Billings Field Offices, Interior.

ACTION: Notice.

SUMMARY: The BLM issued a Notice of Intent to Plan in a December 19, 2000 **Federal Register** notice. This notice is to inform the public that the scoping period has been extended to January 31, 2001.

BLM is preparing an Oil and Gas Resource Management Plan (RMP) Amendment and Environmental Impact Statement (EIS) jointly with the State of Montana (State). The planning area for the BLM will be the BLM-administered oil and gas estate within the Powder River and Billings RMP areas. The planning area for the State will be potential coal bed methane development areas around the state. The RMP Amendment will be based on the existing statutory requirements and will meet the requirements of the Federal Land Policy and Management Act (FLPMA) of 1976. The RMP Amendment will guide BLM's oil and gas decisions within the Powder River and Billings RMP areas and help the State evaluate effects of further oil and gas permit applications. The Draft EIS and RMP Amendment is scheduled for completion by September 2001. The

Final EIS and Proposed RMP Amendment is scheduled for March 2002.

The public has been asked to help BLM and the State identify issues, concerns and alternatives. Draft Planning Criteria to help guide the effort have also been developed for public comment.

DATES: Any issues, concerns, or alternatives should be submitted to BLM on or before January 31, 2001.

ADDRESSES: All submissions should be sent to the following address: BLM, Mary Bloom, BLM Project Leader, 111 Garryowen Road, Miles City, Montana, 59301.

FOR FURTHER INFORMATION CONTACT:

Mary Bloom, BLM Project Leader, (406) 233-3649.

SUPPLEMENTARY INFORMATION:

Supplementary information is described in **Federal Register** Notice of Intent to Plan dated December 19, 2000, Volume 65, Number 244, pages 79422-79423.

The BLM and the State are seeking information from individuals, organizations, and agencies that may be affected by the plan. Specifically, we request any issues, concerns or alternatives that should be addressed in the plan amendment.

This notice meets the requirements of 40 CFR 1501.7 and 43 CFR 1610.2(c).

Dated: January 3, 2001.

Aden L. Seidlitz,

Associate Field Manager.

BILLING CODE 4310-70-P

DEPARTMENT OF JUSTICE

Office of Justice Programs

Agency Information Collection Activities: Proposed Collection; Comment Request

ACTION: Extension of Existing Collection: Summary of Sentenced Population Movement Annual Data Collection National Prisoner Statistics.

Office of Management and Budget approval is being sought for the information collection listed below. This proposed collection was previously published in the **Federal Register** on October 19, 2000, Vol. 65, page 62751, allowing for a 60-day public comment period.

The purpose of this notice is to allow an additional 30 days for public comments. Comments are encouraged and will be accepted for "thirty days" until February 16, 2001. This process is conducted in accordance with 5 CFR 1320.10.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information should address one or more of the following four points;

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

Overview of this Information Collection

(1) *Type of Information Collection:* Revision of a currently approved collection.

(2) *Title of the Form/Collection:* Summary of Sentenced Population Movement—National Prisoner Statistics.

(3) *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* NPS-1. Bureau of Justice Statistics.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Federal, State, and Local or Tribal Government. The National Prisoner Statistics—1 form is the only national source of information on the number of persons under jurisdiction or in custody at midyear and yearend; the number and type of admissions and releases; the number of inmate deaths by cause; counts by sex, race and Hispanic origin; number of inmates with HIV/AIDS, and prison capacity and jail backups due to crowding.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* the estimated total number of respondents is 52.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The estimated total number of annual burden hours for this collection is 338.

If you have additional comments, suggestions, or need a copy of the proposed information collection instrument with instruction, or additional information, please contact Ms. Brenda E. Dyer, Deputy Clearance Officer, United States Department of Justice, Information Management and Security Staff, Justice Management Division, Suite 1220, 1331 Pennsylvania Ave. NW, National Place Building, Washington, DC 20530.

Dated: January 10, 2001.

Brenda E. Dyer,

Department Deputy Clearance Officer, United States Department of Justice.

[FR Doc. 01-1309 Filed 1-16-01; 8:45 am]

BILLING CODE 4410-18-M

DEPARTMENT OF JUSTICE**Office of Justice Programs**

Bureau of Justice Statistics; Agency Information Collection Activities: Extension of a Currently Approved Collection; Comment Request

ACTION: Notice of Information Collection; Extension of a currently approved collection; Capital

punishment report of inmates under sentence of death.

The Department of Justice, Bureau of Justice Statistics has submitted the following information collection request for review and clearance in accordance with the Paperwork Reduction Act of 1995. Office of Management and Budget (OMB) approval is being sought for the information collection listed below. This proposed information collection was previously published in the **Federal Register** on October 19, 2000, at 65 FR 62752-62753, allowing for a 60-day public comment period on this information collection.

The purpose of this notice is to allow an additional 30 days for public comments. Comments are encouraged and will be accepted for "thirty days" until February 16, 2001. This process is conducted in accordance with 5 CFR 1320.10.

Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attn.: Department of Justice Desk Officer, Office of Management and Budget, Washington, DC 20530. Additionally, comments may be submitted to OMB via facsimile to 202-395-7285.

If you have additional comments, suggestions, or additional information, please write Jan M. Chaiken, Director, Bureau of Justice Statistics, 810 Seventh St. NW, Washington, DC 20531. If you need a copy of the collection instrument with instructions, or have additional information, please contact Tracy L. Snell at 202-616-3288, or via facsimile at 202-514-1757.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information should address one or more of the following four points:

(1) evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) evaluate the accuracy of the agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) enhance the quality, utility and clarity of the information to be collected; and

(4) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated,

electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g. permitting electronic submission of responses.

Overview of this Information Collection

(1) *Type of information collection:* Extension of a currently approved collection.

(2) *The title of the Form/Collection:* Capital Punishment Report of Inmates Under Sentence of Death.

(3) *The agency form number and the applicable component of the Department sponsoring the collection.* Form: NPS-8 Report of Inmates Under Sentence of Death; NPS-8A Update Report of Inmates Under Sentence of Death; NPS-8B Status of Death Penalty—No Statute in Force; and NPS-8C Status of Death Penalty—Statute in Force. Corrections Unit, Bureau of Justice Statistics, Office of Justice Programs, United States Department of Justice.

(4) *Affected public who will be asked to respond, as well as a brief abstract:* Primary: State Departments of Corrections and Attorneys General. Others: The Federal Bureau of Prisons. Approximately 104 respondents (two from each State, the District of Columbia, and the Federal Bureau of Prisons) responsible for keeping records on inmates under sentence of death in their jurisdiction and in their custody will be asked to provide information for the following categories: condemned inmates' demographic characteristics, legal status at the time of capital offense, capital offense for which imprisoned, number of death sentences imposed, criminal history information, reason for removal and current status if no longer under sentence of death, method of execution, and cause of death by other than by execution. The Bureau of Justice Statistics uses this information in published reports and for the U.S. Congress, Executive Office of the President, State officials, international organizations, researchers, students, the media, and others interested in criminal justice statistics.

(5) *An estimate of the total number of responses and the amount of time estimated for an average response:* 292 responses at 30 minutes each for the NPS-8; 3,452 responses at 30 minutes each for the NPS-8A; and 52 responses at 15 minutes each for the NPS-8B or NPS-8C. The 44 respondents for the NPS-8/8A and the 52 respondents for NPS-8B/8C totals 96 respondents for this data collection.

(6) *An estimate of the total public burden (in hours) associated with the collection:* 1,885 annual burden hours.

If additional information is required contact: Ms. Brenda E. Dyer, Deputy Clearance Officer, United States Department of Justice, Information Management and Security Staff, Justice Management Division, Suite 1220, National Place Building, 1331 Pennsylvania Ave. NW, Washington, DC 20530.

Dated: January 10, 2001.

Brenda E. Dyer,

Department Deputy Clearance Officer, United States Department of Justice.

BILLING CODE 4410-18-M

DEPARTMENT OF LABOR

Pension and Welfare Benefits Administration

[Prohibited Transaction Exemption 2001-01; Exemption Application Nos. D-10713, D-10714, D-10715, D-10716, and D-10717 et al.]

Grant of Individual Exemptions; General Motors Hourly-Rate Employees Pension Plan; General Motors Retirement Program for Salaried Employees; Saturn Individual Retirement Plan for Represented Team Members; Saturn Personal Choices Retirement Plan for Non-Represented Team Members; Employees' Retirement Plan for GMAC Mortgage Group; Delphi Hourly-Rate Employees Pension Plan; and Delphi Retirement Program for Salaried Employees (Collectively, the Plans)

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Grant of Individual Exemptions.

SUMMARY: This document contains exemptions issued by the Department of Labor (the Department) from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1986 (the Code).

Notices were published in the **Federal Register** of the pendency before the Department of proposals to grant such exemptions. The notices set forth a summary of facts and representations contained in each application for exemption and referred interested persons to the respective applications for a complete statement of the facts and representations. The applications have been available for public inspection at the Department in Washington, D.C. The notices also invited interested persons to submit comments on the requested exemptions to the Department. In

addition the notices stated that any interested person might submit a written request that a public hearing be held (where appropriate). The applicants have represented that they have complied with the requirements of the notification to interested persons. No public comments and no requests for a hearing, unless otherwise stated, were received by the Department.

The notices of proposed exemption were issued and the exemptions are being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978, 5 U.S.C. App. 1 (1996), transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

Statutory Findings

In accordance with section 408(a) of the Act and/or section 4975(c)(2) of the Code and the procedures set forth in 29 CFR Part 2570, Subpart B (55 FR 32836, 32847, August 10, 1990) and based upon the entire record, the Department makes the following findings:

- (a) The exemptions are administratively feasible;
- (b) They are in the interests of the plans and their participants and beneficiaries; and
- (c) They are protective of the rights of the participants and beneficiaries of the plans.

General Motors Hourly-Rate Employees Pension Plan; General Motors Retirement Program for Salaried Employees; Saturn Individual Retirement Plan for Represented Team Members; Saturn Personal Choices Retirement Plan for Non-Represented Team Members; Employees' Retirement Plan for GMAC Mortgage Group; Delphi Hourly-Rate Employees Pension Plan; and Delphi Retirement Program for Salaried Employees (Collectively, the Plans) Located in New York, New York

[Prohibited Transaction Exemption 2001-01; Exemption Application Nos. D-10713; D-10714; D-10715; D-10716; and D-10717]

Exemption

The restrictions of section 406(a) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (D) of the Code, shall not apply to (1) the past and continuing lease (the Lease) by the Plans to CB Richard Ellis, Inc. (CB Richard Ellis), a party in interest with respect to the Plans, of commercial space in a certain office building; and (2) the exercise, by CB Richard Ellis, of an option to renew the Lease for one additional term, provided that the following conditions are met:

- (a) All the terms and conditions of the Lease, including those providing CB

Richard Ellis with an option to renew the Lease, are at least as favorable to the Plans as terms and conditions the Plans could have obtained in an arm's length transaction with an unrelated party;

(b) The interests of the Plans for all purposes under the Lease, including any renewal thereof, are represented by a qualified, independent fiduciary;

(c) The rent paid by CB Richard Ellis under the Lease, including any renewal thereof, is, at all times, no less than the fair market rental value of the leased space; and

(d) The independent fiduciary monitors the Lease, and any renewal thereof, on behalf of the Plans, and takes whatever actions necessary to safeguard the interests of the Plans and their participants and beneficiaries.

EFFECTIVE DATE: This exemption is effective as of December 17, 1998, the date on which CB Richard Ellis entered into the Lease.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption, refer to the notice of proposed exemption (the Notice) published on October 19, 2000 at 65 FR 62761.

Notice to Interested Persons: The applicant was unable to notify interested persons within the time period specified in the Notice. However, the applicant stated that interested persons, including the appropriate fiduciaries of the Plans, were notified in the manner and time agreed to by the Department, by November 18, 2000. Interested persons were informed that they had 30 days to submit any written comments regarding the Notice to the Department. No written comments were received by the Department.

FOR FURTHER INFORMATION CONTACT: Ms. Karin Weng of the Department, telephone (202) 219-8881. (This is not a toll-free number.)

Care Services Employees' 401(k) Profit Sharing Plan and Trust (the Plan) Located in Beachwood, OH

[Prohibited Transaction Exemption 2001-02; Exemption Application No. D-10771]

Exemption

The restrictions of sections 406(a) and 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the (1) cash sale by the Plan, occurring on December 30, 1997, of certain assets (the Assets), to Mr. Warren L. Wolfson, a party in interest with respect to the Plan; and (2) the prospective cash resale of the Assets by the Plan to Mr. Wolfson.

This exemption is subject to the following conditions:

(a) Each sale of the Assets was or will be a one-time transaction for cash.

(b) The Plan received or will receive no less than the fair market value of the Assets at the time of each sale.

(c) The sales price for each Asset was determined or will be determined by a qualified, independent appraiser at the time of each sale transaction.

(d) The terms of the past and prospective sales transactions were or will be no less favorable to the Plan than those obtainable in similar transactions negotiated at arm's length with unrelated parties.

(e) The Plan did not incur any fees or commissions in connection with the past sale of the Assets nor will it incur any fees or commissions expenses with respect to the prospective sale of such Assets.

(f) Within 60 days of the publication, in the **Federal Register**, of the notice granting this proposed exemption, Mr. Wolfson will file a Form 5330 with the Internal Revenue Service and pay all appropriate excise taxes that may be due and owing with respect to prohibited transactions arising in connection with certain of the Assets.

EFFECTIVE DATE: This exemption is effective as of December 30, 1997 with respect to the initial sale of the Assets by the Plan to Mr. Wolfson. In addition, this exemption is effective as of the date of the grant with respect to the resale of the Assets by the Plan to Mr. Wolfson.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption, refer to the notice of proposed exemption published on October 31, 2000 at 65 FR 65011.

FOR FURTHER INFORMATION CONTACT: Ms. Jan D. Broady, Department of Labor, telephone (202) 219-8881. (This is not a toll-free number.)

IRAs for Eldon Nysether and Mark Nysether (the IRAs) Located in Seattle, Washington

[Prohibited Transaction Exemption 2001-03; Exemption Application Nos. D-10901 and D-10902]

Exemption

The sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the proposed sale by the IRAs of their interests in certain improved real property (the Property) to Sea-Land Development Corporation, a disqualified person with respect to the

IRAs,¹ provided that the following conditions are satisfied: (1) The sale is a one-time transaction for cash; (2) the IRAs pay no commissions nor other expenses relating to the sale; and (3) the sale price received by the IRAs equals the Property's fair market value, as of the date of the sale, as established by a qualified, independent appraiser.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption, refer to the notice of proposed exemption published on December 6, 2000 at 65 FR 76292.

FOR FURTHER INFORMATION CONTACT: Ms. Karin Weng of the Department, telephone (202) 219-8881. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions to which the exemptions does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) These exemptions are supplemental to and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transactional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(3) The availability of these exemptions is subject to the express condition that the material facts and representations contained in each application accurately describes all material terms of the transaction which is the subject of the exemption.

¹ Pursuant to 29 CFR 2510.3-2(d), the IRAs are not within the jurisdiction of Title I of the Act. However, there is jurisdiction under Title II of the Act, pursuant to section 4975 of the Code.

Signed at Washington, D.C., this 10th day of January, 2001.

Ivan Strasfeld,

*Director of Exemption Determinations,
Pension and Welfare Benefits Administration,
U.S. Department of Labor.*

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

Sunshine Act Meeting

January 10, 2001.

TIME AND DATE: 2:00 p.m., Wednesday, January 10, 2001.

PLACE: Room 6005, 6th Floor, 1730 K Street, NW., Washington, DC.

STATUS: Closed [Pursuant to 5 U.S.C. 552b(c)(10)].

MATTERS TO BE CONSIDERED: It was determined by a unanimous consent vote of the Commission that the Commission consider and act upon the following in closed session:

1. Disciplinary Matter, Docket No. D 2000-1.
2. Disciplinary Matter, Docket No. D 2001-1.

No earlier announcement of the meeting was possible.

CONTACT PERSON FOR FURTHER

INFORMATION: Jean Ellen (202) 653-5629/ (202) 708-9300 for TDD Relay/1-800-877-8339 for toll free.

BILLING CODE 6735-01-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 01-005]

Aerospace Safety Advisory Panel (ASAP); Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the Aerospace Safety Advisory Panel.

DATES: Thursday, February 8, 2001, 1:00 p.m. to 2:30 p.m.

ADDRESSES: National Aeronautics and Space Administration, 300 E Street, SW., Room 9H40, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Mr. David M. Lengyel, Aerospace Safety Advisory Panel Executive Director, Code Q-1, National Aeronautics and Space Administration, Washington, DC 20546, 202/358-0391, if you plan to attend.

SUPPLEMENTARY INFORMATION: The Aerospace Safety Advisory Panel will present its annual report to the National Aeronautics and Space Administration Administrator. This is pursuant to carrying out its statutory duties for which the Panel reviews, identifies, evaluates, and advises on those program activities, systems, procedures, and management activities that can contribute to program risk. Priority is given to those programs that involve the safety of human flight. The major subjects covered will be the National Space Transportation System, International Space Station, Aeronautical Operations, and Workforce Issues. The Aerospace Safety Advisory Panel is chaired by Mr. Richard D. Blomberg and is composed of nine members and eight consultants. The meeting will be open to the public up to the capacity of the room (approximately 60 persons including members of the Panel).

Dated: January 11, 2001.

Beth M. McCormick,
Advisory Committee Management Officer,
National Aeronautics and Space
Administration.

BILLING CODE 7510-01-U

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 01-003]

5th Digital Earth Community Meeting

AGENCY: National Aeronautics and Space Administration (Lead Agency).

ACTION: Notice of meeting.

SUMMARY: The Federal Interagency Digital Earth Working Group will hold the 5th Digital Earth Community Meeting that will focus on accomplishments thus far, and the future of Digital Earth. The intent of this meeting is to continue the efforts of enabling and facilitating the evolution of Digital Earth, a digital representation of the planet that will allow people to access and apply geo-spatial data from multiple resources. Federal, state, and local government along with private industry, academia and others will participate in presentations, workshops and panel discussions. Together we will educate and empower each other to

continue to develop the Digital Earth environment.

DATES: Wednesday, January 31, 2001 from 8:00 AM to 5:00 PM. Registration beginning at 7:30 AM.

ADDRESSES: Capitol Union Building, Penn State University at Harrisburg, 777 W. Harrisburg Pike, Middletown, PA 17057.

FOR FURTHER INFORMATION CONTACT: To register for the meeting, please contact PSU Continuing Education at 717-948-6505 or e-mail: pshcweb@psu.edu. If you would like to be present at this meeting, please contact Dr. Todd Bacastow at 814-863-0049 or e-mail bacastow@psu.edu. The deadline for registration is Wednesday, January 24, 2001. This is an outreach service of the College of Earth and Mineral Sciences.

SUPPLEMENTARY INFORMATION:

Format: The one day session will concentrate on presentations, workshops, and panel discussions. The status of The National Digital Earth Initiative, What is Digital Earth and Its Community, Using Digital Earth Guidelines, Developing Applications, Involving Students, and Data Accessibility will all be discussed. Upcoming conferences, organizational committees and collaborative efforts will be addressed as well. There will be space available for personal demonstrations—and discussions throughout the day. Although the meeting is open to all interested parties, time availability for presentations and demonstrations is limited and will be allocated on a first come basis. All interested parties must contact Dr. Todd Bacastow by January 17, 2001.

Web Information: Additional details on the Community Meeting will be posted to www.digitalearth.gov in the near future.

Dated: January 2, 2001.

Thomas S. Taylor,
NASA Digital Earth Program Manager.

BILLING CODE 7535-01-M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-277 and 50-278]

In the Matter of PECO Energy Company, PSEG Nuclear LLC, Delmarva Power and Light Company, Atlantic City Electric Company (Peach Bottom Atomic Power Station, Units 2 and 3); Order Approving Transfer of Licenses and Conforming Amendments

I

PECO Energy Company (PECO), PSEG Nuclear LLC, Delmarva Power and Light Company (DP&L), and Atlantic City Electric Company (ACE) are the joint owners of the Peach Bottom Atomic Power Station, Units 2 and 3 (Peach Bottom), located in York County, Pennsylvania. They hold Facility Operating Licenses Nos. DPR-44 and DPR-56 issued by the U.S. Nuclear Regulatory Commission (NRC or Commission) on October 25, 1973, and July 2, 1974, respectively, pursuant to Part 50 of Title 10 of the Code of Federal Regulations (10 CFR Part 50). Under these licenses, PECO (currently owner of 42.49 percent of each Peach Bottom unit) is authorized to possess, use, and operate the Peach Bottom units. The current nonoperating ownership interests of the other joint owners for

each Peach Bottom unit are as follows: PSEG Nuclear LLC, 42.49 percent; DP&L, 7.51 percent; and ACE, 7.51 percent.

II

By an Order dated April 21, 2000, the NRC approved the transfer of the subject Peach Bottom licenses from DP&L and ACE to PECO and PSEG Nuclear LLC. Conforming license amendments were also approved. The April 21, 2000, Order was in response to an application dated December 21, 1999, as supplemented February 11, March 2, and March 16, 2000, and was based in part on the DP&L and ACE interests in the licenses and in the facility being transferred simultaneously, as well as the accumulated decommissioning funds of DP&L and ACE being transferred collectively to the decommissioning trusts of PECO and PSEG Nuclear LLC. The April 21, 2000, Order, with respect to the DP&L and ACE license transfers that were proposed to PECO, was issued in the context of PECO then existing as a stand-alone electric utility, and did not expressly approve the DP&L and ACE license transfers to PECO as it now exists as a subsidiary of Exelon Corporation. Further, the Order did not approve DP&L and ACE license transfers to Exelon Generation Company LLC (EGC), which is to be formed as an indirect subsidiary of Exelon Corporation. The NRC did, however, issue Orders dated August 3, 2000, and October 5, 2000, that respectively approved the direct transfer of the Peach Bottom licenses, to the extent now held by PECO, to EGC, and the indirect transfer of the Peach Bottom licenses, again to the extent now held by PECO, to Exelon Corporation (which indirect transfer occurred on October 20, 2000, by reason of PECO becoming at that time a wholly-owned subsidiary of Exelon Corporation).

By application dated October 10, 2000, PECO, PSEG Nuclear LLC, DP&L, and ACE requested approvals as necessary to allow the Peach Bottom licenses, to the extent now held by DP&L and ACE, to be transferred to PECO (as a subsidiary of Exelon Corporation), to EGC (whether the transferor(s) are DP&L, ACE, or PECO), and to PSEG Nuclear LLC, at two different times, namely, the DP&L transfers first, and the ACE transfers second, if at all. The October 10, 2000, application also requested that the NRC extend the effectiveness of the April 21, 2000, Order to December 31, 2001. No physical changes or changes in the management or operations of the Peach Bottom units are proposed in the

application. The application also requested the approval of conforming license amendments to reflect the license transfers that are the subject of the application. The proposed amendments would delete references in the licenses to DP&L and ACE as licensees, as each respective interest is transferred, and add EGC to the licenses at the appropriate time.

Approval of the transfers encompassed by the October 10, 2000, application and conforming license amendments was requested pursuant to 10 CFR 50.80 and 50.90. A notice of the license transfer application and the conforming amendment request, and an opportunity for a hearing was published in the **Federal Register** on November 27, 2000 (65 FR 70740). No hearing requests or written comments were filed.

Pursuant to 10 CFR 50.80, no license, or any right thereunder, shall be transferred, directly or indirectly, through transfer of control of the license, unless the Commission gives its consent in writing. After reviewing the information submitted in the October 10, 2000, application, the Orders referenced above dated April 21, August 3, and October 5, 2000, and the underlying applications and safety evaluations regarding those Orders, and other information before the Commission, the NRC staff has determined that PSEG Nuclear LLC is qualified to hold, in addition to the interests in the licenses it presently holds, (1) one-half of the interest in the Peach Bottom licenses now held by DP&L, and (2) one-half of the interest in the Peach Bottom licenses now held by ACE; that PECO, as it presently exists as a subsidiary of Exelon Corporation, is qualified to hold, in addition to the interests in the licenses it presently holds, (1) one-half of the interest in the Peach Bottom licenses now held by DP&L, and (2) one-half of the interest in the Peach Bottom licenses now held by ACE; and that EGC is qualified to hold, in addition to the interests in the licenses that it may hold by virtue of transfers from PECO previously and separately approved by the August 3, 2000, Order, (1) one-half of the interest in the Peach Bottom licenses now held by DP&L, which one-half interest may be first transferred to PECO and then to EGC or may be directly transferred to EGC from DP&L, and (2) one-half of the interest in the Peach Bottom licenses now held by ACE, which one-half interest may be first transferred to PECO and then to EGC or may be directly transferred to EGC from ACE; and that each transfer of the licenses, as described, is otherwise consistent with applicable provisions of law,

regulations, and orders issued by the Commission, subject to the conditions described herein. The NRC staff has further found that the application for the proposed license amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations set forth in 10 CFR Chapter I; the facility will operate in conformity with the application, the provisions of the Act, and the rules and regulations of the Commission; there is reasonable assurance that the activities authorized by the proposed license amendments can be conducted without endangering the health and safety of the public and that such activities will be conducted in compliance with the Commission's regulations; the issuance of the proposed license amendments will not be inimical to the common defense and security or to the health and safety of the public; and the issuance of the proposed license amendments will be in accordance with 10 CFR Part 51 of the Commission's regulations and all applicable requirements have been satisfied. These findings are supported by a safety evaluation dated December 27, 2000.

III

Accordingly, pursuant to Sections 161b, 161i, and 184 of the Atomic Energy Act of 1954, as amended, 42 U.S.C. 2201(b), 2201(i), and 2234; and 10 CFR 50.80, *It Is Hereby Ordered* that each license transfer described in Section II of this Order is approved, subject to the following conditions:

1. DP&L shall transfer to the PECO or EGC decommissioning trusts for Peach Bottom, as appropriate to the transferee, and to the PSEG Nuclear LLC decommissioning trusts for Peach Bottom at the time DP&L's interests in the Peach Bottom licenses are transferred to PECO or EGC and to PSEG Nuclear LLC, all of DP&L's accumulated decommissioning trust funds for Peach Bottom Units 2 and 3, divided equally between the PECO or EGC trusts, as appropriate to the transferee, and the PSEG Nuclear LLC trusts. Immediately following such transfer, the amounts in the PECO or EGC and PSEG Nuclear LLC decommissioning trusts combined with the additional payments from ACE that would be owed to PECO or EGC and to PSEG Nuclear LLC under the respective contractual commitments referenced in the application, which contractual commitments shall be in force and effect at the time of the transfer, and that in turn would be contributed to the respective decommissioning trusts as represented

in the application must, with respect to the interests in Peach Bottom Units 2 and 3 transferred from DP&L that PECO or EGC and PSEG Nuclear LLC would then hold, be at a level no less than the formula amounts under 10 CFR Section 50.75.

2. ACE shall transfer to the PECO or EGC decommissioning trusts for Peach Bottom, as appropriate to the transferee, and to the PSEG Nuclear LLC decommissioning trusts for Peach Bottom at the time ACE's interests in the Peach Bottom licenses are transferred to PECO or EGC and to PSEG Nuclear LLC, all of ACE's accumulated decommissioning trust funds for Peach Bottom Units 2 and 3. Immediately following such transfer, the amounts in the PECO or EGC and PSEG Nuclear LLC decommissioning trusts must, with respect to the interests in Peach Bottom Units 2 and 3 transferred from DP&L and ACE that PECO or EGC and PSEG Nuclear LLC would then hold, be at a level no less than the formula amounts under 10 CFR Section 50.75.

3. The decommissioning trust agreements for Peach Bottom Units 2 and 3, with respect to decommissioning trust funds held by EGC and PSEG Nuclear LLC shall provide or continue to provide essentially that:

a. The agreement must be in a form acceptable to the NRC.

b. Investments in the securities or other obligations of the respective parent of the respective licensee, i.e., EGC or PSEG Nuclear LLC, affiliates thereof, or their successors or assigns, shall be prohibited. In addition, except for investments tied to market indexes or other non-nuclear sector mutual funds, investments in any entity owning one or more nuclear power plants shall be prohibited.

c. No disbursements or payments from the trust, other than for ordinary administrative expenses, shall be made by the trustee until the trustee has first given the NRC 30 days prior written notice of the payment. In addition, no disbursements or payments from the trust shall be made if the trustee receives prior written notice of objection from the Director, Office of Nuclear Reactor Regulation.

d. The trust agreement shall not be modified in any material respect without prior written notification to the Director, Office of Nuclear Reactor Regulation.

e. The trustee, investment advisor, or anyone else directing the investments made in the trust shall adhere to a "prudent investor" standard, as specified in 18 CFR 35.32(a)(3) of the Federal Energy Regulatory Commission's regulations.

4. With respect to each transfer approved by this Order, after receipt of all required regulatory approvals, the relevant transferor and transferee shall inform the Director, Office of Nuclear Reactor Regulation, in writing of such receipt and of the date of closing of the transfer no later than 1 business day before the date of closing. If any transfer approved by this Order is not completed by December 31, 2001, this Order shall become null and void with respect to such transfer; provided, however, on application and for good cause shown, such date may be extended.

It Is Further Ordered that, consistent with 10 CFR 2.1315(b), license amendments that make changes, as indicated in Enclosure 2 to the cover letter forwarding this Order, to conform the Peach Bottom licenses to reflect the subject transfers are approved. Such amendments as appropriate to the particular license transfer occurring shall be issued and made effective at the time the proposed corresponding license transfer is completed.

It Is Further Ordered that to the extent the previous Order, issued April 21, 2000, related to the license transfers approved by this Order, is inconsistent with this Order, the April 21, 2000, Order is hereby superseded. Also, condition 2 of the April 21, 2000, Order is modified to supplement the reference to PECO with a reference to EGC in the alternative, as appropriate to the actual transferee. In addition, for good cause shown in the application, namely, the delay in receiving other necessary regulatory approvals, the approval of any concurrent transfer of one-half of the DP&L interests and one-half of the ACE interests in the Peach Bottom licenses to PSEG Nuclear LLC shall remain effective until December 31, 2001, under the applicable terms and conditions set forth in the April 21, 2000, Order.

This Order is effective upon issuance.

For further details with respect to this Order, see the application dated October 10, 2000, and the related safety evaluation issued with this Order. Also see the application dated December 21, 1999, and supplements thereto dated February 11, March 2, and March 16, 2000, and the Orders and related safety evaluations dated August 3, and October 5, 2000, pertaining to related Peach Bottom license transfers involving EGC and PECO, which may be examined, and/or copied for a fee, at the NRC's Public Document Room, located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, MD, and are accessible electronically through the ADAMS Public Electronic Reading

Room link at the NRC Web site <http://www.nrc.gov>.

Dated at Rockville, Maryland, this 27th day of December 2000.

For the Nuclear Regulatory Commission.

Jacqueline E. Silber,

Acting Director, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

UNITED STATES POSTAL SERVICE BOARD OF GOVERNORS

Sunshine Act Meeting

Board Votes to Close January 10, 2001, Meeting

In person and by telephone on January 10, 2001, a majority of the Board of Governors of the United States Postal Service voted to close to public observation its meeting held in Washington, DC, via teleconference. The Board determined that prior public notice was not possible.

ITEM CONSIDERED:

1. Business Initiative.

PERSONS EXPECTED TO ATTEND:

Governors Ballard, Daniels, del Junco, Dyhrkopp, Fineman, Kessler, McWherter, Rider and Walsh; Postmaster General Henderson, Deputy Postmaster General Nolan, Secretary to the Board Hunter, and General Counsel Gibbons.

GENERAL COUNSEL CERTIFICATION: The General Counsel of the United States Postal Service has certified that the meeting was properly closed under the government in the Sunshine Act.

CONTACT PERSON FOR MORE INFORMATION:

Requests for information about the meeting should be addressed to the Secretary of the Board, David G. Hunter, at (202) 268-4800.

David G. Hunter,

Secretary.

BILLING CODE 7710-12-M

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act; Meeting

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of January 15, 2001.

A closed meeting will be held on Thursday, January 18, 2001, at 11:00 a.m.

Commissioner Hunt, as duty officer, determined that no earlier notice thereof was possible.

Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who have an interest in the matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(A) and (10), permit consideration of the scheduled matters at the closed meeting.

The subject matters of the closed meeting will be:

- Institution and settlement of injunctive actions; and
- Institution and settlement of administrative proceedings of an enforcement nature.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: the Office of the Secretary at (202) 942-7070.

Dated: January 12, 2001.

Jonathan G. Katz,
Secretary.

[Declaration of Disaster #3315]

State of Arkansas; Amendment #1

In accordance with a notice received from the Federal Emergency Management Agency, dated January 8, 2001, the above-numbered Declaration is hereby amended to establish the incident period for this disaster as beginning on December 12, 2000 and continuing through January 8, 2001.

All other information remains the same, i.e., the deadline for filing applications for physical damage is February 27, 2001 and for economic injury the deadline is October 1, 2001. (Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008.)

Dated: January 10, 2001.

Herbert L. Mitchell,

Associate Administrator for Disaster Assistance.

BILLING CODE 8025-01-P

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster #3316]

State of Oklahoma

As a result of the President's major disaster declaration on January 5, 2001, I find that the following Counties in the State of Oklahoma constitute a disaster area due to damages caused by a severe winter ice storm beginning on December 25, 2000 and continuing: Adair, Atoka, Bryan, Carter, Cherokee, Choctaw,

Cleveland, Coal, Cotton, Creek, Garvin, Grady, Haskell, Hughes, Jefferson, Johnston, Latimer, LeFlore, Lincoln, Love, Marshall, McClain, McCurtain, McIntosh, Murray, Muskogee, Okfuskee, Oklahoma, Okmulgee, Pittsburg, Pontotoc, Pottawatomie, Pushmataha, Seminole, Sequoyah, Stephens, Tulsa, Wagoner and Washington Counties. Applications for loans for physical damage as a result of this disaster may be filed until the close of business on March 6, 2001, and for loans for economic injury until the close of business on October 5, 2001 at the address listed below or other locally announced locations: U.S. Small Business Administration, Disaster Area 3 Office, 4400 Amon Carter Blvd., Suite 102, Fort Worth, TX 76155.

In addition, applications for economic injury loans from small businesses located in the following contiguous counties may be filed until the specified date at the above location: Caddo, Canadian, Comanche, Delaware, Kingfisher, Logan, Mayes, Nowata, Osage, Pawnee, Payne, Rogers, and Tillman in Oklahoma; Benton, Crawford, Little River, Polk, Scott, Sebastian, Sevier and Washington in Arkansas; Chautauqua and Montgomery in Kansas; Bowie, Clay, Cooke, Fannin, Grayson, Lamar, Montague, Red River and Wichita in Texas.

The interest rates are:

| | Percent |
|---|---------|
| For Physical Damage: | |
| Homeowners With Credit Available Elsewhere | 7.000 |
| Homeowners Without Credit Available Elsewhere | 3.500 |
| Businesses With Credit Available Elsewhere | 8.000 |
| Businesses and Non-Profit Organizations Without Credit Available Elsewhere | 4.000 |
| Others (Including Non-Profit Organizations) With Credit Available Elsewhere | 7.000 |
| For Economic Injury: | |
| Businesses and Small Agricultural Cooperatives Without Credit Available Elsewhere | 4.000 |

The number assigned to this disaster for physical damage is 331611. For economic injury the numbers are 9K3300 for Oklahoma, 9K3400 for Arkansas, 9K3500 for Kansas, and 9K3600 for Texas.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008.)

Dated: January 9, 2001.
Herbert L. Mitchell,
Associate Administrator for Disaster Assistance.

DEPARTMENT OF STATE

[Public Notice 3540]

Bureau of Educational and Cultural Affairs Request for Grant Proposals: Benjamin A. Gilman International Scholarship Program—International Academic Opportunity Act of 2000

SUMMARY: The Office of Global Educational Programs of the Bureau of Educational and Cultural Affairs announces an open competition for the Benjamin A. Gilman International Scholarship Program. Public and private non-profit organizations meeting the provisions described in IRS regulation 26 CFR 1.501(c) may submit proposals for the purpose of carrying out a scholarship program for academic study outside of the United States.

Program Information

This program establishes grants for U.S. citizen or national undergraduate students of limited financial means from the United States to enable such students to pursue academic studies abroad. Such foreign study is intended to better prepare U.S. students to assume significant roles in an increasingly global economy.

Overview

This program provides an assistance award not to exceed \$1,500,000 for the purpose of issuing grants of up to \$5,000 to individuals who meet the eligibility requirements listed below, toward the cost of up to one academic year of undergraduate study abroad. Subject to the availability of funding and to satisfactory performance of the awardee, this assistance award may be renewable for two subsequent fiscal years.

The Presidential Memorandum on International Education of April 19, 2000 directs the Department of State to support the efforts of schools and colleges to improve access to high-quality international educational experiences by increasing the number of diversity of students who study and intern abroad. In support of this Memorandum and pursuant to the authorizing legislation for the Benjamin A. Gilman International Scholarship Program, this program is intended to broaden the student population that participates in study outside the U.S. by

focusing on those students who might not otherwise study abroad due to financial constraints.

The Presidential Memorandum also directs the Department to encourage students and institutions to choose nontraditional study-abroad locations and to help underrepresented U.S. institutions offer and promote study-abroad opportunities for their students. These secondary objectives should also be addressed in grant proposals.

Guidelines

The administering organization should be prepared to solicit applications immediately upon receipt of grant notification and to award scholarships to allow study programs to begin in the 2001/2002 academic year.

Student Eligibility: To apply for a scholarship, an applicant must;

- (1) Be a student in good standing at an institution of higher education in the United States (as defined in section 101(a) of the Higher Education Act of 1965);
- (2) Have been accepted for up to one academic year of study on a program of study abroad approved for credit by the student's home institution;
- (3) Be receiving any need-based student assistance under title IV of the Higher Education Act of 1965; and
- (4) Be a citizen or national of the United States.

Application and Selection: (1) Scholarship application and selection shall be carried out through accredited institutions of higher education in the United States or a combination of such institutions.

(2) In considering applications for scholarships:

- (A) consideration of financial need shall include the increased costs of study abroad; and
- (B) priority consideration shall be given to applicants who are receiving Federal Pell Grants under title of the Higher Education Act of 1965.

(C) in ranking eligible applicants, consideration should also be given to academic excellence, and diversity of the applicant pool, fields of study, destinations, and type and location of home institutions of higher education.

Reporting: The grantee organization will submit quarterly reports on the number of applicants, the number of selectees, the names of the institutions of higher education in the United States that applicants and selectees attended at the time of application, name of institutions sponsoring the study program abroad, the names and locations of the institutions of higher education outside the United States which participants attended during

their study abroad, the fields of study of participants, and attrition rates. Additionally, the Bureau of Educational and Cultural Affairs may request other periodic and ad hoc reports.

Budget Guidelines

Grants awarded to eligible organizations with less than four years of experience in conducting international exchange programs are limited by Bureau policy to \$60,000. The bureau intends to make one award not to exceed \$1,500,000. Accordingly, institutions with less than five years experience are not encouraged to apply. The Bureau encourages applicants to provide maximum levels of cost-sharing and funding from private sources in support of its programs.

Applicants must submit a comprehensive budget for the entire program. Of the total grant, a maximum of 10% (up to \$150,000) may be spent on administrative and overhead costs. There must be a summary budget as well as breakdowns reflecting both administrative and program budgets. Applicants may provide separate sub-budgets for each program component, phase, location, or activity to provide clarification.

Allowable costs for the program include the following:

(1) Administrative: Salaries and benefits and other direct administrative expenses such as postage, phone, printing and office supplies.

(2) Program: Participant expenses, which may include institutional fees, travel expenses, tuition; expenses related to review panels, including travel and per diem.

Please refer to the Solicitation Package for complete budget guidelines and formatting instructions.

Announcement Title and Number

All correspondence with the Bureau concerning this RFGP should reference the above title and number *ECA/A/S/A-01-14*.

FOR FURTHER INFORMATION, CONTACT: The Office of Global Educational Programs, Educational Information and Resources Branch (ECA/A/S/A), Room 349, U.S. Department of State, 301 4th Street, SW., Washington, DC 20547; telephone 202-619-5434; fax 202-401-1433; e-mail advise@pd.state.gov to request a Solicitation Package. The Solicitation Package contains detailed award criteria, required application forms, specific budget instructions, and standard guidelines for proposal preparation. Please specify Bureau Program Officer Amy Forest on all other inquiries and correspondence.

Please read the complete **Federal Register** announcement before sending inquiries or submitting proposals. Once the RFGP deadline has passed, Bureau staff may not discuss this competition with applicants until the proposal review process has been completed.

To Download a Solicitation Package Via Internet

The entire Solicitation Package may be downloaded from the Bureau's website at <http://exchanges.state.gov/education/RFGPs>. Please read all information before downloading.

Deadline for Proposals

All proposal copies must be received at the Bureau of Educational and Cultural Affairs by 5 p.m. Washington, DC time on Friday, February 23, 2001. Faxed documents will not be accepted at any time. Documents postmarked on the due date but received on a later date will not be accepted. Each applicant must ensure that the proposals are received by the above deadline.

Applicants must follow all instructions in the Solicitation Package. The original and 15 copies of the application should be sent to: U.S. Department of State, SA-44, Bureau of Educational and Cultural Affairs, Ref.: *ECA/A/S/A-01-14*, Program Management, ECA/EX/PM, Room 534, 301 4th Street, SW., Washington, DC 20547.

Applicants must also submit the "Executive Summary" and "Proposal Narrative" sections of the proposal on 3.5" diskette, formatted for DOS. These documents must be provided in ASCII text (DOS) format with a maximum line length of 65 characters.

Diversity, Freedom and Democracy Guidelines

Pursuant to the Bureau's authorizing legislation, programs must maintain a non-political character and should be balanced and representative of the diversity of American political, social, and cultural life. "Diversity" should be interpreted in the broadest sense and encompass differences including, but not limited to ethnicity, race, gender, religion, geographic location, socio-economic status, and physical challenges. Applicants are strongly encouraged to adhere to the advancement of this principle both in program administration and in program content. Please refer to the review criteria under the "Support for Diversity" section for specific suggestions on incorporating diversity into the total proposal. Public Law 104-319 provides that "in carrying out programs of educational and cultural exchange in

countries whose people do not fully enjoy freedom and democracy," the Bureau "Shall take appropriate steps to provide opportunities for participation in such programs to human rights and democracy leaders of such countries." Public Law 106-113 requires that the governments of the countries described above do not have inappropriate influence in the selection process. Proposals should reflect advancement of these goals in their program contents, to the full extent deemed feasible.

Review Process

The Bureau will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines stated herein and in the Solicitation Package. All eligible proposals will be reviewed by the program office, as well as the Public Diplomacy section overseas, where appropriate. Eligible proposals will be subject to compliance with Federal and Bureau regulations and guidelines and forwarded to Bureau grant panels for advisory review. Proposals may also be reviewed by the Office of the Legal Adviser or by other Department elements. Final funding decisions are at the discretion of the Department of State's Assistant Secretary for Educational and Cultural Affairs. Final technical authority for assistance awards (grants or cooperative agreements) resides with the Bureau's Grants Officer.

Review Criteria

Technically eligible applications will be competitively reviewed according to the criteria stated below. These criteria are not rank ordered and all carry equal weight in the proposal evaluation:

1. *Quality of the Program Idea:* Proposals should exhibit originality, substance, precision, and relevance to the Bureau's mission.
2. *Program Planning:* Detailed agenda and relevant work plan should demonstrate substantive undertakings and logistical capacity. Agenda and plan should adhere to the program overview and guidelines described above. The work plan should specify target dates for objectives such as application deadlines, notifications, and provision of funds to participants.
3. *Ability to Achieve Program Objectives:* Objectives should be reasonable, feasible, and flexible. Proposals should clearly demonstrate how the institution will meet the program's objectives and plan.
4. *Multiplier Effect/Impact:* Proposed programs should strengthen long-term mutual understanding, including

maximum sharing of information and establishment of long-term institutional and individual linkages.

5. Support of Diversity: Proposals should demonstrate substantive support of the Bureau's policy on diversity. Achievable and relevant features should be cited in both program administration and program content. Proposals should demonstrate the recipient's commitment to promoting the awareness and understanding of diversity, including but not limited to diversity in applicant pool, type and location of home institution, study destinations, and fields of study.

6. Institutional Capacity: Proposed personnel and institutional resources should be adequate and appropriate to achieve the program or project's goals. Applicants should demonstrate prior experience or the capacity to negotiate with academic institutions to achieve significant cost sharing. Electronic databases should be compatible with the Bureau's systems.

7. Institution's Record/Ability: Proposals should demonstrate an institutional record of successful exchange programs, including responsible fiscal management and full compliance with all reporting requirements for past Bureau grants as determined by Bureau Grant Staff. The Bureau will consider the past performance of prior recipients and the demonstrated potential of new applicants.

8. Follow-on Activities: Proposals should provide a plan for continued follow-on activity such as alumni tracking and programming.

9. Project Evaluation: Proposals should include a plan to evaluate the activity's success, both as the activities unfold and at the end of the program. A draft survey questionnaire or other technique plus description of a methodology to use to link outcomes to original project objectives is recommended. Successful applicants will be expected to submit intermediate reports after each project component is concluded or quarterly, whichever is less frequent.

10. Cost-effectiveness: The overhead and administrative components of the proposal, including salaries and honoraria, should be kept as low as possible. All other items should be necessary and appropriate.

11. Cost-Sharing: Proposals should maximize cost-sharing through other private sector support as well as institutional direct funding contributions.

Authority

Overall grant making authority for this program is contained in the Mutual Educational and Cultural Exchange Act of 1961, Public Law 87-256, as amended, also known as the Fulbright-Hays Act. The purpose of the Act is "to enable the Government of the United States to increase mutual understanding between the people of the United States and the people of other countries . . . ; to strengthen the ties which unite us with other nations by demonstrating the educational and cultural interests, developments, and achievements of the people of the United States and other nations . . . and thus to assist in the development of friendly, sympathetic and peaceful relations between the United States and the other countries of the world." The funding authority for the program above is provided through the International Academic Opportunity Act of 2000.

Notice

The terms and conditions published in this RFGP are binding and may not be modified by any Bureau representative. Explanatory information provided by the Bureau that contradicts published language will not be binding. Issuance of the RFGP does not constitute an award commitment on the part of the Government. The Bureau reserves the right to reduce, revise, or increase proposal budgets in accordance with the needs of the program and the availability of funds. Awards made will be subject to periodic reporting and evaluation requirements.

Notification

Final awards cannot be made until funds have been appropriated by Congress, allocated and committed through internal Bureau procedures.

Dated: January 9, 2001.

William B. Bader,

Assistant Secretary for Educational and Cultural Affairs, U.S. Department of State.

BILLING CODE 4710-05-U-M

DEPARTMENT OF STATE

[Public Notice 3539]

Imposition of Nonproliferation Measures Against a North Korean Entity, Including Ban on U.S. Government Procurement

AGENCY: Bureau of Nonproliferation, Department of State.

ACTION: Notice.

SUMMARY: A determination has been made that a North Korean entity has engaged in activities that require the imposition of measures pursuant to section 3 of the Iran Nonproliferation Act of 2000.

EFFECTIVE DATE: January 2, 2001.

FOR FURTHER INFORMATION CONTACT: On general issues: Vann H. Van Diepen, Office of Chemical, Biological and Missile Nonproliferation, Bureau of Nonproliferation, Department of State, (202-647-1142). On U.S. Government procurement ban issues: Gladys Gines, Office of the Procurement Executive, Department of State (703-516-1691).

SUPPLEMENTARY INFORMATION: Pursuant to sections 2 and 3 of the Iran Nonproliferation Act of 2000 (Pub. L. 106-178), the U.S. Government determined on January 2, 2001, that the measures authorized in section 3 of the Act shall apply to the following foreign entity identified in the report submitted pursuant to section 2(a) of the Act:

Changgwang Sinyong Corporation (North Korea) and any successor, sub-unit, or subsidiary thereof.

Accordingly, pursuant to the provisions of the Act, the following measures are imposed on this entity:

1. No department or agency of the United States Government may procure, or enter into any contract for the procurement of, any goods, technology, or services from the foreign person.

2. No department or agency of the United States Government may provide any assistance to the foreign person, and that person shall not be eligible to participate in any assistance program of the United States Government;

3. No United States Government sales to the foreign person of any item on the United States Munitions List (as in effect on August 8, 1995) are permitted, and all sales to that person of any defense articles, defense services, or design and construction services under the Arms Export Control Act are terminated; and,

4. No new individual licenses shall be granted for the transfer to the foreign person of items, the export of which is controlled under the Export Administration Act of 1979 or the Export Administration Regulations, and any existing such licenses are suspended.

These measures shall be implemented by the responsible departments and agencies of the United States Government and will remain in place until April 6, 2002, except to the extent that the Secretary of State may subsequently determine otherwise. The Secretary of State will make a new determination in the event that

circumstances change in such a manner as to warrant a change in the duration of sanctions.

Dated: January 10, 2001.

Robert J. Einhorn,

Assistant Secretary of State for Nonproliferation, U.S. Department of State.

BILLING CODE 4710-25-U

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Advisory Circular 25.335-1A, Design Dive Speed

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of issuance of advisory circular.

SUMMARY: This notice announces the issuance of Advisory Circular (AC) 25.335-1A, Design Dive Speed. This AC sets forth an acceptable means, but not the only means, of demonstrating compliance with the airworthiness standards for transport category airplanes related to the minimum speed margin between design cruise speed and design dive speed for transport category airplanes. Like all ACs, it is not regulatory but is to provide guidance for applicants in demonstrating compliance with the objective safety standards set forth in the rule.

DATES: Advisory Circular 25.335-1A was issued by the Acting Manager, Transport Airplane Directorate, Aircraft Certification Service, ANM-100, on September 29, 2000.

How to Obtain Copies: A paper copy of AC 25.335-1A may be obtained by writing to the U.S. Department of Transportation, Subsequent Distribution Office, DOT Warehouse, SVC-121.23, Ardmore East Business Center, 3341Q 75th Ave., Landover, MD 20785, telephone 301-322-5377, or faxing your request to the warehouse at 301-386-5394. The AC also will be available on the Internet at <http://www.faa.gov/avr/air/airhome.htm>, at the link titled "Advisory Circulars" under the "Available Information" down-drop menu.

Issued in Renton, Washington, on January 8, 2001.

Donald L. Riggan,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service, ANM-100.

[FR Doc. 01-1287 Filed 1-16-01; 8:45 am]

BILLING CODE 4910-13-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Advisory Circular; Damage Tolerance for High Energy Turbine Engine Rotors

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of issuance of final advisory circular (AC) on damage tolerance for high energy turbine engine rotors.

SUMMARY: This notice announces the issuance of Advisory Circular (AC) No. 33.14-1, Damage Tolerance for High Energy Turbine Rotors.

DATES: Advisory Circular No. 33.14.1, was issued by the New England Aircraft Certification Service, Engine and Propeller Directorate on January 8, 2001.

FOR FURTHER INFORMATION CONTACT: Tim Mouzakis, Engine and Propeller Standards Staff, ANE-110, at the above address, telephone (781) 238-7114, fax (781) 238-7199. A copy of the subject AC may also be obtained electronically by writing to the following Internet address: "tim.mouzakis@faa.gov". Additionally, you may obtain a copy of the AC directly from the internet at the following address: "http://www.faa.gov/avr/air/acs/achome.htm".

SUPPLEMENTARY INFORMATION: This advisory circular (AC) provides guidance and information on acceptable methods, but not the only methods of compliance with § 33.14 of the Federal Aviation Regulations, Title 14 of the Code of Federal Regulations. Section 33.14 contains requirements of life management requirements applicable to the design and life management of titanium alloy high energy rotating parts of aircraft engines. Although this AC does refer to regulatory requirements that are mandatory, this ACT is not, in itself, mandatory. This AC neither changes any regulatory requirement nor authorizes changes in or deviations from the regulatory requirements.

This advisory circular would be published under the authority granted to the Administrator by 49 U.S.C. 106(g), 40113, 44701-44702, 44704, provides guidance for Damage tolerance for high energy turbine engine rotors.

Issued in Burlington, Massachusetts, on January 8, 2001.

David A. Downey,

Assistant Manager, Engine and Propeller Directorate, Aircraft Certification Service.

Advisory Circular 25.491-1, Taxi, Takeoff and Landing Roll Design Loads

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of issuance of advisory circular.

SUMMARY: This notice announces the issuance of Advisory Circular (AC) 25.491-1, Taxi, Takeoff and Landing Roll Design Loads. This AC sets forth acceptable methods of compliance with the provision of part 25 of the Federal Aviation Regulations (FAR) dealing with the certification requirements for taxi, takeoff and landing roll design loads. Guidance information is provided for showing compliance with § 25.491 of the FAR, relating to structural design for airplane operation on paved runways and taxiways normally used in commercial operations. Other methods of compliance with the requirements may be acceptable.

DATES: Advisory Circular 25.491-1 was issued by the Acting Manager, Transport Airplane Directorate, Aircraft Certification Service, ANM-100, on October 30, 2000.

How to Obtain Copies: A paper copy of AC 25.491-1 may be obtained by writing to the U.S. Department of Transportation, Subsequent Distribution Office, DOT Warehouse, SVC-121.23, Ardmore East Business Center, 3341Q 75th Ave., Landover, MD 20785, telephone 301-322-5377, or faxing your request to the warehouse at 301-386-5394. The AC also will be available on the Internet at <http://www.faa.gov/avr/air/airhome.htm>, at the link titled "Advisory Circulars" under the "Available Information" down-drop menu.

Issued in Renton, Washington, on January 8, 2001.

BILLING CODE 4910-13-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Noise Exposure Map Notice; Gerald R. Ford International Airport, Grand Rapids, MI

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its determination that the noise exposure maps submitted by Kent County Department of Aeronautics for Gerald R. Ford International Airport, Grand Rapids, Michigan under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Public Law 96-193) and 14 CFR Part 150 are in compliance with applicable requirements.

EFFECTIVE DATE: The effective date of the FAA's determination on the noise exposure maps is December 27, 2000.

FOR FURTHER INFORMATION CONTACT:

Ernest P. Gubry, Willow Run Airport, East, 8820 Beck Road Belleville, MI, 48111, (734) 487-7280.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA finds that the noise exposure maps submitted for Gerald R. Ford International Airport, Grand Rapids, MI are in compliance with applicable requirements of Part 150, effective December 27, 2000.

Under section 103 of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter referred to as "the Act"), an airport operator may submit to the FAA noise exposure maps which meet applicable regulations and which depict non-compatible land uses as of the date of submission of such maps, a description of projected aircraft operations, and the ways in which such operations will affect such maps. The Act requires such maps to be developed in consultation with interested and affected parties in the local community, government agencies, and persons using the airport.

An airport operator who has submitted noise exposure maps that are found by FAA to be in compliance with the requirements of Federal Aviation Regulations (FAR) Part 150, promulgated pursuant to Title I of the Act, may submit a noise compatibility program for FAA approval which sets forth the measures the operator has taken or proposes for the reduction of existing non-compatible uses and for the prevention of the introduction of additional non-compatible uses. The FAA has completed its review of the noise exposure maps and related descriptions submitted by Kent County Department of Aeronautics. The specific maps under consideration are Figure 6-1, "2000 Noise Exposure Map", and Figure 6-2 "2005 Noise Exposure Map" noise map in Volume 1 of 3 of the submission. The FAA has determined that these maps for Gerald R. Ford International Airport, Grand Rapids,

Michigan are in compliance with applicable requirements. This determination is effective on December 27, 2000. FAA's determination on an airport operator's noise exposure maps is limited to a finding that the maps were developed in accordance with the procedures contained in appendix A of FAR Part 150. Such determination does not constitute approval of the applicant's data, information or plans, or a commitment to approve a noise compatibility program or to fund the implementation of that program.

If questions arise concerning the precise relationship of specific properties to noise exposure contours depicted on a noise exposure map submitted under section 103 of the Act, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours, or in interpreting the noise exposure maps to resolve questions concerning, for example, which properties should be covered by the provisions of section 107 of the Act. These functions are inseparable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under Part 150 or through FAA's review of noise exposure maps. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the map depicting properties on the surface rests exclusively with the airport operator which submitted those maps, or with those public agencies and planning agencies with which consultation is required under section 103 of the Act. The FAA has relied on the certification by the airport. Questions may be directed to the individual named above under the heading **FOR FURTHER INFORMATION CONTACT**.

Issued in Belleville, Michigan, on December 27, 2000.

Irene Porter,

Manager, Detroit Airports District Office, Great Lakes Region.

BILLING CODE 4910-13-M

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration**

[Summary Notice No. PE-2001-01]

Petitions for Exemption; Summary of Petitions Received; Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption part 11 of title 14, Code of Federal Regulations (14 CFR), this notice contains a summary of certain petitions seeking relief from specified requirements of 14 CFR, dispositions of certain petitions previously received, and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATES: Comments on petitions received must identify the petition docket number involved and must be received on or before February 5, 2001.

ADDRESSES: Send comments on any petition to the Docket Management System, U.S. Department of Transportation, Room Plaza 401, 400 Seventh Street, SW., Washington, DC 20590-0001. You must identify the docket number FAA-2000-XXXX at the beginning of your comments. If you wish to receive confirmation that FAA received your comments, include a self-addressed, stamped postcard.

You may also submit comments through the Internet to <http://dms.dot.gov>. You may review the public docket containing the petition, any comments received, and any final disposition in person in the Dockets Office between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. The Dockets Office (telephone 1-800-647-5527) is on the plaza level of the NASSIF Building at the Department of Transportation at the above address. Also, you may review public dockets on the Internet at <http://dms.dot.gov>.

This notice is published pursuant to 14 CFR 11.85 and 11.91.

Issued in Washington, DC, on January 10, 2001.

Donald P. Byrne,

Assistant Chief Counsel for Regulations.

Dispositions of Petitions

Docket No.: FAA-2000-8157.

Petitioner: Petroleum Helicopters, Inc.
Section of 14 CFR Affected: 14 CFR § 135.152(a).

Description of Relief Sought/Disposition: To permit PHI to operate three Bell 212 helicopters (Registration Nos. N1074C, N5009N, and N5736D; Serial Nos. 30989, 30915, and 31135, respectively), two Bell 214ST helicopters (Registration Nos. N59805 and N59806, Serial Nos. 28141 and 28140, respectively), three Bell 412 helicopters (Registration Nos. N2014K, N2258F, and N3893L; Serial Nos. 33020, 33073, and 33006, respectively), and one Bell 421SP helicopter (Registration No. N142PH, Serial No. 33150) under part 135 without an approved digital flight data recorder installed on each helicopter.

Grant, 12/15/2000, Exemption No. 6713E

Docket No.: FAA-2000-8430.

Petitioner: Rocky Mountain Holdings, L.L.C.

Section of 14 CFR Affected: 14 CFR § 135.143(c)(2).

Description of Relief Sought/Disposition: To permit RMH to operate certain aircraft under part 135 without a TSO-C112 (Mode S) transponder installed in the aircraft.

Grant, 12/13/2000, Exemption No. 5774E

Docket No.: FAA-2000-8533.

Petitioner: Israel Aircraft Industries.

Section of 14 CFR Affected: 14 CFR § 61.77(a).

Description of Relief Sought/Disposition: To permit IAI to obtain special purpose pilot authorizations for its pilot employees for the purpose of performing: (1) Ferry/delivery flights of U.S.-registered ASTRA Galaxy airplanes from Israel to the United States for its U.S. customers; (2) Ferry/delivery flights of U.S.-registered ASTRA Galaxy airplanes from Israel to other countries for its U.S. customers; and (3) For performing test and acceptance flights of U.S.-registered ASTRA Galaxy airplanes for its U.S. customers.

Grant, 01/13/1999, Exemption No. 7406

Docket No.: FAA-2000-8497.

Petitioner: America West Airlines.

Section of 14 CFR Affected: 14 CFR § 91.205(b)(12).

Description of Relief Sought/Disposition: To permit AWX to operate its aircraft over water without at least one pyrotechnic signaling device on board.

Denial, 12/18/2000, Exemption No. 7409

Docket No.: FAA-2000-8096.

Petitioner: Vinay M. Gidwani.

Section of 14 CFR Affected: 14 CFR § 61.83(a).

Description of Relief Sought/Disposition: To permit Mr. Gidwani to obtain a student pilot certificate for operation of an aircraft other than a glider or balloon.

Denial, 12/18/2000, Exemption No. 7408

Docket No.: FAA-2000-8491.

Petitioner: Lifeport, Inc.

Section of 14 CFR Affected: 14 CFR §§ 25.562 and 25.785(b).

Description of Relief Sought/Disposition: To permit certification of medical stretchers for transport of persons whose medical condition dictates such accommodation. The exemption is for an installation on a Learjet Model 45 airplane.

Grant, 12/07/2000, Exemption No. 7393

Federal Aviation Administration

[Summary Notice No. PE-2001-02]

Petitions for Exemption; Summary of Petitions Received; Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption part 11 of Title 14, Code of Federal Regulations (14 CFR), this notice contains a summary of certain petitions seeking relief from specified requirements of 14 CFR, dispositions of certain petitions previously received, and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATES: Comments on petitions received must identify the petition docket number involved and must be received on or before February 5, 2001.

ADDRESSES: Send comments on any petition to the Docket Management System, U.S. Department of Transportation, Room Plaza 401, 400 Seventh Street, SW., Washington, DC 20590-0001. You must identify the docket number FAA-2000-XXXX at the

beginning of your comments. If you wish to receive confirmation that FAA received your comments, include a self-addressed, stamped postcard.

You may also submit comments through the Internet to <http://dms.dot.gov>. You may review the public docket containing the petition, any comments received, and any final disposition in person in the Dockets Office between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. The Dockets Office (telephone 1-800-647-5527) is on the plaza level of the NASSIF Building at the Department of Transportation at the above address. Also, you may review public dockets on the Internet at <http://dms.dot.gov>.

BILLING CODE 4910-13-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Intent To Rule on Application To Use a Passenger Facility Charge (PFC) at Bradley International Airport, Windsor Locks, Connecticut

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to use a PFC at Bradley International Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101-508) and Part 158 of the Federal aviation regulations (14 CFR part 158).

DATES: Comments must be received on or before February 16, 2001.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: Ms. Priscilla Scott, PFC Program Manager, Federal Aviation Administration, Airport Division, 12 New England Executive Park, Burlington, Massachusetts 01803.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. Robert Juliano, A.A.E., Bureau Chief, State of Connecticut, Department of Transportation, Bureau of Aviation and Ports at the following address: 2800 Berlin Turnpike, P.O. Box 317546, Newington, CT. 06131-7546.

Air carriers and foreign air carriers may submit copies of written comments previously provided to the State of Connecticut under section 158.23 of

Part 158 of the Federal Aviation Regulations.

FOR FURTHER INFORMATION CONTACT:

Priscilla A. Scott, PFC Program Manager, Federal Aviation Administration, Airports Division, 12 New England Executive Park, Burlington, Massachusetts 01803, (781) 238-7614. The application may be reviewed in person at 16 New England Executive Park, Burlington, Massachusetts.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to use a PFC at Bradley International Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101-508) and Part 158 of the Federal Aviation Regulations (14 CFR Part 158).

On December 29, 2000, the FAA determined that the application to use a PFC submitted by the State of Connecticut was substantially complete within the requirements of section 158.25 of Part 158 of the Federal Aviation Regulations. The FAA will approve or disapprove the application, in whole or in part, no later than April 9, 2001.

The following is a brief overview of the use application.

PFC Project #: 01-13-U-00-BDL.

Level of the proposed PFC: \$3.00.

Charge effective date: March 9, 2000.

Charge expiration date: April 11, 2000.

Estimated total PFC revenue: \$4,400,000.

Brief description of project: Reconstruction of Taxiway "S".

Class or classes of air carriers which the public agency has requested not be required to collect PFCs: On demand Air Taxi/Commercial Operators (ATCO).

Any person may inspect the application in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT**.

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at the Connecticut Department of Transportation Building, 2800 Berlin Turnpike, Newington, Connecticut 06131-7546.

Issued in Burlington, Massachusetts on January 2, 2001.

Vincent A. Scarano,

Manager, Airports Division, New England Region.

BILLING CODE 4910-13-M

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****Notice of Intent To Rule on Application To Impose and Use the Revenue From a Passenger Facility Charge (PFC) at Manchester Airport, Manchester, NH**

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Manchester Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101-508) and part 158 of the Federal Aviation Regulations (14 CFR part 158).

DATES: Comments must be received on or before February 16, 2001.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address:

Priscilla Scott, PFC Program Manager, Federal Aviation Administration, Airports Division, 12 New England Executive Park, Burlington, Massachusetts 01803.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. Kevin Dillon, Airport Director for Manchester Airport at the following address: Manchester Airport, One Airport Road, Suite 300, Manchester, New Hampshire 03103.

Air carriers and foreign air carriers may submit copies of written comments previously provided to the City of Manchester under section 158.23 of part 158 of the Federal Aviation Regulations.

FOR FURTHER INFORMATION CONTACT:

Priscilla A. Scott, PFC Program Manager, Federal Aviation Administration, Airports Division, 12 New England Executive Park, Burlington, Massachusetts 01803 (781) 238-7614. The application may be reviewed in person at 16 New England Executive Park, Burlington, Massachusetts.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Manchester Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law

101-508) and part 158 of the Federal Aviation Regulations (14 CFR part 158).

On December 28, 2000, the FAA determined that the application to impose and use the revenue from a PFC submitted by the City of Manchester was substantially complete within the requirements of section 158.25 of part 158 of the Federal Aviation Regulations. The FAA will approve or disapprove the application, in whole or in part, no later than April 6, 2001.

The following is a brief overview of the impose and use application.

PFC Project #: 01-09-C-00-MHT.

Level of the proposed PFC: \$3.00.

Proposed charge effective date: April 1, 2017.

Estimated charge expiration date: June 1, 2017.

Estimated total net PFC revenue: \$700,000.

Brief description of project: Acquire Airport Rescue and Fire Fighting Vehicle.

Class or classes of air carriers which the public agency has requested not be required to collect PFCs: Air Taxi/Commercial Operators (ATCO).

Any person may inspect the application in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT**.

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at the Manchester Airport, One Airport Road, Suite 300, Manchester, New Hampshire 03103.

Issued in Burlington, Massachusetts on January 2, 2001.

Vincent A. Scarano,

Manager, Airports Division, New England Region.

BILLING CODE 4910-13-M

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration**

[Policy Statement Number ACE-00-23.777-01]

Proposed Issuance of Policy Memorandum, Automatic Pilot (Control Wheel Steering) Applications for Part 23/CAR 3 Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of policy statement; request for comments.

SUMMARY: This document proposes to adopt new policy for certification of normal, utility, acrobatic, and commuter category turbine powered airplanes with automatic pilot (autopilot) (control wheel steering) applications.

DATES: Comments sent must be received by February 16, 2001.

ADDRESSES: Send all comments on this proposed policy statement to the individual identified under **FOR FURTHER INFORMATION CONTACT**.

FOR FURTHER INFORMATION CONTACT:

Sending comments: Bill Marshall, Federal Aviation Administration (FAA), Small Airplane Directorate, Regulations and Policy Branch, ACE-111, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone (816) 329-4116; fax (816) 329-4090; email: <Bill.Marshall@faa.gov>.

Asking technical questions: Jon Hannan, FAA, Small Airplane Directorate, Regulations and Policy Branch, ACE-111, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone (816) 329-4127; fax (816) 329-4090; email: <Jon.Hannan@faa.gov>.

SUPPLEMENTARY INFORMATION:**Comments Invited**

How do I comment on the proposed policy? We invite your comments on this proposed policy statement, ACE-00-23.777-01. You may send whatever written data, views, or arguments you choose. We will consider all comments received by the closing date. We may change the proposals contained in this notice because of the comments received.

Please send comments using the following Internet address: Bill.Marshall@faa.gov. Comments sent using the Internet must contain "Comments to Policy Statement ACE-00-23.777-01" in the subject line. Writers should format in Microsoft Word 97 or ASCII any file attachments that are sent using the Internet.

Send comments using the following format:

- Organize comments issue-by-issue. For example, discuss a comment about the automatic pilot control panel and a comment about primary flight controls as two separate issues.

- For each issue, state what specific change you are requesting to the proposed policy memorandum.

- Include justification (for example, reasons or data) for each request. If sending your comments using the Internet will cause you extreme hardship, you may send comments using the U.S. Mail, overnight delivery, or facsimile machine. You should mark your comments, "Comments to Policy Statement ACE-00-23.777-01" and send two copies to the above address in the section "**FOR FURTHER INFORMATION CONTACT:** Sending comments."

What would be the general effect of this proposed policy? The FAA is

presenting this information as a set of guidelines suitable for use. However, we do not intend for this proposed policy to become a binding norm; it does not form a new regulation, and the FAA would not apply or rely on it as a regulation.

The FAA Aircraft Certification Offices (ACO's) and Flight Standards District Offices (FSDO's) that certify changes in type design and approve alterations in normal, utility, and acrobatic category airplanes should try to follow this policy when appropriate. Also, as with all advisory material, this statement of policy identifies one means, but not the only means, of compliance.

Because this proposed general statement of policy only announces what the FAA seeks to establish as policy, the FAA considers it to be an issue for which public comment is appropriate. Therefore, the FAA requests comments on the following proposed general statement of policy relevant to compliance with § 23.777 of the Federal Aviation Regulations (14 CFR 23.777), and other related regulations.

Background

How does part 23 address the automatic pilot (autopilot) and control wheel steering? The guidance on autopilots used in part 23 airplanes does not specifically address Control Wheel Steering (CWS). Before 1996, CWS was a term used by industry to describe a momentary autopilot interrupt mode. Holding the CWS switch depressed temporarily disconnected the autopilot pitch and roll servos so the airplane could be maneuvered. When the CWS switch was released, the autopilot servos would reengage in the same mode as previously selected.

One minor exception was where an autopilot dropped the vertical axis from the reengagement. But in no case was there a change to a mode that had not been selected.

What recent developments have led to this proposed policy? More recently, there have been some autopilots certificated that could be engaged from a CWS mode switch on the primary flight controls. Additionally, some autopilots were certificated that changed modes from what had been previously selected by depressing the CWS switch.

In some cases, these two installations could lead to inadvertent autopilot engagement or mode changes during critical phases of flight such as liftoff, approach, and landing flare. Inadvertent operation could then lead to confusion and a misperception of a flight control

problem or an unintended loss of approach coupling.

Although not specifically pertinent to autopilot controls, § 23.777 of the Federal Aviation Regulations (14 CFR 23.777) requires that each cockpit control "be located . . . to provide convenient operation and to prevent confusion and inadvertent operation."

The Proposed Policy

In order to comply with the intent of § 23.777 of the Federal Aviation Regulations (14 CFR 23.777) as applicable to automatic pilots (autopilots) installed in part 23 airplanes, autopilots should be evaluated in accordance with the following:

Note: These characteristics are not applicable to "go around" mode switches which are allowed on throttles.

- The automatic pilot (autopilot) should not be engaged from a switch on the primary flight controls, unless that switch is protected so inadvertent engagement is not possible. Guards covering the switch, which can be moved to provide access to the switch, may be acceptable in some cases.
- Mode changes should not be made by using a switch on the primary flight controls unless some reliable means is provided to prevent unsafe conditions caused by inadvertent mode changes. Refer to § 23.1329(h) of the Federal Aviation Regulations (14 CFR 23.1329(h)).
- The autopilot disengage button should be the color red and be of different design from nearby switches so it is distinguishable by touch.

Issued in Kansas City, Missouri on January 2, 2001.

Marvin R. Nuss,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-U

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket No. MARAD-2001-8669]

Crowley Maritime Corporation; Notice of Application for Written Permission Under Section 805(a) of the Merchant Marine Act, 1936, as Amended

AGENCY: Maritime Administration, Transportation.

ACTION: Notice of Application.

SUMMARY: Crowley Maritime Corporation (Crowley), by letter dated January 4, 2001, requests written permission under section 805(a) of the

Merchant Marine Act, 1936, as amended (Act), to allow Marine Transport Corporation's (MTC) vessels CHEMICAL EXPLORER and CHEMICAL TRADER to continue to receive operating-differential subsidy (ODS) after MTC becomes a subsidiary of Crowley. This section 805(a) permission is necessary for these vessels to continue to receive ODS because Crowley, through its subsidiaries, owns and operates vessels engaged in the domestic inter-coastal or coastwise service.

DATES: You should submit your comments early enough to ensure that Docket Management receives them not later than close of business (5 p.m. est) on January 31, 2001.

ADDRESSES: Your comments should refer to docket number MARAD-2001-8669. You may submit your comments in writing to: Docket Clerk, U.S. DOT Dockets, Room PL-401, 400 7th Street, SW, Washington, DC 20590. You may also submit them electronically via the internet at <http://dmses.dot.gov/submit/>. You may call Docket Management at (202) 366-9324 and visit the Docket Room from 10 a.m. to 5 p.m., EST., Monday through Friday, except Federal Holidays. An electronic version of this document is available on the World Wide Web at <http://dms.dot.gov>.

FOR FURTHER INFORMATION CONTACT: You may call Edmond J. Fitzgerald, Director, Office of Insurance and Shipping Analysis, (202) 366-2400. You may send mail to Edmond J. Fitzgerald, Director, Office of Insurance and Shipping Analysis, Room 8117, Maritime Administration, 400 Seventh St., SW., Washington, DC 20590.

SUPPLEMENTARY INFORMATION:

Comments

How Do I Prepare and Submit Comments?

Your comments must be written and in English. To ensure that your comments are correctly filed in the Docket, please include the docket number of this document in your comments. We encourage you to write your primary comments in a concise fashion. However, you may attach necessary additional documents to your comments. There is no limit on the length of the attachments. Please submit two copies of your comments, including the attachments, to Docket Management at the address given above under **ADDRESSES**.

If you wish Docket Management to notify you upon its receipt of your comments, enclose a self-addressed, stamped postcard in the envelop containing your comments. Docket

Management will return the postcard by mail.

How do I submit confidential business information? If you wish to submit any information under a claim of confidentiality, you should submit three copies of your complete submission, including the information you claim to be confidential business information, to the Chief Counsel, Maritime Administration, at the address given above under **FOR FURTHER INFORMATION CONTACT**. You should mark "CONFIDENTIAL" on each page of the original document that you would like to keep confidential. In addition, you should submit two copies, from which you have deleted the claimed confidential business information, to Docket Management at the address given under **ADDRESSES**. When you send comments containing information claimed to be confidential business information, you should include a cover letter setting forth with specificity the basis for any such claim.

Will the Agency Consider Late Comments?

We will consider all comments that Docket Management receives before the close of business on the comment closing date indicated above under **DATES**. To the extent possible, we will also consider comments that Docket Management receives after that date.

How Can I Read Comments Submitted by Other People?

You may read the comments received by Docket Management at the address given above under **ADDRESSES**. The hours of the Docket Room are indicated above in the same location. You may also see the comments on the Internet. To read the comments on the Internet, take the following steps: Go to the Docket Management System (DMS) Web page of the Department of Transportation (<http://dmses.dot.gov/>), click on the box labeled "Search". The docket number for this document is MARAD-2001-8669. After typing in the last four-digits of the docket number, click on "search." On the next page, which contains the docket summary information for the docket you selected, click on the desired comments. You may download the comments.

Application Request

Crowley and its wholly owned subsidiary, Shiloh Acquisition, Inc. (Shiloh), entered into an Agreement of Merger with MTC dated December 20, 2000. As part of the process, Shiloh will make a Tender Offer to purchase all the shares of MTC on January 5, 2001, which offer will expire on February 5,

2001, at which time Crowley expects to have control of MTC and subsequently thereafter effect a complete merger between Shiloh and MTC, with MTC being the surviving corporation as a direct subsidiary of Crowley.

MTC, through its subsidiaries, Frances ODS Corporation and Julius ODS Corporation, has two operating-differential subsidy agreements with the Maritime Administration dated as of September 30, 1998, Contract No. MA/MSB-442 and Contract No. MA/MSB-440, respectively. Pursuant to these agreements, Frances ODS Corporation receives ODS for the SMT CHEMICAL EXPLORER and Julius ODS Corporation receives ODS for SMT CHEMICAL TRADER. The agreement for SMT CHEMICAL EXPLORER will terminate by its terms on September 18, 2001 and the agreement for SMT CHEMICAL TRADER will terminate by its terms on March 25, 2001. Frances ODS Corporation receives approximately \$8,500 per day pursuant to the agreement for the SMT CHEMICAL EXPLORER and Julius ODS Corporation receives approximately \$8,100 per day pursuant to the agreement for SMT CHEMICAL TRADER.

Crowley, through its subsidiaries, owns and operates vessels engaged in the domestic inter-coastal or coastwise service, and has provided as an attachment to its application: Schedule A—the fleet of tugs and barges operating on the West Coast and Alaska and the Gulf; Schedule B—the fleet of tugs and barges operating in the U.S.-Puerto Rico trade; Schedule C—the fleet of tugs and barges operating on the East Coast and Gulf; and, Schedule D—the fleet of oil tankers operating throughout the Jones Act trading areas. These schedules show the horsepower of the tugs, capacity of the barges and tankers as well as the general itineraries. Interested parties may review these schedules by reading the application which is part of the docket and is accessible electronically via the internet, or personally at the DOT Docket Room, as described above under how to read comments submitted by other people.

In connection with these domestic services, Crowley requests written permission of the Secretary of Transportation, pursuant to section 805(a) of the Act to allow the MTC subsidiaries to continue to receive ODS pursuant to the subsidy contracts referred to above after MTC becomes a wholly owned subsidiary of Crowley.

In deciding whether to grant Crowley's application for a waiver pursuant to section 805(a) of the Act, Crowley requests the Maritime

Administration to consider the following:

First, continued receipt by the two subsidiaries of MTC of ODS will not leak to Crowley. The subsidy dollars received by the two MTC subsidiaries will be used for the purposes set forth in the section 603 of the Act, as financial aid for the operation of the two vessels, the CHEMICAL EXPLORER and CHEMICAL TRADER. Thus, the ODS payments will remain with and be used by the ODS contractors, Frances ODS Corporation and Julius ODS Corporation.

Second, the continued receipt of ODS will be for (i) a relatively small amount of money and (ii) for a very short period of time. Crowley expects to have control of and complete the merger process by early February 2001. If this timetable holds firm, it would mean that Julius ODS Corporation will receive subsidy for approximately one and a half months and Frances ODS Corporation will receive subsidy for approximately six and a half months. During this short period of time, the subsidy payments will be used by the ODS contractors and not leaked to Crowley.

Third, Crowley has been an operator in the Jones Act trades for over 100 years and, operates a wide range of vessels throughout the entire Jones Act trade area. Receipt of (i) a relatively small amount of ODS, (ii) for a short period of time; and (iii) earmarked for use by the Julius ODS Corporation and Frances ODS Corporation in the operation of the CHEMICAL TRADER and CHEMICAL EXPLORER will not leak to any of Crowley's wide range of Jones Act operations. In addition, it should be noted that by reason of the Title XI Reserve Fund and Financial Agreement between MARAD and the Julius ODS Corporation and the Frances ODS Corporation, those companies are prohibited from divesting any monies to their corporate parent and will continue to be so restricted through the date of the last ODS payment on September 18, 2001. Thus, there is no way for MTC to leak the ODS payments to Crowley.

For the reasons set forth above, Crowley believes that the grant of the requested section 805(a) waiver will not result in unfair competition to any person, firm, or corporation operating exclusively in the coastwise or inter-coastal service or that it would be prejudicial to the objects and policy of the Act and a hearing on the matter is not needed.

Any person, firm, or corporation having any interest (within the meaning of section 805(a)) in Crowley's request and desiring to submit comments

together with petition for leave to intervene should do so in accordance with the above instructions for submitting comments. The petition should state clearly and concisely the grounds of interest, and the alleged facts relied on for relief.

If no petition for leave to intervene is received with the specified time or if it is determined that petitions filed do not demonstrate sufficient interest to warrant a hearing, the Maritime Administration will take such action as may be deemed appropriate.

In the event petitions regarding the relevant section 805(a) issues are received from parties with standing to be heard, a hearing will be held, the purpose of which will be to receive evidence under section 805(a) relative to whether the proposed operations: (a) could result in unfair competition to any person, firm, or corporation operating exclusively in the coastwise or inter-coastal service, or (b) would be prejudicial to the objects and policy of the Act relative to domestic trade operations.

(Catalog of Federal Domestic Assistance Programs No. 20.805 Operating-Differential Subsidies)

By Order of the Maritime Administrator.
Dated: January 11, 2001.

Joel C. Richard,

Secretary.

BILLING CODE 4910-81-P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket No. MARAD-2000-8666]

ALASKA ROSE, BERING ROSE, and SEA WOLF—Applicability of Preferred Mortgage, Ownership and Control Requirements to Obtain a Fishery Endorsement

AGENCY: Maritime Administration, Department of Transportation.

ACTION: Invitation for public comments on a petition requesting MARAD to issue a determination that the ownership and control requirements and the preferred mortgage requirements of the American Fisheries Act of 1998 and 46 CFR Part 356 are in conflict with an international investment agreement.

SUMMARY: The Maritime Administration (MARAD, we, our, or us) is soliciting public comments on a petition from the owners and mortgagees of the vessels ALASKA ROSE—Official Number 610984, BERING SEA—Official Number

609823, and SEA WOLF—Official Number 609823 (hereinafter the “Vessels”). The petition requests that MARAD issue a decision that the American Fisheries Act of 1998 (“AFA”), Division C, Title II, Subtitle I, Pub. L. 105-277, and our regulations at 46 CFR Part 356 (65 Fed. Reg. 44860 (July 19, 2000)) are in conflict with the U.S.-Japan Treaty and Protocol Regarding Friendship, Commerce and Navigation, 206 UNTS 143, TIAS 2863, 4 UST 2063 (1953) (“U.S.-Japan FCN” or “Treaty”). The petition is submitted pursuant to 46 CFR 356.53 and 213(g) of AFA, which provide that the requirements of the AFA and the implementing regulations will not apply to the owners or mortgagees of a U.S.-flag vessel documented with a fishery endorsement to the extent that the provisions of the AFA conflict with an existing international agreement relating to foreign investment to which the United States is a party. This notice sets forth the provisions of the international agreement that the Petitioner alleges are in conflict with the AFA and 46 CFR Part 356 and the arguments submitted by the Petitioner in support of its request. If MARAD determines that the AFA and MARAD’s implementing regulations conflict with the U.S.-Japan FCN, the requirements of 46 CFR Part 356 and the AFA will not apply to the extent of the inconsistency. Accordingly, interested parties are invited to submit their views on this petition and whether there is a conflict between the U.S.-Japan FCN and the requirements of both the AFA and 46 CFR Part 356. In addition to receiving the views of interested parties, MARAD will consult with other Departments and Agencies within the Federal Government that have responsibility or expertise related to the interpretation of or application of international investment agreements.

DATES: You should submit your comments early enough to ensure that Docket Management receives them not later than February 16, 2001.

ADDRESSES: Comments should refer to the docket number that appears at the top of this document. Written comments may be submitted by mail to the Docket Clerk, U.S. DOT Dockets, Room PL-401, Department of Transportation, 400 7th St., S.W., Washington, D.C. 20590-0001. You may also send comments electronically via the Internet at <http://dms.dot.gov/submit/>. All comments will become part of this docket and will be available for inspection and copying at the above address between 10 a.m. and 5 p.m., E.T., Monday through Friday, except Federal Holidays. An electronic

version of this document and all documents entered into this docket are available on the World Wide Web at <http://dms.dot.gov>.

FOR FURTHER INFORMATION CONTACT: John T. Marquez, Jr. of the Office of Chief Counsel at (202) 366-5320. You may send mail to John T. Marquez, Jr., Maritime Administration, Office of Chief Counsel, Room 7228, MAR-222, 400 Seventh St., S.W., Washington, D.C., 20590-0001 or you may send e-mail to John.Marquez@marad.dot.gov.

SUPPLEMENTARY INFORMATION:

Background

The AFA was enacted in 1998 to give U.S. interests a priority in the harvest of U.S.-fishery resources by increasing the requirements for U.S. Citizen ownership, control and financing of U.S.-flag vessels documented with a fishery endorsement. MARAD was charged with promulgating implementing regulations for fishing vessels of 100 feet or greater in registered length while the Coast Guard retains responsibility for vessels under 100 feet.

Section 202 of the AFA, raises, with some exceptions, the U.S.-Citizen ownership and control standards for U.S.-flag vessels that are documented with a fishery endorsement and operating in U.S.-waters. The ownership and control standard was increased from the controlling interest standard (greater than 50%) of 2(b) of Shipping Act, 1916 (“1916 Act”), as amended, 46 App. U.S.C. 802(b), to the standard contained in 2(c) of the 1916 Act, 46 App. U.S.C. 802(c), which requires that 75 percent of the ownership and control in a vessel owning entity be vested in U.S. Citizens. In addition, section 204 of the AFA repeals the ownership grandfather “savings provision” in the Anti-Reflagging Act of 1987, Pub. L. 100-239, 7(b), 101 Stat 1778 (1988), which permits foreign control of companies owning certain fishing vessels.

Section 202 of the AFA also establishes new requirements to hold a preferred mortgage on a vessel with a fishery endorsement. State or federally chartered financial institutions must now comply with the controlling interest standard of 2(b) of the 1916 Act in order to hold a preferred mortgage on a vessel with a fishery endorsement. Entities other than state or federally chartered financial institutions must either meet the 75% ownership and control requirements of 2(c) of the 1916 Act or utilize an approved U.S.-Citizen Trustee that meets the 75% ownership and control requirements to hold the

preferred mortgage for the benefit of the non-citizen lender.

Section 213(g) of the AFA provides that if the new ownership and control provisions or the mortgagee provisions are determined to be inconsistent with an existing international agreement relating to foreign investment to which the United States is a party, such provisions of the AFA shall not apply to the owner or mortgagee on October 1, 2001, with respect to the particular vessel and to the extent of the inconsistency. MARAD's regulations at 46 CFR 356.53 set forth a process wherein owners or mortgagees may petition MARAD, with respect to a specific vessel, for a determination that the implementing regulations are in conflict with an international investment agreement. Petitions must be noticed in the **Federal Register** with a request for comments. The Chief Counsel of MARAD, in consultation with other Departments and Agencies within the Federal Government that have responsibility or expertise related to the interpretation of or application of international investment agreements, will review the petitions and, absent extenuating circumstances, render a decision within 120 days of the receipt of a fully completed petition.

The Petitioners

Alaska Rose L.P., Bering Rose, L.P. and Kendrick Bay, L.P. (each a "Vessel Owner" and collectively, the "Vessel Owners"), are the owners, respectively, of the fishing vessels ALASKA ROSE, BERING ROSE and SEA WOLF (each a "Vessel" and collectively, the "Vessels"). Wards Cove Packing Company ("Wards Cove"), Gravina Fisheries, Inc., Flag Point, L.P., Duke Point, L.P., Island Point Corporation, Maruha Corporation ("Maruha"), Western Alaska Fisheries, Inc. ("WAF") and WAFBO, Inc., are owners of direct or indirect interests in the Vessel Owners and indirect interests in the Vessels. Alyeska Seafoods, Inc. ("Alyeska") is the owner of direct and indirect interests in the Vessel Owners and indirect interests in the Vessels and is the mortgagee under preferred mortgages on the Vessels. The parties identified above, including the shareholders and the Japanese Bank Lenders identified below are hereinafter referred to as the "Petitioner" or "Petitioners."

Petitioner's Entry Into and Participation In U.S. Fisheries

The Petitioner provided the following background on its entry into and participation in the fisheries of the United States.

"In 1985, Wards Cove, Maruha and Marubeni Corporation ("Marubeni") formed Alyeska to acquire, construct and operate a large seafood processing facility at Dutch Harbor, Alaska. Alyeska purchased an existing processing facility in 1985 and constructed a surimi processing plant and fish meal plant at the site in 1986 and 1987 to process pollock. Alyeska's total investment in its processing plant and equipment is approximately \$70 million.

"The Alyeska processing facility is one of the largest fish processing facilities in the state of Alaska. Alyeska employs approximately 400 people at its Dutch Harbor processing facility and processes in excess of 125 million pounds of seafood annually. In order to secure a stable supply of raw material to this processing facility, Alyeska, Maruha and its subsidiaries, and Wards Cove, Alyeska's U.S. Citizen shareholder, have made investments in and provided financing for a number of fishing vessels, including the Vessels. By investing in the Vessel Owners, Alyeska, Maruha and Wards Cove also sought to realize the potential profits that could accrue to the Vessel Owners from sales to Alyeska. The Vessel Owners were organized and the Vessels were acquired by the Vessel Owners in 1996.

"Alyeska assisted in financing the acquisition of the Vessels by the Vessel Owners in return for the agreement of the Vessel Owners that fish harvested by the Vessels would be sold exclusively to Alyeska and in reliance on the assured revenue stream which sales to Alyeska would provide to the Vessel Owners. Such financing is a common and traditional means in the Alaska fishing industry by which fishing vessel owners secure financing for the acquisition, improvement or operation of their vessels and seafood processors secure supply commitments from fishing vessel owners. Each of the Vessels is 100 feet or greater in registered length. Each of the Vessels was designed and constructed or rebuilt for operation in the U.S. fisheries of the North Pacific Ocean and Bering Sea.

"As a result of the enactment of Section 208(a) of the American Fisheries Act, the fishing vessels eligible to catch and deliver pollock to Alyeska's Dutch Harbor facility are limited to vessels meeting specified criteria, including prior deliveries of certain quantities of pollock to Alaskan onshore processing plants. Accordingly, there is a fixed, limited number of vessels, including the Vessels, which are permitted by law to deliver to the Alyeska facility."

Ownership and Mortgage Structure of the Vessels

The ownership and mortgage structure is substantially the same for each of the Vessels and is summarized as follows:

A. Ownership Structure

Alaska Rose, L.P., and Bering Rose, L.P., are Washington limited partnerships that were formed in 1996 for the purpose of acquiring and operating the vessels ALASKA ROSE and BERING ROSE, respectively. From the time of formation through the present date, Alaska Rose L.P. and Bering Rose, L.P. have been owned by Duke Point, L.P. ("Duke Point"), as sole general partner, and Alyeska Seafoods, Inc., as sole limited partner, in the following percentages: Duke Point—75%; Alyeska—25%.

Duke Point is a Washington limited partnership. At all times since the acquisition of the Vessels by Alaska Rose, L.P. and Bering Rose L.P., Duke Point has been owned by Flag Point, L.P. ("Flag Point"), as sole general partner, and Alyeska, as sole limited partner, in the following percentages: Flag Point—75%; Alyeska—25%.

Flag Point is a Washington limited partnership. Flag Point is owned by Gravina Fisheries, Inc., a Washington corporation, as sole general partner; and Island Point Corporation, a Washington corporation, and Alyeska, as limited partners, in the following percentages: Gravina Fisheries, Inc.—50%; Island Point Corp.—25%; Alyeska—25%.

Gravina Fisheries, Inc. is a wholly owned subsidiary of Wards Cove, an Alaska corporation. Petitioners state that all of the capital stock of Wards Cove is owned by United States Citizens, as defined in 46 C.F.R. Part 356. All of the capital stock of Island Point Corporation is owned by Alec W. Brindle, Winn F. Brindle and Harold A. Brindle, each an individual United States Citizen.

Wards Cove is a 100% U.S. Citizen-owned fish processing company which has been engaged in processing salmon and other fish and shellfish species in Alaska since 1912. In 1928, Wards Cove was acquired by two brothers, A. W. Brindle and Harold A. Brindle, and continues to be owned by the Brindle family or entities owned and controlled by them. All of the officers and directors of Wards Cove, Gravina Fisheries, Inc., and Island Point Corporation are U.S. Citizens.

Alyeska is an Alaska corporation, formed in 1985 to acquire, construct and operate a large seafood processing facility at Dutch Harbor, Alaska. All of the capital stock of Alyeska is owned by

Wards Cove, Maruha, WAF and Marubeni. Maruha and Marubeni are publicly traded Japanese corporations. WAF is a wholly-owned U.S. subsidiary of Maruha. Maruha, WAF and Marubeni collectively own more than 25% of the capital stock of Alyeska. Accordingly, Alyeska does not qualify as a U.S. Citizen under the standards of the AFA and MARAD's implementing rules and is therefore a "Non-Citizen," as defined in 46 CFR 356.3(0).

The SEA WOLF is owned by Kendrick Bay, L.P. ("Kendrick Bay"), a Washington limited partnership formed in 1996 for the purpose of acquiring and operating the SEA WOLF. At the time of its formation through the present date, Kendrick Bay has been owned by Duke Point, as sole general partner, and WAFBO, Inc., as sole limited partner, in the following percentages: Duke Point—75%, WAFBO, Inc.—25%.

The ownership structure of Duke Point is described above in connection with the discussion of the ownership of Alaska Rose, L.P. and Bering Rose, L.P. WAFBO, Inc. is a Washington corporation wholly owned by WAF. WAF is an Alaska corporation wholly owned by Maruha. Prior to the acquisition of the SEA WOLF by Kendrick Bay, the SEA WOLF was owned by Sea Wolf Limited Partnership, a Washington limited partnership in which WAF held a 25% limited partnership interest. Sea Wolf Limited Partnership distributed undivided interests in the SEA WOLF to its partners in proportion to their interests in the partnership prior to the acquisition of the Vessel by Kendrick Bay. WAFBO, Inc. is an entity which satisfies the requirements of 46 U.S.C. 12102(a), commonly referred to as a "Documentation Citizen," and was formed by WAF to hold WAF's undivided 25% interest in the SEA WOLF prior to transfer of the entire Vessel to Kendrick Bay. The former partners in Sea Wolf Limited Partnership with the exception of WAFBO, Inc. sold their undivided interests in the Vessel—totaling 75%—to Duke Point, which transferred this 75% interest in the SEA WOLF to Kendrick Bay as a capital contribution. WAFBO, Inc. transferred its undivided 25% interest in the SEA WOLF directly to Kendrick Bay as a capital contribution in return for a 25% limited partnership interest in Kendrick Bay.

The ownership structure of the Vessels was reviewed and approved by the U.S. Coast Guard under the standards applicable to fishing vessels and coastwise qualified vessels in a letter ruling dated December 11, 1996.

B. Mortgage Structure

Permanent financing for the acquisition of the Vessels was provided by three Japanese banks, Mitsubishi Trust and Banking Corporation, The Industrial Bank of Japan, Limited and The Dai-Ichi Kangyo Bank, Limited (collectively, the "Japanese Bank Lenders"), pursuant to a Term Loan Agreement dated March 27, 1997 (the "Alyeska Loan Agreement"). Pursuant to the Alyeska Loan Agreement, the Japanese Bank Lenders made loans to Alyeska (collectively, the "Alyeska Loan") for use by Alyeska for loans and capital contributions to the Vessel Owners and related entities to finance the acquisition by the Vessel Owners of the fishing vessels *BERING ROSE*, *ALASKA ROSE* and *SEA WOLF*.

Simultaneously with the Alyeska Loan transaction, Alyeska provided permanent financing to Alaska Rose, L.P. (the "Alaska Rose Loan") and Bering Rose, L.P. (the "Bering Rose Loan") for the purchase of the *ALASKA ROSE* and the *BERING ROSE*, respectively. In addition, permanent financing for the acquisition of the *SEA WOLF* was provided by the Japanese Bank Lenders through the Alyeska Loan transaction to Duke Point (the "Duke Point Loan") for Duke Point's purchase of an undivided 75% interest in the *SEA WOLF*. Alaska Rose, L.P., Bering Rose, L.P. and Duke Point executed Loan Agreements, Promissory Notes and Preferred Ship Mortgages in favor of Alyeska with respect to the loans. In consideration of the loans, Alaska Rose, L.P., Bering Rose, L.P., and Kendrick Bay also executed Nonrecourse Guaranties in favor of Mitsubishi Trust and Banking Corporation, as agent for the Japanese Bank Lenders (hereafter referred to as "MTBC, as agent"), limited to the amount of the loans outstanding from time to time plus applicable interest, together with the following documents:

(a) Preferred Ship Mortgages on the Vessels in favor of MTBC, as agent, securing the Nonrecourse Guaranties; and

(b) Assignments of Insurance Proceeds in favor of MTBC, as agent, securing the Nonrecourse Guaranties.

C. Exclusive Marketing Agreement

The Petitioners state that Alyeska financed the purchase of the Vessels in order to ensure a stable supply of fish to Alyeska's Dutch Harbor facility and in reliance on the assured revenue stream which sales to Alyeska would generate for the Vessel Owner. Accordingly, Section 5(A) of the loan agreement for each Vessel provides:

So long as there remains any outstanding balance on the Loan, Borrower agrees that the Vessel's sole market shall be Alyeska Seafoods, Inc. for any and all products regularly processed by Alyeska Seafoods, Inc., and for any and all species of catch processed by Alyeska Seafoods, Inc. Exceptions to this requirement are specified (1) on a delivery-by-delivery basis, where Alyeska informs the partnership that it lacks capacity to process the delivery; and (2) where Alyeska and [Vessel Owner] agree that the vessel may sell into other markets. Section 5(B) of the [Vessel Loan Agreement] provides that, in return for this marketing commitment, Alyeska will pay [Vessel Owner] a substantial annual "commitment fee."

Requested Action

The Petitioners have requested a consolidated filing for the Vessels. MARAD's regulations require at 46 CFR 356.53(c) that a separate petition be filed for each vessel for which the owner or mortgagee is requesting an exemption unless the Chief Counsel authorizes a consolidated filing. The Chief Counsel hereby authorizes the consolidated filing by Petitioners relating to the three Vessels.

The Petitioners seek a determination from MARAD under 213(g) of the Act and 46 CFR 356.53 that they are exempt from the requirements of sections 202, 203 and 204 of the AFA and 46 CFR Part 356 on the ground that the requirements of the AFA and 46 CFR Part 356, as applied to Petitioners with respect to the Vessels, conflict with U.S. obligations under U.S.-Japan FCN. The Petitioners request a determination that the restrictions placed on foreign ownership, foreign financing and foreign control of U.S.-flag vessels documented with a fishery endorsement contained in 46 C.F.R. Part 356 and sections 202, 203 and 204 of the AFA do not apply to Petitioners with respect to:

(1) the existing ownership interests in the Vessels held, directly or indirectly, by the Vessel Owners and their Non-Citizen Investors;¹

(2) the existing preferred mortgage interests in the Vessels held by Alyeska and the Japanese Bank Lenders identified below, including existing exclusive marketing agreements and other contract rights and interests ancillary to such financing arrangements; and

(3) future loan, financing and other transactions between the Non-Citizen Investors or the Japanese Bank Lenders,

¹ As used herein, the term "Non-Citizen" means a person or entity which is not a U.S. Citizen, as defined at 46 CFR § 356.3(e). The "Non-Citizen Investors" are Alyeska, Maruha, WAF, Marubeni Corporation, WAFBO, Inc., and Duke Point, L.P.

on the one hand, and the Vessel Owners, on the other, with respect to the Vessels.

Petitioner's Description of the Conflict Between the FCN Treaty and Both 46 CFR Part 356 and the AFA

MARAD's regulations at 46 CFR 356.53(b)(3) require Petitioners to submit a detailed description of how the provisions of the international investment agreement or treaty and the implementing regulations are in conflict. The entire text of the FCN Treaty is available on MARAD's internet site at <http://www.marad.dot.gov>. The description submitted by the Petitioner of the conflict between the FCN Treaty and both the AFA and MARAD's implementing regulations forms the basis on which the Petitioners request that the Chief Counsel issue a ruling that 46 CFR Part 356 does not apply to Petitioners with respect to the Vessels. The Petitioner's description of how the provisions of the U.S.-Japan FCN are in conflict with both the AFA and 46 CFR Part 356 is as follows:

A. The AFA's Limitations and Restrictions on Foreign Involvement in the U.S. Fishing Industry Are Inconsistent With U.S. Obligations Under the U.S.-Japan FCN.³

1. The AFA's Restrictions on Foreign Ownership Violates Article VII

(a) *The AFA's Restrictions on Foreign Investment Impair Petitioners' Existing Ownership Interests.* The AFA's new restrictions on foreign investment in fishing vessels will prohibit the Vessel Owners from employing their Vessels in the U.S. fisheries on and after October 1, 2001, because the extent of Japanese investment in the Vessel Owners exceeds the maximum permitted by the AFA.

Dept. verify hwer ref. &

ft2**FOOTNOTES** [1]: [3]:

A vessel cannot lawfully be employed in the fisheries of the United States unless it is documented as a vessel of the United States with a fishery endorsement issued by the U.S. Coast Guard pursuant to 46 U.S.C. Chapter 121. 46 U.S.C. Chapter 121 sets out the requirements which must be met for a vessel to be eligible for documentation with a fishery endorsement, including requirements related to the citizenship of vessel owners.

The Vessels are fishing vessels, designed and constructed or rebuilt for use in the U.S. fisheries and operated in

the U.S. fisheries of the North Pacific Ocean and Bering Sea. Each of the Vessel Owners is eligible to own a vessel with a fishery endorsement under the current standards of 46 U.S.C. Chapter 121 and each of the Vessels is documented as a vessel of the United States with a fishery endorsement.

However, the Vessel Owners will be prohibited from owning or operating the Vessels in the U.S. fisheries on and after October 1, 2001 under the new restrictions on foreign investment in fishing vessels imposed by the AFA and MARAD's implementing rules, codified at 46 CFR Part 356 (65 Fed. Reg. 44860 *et seq.*, July 19, 2000). The aggregate of the ownership interests held, directly or indirectly, in the Vessel Owners by Alyeska (in the case of the SEA WOLF, by Alyeska and WAFBO, Inc.) exceeds 25%—the maximum percentage interest permitted to be held by Non Citizens under Section 202(a) of the AFA, effective on and after October 1, 2001 (see 46 U.S.C. 12102(c)(1), as amended).⁴ The AFA requires MARAD to revoke the fishery endorsement of any fishing vessel whose owner does not comply with this new requirement. AFA Section 203(e). Accordingly, unless exempted from the AFA's new requirements, the Vessel Owners will no longer be permitted to own and operate their Vessels in the U.S. fisheries as of October 1, 2001. As a result, the Vessel Owners will be deprived of income from their Vessels; will be driven into insolvency and will default under the terms of their Guaranties in favor of the Japanese Bank Lenders and their Loan Agreements with Alyeska, and Alyeska, in turn, will be forced into default under the terms of its loan agreement with the Japanese Bank Lenders. Alternatively, the Vessel Owners would be forced to sell the Vessels or their Non-Citizen Investors would be forced to sell their interests in the Vessel Owners, assuming a buyer could be found. In

⁴ The AFA makes two primary changes to the existing limitation on foreign ownership of fishing vessels: (1) The required percentage of U.S. Citizen ownership is increased from "a majority" to 75%; (2) this new test is to be applied both "at each tier of ownership and in the aggregate," whereas the existing standard is applied solely at each tier of ownership, allowing foreign interests "in the aggregate" to exceed 50%, so long as U.S. Citizen ownership is maintained "at each tier." See 46 CFR 221.3(c) (a U.S. Citizen is a Person who "at each tier of ownership" satisfies the requisite ownership standard). Compare, 46 U.S.C. 12102(c), as now in effect, and 46 CFR 67.31(c), with 46 U.S.C. 12102(c)(1), as amended by Section 202(a) of the Act, and 46 CFR 356.9. The Vessels are owned by U.S. Citizens (as defined at 46 CFR 356.3(e)) at each "tier" of ownership but the "aggregate" U.S. citizen ownership is less than 75%. In addition, Section 204 of the AFA repeals a provision of prior law which permits 100% foreign owned corporations to own certain vessels.

either case, if Alyeska loses access to the fish that would otherwise be harvested by the Vessels and delivered to its Dutch Harbor processing facility, the \$70 million investment which Alyeska and its shareholders have made in that facility and the jobs of its employees would be jeopardized.

(b) *The Impairment of Petitioners' Existing Ownership Interests Violates Article VII.1 and the Grandfather Provision of Article VII.2* The impairment of Petitioners' existing ownership interests in the Vessels violates their right to "national treatment" under Article VII. 1 and the grandfather provision of Article VII.2 of the U.S.-Japan FCN.

The U.S.-Japan FCN was one of a series of similar Friendship, Commerce and Navigation ("FCN") Treaties entered into by the United States with various countries after World War II, based on a standard State Department treaty text. All of these treaties reflect U.S. post-war policy to encourage and protect international trade and investment. Herman Walker, Jr., the principal author of the standard FCN treaty text and one of the principal State Department negotiators during this period, has described the FCN treaties as "concerned with the protection of persons, natural and juridical, and of the property interests of such persons." Herman Walker, Jr., "Modern Treaties of Friendship, Commerce and Navigation," 42 Minn. L. Rev. 805, 806 (1958) (hereinafter, "Modern Treaties").

Article VII.1 of the U.S.-Japan FCN guarantees broad "national treatment" for the nationals and enterprises of the U.S. and Japan when doing business within the jurisdiction of the other country. Article XXII.1 of the U. S.-Japan FCN defines "national treatment" as "treatment accorded within the territories of a Party upon terms no less favorable than the treatment accorded therein, in like situations, to nationals, companies, products, vessels or other objects, as the case may be, of such Party." The principle of national treatment is the central principle of all of the post-war FCN treaties. National treatment requires that each State Party must treat nationals of the other in the same way that it treats its own nationals. The treaties focus on business and investment. "The right of corporations to engage in business on a national-treatment basis may be said to constitute the heart of the treaty." Herman Walker, Jr., "The Post-War Commercial Treaty Program of the United States," 73 Pol. Sci. Q. 57, 67 (1958). In a case involving interpretation of the U.S.-Japan FCN, the United States Supreme Court noted that the purpose

³ The text of the relevant provisions of the U.S.-Japan FCN cited herein is found at Attachment 1 to the Annex I of Authorities (hereinafter "Annex"), filed herewith.

of the FCN treaties was "to assure [foreign corporations] the right to conduct business on an equal basis without suffering discrimination based on their alienage." *Sumitomo Shoji America v. Avagliano*, 457 U.S. 176, 187-88 (1982). "[N]ational treatment of corporations means equal treatment with domestic corporations." *Id.* at 188 n. 18.

The preamble of the U.S.-Japan FCN provides that guaranteeing nationals of each Party "national * * * treatment unconditionally" is one of the two general principles upon which the U.S.-Japan FCN was based. Use of the word "unconditionally" in this context clearly demonstrates the strength of the drafters' general intent. Accordingly, the exceptions to the principle of national treatment stated in the U.S.-Japan FCN must be narrowly construed.

The AFA's retroactive prohibition of ownership interests acquired by Ayeska and WAFBO, Inc. in compliance with existing law clearly denies national treatment to them and to the Vessel Owners. The AFA's new limitation on foreign ownership of fishing vessels is thus inconsistent with the most fundamental principle of the U.S.-Japan FCN.

The first sentence of Article VII.2 of the U.S.-Japan FCN provides a limited exception to the principle of national treatment for enterprises engaged in "the exploitation of land or other natural resources." Even in that context, however, the second sentence of Article VII.2 (referred to as the "grandfather" provision of Article VII.2) prohibits application of new restrictions and limitations to Japanese nationals or enterprises which have previously "acquired interests" in enterprises owning U.S. fishing vessels or have previously engaged in the business activities now to be restricted. Article VII.2 provides in pertinent part:

Each Party reserves the right to limit the extent to which aliens may within its territories establish, acquire interests in, or carry on * * * enterprises engaged in * * * the exploitation of land or other natural resources. *However, new limitations imposed by either Party upon the extent to which aliens are accorded national treatment, with respect to carrying on such activities within its territories, shall not be applied as against enterprises which are engaged in such activities therein at the time such new limitations are adopted and which are owned or controlled by nationals and companies of the other Party*

Emphasis added. The grandfather provision of Article VII.2 thus provides that any new limitations on national treatment placed on alien participation in the sectors covered by the first sentence of Article VII.2 shall not apply to existing enterprises engaged in

business within those sectors at the time such new limitations are adopted.

A study commissioned by the State Department of its past interpretations of the FCN treaties notes that, under the grandfather provision of Article VII.2, "protection is afforded to any privilege granted * * * prior to a change in national treatment; hence at a minimum these foreign enterprises are guaranteed the maintenance of their existing operations." Ronny E. Jones, "State Department Practices Under U.S. Treaties of Friendship, Commerce, and Navigation" (1981) (hereinafter "Jones Study") at 57.⁵ "[R]egulations that force divestiture of interests already acquired or established prior to promulgation of such regulation * * * raise Art. VII questions." *Id.* at 107. Herman Walker, Jr. stated the purpose of the Article VII.2 grandfather provision clearly: "The aim is to * * * guarantee duly established investors against subsequent discrimination. The failure to find a welcome as to entry is of much less importance than would be a failure, once having entered and invested in good faith, to be protected against subsequent harsh treatment." Modern Treaties at 809. In describing the import of the phrase "new limitations," another State Department study states,

The net effect [of the second sentence of Article VII.2] is that, although not obligated to allow alien interests to become established in those fields of activity, *rights which have been extended in the past shall be respected and exempted from the application of new restrictions.*

Charles H. Sullivan, "State Department Standard Draft Treaty of Friendship, Commerce and Navigation" (undated) (hereinafter "Sullivan Study") at 149 (emphasis added). "the second sentence of Article VII(2) is a grandfather clause intended in the interest of fairness to protect legitimately established alien enterprises against retroactive impairment." *Id.* at 148.

Both State Parties placed great importance on the grandfather provision of Article VII.2 because they recognized that it would not only protect existing property rights but would entitle foreign-owned enterprises to continue to operate in the same manner as before, notwithstanding later limitations placed on the rights of foreign-owned entities to engage in such business activities. It was a "principal negotiating point" of the U.S. side to ensure that the reservations in Article VII.2 would not permit retroactive application of any

new limits to companies already engaged in relevant business activities.⁶

The U.S. negotiators therefore resisted efforts to modify the grandfather provision of Article VII.2, despite strong Japanese efforts to restrict its application. As an indication of the importance the Japanese negotiators attached to the provision, the Japanese Embassy at one point late in the negotiations indicated that the Ministry of Finance might be persuaded to withdraw "all other objections" to the draft treaty if the sentence granting grandfather rights to existing businesses were deleted.⁷ Eventually, the Japanese negotiators accepted the language in Article VII.2 without any change after the U.S. agreed to the language appearing in the second sentence of Paragraph 4 of the Protocol. The U.S. State Department agreed to the Protocol language only on the understanding that it in no way undermined the prohibition against application of discriminatory laws to existing enterprises in the second sentence of Article VII.2.⁸

As adopted, the second sentence of Article VII.2 follows the standard treaty text developed by the State Department and used as the basis for more than a dozen FCN treaties. The Sullivan Study notes the breadth of the protection this sentence affords existing companies otherwise subject to VII.2. The Sullivan Study indicates that an enterprise protected by the Article VII.2 grandfather provision is not only protected as to existing property interests or contract rights, but "is able to enjoy what may be considered normal business growth in terms of acquiring new customers and increasing the dollar volume of its business, but it cannot claim expanded privileges. * * *" Sullivan Study at 150.

In short, the protections afforded existing investments and existing businesses by the second sentence of Article VII.2 were seen by the U.S. as a key part of the U.S.-Japan FCN and similar FCN treaties, providing substantial protections to foreign investors and businesses. The provision affords Ayeska and WAFBO, Inc. the right to continue to hold their direct and indirect investments in the Vessel Owners and, more generally, to continue to transact business with the

⁵ Petitioners presume that MARAD has access to the Jones Study and the Sullivan Study referenced below. Petitioners will provide copies of these studies to MARAD on request.

Vessel Owners on the same basis as permitted prior to passage of the AFA. Similarly, the Article VII.2 grandfather provision guarantees the Vessel Owners the right to own and operate the Vessels in the U.S. fisheries on equal terms with wholly domestic enterprises.

Maruha and Marubeni are clearly entitled to protection as Japanese enterprises which, at the time the AFA was adopted, were “engaged in * * * activities” within the United States which the AFA but for Section 213(g), would prohibit, limit or restrict. Alyeska, WAF, WAFBO, Inc. and the Vessel owners likewise come within the protection of the Article VII.2 grandfather provision by reason of the direct and indirect ownership interests in them held by Maruha and/or Marubeni. Thus, the Article VII.2 grandfather provision protects the ownership interests of Maruha, WAF and Marubeni in Alyeska, the ownership interests of Alyeska and WAFBO, Inc. in the Vessel Owners and the Vessel Owners’ right to continue to own and operate the Vessels in the U.S. fisheries.

However, as noted above, the Article VII.2 grandfather provision not only protects preexisting rights and interests acquired, directly or indirectly, by Japanese nationals prior to a discriminatory change in the law, but protects *existing enterprises* from such changes. Accordingly, the Article VII.2 grandfather provision, together with Section 213(g) of the AFA, exempts the Vessel Owners and their Non-Citizen Investors from the new restrictions of Section 202, 203 and 204 of the AFA and 46 CFR Part 356 with respect to (a) the Non-Citizen Investors’ existing direct and indirect ownership interests in the Vessel Owners and the Vessels, (b) the continued operations of the Vessels by the Vessel Owners in the U.S. fisheries, and (c) future transactions between the Non-Citizen Investors and the Vessel Owners to further or protect the existing rights and interests of the Non-Citizen Investors in the Vessels and the Vessel Owners, such as the refinancing of existing loans, the making of new loans, the modification of existing mortgages, the taking of new mortgages or other security and the conclusion of other contractual arrangements ancillary to such financing activities.

2. The AFA’s Restrictions on Foreign Financing of Fishing Vessels Violate Article VII.

(a) *The AFA’s Restrictions on Foreign Financing of Fishing Vessels Impair Petitioners’ Rights and Interests With Respect to Vessel Financing.* The AFA

will nullify the preferred mortgage interests in the Vessels currently held by Alyeska and the Japanese Bank Lenders, impair their rights and interests under existing financing documents and prevent them from protecting their established businesses and interests by entering into future financing and related business transactions with the Vessel Owners.

Current law permits wholly or partly Japanese-owned lenders, including the Japanese Bank Lenders, Alyeska and the other Non-Citizen Investors, to finance U.S. fishing vessels and to hold preferred mortgage interests in U.S. fishing vessels to secure their loans. See 46 USC 31322. A “preferred mortgage” is a creature of federal statute and gives the mortgagee a lien on the mortgaged vessel, enforceable in U.S. District Court under a priority scheme that protects the mortgagee from most maritime liens. See, generally, 46 USC Chapter 313. 46 USC 31326(b)(1) gives the preferred mortgage lien priority over all maritime liens arising after filing of the mortgage except a limited number of “preferred” maritime liens listed at 46 USC 31301(5) and provides that a sale of the vessel by order of the District Court terminates all liens or other claims against the vessel, thus ensuring the purchaser clear title and allowing the mortgagee to realize maximum value for its security. Since maritime liens arise in favor of suppliers, materialmen, repairmen and others in the course of the ordinary operations of the vessel, protection against such liens is essential to the mortgagee’s security, as is the ability to terminate those liens on foreclosure and to sell the vessel “free and clear” of liens. Absent preferred mortgage status, a mortgage provides little or no security for the lender. Thus, the preferred mortgages which Alyeska and the Japanese Bank Lenders hold in the Vessels are valuable property interests in the Vessels.

The AFA will prohibit Alyeska and the Japanese Bank Lenders from continuing to hold their existing preferred mortgages on the Vessels unless, in the case of the Japanese Bank Lenders, their mortgages are transferred to a qualified Mortgage Trustee (see AFA Section 202(b), amending 46 USC 31322, and 46 CFR 356.19) and the terms of the financing documents are approved by a MARAD under the AFA’s new “control” standards (see AFA Section 202(a), adding 46 USC 12102(c)(4)(A), and 46 CFR 356.15(d) and 356.21(d)). The AFA contains a new definition of impermissible Non-Citizen “control” (AFA Section 202(a), codified at 46 USC 12102(c)(2)) and requires transfers of “control” of fishing vessels

to be “rigorously scrutinized” by MARAD under this new standard (AFA Section 203(c)(2)). MARAD has implemented the AFA’s new “control” standard by adopting a host of new restrictions and limitations on contractual and other business arrangements between fishing vessel owners and Non-Citizens. See, generally, 46 CFR 356.11, 356.13–15, 356.21–25, 356.39–45. Unless MARAD reviews and approves the terms of the loan agreements, preferred mortgages and other financing documents previously executed by the Vessel Owners in favor of the Alyeska and the Japanese Bank Lenders prior to October 1, 2001 under these new standards, the Vessels will lose their fishery endorsements and the Vessel Owners will no longer be permitted to own or operate the Vessels in the U.S. fisheries. See 46 CFR 356.15(d), 356.21(d). This, in turn, will destroy the value of the Vessels as security under the mortgages held by Alyeska and the Japanese Bank Lenders and destroy the ability of the Vessel Owners to pay the debts which the mortgages secure. By prohibiting Alyeska and the Japanese Bank Lenders from continuing to hold their existing preferred mortgages on the Vessels, imposing new conditions and restrictions on the terms of their existing financing documents, including a new requirement of administrative review and approval of those financing documents under AFA’s new “control” standards, the AFA and MARAD’s implementing regulations will impair the contractual rights and mortgage interests of Alyeska and the Japanese Bank Lenders under their existing preferred mortgages and related financing documents.

In the case of Petitioner Alyeska’s mortgages, MARAD has made clear that *there is no way that Alyeska can preserve its mortgage interests under the AFA*. MARAD has interpreted the AFA’s requirements to prohibit Non-Citizen fish processors, such as Alyeska, from holding mortgages or other security interests in fishing vessels, even if the mortgage is held by a qualified Mortgage Trustee and the loan and mortgage terms are otherwise acceptable to MARAD. 65 Fed. Reg. at 44871 c.2 (July 19, 2000) (“[A]dvancements of funds from Non-Citizen processors will not be permitted where the security for the loan is a security interest in the vessel”). Thus, in the case of Alyeska, the AFA’s requirements will nullify Alyeska’s existing preferred mortgage interests in the Vessels. If Alyeska’s mortgages are not released, the Vessels will lose their fishery endorsements, destroying the

value of the Vessels as collateral for Alyeska's loans and destroying the Vessel Owners' ability to pay their debts.

Further, even if Alyeska's *existing* financial interests in the Vessel Owners were found to be exempt from the requirements of the AFA and MARAD's implementing rules, the AFA's restrictions on *future* financing transactions between Alyeska or its Japanese shareholders and the Vessel Owners will substantially impair the rights and interests of Alyeska and its Japanese shareholders in violation of Article VII.1. The AFA's restrictions on foreign financing of fishing vessels will prevent Alyeska and its Japanese shareholders from protecting their investments in Alyeska's Dutch Harbor processing facility and their existing investments in and loans to the Vessel Owners by offering the Vessel Owners financing, secured by mortgages on the Vessels or otherwise, for vessel repairs or improvements which may become necessary to permit the Vessel Owners to operate profitably—or at all. If alternative financing from a financial institution is unavailable to the Vessel Owners, the ability of Alyeska to make loans to support the Vessels' continuing operations may be the only means available to protect the Vessel Owners from insolvency and default on their existing loans from Alyeska—triggering a default by Alyeska under its loan agreement with the Japanese Bank Lenders. Thus, the AFA's restrictions on the ability of Alyeska or its Japanese shareholders to make new loans to the Vessel Owners and to take security in the Vessels jeopardize the existing financial interests of Alyeska and its Japanese shareholders in the Vessel Owners and the Vessels, as well as Alyeska's own financial health.

Finally, the new restrictions imposed by the AFA and MARAD's regulations on the ability of Alyeska to make loans to fishing vessel owners will disrupt Alyeska's ability to secure a reliable supply of fish to its processing facility. Alyeska's ability to offer financing for the construction, acquisition or improvement of fishing vessels is a necessary means to secure a stable supply of fish to its processing plant. A processor's agreement to provide financing on favorable terms to qualified U.S. vessel owners in return for the vessel owner's agreement to sell the vessel's catch exclusively to the processor is a customary means by which vessel owners finance the acquisition, repair or improvement of their vessels and processors secure a reliable supply of fish to their plants. Such arrangements between vessel

owners and processors, both wholly domestic and Non-Citizen processors, are common and traditional in the Alaska fishing industry. Non-Citizen processors, such as Alyeska, which have invested many millions of dollars in shore-based processing plants in remote locations in Alaska, must have the ability, like their wholly domestic competitors, to secure a reliable supply of fish to their plants by financing the acquisition or improvement of fishing vessels on normal commercial terms in return for the vessel owner's agreement to sell exclusively to that processor during the term of the loan. Just as their existing ownership and mortgage interests are protected by the Treaty; Alyeska, its Japanese shareholders and the Japanese Bank Lenders must also be able to modify and restructure their loans and related security arrangements with the Vessel owners and make new loans to the Vessel Owners with respect to the Vessels in order to further and protect their existing investments, mortgages and business interests, as circumstances may require.

(b) *The Restrictions on Foreign Financing of Fishing Vessels Imposed by the AFA and MARAD's Implementing Rules Violate Article VII.1.*

The new restrictions on foreign financing of fishing vessels imposed by the AFA and MARAD's implementing regulations violate Article VII.1's national treatment guaranty by (1) depriving Alyeska and the Japanese Bank Lenders of existing preferred mortgage interests securing existing loans; (2) subjecting the terms of their existing loan documents to a new requirement of administrative review and approval by MARAD under the new "control" standards of the AFA and MARAD's implementing rules; (3) depriving Alyeska and the Japanese Bank Lenders of the value of their collateral and the income stream from operations on which they relied in making their loans; and (4) preventing Alyeska, its shareholders or the Japanese Bank Lenders from refinancing existing loans, making new loans to the Vessel Owners, taking new mortgages on the Vessels or entering into other contractual arrangements with respect to the Vessels or the Vessel Owners necessary to further or protect their existing financial and business interests.

Article VII.1 extends full national treatment protection "with respect to engaging in *all types* of commercial, industrial, *financial* and other business activities." The negotiating history of the U.S.-Japan FCN leaves no doubt that loans and lending by foreign-owned lenders are entitled to full national

treatment under the first sentence of Article VII.1.

At the fourth informal meeting of the U.S. and Japanese negotiators, the Japanese negotiators argued that foreign-owned banks should be denied national treatment, as well as most-favored-nation protection. One reason given was that their loans could result in the foreign-owned bank lender controlling key industries.⁹ For this and other reasons, Japan suggested rewriting Article VII.1, and among other changes deleting "financial" from the activities provided national treatment in the first sentence of the provision.

A cable from U.S. State Department headquarters in Washington noted that the Japanese proposal, and in particular its interest in denying national treatment to bank loans, reflected an attitude that creates a "difficulty going to heart of treaty."¹⁰ The State Department opposed any change that would delete the word *financial* from the first sentence of Article VII.1. Subsequently, the Japanese side suggested instead adding the word "lending" to the exception provided in the first sentence of Article VII.2, so the phrase would have read "banking involving depository, lending or fiduciary functions." In response, the State Department reiterated its opposition to any change that would deny foreign lenders the right to full national treatment under Article VII.1.

A Department cable explained why the exception to national treatment provided by the first sentence of the U.S. draft of Article VII.2 was limited to only the depository and fiduciary functions of banks.¹¹ The cable states: "Mr. Otabe is incorrect in supposing that the U.S. reservation for banking is based on the reason he alleges. The reservation has to do with receiving and keeping custody of deposits from the public at large; that is, the safekeeping of other people's money, a function of particular trust. It does not have to do with the lending activities of a bank; and the Department does not feel that a reservation is either appropriate or necessary as to a bank's lending its own money." Id. During the second round of informal meetings, the U.S. negotiators continued to oppose adding loans to the banking functions excluded from full national treatment by the first sentence of Article VII.2, and the Japanese

⁹ Annex, Attachment 5, Memorandum of Conversation dated March 4, 1952, pp. 2-3.

¹⁰ Annex, Attachment 6, Dept. of State Outgoing Telegram dated March 10, 1952, p. 1.

¹¹ Annex, Attachment 7, Dept. of State Outgoing Telegram dated May 21, 1952, p. 3.

government eventually agreed to withdraw its proposed change.¹²

The exception to national treatment for certain banking functions in the first sentence of Article VII.2 is the same as in the standard FCN treaty text. The Sullivan Study notes that "this reservation is stated in terms intended to circumscribe it as much as possible, thereby maximizing the extent to which the banking business remains subject to the rule [of national treatment] set forth in Article VII(1)." Sullivan Study at 144. The Sullivan Study notes that the two areas reserved, depository and fiduciary functions, involve the custody and management of other people's money, and therefore are the most sensitive areas of banking.

It is clear, therefore, that the reference in the first sentence of Article VII.2 to "banking involving depository or fiduciary functions" does not include the lending activities of the Japanese Bank Lenders or Alyeska. Both the U.S. and Japanese negotiators were in full agreement as to the meaning of this phrase. Thus, the financing activities of banks and other lenders are entitled to the full national treatment under Article VII.1.¹³

The provisions of the AFA and MARAD's implementing rules which restrict the right of Japanese-owned entities to make loans secured by mortgages on U.S. vessels or to make such loans without prior MARAD approval of the loan terms are inconsistent with the guaranty of national treatment in Article VII.1. The rationale that such loan activities may be restricted on the grounds that they could result in a degree of control over sensitive industries was specifically considered by the U.S. negotiators and rejected as a valid reason for limiting the Treaty's protections for such lending activities. The control argument presented by Japan at that time is the same argument used to justify the restrictions of the AFA. Although the negotiating history deals largely with banking, the language of Article VII.1

extends the protections of national treatment broadly to "all types of * * * financial * * * activities." Under Article VII.1, neither State Party may restrict loans by foreign-owned entities secured by vessels of their national flag.

The AFA and MARAD's implementing rules impose new restrictions on the ability of Alyeska and the Japanese Bank Lenders, going forward, to protect their existing financial interests in the Vessel Owners and the Vessels by, e.g., re-financing existing loans, advancing new loans for repair or improvement of the Vessels or entering into other financing or contractual arrangements with the Vessel Owners. These restrictions are not permitted by Article VIII of the Treaty. Article VIII extends the Treaty's protection both to loans, mortgages and other financing arrangements that are now outstanding under the terms of existing financing documents and to future financing activities by Alyeska, its shareholders or the Japanese Bank Lenders involving the Vessels or the Vessel Owners.

Application of the AFA's new "control" standards to restrict the ability of Alyeska to do business with the Vessel Owners that supply fish to its processing plant, as it has done in the past and on the same terms as its U.S. Citizen competitors, would deny national treatment to Alyeska and its Japanese shareholders. The State Department has recognized that the exception to the requirement of national treatment that may apply with respect to the ownership of fishing vessels under the first sentence of Article VII.2 does not apply to fish processors.¹⁴ Article VII.1 applies, and it extends the protection of full and unconditional national treatment to fish processors with Japanese ownership, such as Alyeska. The discriminatory restrictions imposed under the AFA on Alyeska's ability to enter into future financing and other contractual arrangements with the Vessel Owners to ensure a stable supply of fish to Alyeska's Dutch Harbor processing facility clearly violate Article VII.1.

For these reasons, Petitioners seek a determination by MARAD that Sections 202, 203 and 204 of the AFA and MARAD's implementing regulations do not apply to Petitioners with respect to (a) existing preferred mortgages and associated loan and security documents previously executed by the Vessel owners in favor of Alyeska or the

Japanese Bank Lenders, including the exclusive marketing agreements contained in Alyeska's loan agreements with the Vessel Owners (or, in the case of the SEA WOLF, with the Vessel Owner's general partner); or (b) fixture financing and ancillary contractual arrangements between Alyeska or the Japanese Bank Lenders and the Vessel Owners, including exclusive marketing agreements.

3. Application of the AFA and MARAD's Implementing Rules to Petitioners Would Result in a "Taking" in Violation of Article VI.3

The first sentence of Article VI.3 of the Treaty states that "[p]roperty of nationals and companies of either Party shall not be taken within the territories of the other Party except for a public purpose, nor shall it be taken without the prompt payment of just compensation." This "takings" provision precludes expropriations and other measures that substantially impair a Japanese national's direct and indirect property rights. Applying the AFA's new restrictions to prohibit the Non-Citizen Petitioners from holding their pre-existing ownership interests, mortgage interests and contract rights would deprive them of their property in violation of Article VI.3.

The term "property" in Article VI.3 includes not simply direct ownership but also a wide variety of property interests, such as those which the Non-Citizen Petitioners have in the Vessel Owners and in the Vessels. The Protocol to the U.S.-Japan FCN explicitly states that "[t]he provisions of Article VI, paragraph 3 * * * shall extend to interests held directly or indirectly by nationals and companies of either Party in property which is taken within the territories of the other Party." Protocol, ¶ 2 (emphasis added). As the United States delegates made clear during the negotiation of the Treaty, the phrase "interests held directly or indirectly" is intended to extend to every type of right or interest in property which is capable of being enjoyed as such, and upon which it is practicable to place a monetary value. These direct and indirect interests in property include not only rights of ownership, but [also] * * * lease hold interest[s], easements, contracts, franchises, and other tangible and intangible property rights.¹⁵ In short, "all property interests are contemplated by the provision."¹⁶ This necessarily includes the direct and indirect ownership interests which

¹² Annex, Attachment 8, Memorandum of Conversation dated October 15, 1952, p. 15.

¹³ To the extent that it could be argued that the first sentence of Article VII.2 might permit restrictions on foreign financing of fishing vessels, the grandfather provision of Article VII.2 would clearly protect Alyeska, its shareholders and the Japanese Bank Lenders with respect to their existing rights and interests, as the holders of ownership and debt interests in the Vessel Owners and mortgage interests in the Vessels, and with respect to future financing activities undertaken to further or protect those interests. Alyeska, WAFBO, Inc., their Japanese shareholders and the Japanese Bank Lenders clearly "acquired interests" in the Vessel Owners prior to enactment of the AFA and are thus entitled to national treatment in future dealings with the Vessel Owners.

¹⁴ Annex, Attachment 9, Letter to the Chairman of the House of Representatives Committee on Merchant Marine and Fisheries from Robert Lee, August 17, 1964.

¹⁵ Annex, Attachment 10, Memorandum of Conversation dated April 15, 1952 at p. 3.

¹⁶ *Id.*

Petitioners have in the Vessel Owners and in the Vessels and the preferred mortgage interests which Alyeska and the Japanese Bank Lenders have in the Vessels, together with ancillary contract rights granted in their loan documents.

The concept of a taking in this context is broad and “is considered as covering, in addition to physical seizure, a wide variety of whole or partial sequestrations and other impairments of interests in or uses of property.” Sullivan Study at 116 (emphasis added). Here, the AFA’s new restrictions on foreign investment and foreign financing will prohibit the Vessel Owners from using their Vessels in the U.S. fisheries. In effect, the AFA will either deprive the Petitioners of the economic value of their interests in the Vessels by prohibiting their productive use or force divestiture. The impairment of the presently existing rights of the Vessel Owners to use their Vessels in the U.S. fisheries—and the rights of the other Petitioners to hold their existing direct and indirect ownership interests in the Vessel Owners and mortgage interests in the Vessels—is a sufficient impairment of those rights and interests as to constitute a violation of Article VI.3.

Further, a taking is permitted under the Treaty only for a “public purpose,” and it is clear that application of the AFA’s ownership restrictions to the Vessel Owners so as to force a divestiture of the interests of Alyeska or WAFBO, Inc. to a private party which qualifies as a U.S. Citizen would not satisfy the “public purpose” requirement of the U.S.-Japan FCN. Even if such a forced sale to a private party could be characterized as having a “public purpose,” the AFA makes no provision for the “prompt payment of just compensation,” as required by Article VI.3. The fact that the AFA and 46 CFR Part 356 fail to provide any compensation scheme—let alone “adequate provision * * * at or prior to the time of taking for the determination and payment thereof”—is another basis for concluding that the AFA’s retroactive limitations on foreign ownership and foreign financing of fishing vessels are inconsistent with Article VI.3 of the U.S.-Japan FCN.

4. The AFA and MARAD’s Implementing Rules Impair Petitioners’ Legally Acquired Rights in Violation of Article V

The new restrictions imposed by the AFA and MARAD’s implementing rules on foreign involvement in the U.S. fishing industry are “unreasonable or discriminatory measures” that impair the legally acquired rights and interests

of Petitioners in violation of Article V of the Treaty.

Article V provides that “[n]either Party shall take unreasonable or discriminatory measures that would impair the legally acquired rights or interests within its territories of nationals and companies of the other Party in the enterprises which they have established. * * *” The provision follows the standard FCN treaty language, except that the language was moved from Article VI.3 in the standard text to a new Article V and certain additional language, not relevant here, was added. According to the Sullivan Study, the provision “offers a basis in rather general terms for asserting protection against excessive governmental interference in business activities or particular activities not specifically covered by the treaty.” Sullivan Study at 115. Herman Walker observed that this language is designed “to account for the possibility of injurious governmental harassments short of expropriation or sequestration.” Herman Walker, Jr., “Treaties for the Encouragement and Protection of Foreign Investment: Present United States Practice,” 5 Am. T. Comp. Law at 236 (1956). A State Department memorandum to Congress, discussing language very similar to Article V in another treaty, noted that the language “affords one more ground, in addition to all the other grounds set forth in the treaty, for contesting foreign actions which appear to be injurious to American interests.”¹⁷

The negotiating history confirms that Article V was intended as a general provision prohibiting discrimination against foreign-owned entities not subject to other provisions of the U.S.-Japan FCN. During the negotiations, Japan proposed adding language prohibiting the denial “of opportunities and facilities for the investment of capital.” The proposal was not adopted after the U.S. opposed it on the grounds that Article VII fully addressed investment activities and that the additional language was not appropriate in Article V, which addresses issues not limited to investment.¹⁸

Thus, Article V was intended as a general prohibition of discriminatory restrictions not covered by other

provisions of the U.S.-Japan FCN and of restrictions that do not rise to the level of a “taking.” Article V prohibits deprivations of both most-favored nation treatment and national treatment. Sullivan Study at 115. Thus, it would apply to the variety of discriminatory prohibitions and restrictions that the AFA and MARAD’s implementing regulations impose on Petitioners’ existing ownership and mortgage interests and other contract rights and on Petitioners’ ongoing ability to protect those rights and interests by entering into future transactions with the Vessel Owners.

The intrusive and discriminatory restrictions imposed by the AFA and MARAD’s implementing rules on transactions between Non-Citizen lenders, such as Alyeska and the Japanese Bank Lenders, and U.S. fishing vessel owners place the Non-Citizen lenders at a significant competitive disadvantage. U.S. Citizen processors and other lenders are free to make loans and to enter into contracts with fishing vessel owners without restriction. U.S. Citizen processors remain free to obtain a reliable supply of fish by financing fishing vessel acquisitions, conversions and improvements in return for exclusive marketing relationships while Non-Citizen processors are prohibited from making similar arrangements. As previously noted, MARAD has stated that Non-Citizen processors will be flatly prohibited from taking security in fishing vessels to secure loans to vessel owners. Under 46 CFR 356.45, a Non-Citizen lender is not even permitted to make an *unsecured* loan to a fishing vessel owner, if (a) the loan exceeds the annual value of the vessel’s catch (where an exclusive marketing agreement is involved—see § 356.45(a)(2)(i)); or (b) the lender is “affiliated with any party with whom the owner * * * has entered into a mortgage, long-term or exclusive sales or purchase agreement, or other similar contract * * *” (see § 356.45(b)(1)). Under these standards, Alyeska’s existing loans to the Vessel Owners would not have been permitted and Alyeska will not be permitted to make future loans to the Vessel Owners, secured or unsecured, to protect its existing interests. Further, the requirement of MARAD review and approval is itself an unreasonable and discriminatory burden, particularly in the absence of coherent standards. The AFA and MARAD’s rules thus impose “unreasonable or discriminatory measures” on Non-Citizen fish processors and other lenders with Japanese ownership, such as Alyeska

¹⁷ Annex, Attachment 11, Department of State Instruction dated February 15, 1954, p. 2, (discussing the applicability of Article V of the U.S.-Japan FCN to American lawyers doing business in Japan, and citing May, 1952 memorandum to U.S. Committee on Foreign Relations).

¹⁸ Annex, Attachment 12; Department of State Division of Communications & Records Outgoing Airgram dated October 28, 1952, p. 2.

and the Japanese Bank Lenders, impairing their legally acquired rights and interests and their ongoing ability to protect those interests in violation of Article V of the U.S.-Japan FCN.

5. Article XIX.6 Does Not Authorize the Provisions of the AFA and MARAD's Implementing Rules Which Are Otherwise in Violation of the U.S.-Japan FCN

Article XIX.6 provides that notwithstanding any other provision of the Treaty, "each Party may reserve exclusive rights and privileges to its own vessels with respect to the * * * national fisheries. * * *" This provision does not authorize the discriminatory limitations on Japanese investment and financing contained in the AFA and MARAD's implementing rules.

Even if Article XIX.6 is interpreted as applying to fishing vessels,¹⁹ it would be irrelevant to the issues presented here with respect to the AFA. Consistent with the Treaty text authorizing a Party to reserve exclusive rights to "its own vessels," the State Department has interpreted Article XIX.6 merely to permit the U.S. to reserve the right to catch or land fish in the U.S. national fisheries to "U.S. flag vessels."²⁰ The text of Article XIX.6 says nothing about and certainly does not authorize restrictions on foreign ownership or financing of U.S. flag fishing vessels or the ability of foreign-owned enterprises to do business with the owners of U.S. flag fishing vessels—restrictions that otherwise clearly violate Article VII of the Treaty.

The historical record of the negotiations provides further evidence that Article XIX.6 was not intended to override Article VII's national treatment requirements with respect to foreign investment in or financing of U.S. flag fishing vessels or other dealings between foreign-owned enterprises and fishing vessel owners. At one point, the Japanese negotiators proposed rewriting Article XIX.6 to provide that the national treatment provisions of the Treaty would not extend to "*nationals companies and vessels* of the other Party any special privileges reserved to national fisheries." See Memorandum of Conversation dated April 3, 1952, at 5.²¹ The State Department understood the Japanese suggestion as an attempt to obtain a blanket exception from the

entire Treaty for national fisheries. See U.S. Dept. of State, Outgoing Airgram to U.S. Embassy in Tokyo (June 12, 1952), at 1–2 (noting that a clearer way to effect the Japanese intent would be by adopting a single comprehensive exception stating that "[t]he provisions of the present Treaty shall not apply with respect to the national fisheries of either Party, or to the products of such fisheries").²² The U.S. rejected the Japanese proposal and the language of Article XIX.6 remained unchanged. The issue of Japanese investment in and other dealings with enterprises owning or operating U.S. flag fishing vessels was left to Article VII.

Subsequent practice of the State Department confirms this reading of Article XIX.6. In 1964, the State Department reaffirmed the narrow scope of Article XIX.6 in a letter to the House Committee on Merchant Marine and Fisheries. The letter makes clear that the provision merely permits the United States to reserve the right to catch or land fish to U.S. flag vessels.²³

This reading of Article XIX.6 in the U.S.-Japan FCN also comports with the State Department's reading of this same language in other FCN treaties to which the U.S. is a party. The Sullivan Study explicitly states that "[t]he crucial element in Article XIX is that it relates to the treatment of *vessels* and to the treatment of their cargoes. *It is not concerned with the treatment of the enterprises which own the vessels and the cargoes.*" Sullivan Study at 284 (emphasis added).

Thus, the text, negotiating history and subsequent State Department practice and understanding all explicitly confirm that Article XIX.6 is irrelevant to laws restricting foreign ownership and control of fishing vessel *owners* and thus does not override the other provisions of the U.S.-Japan FCN dealing with foreign investment and business activity. Article XIX.6 does not exempt the AFA's foreign ownership, financing and control restrictions, from Articles V, VI.3, VII or IX.2, each of which bars application of those restrictions to Petitioners with respect to the Vessel Owners and the Vessels.

6. Broad Interpretation of the Treaty's Protections is in the U.S. Interest

The terms of the U.S.-Japan FCN and the other FCN treaties which share the same language are reciprocal—that is, the principle of "national treatment" applies not only to protect the investments of foreign nationals in the

United States but also to protect the investments of U.S. nationals in Japan and other countries. Thus, any interpretation of the U.S.-Japan FCN adopted by MARAD in the present context will also define the rights of U.S. nationals doing business in Japan and other countries, now and in the future. A narrow interpretation of the U.S.-Japan FCN's protections for Japanese enterprises and their investments in the present context will effectively limit the rights of U.S. investors and U.S. businesses in Japan and other countries with which the United States has concluded similar FCN treaties.

For this reason, the State Department has interpreted the national treatment requirement of the FCN treaties broadly in the past. See, *generally*, Jones Study. The U.S. interest in protecting U.S. nationals doing business abroad, as well as the State Department's historical practice in interpreting the FCN treaties, requires an interpretation of the U.S.-Japan FCN which will protect the interests of foreign enterprises and the U.S. companies in which they have invested from the retroactive and discriminatory prohibitions and restrictions of the AFA and 46 C.F.R. Part 356.

B. AFA Section 213(g) Exempts Japanese Enterprises and U.S. Enterprises With Japanese Investment From The AFA's Limitations and Restrictions on Foreign Ownership, Foreign Financing and Foreign "Control" of U.S. Fishing Vessels

Sections 202, 203 and 204 of the AFA and the implementing regulations published by MARAD on July 19, 2000, codified at 46 C.F.R. Part 356, impose a host of new limitations and restrictions on foreign ownership of fishing vessels, foreign financing of fishing vessels and contractual arrangements between foreign enterprises or U.S. companies with substantial foreign ownership and U.S. fishing vessel owners. As demonstrated above, if applied to Petitioners, these new limitations and restrictions would deprive Petitioners and the Japanese Bank Lenders of valuable existing ownership, mortgage and contract rights and interests in violation of the U.S.-Japan FCN.

Application of the new restrictions to bar Petitioner Alyeska or its Japanese shareholders from entering into future transactions with the Vessel Owners, particularly financing and ancillary contractual arrangements, such as exclusive marketing agreements, would also violate the U.S.-Japan-FCN by substantially impairing the ability of Alyeska and its shareholders to protect

¹⁹ Article XIX.7 defines "vessel" to exclude "fishing vessels" for purposes of Article XIX.6.

²⁰ Annex, Attachment 9, Letter to the Chairman of the House of Representatives Committee on Merchant Marine and Fisheries from Robert Lee, August 17, 1964.

²¹ Annex, Attachment 13, Memorandum of Conversation dated April 3, 1952.

²² Annex, Attachment 14, Department of State Outgoing Airgram dated June 12, 1952.

²³ See fn. 21. See also, Jones Study at 80–81.

their existing rights and interests and to carry on their existing lawful business in the United States in conformity with past practice and on an equal footing with U.S. Citizens.

To avoid these results, Congress included a provision in the AFA to ensure that the Act would not contravene U.S. treaty obligations. Section 213(g) provides in pertinent part:

In the event that any provision of section 12102(c) or section 31322(a) of title 46, United States Code, as amended by this Act, is determined to be inconsistent with an existing international agreement relating to foreign investment to which the United States is a party with respect to the owner or mortgagee on October 1, 2001 of a vessel with a fishery endorsement, such provision shall not apply to that owner or mortgagee with respect to such vessel to the extent of any such inconsistency * * *.

Section 213(g) makes clear that its reach is intended to extend to every "owner" or "mortgagee" holding an ownership or mortgage interest on October 1, 2001, when Sections 202, 203 and 204 of the AFA become effective. Section 213(g) provides explicitly that the exemption does not apply to "subsequent owners and mortgagees" who acquire their interests *after* October 1, 2001 or "to the owner [of the vessel] on October 1, 2001 if any ownership interest in that owner is transferred to or otherwise acquired by a foreign individual or entity *after such date* (emphasis added).

Petitioners are "owners" and "mortgagees" who acquired their interests in the Vessels prior to October 1, 2001, and who intend to continue to hold those interests on and after October 1, 2001. The inconsistency between the provisions of the AFA and MARAD's implementing regulations and the requirements of the U.S.-Japan FCN is demonstrated above. Accordingly, under Section 213(g) of the Act, the provisions of Sections 202, 203 and 204 "shall not apply" to Petitioners "to the extent of the inconsistency."

The exemption provided by Section 213(g) is not limited to existing property rights, mortgage interests or investment interests in existence on October 1, 2001, but rather applies to an "owner" or "mortgagee" on October 1, 2001 "to the extent of the inconsistency" between the Act and the Treaty. Petitioners qualify as "owners" and "mortgagees." Petitioners are, therefore, exempt from the requirements of the AFA "to the extent of the inconsistency" between the AFA and the Treaty. As demonstrated above, the "inconsistency" between the AFA and the Treaty is two-fold: (1) The Treaty protects the existing ownership and

mortgage interests of Petitioners and the Japanese Bank Lenders in the Vessels and related contract rights, which the AFA would prohibit or restrict; and (2) the Treaty protects future transactions between Alyeska, its Japanese shareholders or the Japanese Bank Lenders and the Vessel Owners, which the AFA would prohibit or restrict, including future loans, preferred mortgages and other financing and contractual arrangements, which Petitioners may deem necessary or appropriate to protect their existing businesses and their existing interests in the Vessels and the Vessel Owners. Thus, Section 213(g) exempts Petitioners from the restrictions and limitations of Sections 202, 203 and 204 of the AFA and MARAD's implementing rules.

IV. Conclusion

For the reasons stated above, Sections 202, 203 and 204 of the AFA and 46 CFR Part 356 are inconsistent with the U.S.-Japan FCN and therefore may not be applied to Petitioners with: respect to the Vessels or the Vessel Owners.

This concludes the analysis submitted by Petitioner for consideration.

Dated: January 11, 2001.

By Order of the Maritime Administrator.

Joel Richard,

Secretary, Maritime Administration.

[FR Doc. 01-1357 Filed 1-16-01; 8:45 am]

BILLING CODE 4910-81-P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket No. MARAD-2001-8665]

ARICA—Applicability of Ownership and Control Requirements to Obtain a Fishery Endorsement to the Vessel's Documentation

AGENCY: Maritime Administration, Department of Transportation.

ACTION: Invitation for public comments on a petition requesting MARAD to issue a determination that the ownership and control requirements and the preferred mortgage requirements of the American Fisheries Act of 1998 and 46 CFR Part 356 are in conflict with an international investment agreement.

SUMMARY: The Maritime Administration ("MARAD") is soliciting public comments on a petition from the owners and mortgagees of the vessel ARICA—Official Number 550139 (hereinafter the "Vessel"). The petition requests that MARAD issue a decision that the American Fisheries Act of 1998 ("AFA"

or "Act"), Division C, Title II, subtitle I, Pub. L. 105-277, and the implementing regulations at 46 CFR part 356 (65 FR 44860 (July 19, 2000)) are in conflict with the Agreement Between the United States of America and Denmark Regarding Friendship, Commerce and Navigation, 421 UNTS 105, TIAS: 4797, 12 UST 908951 (1961) ("Denmark Treaty" or "FCN"). The petition is submitted pursuant to 46 CFR 356.53 and 213(g) of AFA, which provide that the requirements of the AFA and the implementing regulations will not apply to the owners or mortgagees of a U.S.-flag vessel documented with a fishery endorsement to the extent that the provisions of the AFA conflict with an existing international agreement relating to foreign investment to which the United States is a party. This notice sets forth the provisions of the international agreement that the Petitioner alleges are in conflict with the AFA and 46 CFR part 356 and the arguments submitted by the Petitioner in support of its request. If MARAD determines that the AFA and MARAD's implementing regulations conflict with the Denmark Treaty, the requirements of 46 CFR Part 356 and the AFA will not apply to the extent of the inconsistency. Accordingly, interested parties are invited to submit their views on this petition and whether there is a conflict between the Denmark Treaty and the requirements of both the AFA and 46 CFR Part 356. In addition to receiving the views of interested parties, MARAD will consult with other Departments and Agencies within the Federal Government that have responsibility or expertise related to the interpretation of or application of international investment agreements.

DATES: You should submit your comments early enough to ensure that Docket Management receives them not later than February 16, 2001.

ADDRESSES: Comments should refer to the docket number that appears at the top of this document. Written comments may be submitted by mail to the Docket Clerk, U.S. DOT Dockets, Room PL-401, Department of Transportation, 400 7th St., SW, Washington, DC 20590-0001. You may also send comments electronically via the Internet at <http://dms.dot.gov/submit/>. All comments will become part of this docket and will be available for inspection and copying at the above address between 10 a.m. and 5 p.m., E.T., Monday through Friday, except Federal Holidays. An electronic version of this document and all documents entered into this docket are available on the World Wide Web at <http://dms.dot.gov>.

FOR FURTHER INFORMATION CONTACT: John T. Marquez, Jr. of the Office of Chief Counsel at (202) 366-5320. You may send mail to John T. Marquez, Jr., Maritime Administration, Office of Chief Counsel, Room 7228, MAR-222, 400 Seventh St., SW, Washington, DC, 20590-0001 or you may send e-mail to John.Marquez@marad.dot.gov.

SUPPLEMENTARY INFORMATION:

Background

The AFA was enacted in 1998 to give U.S. interests a priority in the harvest of U.S.-fishery resources by increasing the requirements for U.S. Citizen ownership, control and financing of U.S.-flag vessels documented with a fishery endorsement. MARAD was charged with promulgating implementing regulations for fishing vessels of 100 feet or greater in registered length while the Coast Guard retains responsibility for vessels under 100 feet.

Section 202 of the AFA, raises, with some exceptions, the U.S.-Citizen ownership and control standards for U.S.-flag vessels that are documented with a fishery endorsement and operating in U.S.-waters. The ownership and control standard was increased from the controlling interest standard (greater than 50%) of § 2(b) of Shipping Act, 1916 ("1916 Act"), as amended, 46 App. U.S.C. 802(b), to the standard contained in § 2(c) of the 1916 Act, 46 App. U.S.C. 802(c), which requires that 75 percent of the ownership and control in a vessel owning entity be vested in U.S. Citizens. In addition, section 204 of the AFA repeals the ownership grandfather "savings provision" in the Anti-Reflagging Act of 1987, Pub. L. 100-239, § 7(b), 101 Stat 1778 (1988), which permits foreign control of companies owning certain fishing vessels.

Section 202 of the AFA also establishes new requirements to hold a preferred mortgage on a vessel with a fishery endorsement. State or federally chartered financial institutions must now comply with the controlling interest standard of § 2(b) of the 1916 Act in order to hold a preferred mortgage on a vessel with a fishery endorsement. Entities other than state or federally chartered financial institutions must either meet the 75% ownership and control requirements of § 2(c) of the 1916 Act or utilize an approved U.S.-Citizen Trustee that meets the 75% ownership and control requirements to hold the preferred mortgage for the benefit of the non-citizen lender.

Section 213(g) of the AFA provides that if the new ownership and control provisions or the mortgage provisions

are determined to be inconsistent with an existing international agreement relating to foreign investment to which the United States is a party, such provisions of the AFA shall not apply to the owner or mortgagee on October 1, 2001, with respect to the particular vessel and to the extent of the inconsistency. MARAD's regulations at 46 CFR 356.53 set forth a process wherein owners or mortgagees may petition MARAD, with respect to a specific vessel, for a determination that the implementing regulations are in conflict with an international investment agreement. Petitions must be noticed in the **Federal Register** with a request for comments. The Chief Counsel of MARAD, in consultation with other Departments and Agencies within the Federal Government that have responsibility or expertise related to the interpretation of or application of international investment agreements, will review the petitions and, absent extenuating circumstances, render a decision within 120 days of the receipt of a fully completed petition.

The Petitioners

Arica Fishing Company Limited Partnership ("Arica Fishing Co.") is the owner of the Vessel. Arica Fishing Co. is owned by JOMM Enterprises, Inc, the General Partner, and limited partners Royal Greenland Inc.-USA, JZ, Ltd., Kenneth Morrison, and Robert F. Allen. Royal Greenland Inc.-USA directly owns 47% of Arica Fishing Co. and indirectly owns an additional percentage through its participation in both JOMM Enterprises, Inc. and JZ, Ltd.. Royal Greenland, Inc.-USA is a Washington State Corporation that holds an aggregate interest at all tiers of the partnership ownership structure of approximately 54%.

Royal Greenland, Inc.-USA is a subsidiary of Royal Greenland Trading ApS, a Danish company registered in Denmark. In 1994, Royal Greenland Trading ApS was approached to invest in U.S. fishing operations on the West coast of the United States. The following year Royal Greenland agreed to make these investments through a U.S. subsidiary, Royal Greenland Inc.-USA. Arica Fishing Co, Royal Greenland, Inc.-USA, Royal Greenland Trading ApS, JOMM Enterprises, Inc. and JZ, Ltd are hereafter collectively referred to as the "Petitioner" or "Petitioners."

Requested Action

The Petitioners seek a determination from MARAD under § 213(g) of the AFA and 46 CFR 356.53 that they are exempt from the U.S. citizen ownership and control requirements of the AFA and 46

CFR part 356 on the grounds that the requirements of the AFA and 46 CFR part 356, as applied to Petitioners with respect to the Vessel, conflict with U.S. obligations under the Denmark Treaty. Specifically, the Petitioners request that MARAD determine that the ownership and control restrictions do not apply to Royal Greenland Trading ApS, its wholly-owned subsidiary Royal Greenland, Inc.-USA, or its equity ownership in the Vessel, through its ownership interest in Arica Fishing Company Limited Partnership, JOMM Enterprises, Inc., and JZ, Ltd.

Petitioner's Description of the Conflict Between the FCN Treaty and Both 46 CFR Part 356 and the AFA

MARAD's regulations at 46 CFR 356.53(b)(3) require Petitioners to submit a detailed description of how the provisions of the international investment agreement or treaty and the implementing regulations are in conflict. The entire text of the Denmark Treaty is available on MARAD's internet site at <http://www.marad.dot.gov>. The description submitted by the Petitioner of the conflict between the Denmark Treaty and both the AFA and MARAD's implementing regulations forms the basis on which the Petitioner requests that the Chief Counsel issue a ruling that 46 CFR part 356 does not apply to Petitioner with respect to the Vessel. The Petitioner's description of how the provisions of the Denmark Treaty are in conflict with both the AFA and 46 CFR Part 356 is as follows:

Summary of Argument

The ownership and control provisions of the AFA are directly inconsistent with the U.S.-Denmark Treaty of Friendship, Commerce and Navigation (the "Denmark Treaty"), an existing international agreement relating to foreign investments to which the United States is a party. The issue is relevant because there is investment by Royal Greenland Trading, a Danish company, in the U.S. flag fishing vessel Arica that would be directly impaired by the AFA. Specifically, the AFA's unambiguous, retroactive discrimination against fishing companies with foreign ownership interests, for the benefit of super-majority U.S. owned fishing companies—as applied to Danish investment in such companies—is directly at odds with the Denmark Treaty.

The purpose of the Denmark Treaty is to encourage investment between the United States and Denmark. The Treaty prohibits the impairment of rights legally acquired by Danish investors in U.S. enterprises. The Denmark Treaty also explicitly accords Danish investors national treatment—treatment by the U.S. government as if such investors were U.S. nationals, with respect to their investments in the United States. Most plainly, the Denmark Treaty explicitly forbids interference with Danish investors'

rights to manage enterprises which they have established or acquired.

Therefore, under Section 213(g) of the Act, the irreconcilable conflict between the investment protection provisions of the Denmark Treaty and the AFA's retroactive impairment of Royal Greenland Trading's investment rights requires Marad to grant this petition to exempt from the U.S. citizen ownership and control requirements of the AFA Royal Greenland Trading's equity ownership in the Arica (through its ownership interest in Arica Fishing Company Limited Partnership, JOMM Enterprises, Inc., and JZ, Ltd.).

The U.S. Treaties of Friendship, Commerce and Navigation Are a Class of International Agreements Protecting Bilateral Investment

The Denmark Treaty was one of a group of post-World War II treaties designed to create open-door investment between the U.S. and nearly twenty other countries. Unlike previous agreements, these "Friendship, Commerce and Navigation" treaties dealt explicitly with corporate investment between countries.

The purpose of the FCN treaties in the post-war period was to provide a stable environment for private international investment.¹⁴ The FCN treaties sought "national treatment,"¹⁵ and were intended to create an "open door" for foreign investment.¹⁶ After the war, the United States "took the lead in developing [a liberal] international investment regime, and began to negotiate a series of Friendship, Commerce and Navigation treaties, a major purpose of which was to protect U.S. investment abroad."¹⁷

¹⁴ Walker, *Modern Treaties of Friendship, Commerce and Navigation*, 42 Minn. L. Rev. 805 (1958). Herman Walker, Jr., the chief commentator on the purpose of the Friendship, Commerce and Navigation ("FCN") treaties, served, at the time of the drafting of the Treaty as Adviser on Commercial Treaties at the State Department and was responsible for formulation of the postwar form of the FCN Treaty, negotiating several of the treaties for the United States. See *Sumitomo Shoji America Inc. v. Avagliano et al.*, 457 U.S. 176, 182 (1982).

¹⁵ Walker, *Modern Treaties of Friendship, Commerce and Navigation*, 42 Minn. L. Rev. 817 (1958).

¹⁶ "National Treaties" is defined by Article XXII of the Denmark Treaty as "treatment accorded within the territories of a Party upon terms no less favorable than the treatment accorded therein, in like situations, to nationals, companies, products, vessels or other objects, as the case maybe, of such parties." National treatment in to be accorded automatically and without condition of reciprocity (*Sullivan Report* at page 64; see, *infra* at p.5 fn. 19.)

Harold F. Lidner, Deputy Assistant Secretary of State for Economic Affairs, testified before the Senate during hearings on ratification of the Denmark Treaty (among others) and corrected U.S. Senator Sparkman at this hearing on his misapprehension that "national treatment" meant treatment of U.S. nationals in a foreign nation in the same way foreign nations were treated in the United States, clarifying that it meant, instead, treatment of foreign nationals in the U.S. exactly as U.S. citizens are treated. Hearing Subcommittee on Commercial Treaties and Consular Conventions, at p. 7, 82nd Cong. (May 9, 1952).

¹⁷ Vandevelde, *Sustainable Liberalism and The International Investment Regime*, 19 Mich. J. Int'l L. 373 (1998).

Federal courts recognized the FCN treaties as "the medium through which the U.S. and other nations could provide for the rights of each country's citizens, their property and their interests, in the territories of the other."¹⁸ The treaties were the means by which nationals of each country could "manage their investment in the host country."¹⁹

These FCN treaties "define the treatment each country owes the nationals of the other; their rights to engage in business and other activities within the boundaries of the former; and the respect due them, their property and their enterprises."²⁰ Foreign investment issues were a centerpiece of the Treaties' purpose:

"[The FCN treaties] preoccupation with [national treatment issues] has been especially responsive to the contemporary need for a code of private foreign investment; and their adaptability for use as a vehicle in the forwarding of an investment aim follows from their historical concern with establishment matters."²¹

The FCN Treaties reached after World War II, had:

"a new consideration * * * which lent special impetus to the program following World War II, [that consideration] was the need for encouraging and protecting foreign investment, responsively to the increasing investment interests of American business abroad and to the position the United States has now reached as principal reservoir of investment capital in a world which has become acutely "economic development" conscious."²²

It is also important to note that the FCN Treaties, including the Denmark Treaty, are self-executing treaties, that is, they are binding domestic law of their own accord, without the need for implementing legislation.²³ Such treaties are the supreme law of the land, and even federal statutes "ought never to be construed to violate the law of nations if any other possible construction remains."²⁴ Only when Congress clearly intends to depart from the

obligations of a treaty will inconsistent federal legislation govern.²⁵

The U.S.-Denmark Treaty of Friendship, Commerce and Navigation Protects Danish Investment in U.S. Companies and is Clearly Inconsistent with the American Fisheries Act

The Denmark Treaty contains 26 Articles, several of which contemplate, and expressly prohibit, retroactive limitations on foreign investment in U.S. companies, such as those imposed by the AFA.²⁶

A. Proclamation: Encouraging International Investment

The first provision of the Denmark Treaty, entitled "A Proclamation," contains broad language relevant to an understanding of the subsequent Treaty Articles relating to bilateral investment. The Proclamation states:

"The United States of America and the Kingdom of Denmark, desirous of strengthening the bonds of peace and friendship traditionally existing between them and of encouraging closer economic and cultural relations between their people, and *being cognizant of the contributions which may be made toward these ends by arrangements encouraging mutually beneficial investments*, promoting mutually advantageous commercial intercourse and otherwise establishing mutual rights and privileges, have resolved to conclude a Treaty of Friendship, Commerce and Navigation, based in general upon the principles of national and of most-favored-nation treatment unconditionally accorded * * *" (emphasis added).

By emphasizing the importance of international investments, the Proclamation provides the Denmark Treaty's context for interpreting its investment protection provisions.²⁷ In entering into this Treaty, the United States recognized, and accepted as "consideration," the advantages provided by

²⁵ *Id.* See also *Sumitomo Shoji America, Inc. v. Avagliano et al.*, 457 U.S. 176 (1982).

²⁶ The conflict between the AFA and certain international treaties has been recognized by one of the principal authors of the Act. Senator Slade Gorton (R-WA), one of the chief sponsors of the final legislation, was quoted in the press shortly after the Act passed questioning the validity of the new ownership provisions in relation to these investment treaties: "Another provision [of the American Fisheries Act] requires vessels operating in this fishery to have at least 75 percent U.S. ownership three years after the law goes into effect, but [Senator Slade] Gorton said this "Americanization" feature "may very well be found invalid" under U.S. trade agreements if challenged by foreign ownership interests. *Marine Digest and Transportation News* at p. 29 November 1998) (emphasis added).

²⁷ The Sullivan Report is an Article-by-Article discussion of the standard draft treaty of Friendship, Commerce and Navigation, based on the record of negotiation, State Department messages providing instructions, and internal memoranda dealing with issues raised in the course of negotiations, that was completed in November, 1973. The Sullivan Report states that the standard FCN Treaty Preamble (designated "Proclamation" in the Denmark Treaty "does have legal effect, for the courts rely on it as a guide to interpretation concerning the applicability of the operative articles." *Sullivan Report* at 62.

foreign investment in this country and protection of U.S. investments abroad.²⁸ The national treatment benefits of the Danish Treaty are “to be accorded automatically and without condition of reciprocity.”²⁹

B. Article VIII: Managing Commercial Enterprises

Paragraph 1 of Article VIII of the Denmark Treaty states that nationals of each signatory Nation shall be permitted to:

“constitute companies for engaging in commercial,³⁰ manufacturing, processing [and] financial * * * activities, and to control and manage enterprises which they have been permitted to establish or acquire * * * for the foregoing and other purposes.” (emphasis added).

Royal Greenland Trading owns Royal Greenland Inc.-USA, a U.S. entity owning interests through a variety of entities in the fishing vessel Arica. There is no question that Royal Greenland Inc.-USA engages in commercial activities directly or through related entities: the sale of fish harvested by the fishing vessel Arica, and the fish processing undertaken aboard the vessel Arica.³² Royal Greenland Inc.-USA is also

directly engaged in financial activities: e.g., the investment of funds in the U.S. fishing industry.

The AFA would force Royal Greenland Trading to divest itself of its current ownership and control of Royal Greenland, Inc.—USA, requiring the sale of 75% of that company's equity in order for it to be able to maintain its investment in Arica Fishing Company Limited Partnership.³³ Forced divestiture is facially inconsistent with the control and management protections required by Article VIII of the Denmark Treaty, above.

The clear conflict between Article VII.1 of the Denmark Treaty and the AFA can be seen from the stated purpose of the original bill that was eventually enacted as the AFA:

“to prevent foreign ownership and control of United States flag vessels employed in the fisheries in the navigable waters and exclusive economic zone of the United States * * *” (emphasis added).³⁴

One additional point regarding Paragraph 1 of Article VIII is worthy of note. Article VIII states that it protects the control only of enterprises which a Danish entity has “been permitted to establish or acquire.” That is, only retroactive limitations, such as the one here at issue, are forbidden.

2. Paragraph 2: National Treatment

Paragraph 2 of Article VIII states:

“Companies, controlled by nationals and companies of either Party and constituted under the applicable laws and regulations within the territories of the other Party for engaging in the activities listed in paragraph 1 of the present Article, shall be accorded national treatment therein with respect to such activities.” (emphasis added).

Under the definition of national treatment,³⁵ paragraph 2 of Article VIII requires that duly constituted companies controlled by Danish entities shall be treated precisely as if they were U.S. investors. Such an obligation can hardly be met by requiring the transfer of ownership and control of a company from Danish investors to U.S. investors.

The U.S. State Department has repeatedly recognized this interpretation of Article VIII. For example, in 1971, the State Department opposed legislation in Guam requiring that 50% of the voting stock of corporations doing business in Guam be owned by U.S. citizens. The State Department took the position that such legislation was inconsistent with Article VII of the Japan FCN Treaty, which, (as do Articles VII and VIII of the Denmark Treaty), establishes a right to national treatment of non-U.S. companies and nationals engaged in business activity.³⁶

treatment, Aug. 17, 1964. *Jones Study* at 80 (citation infra at p. 7 fn 29).

³³ Alternatively, Royal Greenland USA would be forced to sell its direct investment in the Arica Fishing Company, L.P., which would have the same impact on its parent company, Royal Greenland Trading.

³⁴ S. 1221, 105th Cong. (preamble) (1997).

³⁵ See supra at p. 3, fn. 9.

³⁶ The State Department's position on this and other FCN issues are reviewed in the “Jones Study,” prepared by Ronny E. Jones for the U.S. State Department, and is a compilation of post-World

In sum, the provisions of the AFA requiring retroactive divestment of Danish ownership of a business entity in the United States are facially inconsistent with both paragraphs of Article VIII of the Denmark Treaty that explicitly protect foreign investors engaged in the control of U.S. companies.

C. Article VI, Paragraph 4: Impairment of Interest in Supplied Capital Is Prohibited

Paragraph 4 of Article VI of the Denmark Treaty prohibits:

“unreasonable or discriminatory measures that would impair the legally acquired rights or interests within its territories of nationals and companies of the other Party in the enterprises which they have established, or in the capital, skills, arts or technology which they have supplied.” (emphasis added).

The explicit purpose and effect of the AFA is to discriminate against foreign nationals and companies. The Act's ownership provisions require divestment of substantial equity in U.S. fishing vessels and the loss of future profits from the enterprise. On their face, these provisions directly “impair the legally acquired interests” of Danish investors both “in the enterprises which they have established,” and “in their capital * * * which they have supplied.”

It is clear from the expressed purposes of the FCN treaties, and from this provision in particular, that their central goal was to encourage capital investment between treaty signatories by protecting potential investors from the fear that government action would retroactively impair equity ownership rights in that investment. It was only in this context of mutually understood and guaranteed investment rights that open invitations to foreign capital to develop the U.S. fishing fleet could be, and was, successful.

Thus, the retroactive forced divestment of owned equity imposed on Danish investors by the AFA directly violates Article VI of the Denmark Treaty, and as such is inconsistent with the Treaty as contemplated under Section 213(g) of the Act.

D. Article VII: National Treatment Required

Paragraph 1 of Article VII of the Denmark Treaty states:

“Nationals and companies of either party shall be accorded * * * national treatment with respect to engaging in all types of commercial * * * [and] * * * financial activities.”

War II State Department positions on FCN Treaties through 1981. See e.g. State Department position re: Letter to A. Papa (U.S. Attorney General's office) from F.R. Brown (Legislative Counsel of 11th Legislature of Guam), Sept. 27, 1971, *Jones Study* at 76. See also, State Department position concluding under the French FCN Treaty that control and national treatment provisions “bar new discriminatory limitations from being applied to established or authorized operations and rights of a protected foreign company” (differentiating from permissible prospective limitations on ownership), *Jones Study* at 54; State Department position opposing Korean government's restricting foreign majority ownership of companies in certain industries, October, 1972, *Jones Study* at 86; State Department position opposing Thai government's restrictions on majority ownership of companies in some industries. 1972 *Jones Study* at 104–106.

²⁸ Harold F. Linder, Deputy Assistant Secretary of State for Economic Affairs, testified before the Senate during hearings on ratification of the Denmark Treaty (among others) as follows: “. . . These treaties are not one-sided. They are drawn up in mutual terms, in keeping with their character as freely negotiated instruments between sovereign equals. Rights assured to Americans in foreign countries are assured in equivalent measure to foreigners in this country. Hearing, Subcommittee on Commercial Treaties and Consular Conventions, May 9, 1952 at p. 6.

²⁹ *Sullivan Report* at 64. Although the Denmark Treaty requires investment protection without the requirement of reciprocity, it may be useful to note that a review of the *Jones Study*, infra p. 7 at fn. 23 shows no incidents of State Department conflicts with Denmark under the Denmark Treaty).

³⁰ The Minutes of interpretation appended to the Denmark Treaty state: “The word ‘commercial’ as used in Article VII, paragraph 1 and Article VIII paragraph 1, does not extend to the fields of navigation and aviation. The word ‘commercial’ ‘relates primarily but not exclusively to the buying and selling of goods and activities incidental thereto.’ Royal Greenland Inc.-USA is chiefly concerned with the sale of fishery products and activities incidental thereto. It is also important to note that the term ‘navigation’ does not include commercial fishing. First, the Danish Treaty mentions ‘national fisheries,’ and ‘inland navigation’ as separate, independent activities under paragraph 3, Article XIX. ‘Navigation’ is generally defined as ‘the act of sailing a vessel on water.’ Black's Law Dictionary, 7th ed. West Publishing, 1999. Finally, it may be important to note that in the Denmark Treaty, the word navigation is represented by the Danish word ‘sofort,’ which means transportation activity on sea and would not include fishing or fish processing. Had fishing or fish Processing been intended, the appropriate word would have been ‘fiskei.’”

³¹ This provision as well as others found in Article VII of the standard draft treaty examined by the Sullivan Report, is considered “the heart of the treaty.” *Sullivan Report* at 124.

³² See, e.g. State Department opposition to H.R. 12275 (expanding the definition of fisheries to include processing activities) as contrary to U.S.-Japan FCN treaty; processing activities under the FCN are entitled even to prospective national

As set forth above, the AFA directly affects Danish nationals and their companies that are “engaging in * * * commercial and other business activities.” Royal Greenland Trading engages in commercial and financial investment activities through a subsidiary, Royal Greenland Inc.-USA. The Denmark Treaty requires that Royal Greenland Trading’s commercial and investment activities be accorded national treatment, and as demonstrated above, the AFA’s explicit discrimination against non-U.S. citizens violates this national treatment provision when applied to Danish investment.

Paragraph 2 of Article VII *also* requires most-favored-nation treatment with respect to “organizing, participating in and operating companies of [the United States].” Most-favored-nation treatment is defined by Article XXII of the Denmark Treaty as “treatment accorded * * * upon terms no less favorable than the treatment accorded therein, in like situations, to nationals, companies, products, vessels or other objects, as the case may be, of any third country. Thus, it is important to note that *if nationals of any other country are afforded protection under section 213(g) of the Act failure to provide the same protection to Danish nationals would also be inconsistent with Article VII.*

E. Article IX: Protection of Movable Property

Article IX of the Denmark Treaty explicitly applies the protections afforded by the rest of the Treaty, and in particular those protections secured by Articles VII and VIII, to the purchase, ownership and disposition of property.

Paragraph 4 of Article IX sets out the only conditions under which nationals and companies of either party may be required to dispose of property they have acquired.³⁷ Subparagraph a, Paragraph 4 of Article IX permits such a requirement for movable property *so long as such a requirement conforms to Article VIII, paragraph 1 and all other provisions of the Denmark Treaty.* As set forth above and below, the retroactive equity divestment requirements of the AFA do not conform with Article VIII and the other provisions of the Denmark Treaty. Article IX of the Denmark Treaty, in effect, repeats that ownership of movable property may not be subject to forced retroactive divestiture.³⁸

³⁷ “Nationals and companies of either Party shall be accorded national treatment within the territories of the other Party with respect to acquiring * * * and with respect to owning movable property of all kinds . . . subject to the right of such other Party to limit or prohibit, in a manner that does not impair rights and privileges secured by Article VIII, paragraph 1, [See discussion at pp. 58 supra] or by other provisions of the present treaty, alien ownership of particular materials that are dangerous from the standpoint of public safety and alien ownership of interests in enterprises carrying on particular types of activities.” (emphasis added).

³⁸ “The term “discriminatory” as used in this context would comprehend denials of either national or most-favored-nation treatment, or both . . . the intent is to protect against retroactive impairment of vested rights if the acquisition of such rights was lawful * * *” (emphasis added). *Sullivan Report* at 115.

F. Article I: Equitable Treatment Required for Danish Interests

Article I of the Denmark Treaty states:

“Each Party shall at all times accord equitable treatment to the persons, property, enterprises and other interests of nationals and companies of the other Party.”

This Article was intended to provide a fail safe mechanism in the Treaty to ensure that fair and equitable treatment be afforded to nationals of both countries.³⁹ The forced divestiture of investments and/or sale of assets cannot be viewed as equitable treatment under any logical reading of Article I. Nevertheless, if this Article has any meaning whatsoever, at the very least, it cannot mean forcing a sale of valuable assets, such as the equity interest in a fishing company.

G. Article VI, Paragraph 3: Taking of Property Requires Just Compensation

Paragraph 3 of Article VI of the Denmark Treaty requires that the U.S. government cannot take property belonging to Danish nationals:

“without the prompt payment of just compensation. Such compensation shall be in an effectively realizable form and shall represent the full equivalent of the property taken; and adequate provision shall have been made at or prior to the time of taking for the determination and payment thereof * * *”

There is no practical difference between forcing a sale of property to the U.S. government and forcing such a sale to American nationals.⁴⁰ Thus, to the extent that a forced sale of property (1) diminishes the value of the asset for the company by virtue of the AFA’s passage; or (2) results in a below-market sale of assets, the AFA

³⁹ This Article “provides a basis for making representation against actions detrimental to [a signatory’s] interests that may not be covered by any specific legal rule in the treaty, as, for example, a measure that is superficially nondiscriminatory but is so framed as to harm only some [signatory’s] interest * * *, the construction leading to a just or equitable result is to be preferred.” *Sullivan Report* at 67. See also, Webster’s New Universal Unabridged Dictionary, Barnes and Noble Books, 1996, “Equitable: Characterized by equity or fairness; just and right; fair; reasonable: *equitable treatment of all citizens*”; Black’s Law Dictionary, 7th ed. West Publishing, 1999, “Equitable: just; conformable to principles of justice and right.”

⁴⁰ The rule of just compensation covers partial takings. In such cases, the compensation should be a full approximation of the amount by which the taking impaired the value of the property.” *Sullivan Report* at 117.

violates Article VI,⁴¹ as it makes no provision for compensation of Danish investors.^{42 43}

H. Article XIX: Vessels Flying the U.S. Flag are Deemed U.S. Vessels For Purposes of Access to U.S. Fisheries

Paragraph 4 of Article XIX of the Denmark Treaty states:

“each Party may reserve exclusive rights and privileges to its own vessels with respect to * * *. *national fisheries.*” (emphasis added).

This provision allows the U.S. and Denmark to reserve exclusive rights and privileges to “its own vessels” operating in the fisheries of their respective countries. The national identity of a vessel is determined by the country in which the vessel is documented, *i.e.* by the flag that it flies. The national identity of a vessel is not determined by the nationality of the investor in the owning entity.⁴⁴

The Arica is a U.S. vessel documented under the laws of the United States. The U.S. entity owning this U.S. flag vessel—like General Motors, Ford Motor Company and Coca-Cola—has foreign investors. The purpose of this provision in the Treaty was to allow the United States and Denmark the opportunity to restrict fisheries to vessels each country could control. That control, historically, has always been through the flag of the vessel, subjecting the vessel to our environmental, labor and tax laws—not to

⁴¹ At the very least, paragraph 3 of Article VI requires application of a standard similar to that under the 5th Amendment to the United States Constitution. Paragraph 5 of Article VI requires that Danish citizens “shall in no case be accorded * * * less than national treatment * * * with respect to the matters set forth” in paragraph 3. No federal court would permit the government to force a sale of assets by a U.S. citizen, thus denying that citizen any use of that property in the future, without requiring just compensation. Further, the Danish Protocol 2 appended to the Denmark Treaty requires that the provision of Article VI for payment of just compensation shall extend to interests held directly or indirectly by nationals and companies of either party.

⁴² “The intent of this requirement [that provision is made for the determination and payment of compensation] is to afford protection against *ex post facto* proceedings that could work to the disadvantage of the person whose property is taken.” *Sullivan Report* at 119.

⁴³ Even with respect to the forced sale of “materials dangerous from the standpoint of public safety,” permitted under Article IX of the Treaty, the Danish Treaty requires that “a term of at least five years shall be allowed in which to effect such disposition.” Subparagraph b, Paragraph 4, Article IX.

⁴⁴ In order to be documented under the U.S. flag, for example, a vessel must be owned by a U.S. citizen corporation, partnership or other entity. There is no limitation on the citizenship of the investment for the basic documentation. 42 U.S.C. 12102(a). Should the vessel be used in specific trades, such as coastwise or fisheries, there may be limitation on the citizenship of the investors. 46 U.S.C. 12106; 12108. It is significant to note that *at the time the Denmark Treaty was signed there was no such limitation on fishing vessels.* It was not until 1988 that a *prospective* limitation was imposed on the citizenship of the investors in an entity owning a vessel with a fisheries endorsement. See, *The Commercial Fishing Industry Vessel Anti-Reflagging Act of 1987*; Section 7(b) of Public Law 100–239.

allow the foreign investment capital to be taken.

This issue is further clarified by Paragraph 2 of Article XIX, which states explicitly:

"Vessels under the flag of either Party * * * shall be deemed to be vessels of that Party * * *"

Thus, the United States has the full authority to reserve exclusive rights and privileges to the U.S. flag vessel Arica, ever since Royal Greenland Trading made its first investment in the Vessel. What the United States has not had the right to do under the Denmark Treaty is to take away that investment once it was made. Article XIX does not permit the United States to reserve rights or privileges under the Denmark Treaty for some of "its vessels" (those with super-majority U.S. investment) as against others of "its vessels" (those that include some Danish investment). On the contrary, it guarantees U.S. fishing vessels with Danish investment equal access to U.S. fisheries.

I. Article XXI: Restrictions on the Rights of "Third Country" Nationals Are Not Applicable to the Danish Citizens of Greenland

Greenland is a legal territory of Denmark, not an independent country.⁴⁵ Residents of Greenland are Danish citizens. The Danish Constitution of 1953 covers all parts of Denmark, including Greenland. Subsequent to this constitution, Greenland was administered as a department directly under the central Danish government authority. In 1978, a parliamentary statute established Greenlandic "home-rule" effective May 1, 1979 for some internal legal areas. However, Greenland remains a legal part of the sovereign nation, Denmark, and is subject to Danish statutes, such as the "Companies Act."

As stated earlier,⁴⁶ Royal Greenland Trading, the Danish company with investment in Arica Fishing Company Limited Partnership, is owned by investors in the Territory of Greenland. Article XXI, Paragraph 1(d) of the Denmark Treaty denies: "to any company in the ownership or direction of which nationals of any *third country or countries* have directly or indirectly a controlling interest, the advantages of the present Treaty, except with respect to recognition of juridical status and with respect to access to courts." (emphasis added).

This reservation is a provision to permit piercing the corporate veil when nationals of non-signatories seek to "obtain rights under the treaty through the device of obtaining and exercising interests in companies of the treaty partner * * * *Absent such a provision, such corporate interests could take*

advantage of the definition of "companies" [in the Treaty], which establishes place of incorporation as the sole test of the nationality of a corporation."⁴⁷ (emphasis added).

Greenland is not a "third country" within the meaning of this provision. Greenland is a territory of Denmark, dependent upon it for foreign policy determinations. It is also facially evident that no "device" to gain the benefits of the Treaty has taken place. The ownership arrangements for Royal Greenland Inc.-USA were completed long before enactment of the AFA. The duly constituted Danish company Royal Greenland Trading has the right to expect the protection afforded all incorporated Danish companies under the Denmark Treaty.

J. Article XXIII: Restriction on the Denmark Treaty's Application to Greenland Does Not Apply to Greenlandic Investment in a Duly Constituted Danish Company

Article XXIII of the Denmark Treaty states:

"The territories to which the present Treaty extends shall comprise all areas of land and water under the sovereignty or authority of each of the Parties, other than Greenland, the Panama Canal Zone and trust Territory of the Pacific."

As set forth above, Royal Greenland Trading is a duly incorporated Danish company, subject to Danish government authority and chartered by the Danish Crown. Royal Greenland Trading is located at Langerak 15, 9220 Aalborg, Denmark. Overall, Royal Greenland Trading's affiliated companies have several hundred employees in Denmark. Article XXII, Paragraph 3 states:

"* * * Companies constituted under the applicable laws and regulations within the territories of either Party shall be deemed companies thereof and shall have their juridical status recognized within the territories of the other 'party'."

Thus, the Denmark Treaty is absolutely explicit that:

"*the place of charter or incorporation [is] the sole fact determining the nationality of the company.* This test is in contrast to the so-called 'seat' test favored in some European countries where the location of the real center of management of the company or the place or places where its principal activities are carried on are looked to as determining its nationality, even though its incorporation may be in another country. Under the test of place of incorporation, there is no specific requirement of a substantial de facto contact of the company with the chartering country other than the issuance of the charter * * * Adoption of the single test of place of incorporation was based in part on the practical consideration that it makes the nationality of a company simple and easy to determine."⁴⁸ (emphasis added).

The only exception to this "place of charter or incorporation" rule, is that set forth in Article XXI of the Denmark Treaty discussed in Section I above. As discussed, Danish citizen investors residing in Greenland do not fall within the narrow exception for third

country nationals seeking by device to take advantage of another nation's favorable trade relations. Therefore, Royal Greenland Trading must be afforded the protections for Danish companies under the Denmark Treaty.

In addition, it is important to recognize that Article XXIII was not intended to preclude protection for the Danish nationals of Greenland and their companies, to which Danish law applies. It appears clear that this exception was intended to protect areas having special territorial, commonwealth or merely military relationships with their home countries, such as the Panama Canal Zone and the U.S. Trust Territory of the Pacific Islands. Such policy rationales are not applicable to investments by the Danish citizens of Greenland in their host country.

V. Conclusion: Royal Greenland Trading is Entitled to an Exemption Under Section 213(g) of the American Fisheries Act Because the Act's Retroactive Ownership and Control Provisions are Inconsistent With the Denmark Treaty.

The Danish Treaty clearly contemplates the very category of investment restrictions here at issue. It is important to recognize that should the United States or Denmark have wished to exclude investment in the fishing industry vessels of one party on behalf of the nationals or companies of the other, they could easily have done so. For example, Article XIV of the Treaty relates to prohibitions and restrictions on imports. Paragraph 4 of Article XIV explicitly excludes from the protections of the Article "advantages accorded * * * products of [each country's] national fisheries." Similarly, Paragraph 4 of Article XIX reserves exclusive rights and privileges to each signatory's own vessels with respect to national fisheries. The Treaty simply does not permit forced divestment of investment—or a prohibition on management of that investment—in U.S. companies operating in the national fisheries.

The overlapping, self-reinforcing investment protections provided by the several Articles analyzed in this petition were clearly intended to prohibit the category of coerced retroactive investment divestiture required by the AFA. The Treaty's explicit agreement as to a national's right to control interests in companies they have established in each Treaty partner's territory, its requirement for the highest possible degree of investment protection—national treatment, and its prohibition of the impairment of equity rights gained by supplied capital, are all, singly and in the aggregate, at odds with the AFA's ownership provisions.

If the investment of Royal Greenland Trading is not protected, the implications would be significant and the economic climate fostered by the Treaty damaged. Forcing the sale of Danish nationals' assets in the industry they helped to create would likely make more far reaching free trade agreements difficult. The United States has long been a champion worldwide of free market investment, often decrying other governments' actions in restricting their import markets, currencies and venture capital opportunities. To interpret the Treaty

⁴⁵ "Greenland first came under Danish rule in 1380. In the revision of the Danish Constitution in 1953, Greenland became part of the Kingdom and acquired the representation of two members in the Danish Folketing * * * Greenland is part of the Kingdom of Denmark, and the Danish Government remains responsible for foreign affairs, defense and justice." *The Europa World Year Book* 1999, Europe Publications Ltd. (1999); Volume I at pp 1203-04.

⁴⁶ See *Exhibit A* and discussion accompanying supra at p.2 fn. 6.

⁴⁷ *Sullivan Report* at 308.

⁴⁸ *Sullivan Report* at 318-20.

so as to permit enforced, retroactive loss of assets, and the expulsion of Danish nationals overseeing their own investments from their corporate positions may seriously weaken the standing of the U.S. to continue in its leadership role.

Marad should therefore grant Royal Greenland Trading's petition pursuant to Section 213(g) of the AFA and 46 C.F.R. 356.53 promulgated thereunder, and rule that the citizen ownership and control restrictions in the Act and those portions of 46 C.F.R. Part 356 that implement those restrictions do not apply to Royal Greenland Trading ApS (or its wholly-owned subsidiary) with respect to its ownership equity in the vessel Arica (O.N. 550139), through its ownership interest in Arica Fishing Company Limited Partnership, JOMM Enterprises, Inc., and JZ, Ltd.

This concludes the analysis submitted by Petitioner for consideration.

Dated: January 11, 2001.

By Order of the Maritime Administrator.

Opioid Drugs in Maintenance and Detoxification Treatment of Opiate Addiction;**AGENCY:** Substance Abuse and Mental Health Services Administration, HHS.**ACTION:** Final rule.

SUMMARY: The Department of Health and Human Services and the Substance Abuse and Mental Health Services Administration (SAMHSA) are issuing final regulations for the use of narcotic drugs in maintenance and detoxification treatment of opioid addiction. This final rule repeals the existing narcotic treatment regulations enforced by the Food and Drug Administration (FDA), and creates a new regulatory system based on an accreditation model. In addition, this final rule shifts administrative responsibility and oversight from FDA to SAMHSA. This rulemaking initiative follows a study by the Institute of Medicine (IOM) and reflects recommendations by the IOM and several other entities to improve opioid addiction treatment by allowing for increased medical judgment in treatment.

DATES: This final rule will become effective on March 19, 2001.

FOR FURTHER INFORMATION CONTACT: Nicholas Reuter, Center for Substance Abuse Treatment (CSAT), SAMHSA, Rockwall II, 5600 Fishers Lane, Rm 12-05, Rockville, MD 20857, 301-443-0457, email: nreuter@samhsa.gov.

SUPPLEMENTARY INFORMATION:**I. Background**

In the **Federal Register** of July 22, 1999, (64 FR 39810, July 22, 1999, hereinafter referred to as the July 22, 1999, notice or July 22, 1999, proposal) SAMHSA, FDA, and the Secretary, Health and Human Services (HHS), jointly published a Notice of Proposed Rulemaking (NPRM) to revise the conditions for the use of narcotic drugs in maintenance and detoxification treatment of opioid addiction. The agencies also proposed the repeal of the existing narcotic treatment regulations enforced by the FDA, the creation of a new regulatory system based on an

accreditation model under new 42 CFR part 8, and a shift in administrative responsibility and oversight from FDA to SAMHSA.

The July 22, 1999, notice traced the history of Federal regulatory oversight of Opioid Treatment Programs ("OTPs," also known as narcotic treatment programs, or, methadone programs), focusing on Federal regulations enforced by FDA since 1972. The July 22, 1999, notice summarized the periodic reviews, studies, and reports on the Federal oversight system, culminating with the 1995 Institute of Medicine (IOM) Report entitled, *Federal Regulation of Methadone Treatment* (Ref. 1). As noted in the July 22, 1999, proposal, the IOM report recommended that the existing FDA process-oriented regulations should be reduced in scope to allow more clinical judgment in treatment and greater reliance on guidelines. The IOM report also recommended designing a single inspection format, having multiple elements, that would (1) provide for consolidated, comprehensive inspections conducted by one agency (under a delegation of Federal authority, if necessary), which serves all agencies (Federal, State, local) and (2) improve the efficiency of the provision of methadone services by reducing the number of inspections and consolidating their purposes.

To address these recommendations, SAMHSA proposed a "certification" system, with certification based on accreditation. Under the system, as set forth in the July 22, 1999, proposal, a practitioner who intends to dispense opioid agonist medications in the treatment of opiate addiction must first obtain from SAMHSA, a certification that the practitioner is qualified under the Secretary's standards and will comply with such standards. Eligibility for certification will depend upon the practitioner obtaining accreditation from a private nonprofit entity, or from a State agency, that has been approved by SAMHSA to accredit OTPs. Accreditation bodies would base accreditation decisions on a review of an application for accreditation and on surveys (on site inspections) conducted every three years by addiction treatment experts. In addition, accreditation bodies will apply specific opioid treatment accreditation elements that reflect "state-of-the-art" opioid treatment guidelines. Moreover, accreditation standards will require that OTPs have quality assurance systems that consider patient outcomes.

As noted in the July 22, 1999, proposal, this new system would replace the existing FDA regulatory

system. The existing system provides for FDA "approval" of programs, with direct government inspection in accordance with more detailed process-oriented regulations. These process-oriented regulations are less flexible and prescribe many aspects of treatment. The existing regulations do not require that programs have quality assurance systems. Finally, under the existing system, programs are not subject to periodic certification and there is no set schedule for inspections.

Proposed Subpart A addressed accreditation and included steps that accreditation bodies will follow to achieve approval to accredit OTPs under the new system. It also set forth the accreditation bodies' responsibilities, including the use of accreditation elements during accreditation surveys. Proposed Subpart B established the sequence and requirements for obtaining certification. This section addressed how and when programs must apply for initial certification and renewal of their certification. Finally, Subpart C of proposed part 8 established the procedures for review of the withdrawal of approval of the accreditation body or the suspension and proposed revocation of an OTP certification.

In addition to proposing an entirely new oversight system, the July 22, 1999, proposal included several other new provisions. For example, the Federal opioid treatment standards were significantly reduced in scope to allow more flexibility and greater medical judgment in treatment. Certain restrictions on dosage forms were eliminated so that OTPs may now use solid dosage forms. Under the previous rules, OTPs were limited to the use of liquid dosage forms. Several reporting requirements and reporting forms were eliminated, including the requirements for physician notifications (FDA Reporting Form 2633) and the requirement that programs obtain FDA approval prior to dosing a patient above 100 milligrams. The proposal included a more flexible schedule for medications dispensed to patients for unsupervised use, including provisions that permit up to a 31-day supply. Under the current regulations, patients are limited to a maximum 6-day supply of medication. Many of these regulatory requirements had been in place essentially unchanged for almost 30 years.

SAMHSA distributed the July 22, 1999, notice to each OTP listed in the current FDA inventory, each State Methadone Authority, and to other interested parties. Interested parties were given 120 days, until November 19, 1999, to comment on the July 22,

1999, proposal. In addition, on November 1, 1999, SAMHSA, FDA, the Office of National Drug Control Policy (ONDCP), the Drug Enforcement Administration (DEA), and other Federal agencies convened a Public Hearing on the proposal. The Public Hearing was announced in the **Federal Register** published October 19, 1999, (64 FR 59624, October 19, 1999), and was held in Rockville, MD. On January 31 and May 10, 2000, the SAMHSA/CSAT National Advisory Council Subcommittee on Accreditation met to assist SAMHSA/CSAT in its review of data and information from SAMHSA/CSAT's ongoing accreditation project. The SAMHSA/CSAT National Advisory Council convened to discuss the opioid accreditation project on May 12, 2000. The May 12, 2000, Council meeting provided an opportunity for comments from the public (65 FR 25352, May 1, 2000).

II. Comments and Agency Response

In response to the July 22, 1999, proposal, SAMHSA received almost 200 submissions, each containing one or more comments. The comments were from government, industry, industry trade associations, academia, health professionals, professional organizations, patient advocacy organizations, and individual patients.

A. General Comments

1. Many comments agreed in principle that the shift to an accreditation-based system will encourage OTPs to use individualized, clinically determined treatment plans that are guided by current, best-practice medical and clinical guidelines and to evaluate clinical outcomes. Other comments noted that the accreditation proposal recognizes that opiate addiction is a medical condition. Several comments affirmed that a major segment of the healthcare system in the United States is being reviewed through accreditation systems. As such, these comments stated that applying accreditation requirements to OTPs provides the potential for mainstream medicine to embrace opioid treatment.

While not opposing the proposal, some comments stated there should be no Federal regulations in this area. Other comments expressed concerns about additional costs to OTPs and, ultimately patients, for accreditation and duplicative assessments, noting that some States will continue to enforce process-oriented regulations, supported by considerable licensing fees. Based upon these "uncertainties," these comments suggest that SAMHSA wait

for the results of further study before implementing new regulations.

The Secretary agrees that the SAMHSA-administered accreditation-based regulatory system will encourage the use of best-practice clinical guidelines and require quality improvement standards with outcome assessments. As set forth below, the Secretary does not agree that comments on the uncertainty about accreditation costs or State regulatory activities warrant additional study before implementing these new rules.

2. Several comments addressed the costs associated with accreditation and challenged the estimates provided in the July 22, 1999, proposed rule. One comment included the results from a survey of OTPs with accreditation experience to indicate the indirect costs of accreditation will be considerable. According to the comment, these OTPs have had to spend considerable sums to hire consultants and additional staff, upgrade computers, develop infection control manuals, and make physical plant improvements. In some cases these costs were reported to approach \$50,000. Some of these comments suggested that SAMHSA await the completion of the "accreditation impact study" to obtain additional information on costs, before proceeding. Other comments stated that accreditation can lead to increased treatment capacity, but only if additional funds are provided. One comment suggested that SAMHSA create a capital improvement fund, while another suggested that SAMHSA allow block grant funds to be used to pay for accreditation.

The Secretary believes that the estimated costs as set forth in the July 22, 1999, notice remain reasonably accurate. As discussed in greater detail below, information on accreditation developed under the accreditation impact study, together with other ongoing SAMHSA technical assistance programs, indicates that the accreditation system will not produce an excessive burden to programs to warrant delaying the implementation of this final rule.

There are many components to SAMHSA's accreditation project that have been proceeding concurrently with this rulemaking. In April 1999, SAMSHA's Center for Substance Abuse Treatment (CSAT) issued "Guidelines for the Accreditation of Opioid Treatment Programs." These guidelines are up-to-date best-practice guidelines that are based upon the Federal opioid treatment standards set forth under proposed section 8.12 as well as SAMHSA/CSAT's Treatment Improvement Protocols (TIPs) that

address opiate addiction treatment. Two accreditation bodies, the Commission for the Accreditation of Rehabilitation Facilities (CARF) and the Joint Commission for the Accreditation of Healthcare Organizations (JCAHO), under contract to SAMHSA/CSAT, used these guidelines to develop "state-of-the-art" accreditation elements. These two accreditation bodies have surveyed dozens of programs with these new accreditation standards.

The July 22, 1999, proposal described an ongoing accreditation impact study. Under the accreditation impact study, CARF and JCAHO trained over 170 participating OTPs. In addition, more than 50 OTPs have been accredited under this system with technical assistance provided through a contract funded by SAMHSA/CSAT. None of the accredited programs have had to incur the kind of "physical plant" and other costly expenses predicted by some of the comments previously discussed. This direct and up-to-date information indicates that the cost estimates in the July 22, 1999, notice are up-to-date and reasonable. On the other hand, the survey discussed above that was submitted with one comment reflected accreditation surveys performed over 10 years ago. And, in some cases, the accreditation experiences discussed in these comments reflect accreditation of psychiatric hospitals, not OTPs.

The accreditation-based system which is the subject of this rule includes safeguards to reduce the risk of unnecessary and overly burdensome accreditation activities relating to OTPs. For example, SAMHSA will approve each accreditation body after reviewing its accreditation elements, accreditation procedures, and other pertinent information. SAMHSA will convene periodically an accreditation subcommittee, as part of the SAMHSA/CSAT National Advisory Council. The subcommittee will review accreditation activities and accreditation outcomes and make recommendations to the full SAMHSA/CSAT Council, and ultimately to SAMHSA on accreditation activities and guidelines. Finally, SAMHSA/CSAT has been providing technical assistance to OTPs in the accreditation impact study that has helped programs in achieving accreditation. SAMHSA/CSAT intends to continue providing technical assistance on accreditation during the 3-5 year transition period and possibly longer.

The Secretary does not agree that it is necessary to establish a special fund to help programs pay for accreditation fees and indirect "physical plant" improvements in order for OTPs to be

able to achieve accreditation. As noted above, the Secretary believes that the estimates in the July 22, 1999, proposal for the cost of accreditation are reasonably accurate (approximately \$4–5 million per year, \$5400 per OTP per year, \$39 per patient per year). Nonetheless, the Secretary has taken steps to minimize the potential effects of this burden to OTPs, especially to OTPs that are small businesses or that operate in under-served communities. First, the Secretary has determined that States could use funds provided by SAMHSA under their Substance Abuse Prevention and Treatment (SAPT) Block Grants to offset costs of accreditation for programs qualified to receive assistance under the State's SAPT block grant. Second, SAMHSA has included in its budget, a plan to continue funding accreditation. Finally, SAMHSA will continue to provide technical assistance which will aid those programs that need help in achieving accreditation.

3. One OTP that is participating in the accreditation impact study, while commending the accreditation experience and accreditation in general, commented that the proposed change is premature. Some comments suggested that SAMHSA postpone implementation for an indefinite period to allow for an unspecified number of CARF and JCAHO accreditation results. Another comment stated that the first series of surveys will determine the utility of the first generation of standards, noting that the process can be focused and modified in response to results from the impact study. A few comments questioned whether all providers can make the transition.

On the other hand, many comments stated that the field has been subject to regulatory neglect long enough, and that SAMHSA should minimize the delay in finalizing rules. One comment submitted the results of a survey that suggested that as many as 155 OTPs currently need technical assistance in order to provide treatment in accordance with standards and regulations.

The Secretary does not believe that these final regulations should be delayed until the completion of the accreditation impact study. As stated in the July 22, 1999, proposal, the Department of Health and Human Services (HHS) has determined that accreditation is a valid and reliable system for providing external monitoring of the quality of health care—including substance abuse and methadone treatment. The SAMHSA/CSAT study is designed to provide additional information on the processes, barriers, administrative outcomes, and

costs associated with an accreditation-based system. In addition, the study is expected to provide important information to allow SAMHSA to keep its guidelines, and its accreditation program, as responsive and up-to-date as possible. Among other things, the study will allow HHS to continuously monitor the monetary costs of accreditation, to ensure that successful OTPs are not precluded from operating by the costs of accreditation, and that patients are not denied treatment based on costs. The full study, which compares a representative sample of OTPs 6 months following accreditation to their baseline status across several variables, will require a few years to complete. Regulations can be modified at any time. If SAMHSA believes that the results of the study merit changes in the regulations, then such changes will be the subject of a future rulemaking.

The Secretary has reviewed preliminary results from the accreditation study by two accreditation bodies, CARF and JCAHO, of almost 10 percent (approximately 80 OTPs) of the entire inventory of approved outpatient OTPs. Well over 90 percent of the OTPs surveyed achieved accreditation under the "methadone specific" accreditation standards. Only a very few programs required a follow-up survey to achieve accreditation. And, to date, only one OTP failed to achieve accreditation. These accreditation outcome results are comparable to the historical compliance rate under the previous FDA process-oriented regulatory system. In addition, these rates correspond to the assumed accreditation resurvey rate stated in the July 22, 1999, proposal for estimating the indirect costs of accreditation.

These accreditation outcome results have been analyzed and presented to SAMHSA/CSAT's National Advisory Council's Accreditation Subcommittee (NACAS). As discussed in the July 22, 1999, proposal, SAMHSA/CSAT augmented NACAS with consultants representing OTPs (both large and small programs), medical and other substance abuse professionals, patients, and State officials. The subcommittee has met twice, on January 31 and May 10, 2000, and the public was provided an opportunity to participate in this advisory process. On May 12, 2000, the SAMHSA/CSAT National Advisory Council urged SAMHSA/CSAT to move expeditiously to finalize the July 22, 1999, proposal.

The Secretary believes that the interim results from the accreditation impact study confirm that the accreditation guidelines, along with the accreditation process itself, are a valid and reliable method for monitoring the

quality of care provided by OTPs. The results indicate that most OTPs can achieve accreditation and that treatment capacity has not declined as a result. While SAMHSA intends to continue the study to fulfill its objectives, the Secretary does not believe that it is appropriate or necessary to delay implementation of these new rules until the full study is complete.

4. Many comments, especially from current and past OTP patients, questioned the impact of revised Federal regulations in light of State regulations. These comments contend that State regulations are much more restrictive on medical and clinical practices than Federal regulations, and that State regulatory authorities have expressed little or no interest in changing their regulations or the way State regulations are enforced. Comments from OTP sponsors stated that accreditation costs would add to State licensing fees, which, in some States, exceed several thousand dollars annually.

The Secretary shares the concerns expressed in these comments about State regulations and licensing requirements. Indeed, the July 22, 1999, proposal discussed State licensure and regulatory issues. The proposal also noted that there was considerable variation in the nature and extent of oversight at the State level. Some States have regulations and enforcement programs that exceed Federal regulations. Others have relied exclusively upon FDA and DEA regulatory oversight. An increasing number of States rely on accreditation, by nationally recognized accreditation bodies, for all or part of their healthcare licensing functions.

The Secretary believes that SAMHSA's ongoing coordination activities with States will minimize the impact of Federal-State regulatory disparities upon OTPs. One objective of these activities is to increase State authorities' acceptance of the new accreditation-based system. First, SAMHSA/CSAT's OTP accreditation guidelines were developed by a consensus process that included representation from State Methadone Authorities. In addition, some State officials have accompanied CARF and JCAHO accreditation survey teams to observe site visits. Finally, SAMHSA/CSAT has distributed information on accreditation to each State. This information includes the SAMHSA/CSAT OTP accreditation guidelines, the CARF OTP accreditation standards and the JCAHO OTP accreditation standards. SAMHSA/CSAT convened three national meetings of State officials

between 1997 and 2000 and intends to continue coordinating activities with State authorities and national organizations such as the National Association of State Alcohol and Drug Abuse Directors (NASADAD).

This final rule includes provisions that would permit any State to apply for approval as an accreditation body and, if approved, accredit OTPs under the new Federal opioid treatment standards. Based on the above, the Secretary expects that many states will consider OTP accreditation and Federal certification requirements as sufficient to fulfill all or a substantial part of their licensing requirements. Taken together, the Secretary believes that these measures will minimize significantly the existing disparity between Federal and State regulation of OTPs.

5. Office-Based Treatment. The July 22, 1999, proposal discussed the concept of "office-based opioid treatment" and specifically solicited comments on how the Federal opioid treatment standards might be modified to accommodate office-based treatment and on whether a separate set of Federal opioid treatment standards should be included in this rule for office-based treatment.

The Secretary received many diverse comments on the office-based treatment issue. Several comments from patients and individual physicians believed that office-based treatment provided an excellent opportunity to expand opioid agonist treatment. These comments reference opioid treatment delivery systems in other countries and suggest that the U.S. should adopt similar systems. A few comments recommended that community pharmacies be encouraged to dispense methadone and LAAM as "medication units" as a way to make treatment more convenient for patients.

While many comments suggested separate standards for office-based treatment, others feared that different standards would result in a two-tiered system of treatment. Overall many comments stated that existing and proposed rules do not facilitate the development of the office-based practice model. As such, accreditation and certification would be prohibitively expensive for individual physicians.

On the other hand, many comments expressed concerns with the concept of "office-based" treatment and prescribing methadone and LAAM. Many of these comments reflected concern about the lack of trained and experienced practitioners. One comment referenced literature reports that described experiences in Australia and the United Kingdom with deaths

from iatrogenic methadone toxicity associated with patients early in treatment. The experiences in these two countries were associated with an accelerated rate of patient admissions and the involvement of new, inexperienced practitioners. One comment cited research on methadone medical maintenance that indicated that approximately 15 percent of the patients treated in physicians offices were referred back to OTPs after "relapsing" to illicit opiate use.

Generally, most comments on this issue stated that there was not enough information on office-based practice. These comments suggest that based on the available information, office-based treatment warrants a gradual, step-wise approach, along with more use of medication units. This approach would serve to "diffuse opioid agonist maintenance treatment into traditional settings."

After carefully considering the diverse comments, as well as other legal and regulatory factors, the Secretary is not including in this rule specific standards that would permit physicians to prescribe methadone and LAAM in office-based settings without an affiliation with an OTP. Instead, until additional information is generated, the Secretary is announcing administrative measures to facilitate the treatment of patients under a "medical maintenance" model.

Current regulations enforced by DEA do not permit registrants to prescribe narcotic drugs, including opioid agonist medications such as methadone and LAAM for the treatment of narcotic addiction (see 21 CFR 1306.07(a)). In addition, the Secretary agrees that, at the present time, there should be some linkage between OTPs and physicians who treat stable patients with methadone and LAAM in their offices to address patients' psychosocial needs in the event of relapse. The Secretary agrees with the comments about the lack of trained and experienced practitioners to diagnose, admit, and treat opiate addicts who are not sufficiently stabilized, without the support of an OTP.

The Secretary has taken steps to facilitate "medical maintenance," that will result in more patients receiving treatment with methadone and LAAM in an office-based setting. Medical maintenance refers to the treatment of stabilized patients with increased amounts of take-home medication for unsupervised use and fewer clinic visits for counseling or other services. First, the "take home" provisions in these rules have been revised from the previous regulations under 21 CFR

§ 291.505 to permit stabilized patients up to a one-month supply of treatment medication. In addition, SAMHSA/CSAT has developed treatment guidelines and training curricula for practitioners to increase the information and education for practitioners in this area. Finally, SAMHSA/CSAT has issued announcements to the field explaining how patients and treatment programs can obtain authorizations for medical maintenance. These authorizations were developed to address program-wide exemptions under 21 CFR 291.505; however, SAMHSA/CSAT envisions a similar approach will be used under the program-wide exemption provisions of 42 CFR 8.11(h).

Under the medical maintenance model, office-based physicians maintain formal arrangements with established OTPs. Typically, patients who have been determined by a physician to be stabilized in treatment may be referred to office-based physicians. It has been estimated that over 12,000 current patients would be eligible for medical maintenance treatment. The Secretary believes that this is a reasonable approach that will expand treatment capacity gradually while additional information and experience is developed to evaluate and refine office-based treatment models.

B. Comments on Subpart A—Definitions and Accreditation

Proposed subpart A sets forth definitions as well as procedures, criteria, responsibilities and requirements relating to accreditation.

1. A comment from a State authority suggested that the treatment plan definition under § 8.2 should be modified to require a reference to the services determined necessary to meet the goals identified in the plan. The Secretary agrees with this suggestion and has revised the treatment plan definition accordingly.

2. One comment suggested that the proposed definition of detoxification treatment specifies agonist and therefore precludes the use of mixed agonist or agonists in combination with other drugs. The Secretary has announced plans to develop new rules specifically for partial agonist medications for the treatment of opiate addiction (See 65 FR 25894, May 4, 2000). Therefore, use of the term "agonist" is appropriate in this context.

The use of "other drugs" (interpreted to mean non-narcotic substances) in combination with methadone and LAAM are not subject to the regulatory requirements of this rule.

3. Several comments were submitted on the proposed definition of opiate addiction. Some comments suggested that the definition should be revised to remove behavior-oriented concepts and rely on medical constructs only. One comment suggested substituting the definition of opiate addiction contained in the recent NIH consensus panel report. The Secretary concurs, and has revised the definition of opiate addiction to be more consistent with the recent NIH Consensus panel's recommendations.

4. A few comments were concerned that there would be only two accreditation bodies, CARF and JCAHO. In addition, these comments reflect concern that accreditation would be an additional requirement on top of existing FDA regulations.

As proposed in the July 22, 1999, notice (section 8.3(a)) any private nonprofit organization, State governmental entity, or political subdivision thereof, capable of meeting the requirements of subpart A is eligible to apply to become an accreditation body under the new rules. As discussed elsewhere in this final rule, some State authorities have contacted SAMHSA and expressed interest in becoming an accreditation body under subpart A. In addition, a number of non-governmental entities have expressed similar interest. Accordingly, the Secretary believes that there will be more than two accreditation bodies that seek and obtain approval to become an accreditation body under these rules.

The requirements for accreditation and SAMSHA certification under this final rule will replace the requirements for FDA approval of OTPs under previous regulations. The previous regulations in place under 21 CFR 291.505 will be rescinded on March 19, 2001.

5. The Secretary received a considerable number of diverse comments from State authorities, OTPs, and patients on the provision proposed under section 8.3(a) that would permit States to serve as accreditation bodies under the new rules. The preamble to the July 22, 1999, notice emphasized the need for States to consider serving as accreditation bodies. This emphasis was based upon the recommendation in the IOM Report that strongly suggested that the Federal Government design a consolidated inspection system that reduces the burden on OTPs from multiple (Federal, State, local) inspections.

State authorities provided a mixed response in their comments on this issue. As discussed below, several States expressed an interest in becoming

accrediting bodies under the new rules but believed that they were ineligible because they could not accredit 50 OTPs a year under proposed section 8.3. On the other hand, many States indicated that they were not interested in becoming accreditation bodies, while several indicated that they were undecided and would await additional information.

Comments from OTPs, for the most part, reflect a longstanding cooperative relationship with State regulatory authorities. OTPs, in general, did not appear to oppose the concept of State authorities serving as accreditation bodies under the proposed new system. Indeed, some OTPs, located within States that assess extensive licensing fees, commented that it would be imperative that States take on the role of accreditation bodies under the new system in order to eliminate the financial impact of licensing and accreditation fees.

Comments from patients on this issue suggested caution. Many patients sensed that State regulators would retain strict, "process-oriented" regulations or philosophies. These comments urged that if SAMHSA permitted States to serve as accreditation bodies then the agency should carefully monitor accreditation standards and practices to assure that they conform with the Federal opioid treatment standards.

After considering the comments on this issue, the Secretary is retaining the provision that allows States to serve as accreditation bodies under the new rules. The Secretary acknowledges that many States will choose not to participate as accreditation bodies. Some of these States already accept accreditation by recognized accreditation bodies for licensing purposes. It is expected that more States, especially States with relatively few OTPs, will also choose to accept accreditation as meeting State licensure requirements in time. Indeed, legislation enacted recently in New Hampshire to allow methadone maintenance treatment incorporated a requirement for CARF accreditation (Ref. 2). Finally, some States will apply accreditation reviews and findings to complement their licensing activities. The Secretary recognizes that the States' role in adapting to the new system will change over time as additional information on accreditation is developed.

The Secretary believes that there are adequate safeguards to address patient concerns about overly restrictive State regulations and oversight. Under section 8.3(b)(3), SAMHSA will review each applicant accreditation body's proposed accreditation standards. As part of this

review, SAMHSA will determine the extent to which the accreditation standards are consistent with the Federal opioid treatment standards. In addition, under section 8.5, SAMHSA will evaluate periodically the performance of accreditation bodies by inspecting a selected sample of the OTPs accredited by the accreditation body. As part of this effort SAMHSA may also consider follow-up inspections in cases where accreditation activities identify public health, public safety, and patient care issues.

The Secretary continues to believe, as outlined in the July 22 proposal, that there are benefits to States serving as accreditation bodies under this rule. This feature provides the potential to reduce the overall number of OTP inspections. It also permits the use and application of the vast expertise available within many State oversight agencies.

6. A number of State authorities and an accreditation body questioned the restriction under proposed section 8.3(b)(3) that would require accreditation bodies to be able to survey no less than 50 OTPs annually. Some comments contend that this would unfairly and inappropriately exclude smaller States or States with fewer OTPs from participating. These comments suggested that other requirements should be considered and applied or a waiver provision added. One accreditation body commented that accreditation bodies recognized by the Health Care Financing Administration are not subject to such arbitrary limitations. Other comments suggested that the 50 survey per year minimum was not necessary to achieve its stated purpose—to ensure the quality of accreditation services and minimize the variability of accreditation standards.

The Secretary concurs with these comments. The provisions of section 8.3(b)(3) (submission and review of proposed accreditation standards) and section 8.5 (periodic evaluation of accreditation bodies) are adequate to enable SAMHSA to ensure the quality of accreditation services and minimize the potential variability in accreditation standards. Accordingly, section 8.3(b) has been modified to remove this requirement.

7. A few comments suggested that State authorities and patient advocates should be permitted to participate in the approval of accreditation bodies under the new rules and in the accreditation process in general. These comments believe that they can make substantial contributions to the process.

The Secretary agrees that patients and State authorities can contribute

substantially to the successful operation of the new system. State authorities and patients have participated in the committees that have developed SAMHSA/CSAT's Accreditation Guidelines. In addition, representatives from both these groups have served on the Accreditation Subcommittee of the SAMHSA/CSAT National Advisory Council. Accreditation standards include several provisions designed to solicit and consider individual patient views regarding treatment planning and other areas. Some, though not all, accreditation bodies also have patient hotlines that allow patients to convey concerns directly to accreditation bodies. Finally, SAMHSA and State authorities will continue to consult and interact under the new rules. The Secretary believes that these measures are adequate to assure the appropriate level of State authority and patient input into the accreditation process.

8. Several comments addressed proposed section 8.3(b)(6), pertaining to the qualifications of accreditation body personnel and proposed section 8.4(h) on accreditation teams. One State authority objected that the requirement that there be a licensed physician on the accreditation body staff was an unnecessary expense to accreditation bodies. Another comment recommended that accreditation teams should include a physician certified for dispensing opioids. Some patients advocated that the accreditation team should include a current patient.

The Secretary believes the requirements for accreditation personnel and accreditation teams as set forth in the July 22, 1999, proposal are sufficient. It is not clear that every OTP would benefit from having a physician or opioid agonist patient on the accreditation team. The Secretary has reviewed the results of accreditation surveys under the SAMHSA/CSAT methadone accreditation project. Based on these reviews, the requirements set forth under section 8.4(h) are adequate to assure that accreditation bodies carefully consider the qualifications of accreditation surveyors and accreditation teams.

9. A considerable number of comments were submitted, mostly by State authorities, concerning the absence of a definition for State authority. These comments suggested that adding a definition for state authority could reduce confusion in States that serve as accreditation bodies. In addition, these comments reflect a belief that this change would help clarify the Federal-State consultation process set forth in the proposed rule. The Secretary agrees with these

comments and has added a definition of State Authority. This definition tracks closely with the definition contained in the previous regulations under section 21 CFR 291.505.

C. Subpart B—Certification

Subpart B establishes the criteria and procedures for the certification of OTPs. This section also addresses the conditions for certification and the interaction between the Federal Government and State authorities under the new rules.

1. Many comments from State regulators noted that there was no reference to a requirement that OTPs obtain a license or permit from States before receiving certification from the Federal Government. These comments reflect a concern that SAMHSA may certify a program in a State where no methadone authority exists, or without the knowledge of the State authority. Other comments urged Federal certification to pre-empt State licensing, noting that "initial State approval will remain a de facto requirement."

The Secretary believes that the conditions for certification as set forth in the July 22, 1999, proposal, including the provisions relating to State licensure, are adequate and appropriate to fulfill the objectives of this rule. The Secretary's role in the oversight of narcotic treatment is to set standards for the appropriate use of narcotic drugs in the treatment of addiction, and then to ensure compliance with those standards. The States, on the other hand, have a broader set of responsibilities, including regional and local considerations such as the number and distribution of treatment facilities, the structural safety of each facility, and issues relating to the types of treatment services that should be available. Nothing in this part is intended to restrict State governments from regulating the use of opioid drugs in the treatment of opioid addiction. The Secretary notes that many States exercise this authority by choosing not to authorize methadone treatment at all.

The Secretary does not believe that OTPs will open and begin treating patients without State notification, review, and approval. The Secretary has been careful to state throughout this rule that OTPs (including medication units) must comply with all pertinent State and local laws as a condition of Federal certification. As such, OTPs will also be responsible for assuring that they have the necessary approvals and licensure at the State. Moreover, OTPs must obtain DEA registration prior to accepting opioid addiction treatment drugs for the treatment of opiate addiction. DEA

registration is explicitly contingent upon State authority approval. Importantly, as noted below, there will be extensive consultation, coordination, and cooperation between SAMHSA and relevant State authorities.

2. One State regulator requested that the regulation be modified at section 8.11(c)(1) to add a requirement that SAMHSA notify the State upon receipt of applications for certification as well as approval and withdrawal. This comment was based upon a concern that provisionally certified programs could operate without a State's knowledge.

The Secretary agrees that it is imperative for States to be notified of significant certification activities, including new program applications, program suspensions and withdrawals. SAMHSA intends to notify States of all such developments under the provisions of section 8.11(c)(1). The Secretary believes that the rules are sufficiently clear on this point.

3. Some State authorities suggested revising proposed section 8.11(h), which states that SAMHSA "may" consult with State authorities prior to granting exemptions from a requirement under sections 8.11 or 8.12.

Section 8.11(h) permits OTPs to request exemptions from the requirements set forth under the regulation. This represents a continuation of a long-standing provision from the previous regulation under 21 CFR 291.505. The Secretary anticipates that most exemption requests under the new rule will be to permit variations from the treatment standards, including program-wide exemptions for medical maintenance. The Secretary agrees that it is appropriate and necessary to consult with State authorities on requests for variations from existing standards. Accordingly, section 8.11(h) is revised to require consultation with the State authority prior to granting an exemption.

4. Several comments from patients suggested that Federal regulations should prevent States from imposing additional regulatory requirements beyond the Federal regulations. Many of these comments contend that State regulations prevent treatment expansion, hinder accountability for quality treatment, limit patient access, and lead to patient abuses.

As noted above, the Secretary acknowledges the authority within State government to regulate the practice of medicine. This rule does not pre-empt States from enacting regulations necessary to carry out these important responsibilities.

Many State regulations closely resemble the previous Federal regulations under 21 CFR 291.505. In addition, many States are currently reevaluating their regulations to determine if modifications are necessary to reflect the changes in Federal rules. The Secretary encourages States to consider the new information on changes in the opioid addiction treatment field, including phases of treatment, measuring accountability for improving the quality of patient care, and modern medication dosing practices, as States proceed in revising their regulations.

The Secretary also invites States to continue to enhance their partnership with Federal authorities in this area. As noted above, the final rule includes a new feature—the opportunity for States to serve as accreditation bodies. This new activity adds to existing partnership opportunities, such as the participation in the SAPT Block Grant program and its related technical assistance program. The Secretary hopes that these actions collectively will continue the regulatory reform started with the July 22, 1999, proposal.

5. A few comments expressed concern about proposed section 8.11(e), which permits provisional certification for one year, while a program obtains accreditation. These comments believe that one year was “too long for a program to go without accreditation.”

The Secretary believes that the maximum 1-year term (not including the 90-day extension allowed under section 8.11(e)(2)) for provisional certification is reasonable and customary with accreditation in other areas of healthcare. The purpose of this provision is to permit new OTPs to initiate operations and generate patient records to aid in the accreditation application, survey, and review process. It should be noted that OTPs will be subject to SAMHSA, DEA, and State oversight during the tenure of provisional accreditation. These OTPs must comply with Federal opioid treatment regulations and are subject to compliance actions at any time.

6. Section 8.11(i)(2) proposed that certification as an OTP would not be required for the maintenance or detoxification treatment of a patient who is admitted to a hospital or long-term care facility for the treatment of medical conditions other than addiction. One comment noted that, as written, patients admitted to hospitals for cocaine or alcohol addiction would not be eligible for treatment under this provision. The comment suggested that adding the word “opioid” before “addiction” would help to clarify this

issue. The Secretary concurs and the section 8.11(i)(2) has been changed to reflect this change.

D. Subpart B—Treatment Standards

1. A number of comments were submitted on proposed section 8.12 in general. These comments stated that the Federal Opioid Treatment standards are vague and lack specificity. As such, these comments contend that the standards are unenforceable as regulations. One comment suggested that the SAMHSA/CSAT Accreditation Guidelines be incorporated as regulations.

The Secretary believes that the Federal Opioid Treatment Standards are enforceable, and do not need to be modified to accomplish their purpose under the new rules. The July 22, 1999, proposal noted that in the past, HHS has attempted to write all facets of treatment, including required services, into regulation. In addition, the proposal acknowledged that it is now accepted that (a) different patients, at different times, may need vastly different services, and (b) the state of the clinical art has changed, to reflect scientific developments and clinical experience, and is likely to continue to change and evolve as our understanding of more effective treatment methods increases. Accordingly, the Secretary proposed a more flexible approach with a greater emphasis on performance and outcome measurement. With guidance from SAMHSA, the accreditation bodies will develop the elements needed to determine whether a given OTP is meeting patient needs for required services. SAMHSA will review these elements as part of the accreditation body's initial and renewal applications to ensure that accreditation bodies have incorporated the Federal opioid treatment standards into their accreditation elements. SAMHSA will also review accreditation body elements to ensure that the elements do not exceed Federal expectations in terms of opioid agonist treatment. Incorporating accreditation guidelines into regulations would subvert this approach.

As noted in the July 22, 1999, proposal, the Secretary believes that the standards are “enforceable regulatory requirements that treatment programs must follow as a condition of certification (64 FR 39810, July 22, 1999).” While the new regulations increase the flexibility and clinical judgement in the way OTPs meet the regulatory requirements, they are set forth under section 8.12 as the services, assessments, procedures, etc., that OTPs “must” and “shall” provide. As such, the new standards are as enforceable as

the previous regulations under 21 CFR 291.505. OTPs that do not substantially conform with the Federal Opioid Treatment standards set forth under section 8.12 will risk losing SAMHSA certification.

2. One comment recommended that proposed section 8.12(b) should be modified to require a standard that OTPs should have adequate facilities. The comment stated that this provision existed in the previous regulation. The Secretary agrees and has added a requirement that OTP's must maintain adequate facilities. The Secretary notes, however, that SAMHSA/CSAT accreditation guidelines and accreditation standards used in the SAMHSA accreditation impact study, address the adequacy of the OTP's facility. These accreditation standards, in conjunction with treatment outcomes, will help determine whether facilities are adequate under the new rules.

3. One comment addressed proposed section 8.12(b), stating that rules should expressly require compliance with civil rights laws, not just “pertinent” Federal laws. As such, the comment suggests that the standards should require detailed patient grievance procedures, including appeals to neutral parties. The Secretary believes that it is not necessary to modify the rule to reflect civil rights laws specifically. These laws are included under the requirement as written. In addition, SAMHSA/CSAT Accreditation Guidelines, as well as the accreditation standards developed from them include provisions for accepting and acting upon patient grievances.

4. A number of respondents commented on proposed section 8.12(d) which addresses OTP staff credentials. Under the July 22, 1999, proposal, the Secretary proposed that each person engaged in the treatment of opiate addiction must have sufficient education, training, or experience or any combination thereof, to enable that person to perform the assigned functions. Further, all licensed professional care providers must comply with the credentialing requirements of their professions. The proposal encouraged, but did not require, that treatment programs retain credentialed staff.

Some comments requested that this standard be clarified to require American Society of Addiction Medicine (ASAM)-certified medical professionals. Another comment questioned whether personnel had to be licensed in the State where the treatment program is located. Another comment from a State Authority, recommended that the regulations

specify the license, training, experience, as well as the number of licensed counselors in a program, including a minimum counselor-to-patient ratio. On the other hand, an OTP medical director commented that none of the cited credentials "conferred competence in dealing with opioid dependent patients, per se." According to this comment, SAMHSA/CSAT should instead develop curricula for medical directors and other care givers.

Except for the requirements of section 8.12(h), which relate to the qualifications for practitioners who administer or order medications, the Secretary does not believe that it is appropriate to further prescribe the qualifications for health professionals in this regulation. Under sections 8.12(b), (d), (e), (f) services must be provided by professionals qualified by education and training. The Secretary does not believe that one credentialing organization should be specified as a requirement for qualifications. Instead, the Secretary intends to rely on guidelines and accreditation standards together with patient outcome assessments to determine the adequacy of training and education level of professionals in OTPs. SAMHSA/CSAT is actively developing model training curricula in this area.

5. A few comments suggested that the regulations specify the outcome measures for quality assessment plans under section 8.12(c)(1). Similarly, some comments suggested that diversion control plans, which OTPs are required to develop under section 8.12(c)(2), should also be spelled out in regulations.

The Secretary believes that the regulation as proposed provides sufficient detail on outcome measures and diversion control plans. In keeping with the intent of the regulation reform, these general requirements are elaborated in best-practice guidelines and in "state-of-the-art" accreditation standards. Indeed, following a review of the accreditation standards that are based upon SAMHSA/CSAT's opioid treatment accreditation guidelines, the Secretary has determined that they are adequate to ensure that OTPs will be able to develop meaningful outcome assessment and diversion control plans. In addition, these SAMHSA/CSAT accreditation guidelines and accreditation standards reflect the latest research findings in this area. Unlike the Federal regulations, these guidelines and standards will be updated periodically to reflect new research and clinical experience.

6. The Secretary received a considerable number of comments on

the proposed definition and the standards for short-and long-term detoxification treatment. Most of these comments suggested that the word "detoxification" is a pejorative non-medical term and does not constitute treatment, because few, if any, patients can be stabilized in such a short period of time. These comments suggested that all references to detoxification should be deleted from the regulations, or at least renamed.

These comments fail to recognize the distinction between opiate dependence, for which detoxification treatment is appropriate, and opiate addiction, for which maintenance treatment is appropriate. The Narcotic Addiction Treatment Act of 1974 (NATA) and regulations have long recognized these distinctions. While a majority of the available treatment research, including recent studies, concludes that maintenance treatment is much more effective than detoxification regimens, the Secretary believes that it is still necessary to retain distinct standards for maintenance and detoxification treatment (Ref. 3).

7. Several comments were submitted in response to the Secretary's specific request for comments on proposed section 8.12(e)(4) which set forth minimum requirements for detoxification treatment. The July 22, 1999, proposal retained the requirement from the existing regulation that "a patient is required to wait no less than 7 days between concluding one detoxification episode before beginning another." Essentially, while sympathetic to the need for limits on detoxification treatment, all the comments on this item opposed continuing any waiting period between detoxification episodes. These respondents believe that seven days is "artificial * * * or more time than is needed." In addition, these comments indicate that OTPs often request and are granted exemptions from the waiting period requirement under the existing regulation, creating an unnecessary paperwork burden for OTPs, as well as State and Federal regulators. Instead, the comments suggested a limit on the number of unsuccessful detoxification episodes in one year before the patient is assessed for opioid agonist maintenance or other treatment. In addition, these comments recommended that an unsuccessful detoxification attempt be defined to include any relapse to abuse.

The Secretary agrees with the recommendations that the intent of the restrictions on detoxification can be accomplished without a mandated time interval between detoxification admissions. The standards for

detoxification treatment set forth under section 8.12(e)(2) and (4) have been revised to state that patients with two or more unsuccessful detoxification episodes within a 12-month period must be assessed by the OTP physician for other forms of treatment. This change is consistent with SAMHSA/CSAT accreditation guidelines which also elaborate on unsuccessful detoxification treatment attempts.

8. A considerable number of diverse comments addressed proposed section 8.12(f) relating to required services. This section of the July 22, 1999, proposal requires that "adequate medical, counseling, vocational, educational and assessment services are fully and reasonably available to patients enrolled in an OTP."

Two comments strongly recommended that the regulation require integrated, simultaneous treatment by specially cross-trained staff, for co-occurring opioid treatment and mental illness. These respondents believe that integrated services for persons with an addiction(s) and a psychiatric disorder are crucial. These dually-diagnosed patients represent 50–80 percent of substance dependent populations.

The Secretary agrees with the importance of providing adequate integrated services for opiate-addicted patients who also suffer from psychiatric disorders. Indeed, the SAMHSA/CSAT Accreditation Guidelines, along with the accreditation standards developed by CARF and JCAHO all address the need to evaluate patients for co-occurring illnesses, including mental illness. CARF Opioid Treatment Program Accreditation Standards state that services for co-occurring illness should be provided on site or by referral. However, the same standards note that "coexisting conditions, especially in persons from disenfranchised populations, are most effectively treated at a single site." The Secretary takes note that these provisions for co-occurring disorders under these new rules will be a vast improvement over the previous regulatory system, which did not address co-occurring opiate addiction and psychiatric disorders at all. As such, under the new rules, patients' access to effective treatment for co-occurring disorders will be enhanced substantially. However, the Secretary believes that it would be prohibitively expensive to require every OTP to hire and retain specialists in the treatment of co-occurring disorders.

Other comments on this section stated that the regulations should specify a schedule for services. Some comments

recommended that the regulations require OTPs to document that patients actually receive services when they are referred to off-site providers. Other comments suggested that accreditation bodies should monitor the extent to which services are provided as part of their periodic onsite surveys. Still other comments, mostly from patients, suggested the requirement for services be eliminated, maintaining that medication is all they needed.

The Secretary believes that the requirements for services as stated in the July 22, 1999, proposal, together with the accreditation process, provide adequate assurance that patients enrolled in OTPs receive the services that they have been assessed to need. The July 22, 1999, proposal emphasized the need for these services as an essential part of treatment. However, in shifting to an accreditation approach with an emphasis on performance outcomes, the Secretary was no longer attempting to "write all facets of these required services into regulation." OTPs must initially and periodically assess each patient and ensure that adequate services are available to patients determined to need them. SAMHSA/CSAT Accreditation Guidelines and accreditation standards will elaborate on the standards for services. OTPs will be accountable through the accreditation process to assure that patients receive the appropriate services they need for successful treatment outcomes; for some patients, medication services may be sufficient to produce positive outcomes.

9. A number of respondents submitted comments on proposed section 8.12(f)(2), which requires a complete medical examination within the first 30 days following admission. Some of these comments noted that this provision, as proposed, permitted patients to enter treatment while tests, some of which required several days, are completed. Others commented that the 30 days was too long to wait for a medical exam to be completed, noting that information from the exam is crucial to the first few days of treatment. Finally, some comments suggested that regulations should specify the contents of the medical exam.

The intent of proposing 30 days for the completion of the physical exam was to allow patients into treatment while OTPs wait for the results of serology and other tests that require, in some cases, several days to complete. Section 8.12(f)(2) has been revised to clarify the requirement for a physical exam upon admission, with serology and other tests results completed w/in 14 days. The Secretary does not agree

that regulations should specify the contents of the medical examination. Instead, the Secretary believes that accreditation guidelines should express the state-of-the-art content for a medical exam appropriate for the treatment of opiate addiction.

10. The July 22, 1999, notice proposed that OTPs conduct at least eight random drug abuse tests per year for each patient. Many comments suggested that the Federal standards specify more frequent drug abuse tests, including weekly testing, to balance the more flexible proposed take-home schedule. Other comments suggested that Federal regulations should specify measures to prevent adulteration. On the other hand, some comments suggested that quarterly drug abuse testing is appropriate. Moreover, one comment recommended substituting an "honor system" because patients can corrupt the testing process and falsify results.

After considering the comments on this issue, the Secretary is retaining the requirement for a minimum of eight random drug abuse tests per year for maintenance treatment. The Secretary believes that this is an adequate and balanced standard for drug abuse testing. There is extensive discussion on drug abuse testing issues in the SAMHSA/CSAT Treatment Improvement Protocols and the SAMHSA/CSAT Accreditation Guidelines. In addition, these guidelines elaborate on measures to address the corruption and falsification of results. Finally, as the Federal standard is a minimum, OTPs can require more frequent tests if desired.

11. The Secretary received many comments on proposed section 8.12(g)(2) which requires OTPs to determine and document that patients are not enrolled in other programs. Most respondents question how such determinations could be made without a patient registry. One comment stated that multiple enrollments are attributable to inadequate medication dosing practices.

The July 22, 1999, proposal retained the provisions relating to multiple enrollments from the previous regulations under 21 CFR 291.505. In proposing to retain the requirement, the Secretary noted that there have been cases of patients enrolling in more than one treatment program; however, the extent of this practice is undetermined but not considered to be widespread. The intent of this provision is for OTPs to make a good faith effort, using available resources and mechanisms to ascertain whether or not a prospective patient was currently enrolled in another OTP. Some individual States

with OTPs concentrated within a community have established a patient registry and require OTPs to report new patients and patients who have discontinued in treatment. In other jurisdictions, patient registries are developed and maintained voluntarily by OTPs. OTPs also often contact other OTPs in the vicinity to determine if the patient is currently enrolled in an OTP, or they ask the patient. If used, these mechanisms must be used in accordance with the provisions at 42 CFR 2.34, regarding disclosures to prevent multiple enrollments. The Secretary acknowledges that none of these mechanisms can determine with complete certainty whether or not a patient is enrolled in more than one OTP. Accordingly, the Secretary expects that OTPs will document in each patient's record that the OTP made a good faith effort to review whether or not the patient is enrolled in any other OTP. Section 8.12(g)(2) has been revised accordingly.

12. The Secretary received many comments on proposed section 8.12(j), relating to interim methadone maintenance. Most of these comments were from patients who suggested interim maintenance as a model for long standing patients who have been stabilized in treatment. As such, these comments suggested that the term for interim methadone maintenance be extended beyond 120 days.

These comments reflect a misunderstanding of interim methadone maintenance. Interim methadone maintenance was mandated by the ADAMHA Reorganization Act of 1992 as a measure to address shortages in treatment capacity and documented waiting lists (Pub. L. 102-321, See also 58 FR 495, January 5, 1993). The legislation included several restrictions which were incorporated and retained into Federal regulations. Although very few programs have applied for authorization to provide interim methadone maintenance, the Secretary does not at this time believe it is necessary or appropriate to change the standards. Instead, as discussed elsewhere in this notice, the Secretary believes that medical maintenance provides a more reasonable approach for expanding treatment capacity.

13. The Secretary received comments on proposed section 8.11(h), which provides for exemptions from treatment standards or certification requirements. One comment suggested that the examples in the previous regulation for exemptions, be retained in the final new regulations. The comment suggests that this would encourage individual physicians, pharmacists, or both to

provide methadone treatment in rural areas where methadone treatment is scarce or unavailable. Another comment suggested that SAMHSA streamline the exemption process and do more to publicize the availability of such regulatory options. The Secretary accepts both of these suggestions, and section 8.11(h) has been revised accordingly. In addition, SAMHSA has already taken steps to streamline the exemption process and publicize the availability of certain exemptions (Ref. 4).

14. Most comments strongly supported the provisions in proposed section 8.12(h)(3)(i) which permits OTPs to use solid dosage forms. Some patients reported spoilage and decomposition problems with 14-day supplies of liquid dosage form. Other comments suggested that the use of solid medication will reduce treatment cost modestly by eliminating the need for dosage bottles for solutions. The Secretary agrees that permitting OTPs to use solid medication will reduce treatment costs and increase treatment convenience to patients.

15. The Secretary received many comments on proposed section 8.11(h)(3)(iii) that would have required the program physician to justify in the patient record all doses above 100 mg. Most comments viewed this requirement as an inappropriate "value judgement" that hampers clinical judgement. The Secretary agrees that the requirement to justify a dose above 100 mg, which is a modification of a requirement under the previous regulation, is not necessary to reduce the risk of medication diversion. Accordingly, this requirement has been eliminated from the final rule.

16. The Secretary specifically requested and received comments on proposed changes to the requirements under section 8.12(i) pertaining to medications dispensed for unsupervised use (hereinafter "take-homes"). The July 22, 1999, proposal set forth four options for addressing take-homes. These options ranged from retaining the previous requirements to a scheme based on a maximum dose. Option number 2 was discussed as the option preferred by HHS and endorsed by DEA. This option resembles the requirement under the previous regulations and retains the 8-point take-home criteria. However, option number 2 permitted patients in stable treatment for one year to receive up to a 31-day supply of medication, while the previous regulation included a maximum take-home supply of 6 days.

Most comments supported proposed option 2, with modifications. In

supporting option 2, current patients stated that less frequent clinic attendance will make treatment much more convenient. In addition, Option 2 will eliminate travel hardships and facilitate employment commitments, ultimately increasing retention in treatment and rehabilitation. Option 1, which encompassed the take-home schedule from the previous regulation, was viewed by many comments as too restrictive. Many comments opposed option 3, which proposed a set 2-week maximum milligram amount for take-homes, because it unfairly penalized patients receiving higher doses.

On the other hand, a form letter circulated and submitted by several treatment programs stated that no patients should be eligible for a 31-day take-home supply. According to these comments, all patients must report to clinics often so that their rehabilitation can be monitored appropriately. In addition, these comments stated that allowing any patient a 31-day take-home supply presents an unacceptable risk of diversion.

The Secretary does not agree with these comments. Indeed, there is considerable evidence that many patients can responsibly handle supplies of take-home medications beyond the 6-day maximum allowed under the previous regulations. In addition, FDA has permitted hundreds of patients to receive monthly take-home supplies of methadone through exemptions or Investigational New Drug Applications. These investigations have been analyzed and reported in scientific literature and indicate that patients successfully continue in rehabilitation (Ref. 5). Moreover, these cases indicate that rehabilitation is enhanced through these "medical maintenance" models. Accordingly, and in response to an increased interest in this issue, FDA and SAMHSA/CSAT issued a "Dear Colleague" letter on March 30, 2000, that advised the field on procedures for obtaining OTP exemptions for medical maintenance, which include a provision for up to a 31-day supply of take-home medication (Ref 4).

The Secretary notes that many comments provided suggestions on refining the basic schedule for take-home eligibility outlined in proposed option 2. For example, many comments suggested that one year of stable treatment was still too short a period of time to evaluate whether patients can responsibly handle a 31-day supply of take-home medication. These comments suggested an interim step that permits a 14-day take-home supply after one year of stable treatment before a patient is eligible for a 31-day supply.

The Secretary concurs with these comments. The 2-year time in treatment requirement is more consistent with the studies and exemptions for medical maintenance granted to date under the previous rules. In addition, this schedule is more consonant with the schedule set forth in the SAMHSA/CSAT Accreditation Guidelines and the accreditation body standards. Accordingly, section 8.12(i)(3) has been revised to reflect a 14-day take-home step after one year of stable treatment and to reflect that patients are eligible for a take-home supply up to 31 days after two years of stable treatment. The language in other parts of section 8.12(i)(3) has been modified slightly for clarity to lengthen the duration of the steps within the first year of treatment, and to remove some requirements for observed ingestion.

17. Comments overwhelmingly supported the proposal to permit take-home use of LAAM and suggest that the Secretary apply the same schedule as methadone, e.g. option 2. A comment from a practitioner who has treated over 500 patients, stated that patients dislike being switched from LAAM to methadone when necessary for travel purposes. Most comments suggested that diversion of LAAM is no more likely than the diversion of methadone which generally is not problematic. One comment submitted the results of a 149-patient study on LAAM take-home use. Patients were randomized into take-home and clinic only groups. As part of the study, 545 take-home doses of LAAM were distributed to patients, and patients were subject to random "callbacks." There was no evidence of tampering, diversion, or interest in obtaining LAAM take-home supplies illicitly. In addition, there were no differences between the two groups in the measured outcome variables. The investigator concluded that methadone and LAAM should be subject to the same take-home requirements. The Secretary concludes that LAAM should be available for take-home use under this rule.

18. A comment submitted by a physician discussed his successful experience using LAAM for detoxification treatment, finding LAAM to be superior to methadone for detoxification with some patients. The comment suggested that the regulations should be modified to permit the use of LAAM for detoxification.

Although previous **Federal Register** notices may have suggested that LAAM was not available for use in detoxification treatment (58 FR 38704, July 20, 1993), the July 22, 1999, proposal does not prohibit the use of

methadone or LAAM for detoxification treatment. Indeed, the current FDA approved labeling for LAAM discusses and provides guidance on withdrawing patients from LAAM therapy:

ORLAAM is indicated for the management of opiate dependence * * * There is a limited experience with detoxifying patients from ORLAAM in a systematic manner, and both gradual reduction (5 to 10% a week) and abrupt withdrawal schedules have been used successfully. The decision to discontinue ORLAAM therapy should be made as part of a comprehensive treatment plan.

The Secretary believes that the regulations are adequately clear on this point.

19. A few respondents commented upon the proposed implementation plan and whether OTPs could be expected to comply with the timetables for achieving accreditation. Under proposed section 8.11(d), treatment programs approved under the previous regulations are deemed certified under the new rules. This "transitional certification" would expire on June 18, 2001 unless the OTPs certify with a written statement signed by the program sponsor that they will apply for accreditation within 90 days of the date SAMHSA approves the first accreditation body. Transitional certification, in that case, will expire on March 19, 2003. SAMHSA may extend transitional certification on a case-by-case basis for up to one year under certain conditions. The comments questioned whether SAMHSA had empirical evidence that OTPs could meet this timetable.

The Secretary believes that the timetables proposed in the July 22, 1999, notice remain reasonable. A significant number of OTPs have already had experience with accreditation. This includes programs located in Department of Veterans Affairs Medical Centers, as well as OTPs located in the several States that require accreditation of OTPs (Maryland, Indiana, North Carolina, Georgia, South Carolina, and Michigan). Moreover, as discussed previously, as part of SAMHSA/CSAT's accreditation implementation plan, two accreditation bodies conducted accreditation surveys of OTPs and accredited over 50 OTPs in just a few months. SAMHSA/CSAT has planned additional training and technical assistance to enable OTPs to understand and comply with the new regulations. In addition, the regulations have been streamlined with fewer reporting and recordkeeping requirements. OTPs have had ample opportunity to prepare for this final rule, and the SAMHSA/CSAT Accreditation Guidelines as well as the

CARF and JCAHO accreditation standards have been widely available for years. Taken together, these factors provide the Secretary with reasonable confidence that OTPs can apply for and achieve accreditation within two years from the effective date of this rule.

The Secretary is sensitive to concerns about OTPs contacting accreditation bodies and scheduling accreditation reviews in a convenient manner. Therefore, while not changing the timetables for achieving accreditation under the final rule, the Secretary has modified section 8.11(d) to state that programs will agree to apply for accreditation within 90 days from the date SAMHSA announces the approval of the second accreditation body. The Secretary believes that tying this certification for OTPs to apply from the date SAMHSA announces the approval of the first accreditation body to the date SAMHSA announces approval of the second accreditation body will facilitate OTPs contacting and achieving accreditation under the final rule.

20. A few comments requested that OTPs that have been previously accredited by JCAHO and CARF should be "grandfathered" somehow under the new final regulations.

There are no provisions in the final rule to accept accreditation by accreditation bodies that have not been approved by SAMHSA under section 8.3(d). These accreditation bodies did not develop and apply accreditation standards that were based upon the opioid agonist treatment standards set forth under section 8.12. SAMHSA, however, will consider on a case-by-case basis, whether OTPs that achieved accreditation under the SAMHSA/CSAT implementation initiative can be exempted from re-accreditation under this final rule, pursuant to section 8.11(h).

E. Subpart C—Procedures for Review of Suspension or Proposed Revocation of OTP Certification, and of Adverse Action Regarding Withdrawal of Approval of an Accreditation Body

1. One comment recommended that subpart C should be revised to add discovery provisions. This would enable OTPs to obtain crucial information on how "accreditation bodies conducted their investigation." The Secretary believes that the provisions of subpart A that require that accreditation bodies have appeals procedures in their accreditation decision-making process is adequate to assure that OTPs can obtain the information they need on accreditation activities.

2. One comment suggested that subpart C should be revised to allow

applicant OTPs to appeal decisions to deny approval of an initial application. The Secretary does not agree and points out that OTPs will be able to appeal denials of accreditation by accreditation bodies under § 8.3(b)(4)(vii).

3. Response times in § 8.26(a), (b) and (c) have been lengthened, as have the oral presentation timeframes in § 8.27(d), and expedited procedures in § 8.28(a) and (d).

F. Conclusion and Delegation of Authority

After considering the comments submitted in response to the July 22, 1999, proposal, along with the information presented during the November 1, 1999, Public Hearing, the Secretary has determined that the administrative record in this proceeding supports the finalization of new rules under 42 CFR part 8.

In a notice to be published in a future issue of the **Federal Register**, the Secretary will announce the delegation of authority to the Administrator of SAMHSA, with the authority to redelegate, responsibility for the administration of 42 CFR part 8.

III. Analysis of Economic Impacts

The Secretary has examined the impact of this rule under Executive Order 12866. Executive Order 12866 directs Federal agencies to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages, distributive impacts, and equity). According to Executive Order 12866, a regulatory action is "significant" if it meets any one of a number of specified conditions, including having an annual effect on the economy of \$100 million; adversely affecting in a material way a sector of the economy, competition, or jobs; or if it raises novel legal or policy issues. While this rule is not a significant economic regulation, the Secretary finds that this rule is a significant regulatory action as defined by Executive Order 12866. As such, this rule has been reviewed by the Office of Management and Budget (OMB) under the provisions of that Executive Order. In addition, it has been determined that this rule is not a major rule for the purpose of congressional review. For the purpose of congressional review, a major rule is one which is likely to cause an annual effect on the economy of \$100 million; a major increase in costs or prices; significant effects on competition, employment, productivity, or

innovation; or significant effects on the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets.

A. Introduction

As noted in the July 22, 1999, proposal, approximately 900 OTPs provide opioid agonist treatment to approximately 140,000 patients in the U.S. For almost 30 years, FDA has applied process-oriented regulations with periodic inspections to approve and monitor these OTPs. This final rule establishes an accreditation-based regulatory system, administered by SAMHSA, to carry out these responsibilities. In addition, this final rule includes changes that will make the regulations more flexible, and provide the opportunity to increase treatment capacity. OTPs will incur additional costs under the new accreditation-based system, but these additional costs are modest, and the Secretary believes are offset by benefits set forth under the new rules.

The additional costs under these new rules are attributable to the costs of accreditation. FDA did not assess fees for inspections under the previous regulations. Under the new rules, private not-for-profit accreditation bodies will assess accreditation survey fees, and if necessary, reinspection fees. The July 22, 1999, proposal estimated that the direct and indirect costs of accreditation at \$4.9 million per year. These annual cost equal approximately \$5,400 per facility and \$39 per patient. The cost estimates were based on discussions with three accreditation bodies. Overall, the net costs of the new system over the existing FDA system, factoring in SAMHSA's estimated annual oversight costs of \$3.4 million, was \$4.4 million. The July 22, 1999, proposal noted that additional information on accreditation costs would be derived from SAMHSA/CSAT ongoing accreditation implementation project and requested specific comments on the estimates provided.

As discussed above, although a number of comments submitted in response to the July 22, 1999, proposal predicted that accreditation costs could be higher, these predictions were based upon accreditation experiences in the past, not associated with the specific accreditation standards set forth under the new system. The results from approximately 50 accreditation surveys under the SAMHSA accreditation impact study suggest that the costs, as estimated in the July 22, 1999, proposal, are reasonably accurate.

The July 22, 1999, proposal discussed the benefits of the proposed rule in

terms of the advantages of accreditation and in terms of relapse rates as a function of retention in treatment. Although difficult to quantify, the Secretary believes that the accreditation-based system will provide more frequent quality surveys of OTPs and allow greater flexibility in the delivery of opioid treatment. In addition, patients have commented that the increased flexibility of the new regulations, particularly in the standards for medications dispensed for unsupervised use, will increase patient convenience, increase patient satisfaction, and increase patient retention in treatment. Importantly, changes in the regulations will facilitate and expand medical maintenance treatment freeing resources to expand treatment capacity. As noted in the July 22, 1999, proposal, increasing retention in treatment and increasing the number of patients in treatment will lead to decreases in mortality and morbidity associated with opiate addiction, decrease health expenditures, and decrease criminal activity. These benefits are likely to be significantly greater than the costs of these new regulations.

B. Small Entity Analysis

The Regulatory Flexibility Act (RFA) requires agencies to analyze regulatory options that would minimize any significant impact of a rule on a substantial number of small entities. SAMHSA included such an analysis in the July 22, 1999, proposal.

1. Description of Impact

The July 22, 1999, proposal provided an extensive description of the industry, and concluded that, although the regulations were streamlined under the proposal with fewer forms and reporting requirements, the proposed rule constituted a significant impact on a substantial number of small entities. This impact is attributable to the requirement that all OTPs, regardless of size, must be accredited and maintain accreditation in order to continue to treat patients. Overall, the July 22, 1999, proposal estimated that the cost per patient for a "small" OTP (defined as an OTP treating 50 or fewer patients) would increase slightly more than the industry average (\$50 compared to \$39).

2. Analysis of Alternatives

The July 22, 1999, notice included a brief discussion of alternatives to the proposed accreditation-based regulatory scheme. In the analysis set forth initially in the July 22, 1999 notice, the Department discussed but dismissed the alternative of continuing the existing

direct, FDA monitored, regulatory system because of the findings and criticisms of that system identified in the Institute of Medicine Report and elsewhere. In addition, the alternative of allowing self-certification was discussed, but rejected due to concerns about diversion and insufficient enforceability.

The preamble to the proposed rule also included a brief discussion of alternatives that would minimize the economic impact of the new regulations on small businesses and other small entities. For example, the notice discussed the alternative of exempting small facilities from some requirements. It was also noted that small facilities could seek arrangements with larger facilities that could lower costs with economy-of-scale features.

The issues in this initial analysis were highlighted for specific comment, and the notice itself was sent to every OTP identified in the FDA inventory of approved programs. Except to say that small programs should not have to close under the new rules, or that small programs should be exempt from accreditation, very few comments addressed the issue specifically, or provided information on alternatives. Therefore, this initial analysis does not require changing and is adopted as the final regulatory flexibility analysis.

3. Response to Comments From Small Entities

These issues were highlighted for specific comment, and the notice itself was sent to every OTP identified in the FDA inventory of approved programs. Except to say that small programs should not have to close under the new rules, or that small programs should be exempt from accreditation, very few comments addressed the issue specifically, or provided information on alternatives.

As discussed above, SAMHSA has evaluated the results of accreditation surveys of OTPs conducted pursuant to the proposed Federal opioid treatment standards. As such, SAMHSA has a better understanding of how accreditation will work in both large and small OTPs. Moreover, SAMHSA has provided technical assistance to participating programs to help them achieve accreditation. SAMHSA expects to continue providing technical assistance to programs during and after the transition to the new system.

The accreditation-based system, the subject of these new rules, includes flexibility measures for small OTPs. The Secretary anticipates that there will be a number of approved accreditation bodies to choose from, including those

that will adjust accreditation fees on a sliding scale tied to the patient census. In addition, SAMHSA will retain the authority to certify programs without accreditation and could apply this provision, if necessary, to address burdens to OTPs with low patient censuses. SAMHSA prefers this case-by-case approach to a blanket exemption from accreditation requirements for programs below an arbitrary size. Such a blanket exemption would not be consistent with the intent of this regulatory initiative—to enhance the quality of opioid agonist treatment. The Secretary believes that, taken together, these considerations can mitigate the impact on small entities, while still meeting the objectives of this rulemaking.

C. Unfunded Mandates Reform Act of 1995

The Secretary has examined the impact of this rule under the Unfunded Mandates Reform Act of 1995 (UMRA) (Public Law 104-4). This rule does not trigger the requirement for a written statement under section 202(a) of the UMRA because it does not impose a mandate that results in an expenditure of \$100 million (adjusted annually for inflation) or more by State, local, and tribal governments in the aggregate, or by the private sector, in any one year.

IV. Environmental Impact

The Secretary has previously considered the environmental effects of this rule as announced in the proposed rule (64 FR 39810 at 39825). No new information or comments have been received that would affect the agency's previous determination that there is no significant impact on the human environment and that neither an environmental assessment nor an environmental impact statement is required.

V. Executive Order 13132: Federalism

The Secretary has analyzed this final rule in accordance with Executive Order

13132: Federalism. Executive Order 13132 requires Federal agencies to carefully examine actions to determine if they contain policies that have federalism implications or that preempt State law. As defined in the Order, "policies that have federalism implications" refer to regulations, legislative comments or proposed legislation, and other policy statements or actions that have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

The Secretary is publishing this final rule to set forth treatment regulations that provide for the use of approved opioid agonist treatment medications in the treatment of opiate addiction. The Narcotic Addict Treatment Act (the NATA, Pub. L. 93-281) modified the Controlled Substances Act (CSA) to establish the basis for the Federal control of narcotic addiction treatment by the Attorney General and the Secretary. Because enforcement of these sections of the CSA is a Federal responsibility, there should be little, if any, impact from this rule on the distribution of power and responsibilities among the various levels of government. In addition, this regulation does not preempt State law. Accordingly, the Secretary has determined that this final rule does not contain policies that have federalism implications or that preempt State law.

VI. Paperwork Reduction Act of 1995

This final rule contains information collection provisions which are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (the PRA)(44 U.S.C. 3507(d)). The title, description and respondent description of the information collections are shown in the following paragraphs with an estimate of the annual reporting burden. Included in the estimate is the time for

reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Title: Narcotic Drugs in Maintenance and Detoxification Treatment of Narcotic Dependence; Repeal of Current Regulations and Adoption of New Regulations.

Description: The Secretary is issuing regulations to establish an accreditation-based regulatory system to replace the current system that relies solely upon direct Federal inspection of treatment programs for compliance with process-oriented regulations.

These new rules are intended to enhance the quality of opioid treatment by allowing increased clinical judgment in treatment and by the accreditation process itself with its emphasis on continuous quality assessment. As set forth in this final rule, there will be fewer reporting requirements and fewer required forms under the new system. The total reporting requirements are estimated at 2,071 hours for treatment programs, and 341 hours for accrediting organizations as outlined in Tables 1 and 2.

The regulation requires a one-time reporting requirement for transitioning from the old system to the new system. The estimated reporting burden for "transitional certification" is approximately 475 hours. The proposal also requires ongoing certification on a 3-year cycle, with an estimated reporting burden of approximately 300 hours.

Description of Respondents: Business or other for-profit; Not-for-profit institutions; Federal Government; State, local or tribal government.

No comments were submitted in response to the Secretary's invitation in the July 22, 1999, proposal to comment on the information collection requirements.

TABLE 1.—ANNUAL REPORTING BURDEN FOR TREATMENT PROGRAMS

| 42 CFR citation | Purpose | Number of respondents | Responses/ respondent | Hours/ response | Total hours |
|------------------|---|-----------------------|-----------------------|-----------------|-------------|
| 8.11(b) | New programs approval (SMA-162) | 75 | 1 | 1.50 | 112.50 |
| 8.11(b) | Renewal of approval (SMA-162) ¹ | 300 | 1 | 1.00 | 300.00 |
| 8.11(b) | Relocation of program (SMA-162) | 35 | 1 | 1.17 | 40.83 |
| 8.11(d) | Application for transitional certification (SMA-162) ² | 300 | 1 | 1.58 | 475.00 |
| 8.11(e)(1) | Application for provisional certification | 75 | 1 | .50 | 37.50 |
| 8.11(e)(2) | Application for extension of provisional certification | 30 | 1 | .25 | 7.50 |
| 8.11(f)(5) | Notification of sponsor or medical director change .. | 60 | 1 | .33 | 20.00 |
| 8.11(g)(2) | Documentation to SAMHSA for interim maintenance. | 1 | 1 | 2 | 2.00 |
| 8.11(h) | Request to SAMHSA for Exemption from 8.11 and 8.12. | 800 | 3 | .438 | 1050.00 |

TABLE 1.—ANNUAL REPORTING BURDEN FOR TREATMENT PROGRAMS—Continued

| 42 CFR citation | Purpose | Number of respondents | Responses/ respondent | Hours/ response | Total hours |
|------------------|---|-----------------------|-----------------------|-----------------|-------------|
| 8.11(i)(1) | Notification to SAMHSA Before Establishing Medication Units. | 3 | 1 | .25 | .75 |
| 8.12(j)(2) | Notification to State Health Officer When Patient Begins Interim Maintenance. | 1 | 1 | .33 | .33 |
| 8.24 | Contents of Appellant Request for Review of Suspension. | 2 | 1 | .25 | .50 |
| 8.25(a) | Informal Review Request | 2 | 1 | 1.00 | 2.00 |
| 8.26(a) | Appellant's Review File and Written Statement | 2 | 1 | 5.00 | 10.00 |
| 8.28(a) | Appellant's Request for Expedited Review | 2 | 1 | 1.00 | 2.00 |
| 8.28(c) | Appellant's Review File and Written Statement | 2 | 1 | 5.00 | 10.00 |
| Total | | | | | 2,070.91 |

¹ Applications for renewal of certification are required every 3 years.

² Transitional Certification is a one-time requirement and will be included in the total annualized burden but averaged over the 3-year period of the OMB collection activity approval.

The final rule does not increase the estimated annualized burden. Certain reporting requirements have been eliminated, such as submissions for authorizations to use LAAM, the requirement to submit a physician responsibility statement (FDA Form 2633), and elimination of the requirement to obtain Federal approval for take-home doses of methadone in excess of 100 mg that exceed a 6-day supply. The new rule adds a one-time

requirement for existing programs to apply for transitional certification, and a requirement to apply for certification renewal every third year. The annualized burdens associated with these new reporting requirements offset the burdens eliminated, resulting in no estimated net change.

Accreditation bodies will also require treatment programs to submit information as part of the standard operating procedures for accreditation.

As mentioned earlier in this notice, accreditation bodies, under contract to SAMHSA, have accredited existing OTPs as part of an initiative to gain more information on the accreditation of OTPs. SAMHSA prepared a separate OMB Paperwork Reduction notice and analysis for that information collection activity (63 FR 10030, February 27, 1998, OMB approval number 0930-0194).

TABLE 2.—ANNUAL REPORTING BURDEN FOR ACCREDITATION ORGANIZATIONS

| 42 CFR citation | Purpose | No. of respondents | Responses/ respondent | Hours/ response | Total hours |
|-------------------------------|---|--------------------|-----------------------|-----------------|-------------|
| 8.3 (b) (1-11) | Initial approval (SMA-163) | 10 | 1 | 3.0 | 30.0 |
| 8.3 (c) | Renewal of approval (SMA-163) | 3 | 1 | 1.0 | 3.0 |
| 8.3 (e) | Relinquishment notification | 1 | 1 | 0.5 | 0.5 |
| 8.3 (f) (2) | Non-renewal notification to accredited OTP's | 1 | 90 | 0.1 | 9.0 |
| 8.4 (b) (1) (ii) | Notification to SAMHSA for serious noncompliant programs. | 2 | 2 | 1.0 | 4.0 |
| 8.4 (b) (1) (iii) | Notification to OTP for serious noncompliance | 2 | 2 | 1.0 | 4.0 |
| 8.4 (d) (1) | General document and information to SAMHSA upon request. | 10 | 2 | 0.5 | 10.0 |
| 8.4 (d) (2) | Accreditation survey to SAMHSA upon request | 10 | 6 | 0.2 | 12.0 |
| 8.4 (d) (3) | List of surveys, surveyors to SAMHSA upon request. | 10 | 6 | 0.2 | 12.0 |
| 8.4 (d) (4) | Less than full accreditation report to SAMHSA | 10 | 7.5 | 0.5 | 37.5 |
| 8.4 (d) (5) | Summaries of Inspections | 10 | 30 | 0.5 | 150.0 |
| 8.4 (e) | Notifications of Compliers | 10 | 1 | 0.5 | 5.0 |
| 8.6 (a) (2) and (b) (3) | Revocation notification to Accredited OTP's | 1 | 90 | 0.3 | 27.0 |
| 8.6 (b) | Submission of 90-day Corrective plan to SAMHSA | 1 | 1 | 10 | 10.0 |
| 8.6 (b) (1) | Notification to accredited OTP's of Probationary Status. | 1 | 90 | 0.3 | 27.0 |
| Total | | 82 | | | 341 |

Note: Because some of the numbers underlying these estimates have been rounded, figures in this table are approximate. There are no maintenance and operation costs nor start up and capital costs.

Recordkeeping—The recordkeeping requirements for OTPs set forth in sec. 8.12 include maintenance of the following: A patient's medical evaluation and other assessments when admitted to treatment, and periodically throughout treatment Sec. 8.12(f)(4);

the provision of needed services, including any prenatal support provided the patient (Sec. 8.12(f)(3) and (f)(4)) justification of exceptional initial doses; changes in a patient's dose and dosage schedule; justification for variations from the approved product

labeling for LAAM and future medications (Sec. 8.12(h)(4)); and the rationale for decreasing a patient's clinic attendance (Sec. 8.12(i)(3)).

In addition, sec. 8.4(c)(1) will require accreditation bodies to keep and retain for 5 years certain records pertaining to their respective accreditation activities.

These recordkeeping requirements for OTPs and accreditation bodies are customary and usual practices within the medical and rehabilitative communities, and thus impose no additional response burden hours or costs.

Disclosure—This final rule retains requirements that OTPs and accreditation organizations disclose information. For example, sec. 8.12(e)(1) requires that a physician explain the facts concerning the use of opioid drug treatment to each patient. This type of disclosure is considered to be consistent with the common medical practice and is not considered an additional burden. Further, the new rules require under sec. 8.4(i)(1) that each accreditation organization shall make public its fee structure. The Secretary notes that the preceding section of this notice contains publicly available information on the fee structure for each of three accreditation bodies. This type of disclosure is standard business practice and is not considered a burden in this analysis.

Individuals and organizations may submit comments on these burden estimates or any other aspect of these information collection provisions, including suggestions for reducing the burden, and should direct them to: SAMHSA Reports Clearance Officer, Room 16–105, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857.

The information collection provisions in this final rule have been approved under OMB control number 0930–0206. This approval expires 09/30/2002. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Nelba Chavez,

Administrator, Substance Abuse and Mental Health Services Administration.

Dated: January 5, 2001.

Donna E. Shalala,

Secretary of Health and Human Services.

Therefore, under the Comprehensive Drug Abuse Prevention and Control Act of 1970, the Controlled Substances Act as amended by the Narcotic Addict Treatment Act of 1974, the Public Health Service Act, and applicable delegations of authority thereunder, titles 21 and 42 of the Code of Federal Regulations are amended as follows:

21 CFR Chapter I

PART 291—[REMOVED]

1. Under authority of sections 301(d), 543, 1976 of the Public Health Service Act (42 U.S.C. 241(d), 290dd–2, 300y–11); 38 U.S.C. 7332, 42 U.S.C. 257a; and section 303(g) of the Controlled Substances Act (21 U.S.C. 823(g)), amend title 21 of the Code of Federal Regulations by removing part 291.

42 CFR Chapter I

2. Amend 42 CFR Chapter I by adding part 8 to subchapter A to read as follows:

PART 8—CERTIFICATION OF OPIOID TREATMENT PROGRAMS

Subpart A—Accreditation

Sec.

- 8.1 Scope.
- 8.2 Definitions.
- 8.3 Application for approval as an accreditation body.
- 8.4 Accreditation body responsibilities.
- 8.5 Periodic evaluation of accreditation bodies.
- 8.6 Withdrawal of approval of accreditation bodies.

Subpart B—Certification and Treatment Standards

- 8.11 Opioid treatment program certification.
- 8.12 Federal opioid treatment standards.

8.13 Revocation of accreditation and accreditation body approval.

8.14 Suspension or revocation of certification.

8.15 Forms.

Subpart C—Procedures for Review of Suspension or Proposed Revocation of OTP Certification, and of Adverse Action Regarding Withdrawal of Approval of an Accreditation Body

- 8.21 Applicability.
- 8.22 Definitions.
- 8.23 Limitation on issues subject to review.
- 8.24 Specifying who represents the parties.
- 8.25 Informal review and the reviewing official's response.
- 8.26 Preparation of the review file and written arguments.
- 8.27 Opportunity for oral presentation.
- 8.28 Expedited procedures for review of immediate suspension.
- 8.29 Ex parte communications.
- 8.30 Transmission of written communications by reviewing official and calculation of deadlines.
- 8.31 Authority and responsibilities of the reviewing official.
- 8.32 Administrative record.
- 8.33 Written decision.
- 8.34 Court review of final administrative action; exhaustion of administrative remedies.

Authority: 21 U.S.C. 823; 42 U.S.C. 257a, 290aa(d), 290dd–2, 300x–23, 300x–27(a), 300y–11.

Subpart A—Accreditation

§ 8.1 Scope.

The regulations in this part establish the procedures by which the Secretary of Health and Human Services (the Secretary) will determine whether a practitioner is qualified under section 303(g) of the Controlled Substances Act (21 U.S.C. 823(g)) to dispense opioid drugs in the treatment of opioid addiction. These regulations also establish the Secretary's standards regarding the appropriate quantities of opioid drugs that may be provided for unsupervised use by individuals undergoing such treatment (21 U.S.C. 823(g)(1)). Under these regulations, a practitioner who intends to dispense opioid drugs in the treatment of opioid addiction must first obtain from the Secretary or by delegation, from the Administrator, Substance Abuse and Mental Health Services Administration (SAMHSA), a certification that the practitioner is qualified under the Secretary's standards and will comply with such standards. Eligibility for certification will depend upon the practitioner obtaining accreditation from an accreditation body that has been approved by SAMHSA. These regulations establish the procedures whereby an entity can apply to become an approved accreditation body. This

part also establishes requirements and general standards for accreditation bodies to ensure that practitioners are consistently evaluated for compliance with the Secretary's standards for opiate addiction treatment with an opioid agonist treatment medication.

§ 8.2 Definitions.

The following definitions apply to this part:

Accreditation means the process of review and acceptance by an accreditation body.

Accreditation body means a body that has been approved by SAMHSA under § 8.3 to accredit opioid treatment programs using opioid agonist treatment medications.

Accreditation body application means the application filed with SAMHSA for purposes of obtaining approval as an accreditation body, as described in § 8.3(b).

Accreditation elements mean the elements or standards that are developed and adopted by an accreditation body and approved by SAMHSA.

Accreditation survey means an onsite review and evaluation of an opioid treatment program by an accreditation body for the purpose of determining compliance with the Federal opioid treatment standards described in § 8.12.

Accredited opioid treatment program means an opioid treatment program that is the subject of a current, valid accreditation from an accreditation body approved by SAMHSA under § 8.3(d).

Certification means the process by which SAMHSA determines that an opioid treatment program is qualified to provide opioid treatment under the Federal opioid treatment standards.

Certification application means the application filed by an opioid treatment program for purposes of obtaining certification from SAMHSA, as described in § 8.11(b).

Certified opioid treatment program means an opioid treatment program that is the subject of a current, valid certification under § 8.11.

Comprehensive maintenance treatment is maintenance treatment provided in conjunction with a comprehensive range of appropriate medical and rehabilitative services.

Detoxification treatment means the dispensing of an opioid agonist treatment medication in decreasing doses to an individual to alleviate adverse physical or psychological effects incident to withdrawal from the continuous or sustained use of an opioid drug and as a method of bringing the individual to a drug-free state within such period.

Federal opioid treatment standards means the standards established by the Secretary in § 8.12 that are used to determine whether an opioid treatment program is qualified to engage in opioid treatment. The Federal opioid treatment standards established in § 8.12 also include the standards established by the Secretary regarding the quantities of opioid drugs which may be provided for unsupervised use.

For-cause inspection means an inspection of an opioid treatment program by the Secretary, or by an accreditation body, that may be operating in violation of Federal opioid treatment standards, may be providing substandard treatment, or may be serving as a possible source of diverted medications.

Interim maintenance treatment means maintenance treatment provided in conjunction with appropriate medical services while a patient is awaiting transfer to a program that provides comprehensive maintenance treatment.

Long-term detoxification treatment means detoxification treatment for a period more than 30 days but not in excess of 180 days.

Maintenance treatment means the dispensing of an opioid agonist treatment medication at stable dosage levels for a period in excess of 21 days in the treatment of an individual for opioid addiction.

Medical director means a physician, licensed to practice medicine in the jurisdiction in which the opioid treatment program is located, who assumes responsibility for administering all medical services performed by the program, either by performing them directly or by delegating specific responsibility to authorized program physicians and healthcare professionals functioning under the medical director's direct supervision.

Medical and rehabilitative services means services such as medical evaluations, counseling, and rehabilitative and other social programs (e.g., vocational and educational guidance, employment placement), that are intended to help patients in opioid treatment programs become and/or remain productive members of society.

Medication unit means a facility established as part of, but geographically separate from, an opioid treatment program from which licensed private practitioners or community pharmacists dispense or administer an opioid agonist treatment medication or collect samples for drug testing or analysis.

Opiate addiction is defined as a cluster of cognitive, behavioral, and physiological symptoms in which the

individual continues use of opiates despite significant opiate-induced problems. Opiate dependence is characterized by repeated self-administration that usually results in opiate tolerance, withdrawal symptoms, and compulsive drug-taking. Dependence may occur with or without the physiological symptoms of tolerance and withdrawal.

Opioid agonist treatment medication means any opioid agonist drug that is approved by the Food and Drug Administration under section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) for use in the treatment of opiate addiction.

Opioid drug means any drug having an addiction-forming or addiction-sustaining liability similar to morphine or being capable of conversion into a drug having such addiction-forming or addiction-sustaining liability.

Opioid treatment means the dispensing of an opioid agonist treatment medication, along with a comprehensive range of medical and rehabilitative services, when clinically necessary, to an individual to alleviate the adverse medical, psychological, or physical effects incident to opiate addiction. This term encompasses detoxification treatment, short-term detoxification treatment, long-term detoxification treatment, maintenance treatment, comprehensive maintenance treatment, and interim maintenance treatment.

Opioid treatment program or "OTP" means a program or practitioner engaged in opioid treatment of individuals with an opioid agonist treatment medication.

Patient means any individual who undergoes treatment in an opioid treatment program.

Program sponsor means the person named in the application for certification described in § 8.11(b) as responsible for the operation of the opioid treatment program and who assumes responsibility for all its employees, including any practitioners, agents, or other persons providing medical, rehabilitative, or counseling services at the program or any of its medication units. The program sponsor need not be a licensed physician but shall employ a licensed physician for the position of medical director.

Registered opioid treatment program means an opioid treatment program that is registered under 21 U.S.C. 823(g).

Short-term detoxification treatment means detoxification treatment for a period not in excess of 30 days.

State Authority is the agency designated by the Governor or other appropriate official designated by the

Governor to exercise the responsibility and authority within the State or Territory for governing the treatment of opiate addiction with an opioid drug.

Treatment plan means a plan that outlines for each patient attainable short-term treatment goals that are mutually acceptable to the patient and the opioid treatment program and which specifies the services to be provided and the frequency and schedule for their provision.

§ 8.3 Application for approval as an accreditation body.

(a) *Eligibility.* Private nonprofit organizations or State governmental entities, or political subdivisions thereof, capable of meeting the requirements of this part may apply for approval as an accreditation body.

(b) *Application for initial approval.* Three copies of an accreditation body application form [SMA-163] shall be submitted to SAMHSA at rm. 12-105, 5600 Fishers Lane, Rockville, MD 20857, and marked ATTENTION: OTP Certification Program. SAMHSA will consider and accept the electronic submission of these materials when electronic submission systems are developed and available. Accreditation body applications shall include the following information and supporting documentation:

(1) Name, address, and telephone number of the applicant and a responsible official for the accreditation body. The application shall be signed by the responsible official;

(2) Evidence of the nonprofit status of the applicant (*i.e.*, of fulfilling Internal Revenue Service requirements as a nonprofit organization) if the applicant is not a State governmental entity or political subdivision;

(3) A set of the accreditation elements or standards and a detailed discussion showing how the proposed accreditation elements or standards will ensure that each OTP surveyed by the applicant is qualified to meet or is meeting each of the Federal opioid treatment standards set forth in § 8.12;

(4) A detailed description of the applicant's decisionmaking process, including:

(i) Procedures for initiating and performing onsite accreditation surveys of OTPs;

(ii) Procedures for assessing OTP personnel qualifications;

(iii) Copies of an application for accreditation, guidelines, instructions, and other materials the applicant will send to OTPs during the accreditation process, including a request for a complete history of prior accreditation activities and a statement that all

information and data submitted in the application for accreditation is true and accurate, and that no material fact has been omitted;

(iv) Policies and procedures for notifying OTPs and SAMHSA of deficiencies and for monitoring corrections of deficiencies by OTPs;

(v) Policies and procedures for suspending or revoking an OTP's accreditation;

(vi) Policies and procedures that will ensure processing of applications for accreditation and applications for renewal of accreditation within a timeframe approved by SAMHSA; and

(vii) A description of the applicant's appeals process to allow OTPs to contest adverse accreditation decisions.

(5) Policies and procedures established by the accreditation body to avoid conflicts of interest, or the appearance of conflicts of interest, by the applicant's board members, commissioners, professional personnel, consultants, administrative personnel, and other representatives;

(6) A description of the education, experience, and training requirements for the applicant's professional staff, accreditation survey team membership, and the identification of at least one licensed physician on the applicant's staff;

(7) A description of the applicant's training policies;

(8) Fee schedules, with supporting cost data;

(9) Satisfactory assurances that the body will comply with the requirements of § 8.4, including a contingency plan for investigating complaints under § 8.4(e);

(10) Policies and procedures established to protect confidential information the applicant will collect or receive in its role as an accreditation body; and

(11) Any other information SAMHSA may require.

(c) *Application for renewal of approval.* An accreditation body that intends to continue to serve as an accreditation body beyond its current term shall apply to SAMHSA for renewal, or notify SAMHSA of its intention not to apply for renewal, in accordance with the following procedures and schedule:

(1) At least 9 months before the date of expiration of an accreditation body's term of approval, the body shall inform SAMHSA in writing of its intent to seek renewal.

(2) SAMHSA will notify the applicant of the relevant information, materials, and supporting documentation required under paragraph (b) of this section that

the applicant shall submit as part of the renewal procedure.

(3) At least 3 months before the date of expiration of the accreditation body's term of approval, the applicant shall furnish to SAMHSA three copies of a renewal application containing the information, materials, and supporting documentation requested by SAMHSA under paragraph (c)(2) of this section.

(4) An accreditation body that does not intend to renew its approval shall so notify SAMHSA at least 9 months before the expiration of the body's term of approval.

(d) *Rulings on applications for initial approval or renewal of approval.* (1) SAMHSA will grant an application for initial approval or an application for renewal of approval if it determines the applicant substantially meets the accreditation body requirements of this subpart.

(2) If SAMHSA determines that the applicant does not substantially meet the requirements set forth in this subpart, SAMHSA will notify the applicant of the deficiencies in the application and request that the applicant resolve such deficiencies within 90 days of receipt of the notice. If the deficiencies are resolved to the satisfaction of SAMHSA within the 90-day time period, the body will be approved as an accreditation body. If the deficiencies have not been resolved to the satisfaction of SAMHSA within the 90-day time period, the application for approval as an accreditation body will be denied.

(3) If SAMHSA does not reach a final decision on a renewal application before the expiration of an accreditation body's term of approval, the approval will be deemed extended until SAMHSA reaches a final decision, unless an accreditation body does not rectify deficiencies in the application within the specified time period, as required in paragraph (d)(2) of this section.

(e) *Relinquishment of approval.* An accreditation body that intends to relinquish its accreditation approval before expiration of the body's term of approval shall submit a letter of such intent to SAMHSA, at the address in paragraph (b) of this section, at least 9 months before relinquishing such approval.

(f) *Notification.* An accreditation body that does not apply for renewal of approval, or is denied such approval by SAMHSA, relinquishes its accreditation approval before expiration of its term of approval, or has its approval withdrawn, shall:

(1) Transfer copies of records and other related information as required by SAMHSA to a location, including

another accreditation body, and according to a schedule approved by SAMHSA; and

(2) Notify, in a manner and time period approved by SAMHSA, all OTPs accredited or seeking accreditation by the body that the body will no longer have approval to provide accreditation services.

(g) *Term of approval.* An accreditation body's term of approval is for a period not to exceed 5 years.

(h) *State accreditation bodies.* State governmental entities, including political subdivisions thereof, may establish organizational units that may act as accreditation bodies, provided such units meet the requirements of this section, are approved by SAMHSA under this section, and have taken appropriate measures to prevent actual or apparent conflicts of interest, including cases in which State or Federal funds are used to support opioid treatment services.

§ 8.4 Accreditation body responsibilities.

(a) *Accreditation surveys and for cause inspections.* (1) Accreditation bodies shall conduct routine accreditation surveys for initial, renewal, and continued accreditation of each OTP at least every 3 years.

(2) Accreditation bodies must agree to conduct for-cause inspections upon the request of SAMHSA.

(3) Accreditation decisions shall be fully consistent with the policies and procedures submitted as part of the approved accreditation body application.

(b) *Response to noncompliant programs.* (1) If an accreditation body receives or discovers information that suggests that an OTP is not meeting Federal opioid treatment standards, or if survey of the OTP by the accreditation body otherwise demonstrates one or more deficiencies in the OTP, the accreditation body shall as appropriate either require and monitor corrective action or shall suspend or revoke accreditation of the OTP, as appropriate based on the significance of the deficiencies.

(i) Accreditation bodies shall either not accredit or shall revoke the accreditation of any OTP that substantially fails to meet the Federal opioid treatment standards.

(ii) Accreditation bodies shall notify SAMHSA as soon as possible but in no case longer than 48 hours after becoming aware of any practice or condition in an OTP that may pose a serious risk to public health or safety or patient care.

(iii) If an accreditation body determines that an OTP is substantially

meeting the Federal opioid treatment standards, but is not meeting one or more accreditation elements, the accreditation body shall determine the necessary corrective measures to be taken by the OTP, establish a schedule for implementation of such measures, and notify the OTP in writing that it must implement such measures within the specified schedule in order to ensure continued accreditation. The accreditation body shall verify that the necessary steps are taken by the OTP within the schedule specified and that all accreditation elements are being substantially met or will be substantially met.

(2) Nothing in this part shall prevent accreditation bodies from granting accreditation, contingent on promised programmatic or performance changes, to OTPs with less substantial violations. Such accreditation shall not exceed 12 months. OTPs that have been granted such accreditation must have their accreditation revoked if they fail to make changes to receive unconditional accreditation upon resurvey or reinspection.

(c) *Recordkeeping.* (1) Accreditation bodies shall maintain records of their accreditation activities for at least 5 years from the creation of the record. Such records must contain sufficient detail to support each accreditation decision made by the accreditation body.

(2) Accreditation bodies shall establish procedures to protect confidential information collected or received in their role as accreditation bodies that are consistent with, and that are designed to ensure compliance with, all Federal and State laws, including 42 CFR part 2.

(i) Information collected or received for the purpose of carrying out accreditation body responsibilities shall not be used for any other purpose or disclosed, other than to SAMHSA or its duly designated representatives, unless otherwise required by law or with the consent of the OTP.

(ii) Nonpublic information that SAMHSA shares with the accreditation body concerning an OTP shall not be further disclosed except with the written permission of SAMHSA.

(d) *Reporting.* (1) Accreditation bodies shall provide to SAMHSA any documents and information requested by SAMHSA within 5 days of receipt of the request.

(2) Accreditation bodies shall make a summary of the results of each accreditation survey available to SAMHSA upon request. Such summaries shall contain sufficient

detail to justify the accreditation action taken.

(3) Accreditation bodies shall provide SAMHSA upon request a list of each OTP surveyed and the identity of all individuals involved in the conduct and reporting of survey results.

(4) Accreditation bodies shall submit to SAMHSA the name of each OTP for which the accreditation body accredits conditionally, denies, suspends, or revokes accreditation, and the basis for the action, within 48 hours of the action.

(5) Notwithstanding any reports made to SAMHSA under paragraphs (d)(1) through (d)(4) of this section, each accreditation body shall submit to SAMHSA semiannually, on January 15 and July 15 of each calendar year, a report consisting of a summary of the results of each accreditation survey conducted in the past year. The summary shall contain sufficient detail to justify each accreditation action taken.

(6) All reporting requirements listed in this section shall be provided to SAMHSA at the address specified in § 8.3(b).

(e) *Complaint response.* Accreditation bodies shall have policies and procedures to respond to complaints from SAMHSA, patients, facility staff, and others, within a reasonable period of time but not more than 5 days of the receipt of the complaint. Accreditation bodies shall also agree to notify SAMHSA within 48 hours of receipt of a complaint and keep SAMHSA informed of all aspects of the response to the complaint.

(f) *Modifications of accreditation elements.* Accreditation bodies shall obtain SAMHSA's authorization prior to making any substantive (*i.e.*, noneditorial) change in accreditation elements.

(g) *Conflicts of interest.* The accreditation body shall maintain and apply policies and procedures that SAMHSA has approved in accordance with § 8.3 to reduce the possibility of actual conflict of interest, or the appearance of a conflict of interest, on the part of individuals who act on behalf of the accreditation body. Individuals who participate in accreditation surveys or otherwise participate in the accreditation decision or an appeal of the accreditation decision, as well as their spouses and minor children, shall not have a financial interest in the OTP that is the subject of the accreditation survey or decision.

(h) *Accreditation teams.* (1) An accreditation body survey team shall consist of healthcare professionals with

expertise in drug abuse treatment and, in particular, opioid treatment. The accreditation body shall consider factors such as the size of the OTP, the anticipated number of problems, and the OTP's accreditation history, in determining the composition of the team. At a minimum, survey teams shall consist of at least two healthcare professionals whose combined expertise includes:

(i) The dispensing and administration of drugs subject to control under the Controlled Substances Act (21 U.S.C. 801 *et seq.*);

(ii) Medical issues relating to the dosing and administration of opioid agonist treatment medications for the treatment of opioid addiction;

(iii) Psychosocial counseling of individuals undergoing opioid treatment; and

(iv) Organizational and administrative issues associated with opioid treatment programs.

(2) Members of the accreditation team must be able to recuse themselves at any time from any survey in which either they or the OTP believes there is an actual conflict of interest or the appearance of a conflict of interest.

(i) *Accreditation fees.* Fees charged to OTPs for accreditation shall be reasonable. SAMHSA generally will find fees to be reasonable if the fees are limited to recovering costs to the accreditation body, including overhead incurred. Accreditation body activities that are not related to accreditation functions are not recoverable through fees established for accreditation.

(1) The accreditation body shall make public its fee structure, including those factors, if any, contributing to variations in fees for different OTPs.

(2) At SAMHSA's request, accreditation bodies shall provide to SAMHSA financial records or other materials, in a manner specified by SAMHSA, to assist in assessing the reasonableness of accreditation body fees.

§ 8.5 Periodic evaluation of accreditation bodies.

SAMHSA will evaluate periodically the performance of accreditation bodies primarily by inspecting a selected sample of the OTPs accredited by the accrediting body and by evaluating the accreditation body's reports of surveys conducted, to determine whether the OTPs surveyed and accredited by the accreditation body are in compliance with the Federal opioid treatment standards. The evaluation will include a determination of whether there are major deficiencies in the accreditation body's performance that, if not

corrected, would warrant withdrawal of the approval of the accreditation body under § 8.6.

§ 8.6 Withdrawal of approval of accreditation bodies.

If SAMHSA determines that an accreditation body is not in substantial compliance with this subpart, SAMHSA shall take appropriate action as follows:

(a) *Major deficiencies.* If SAMHSA determines that the accreditation body has a major deficiency, such as commission of fraud, material false statement, failure to perform a major accreditation function satisfactorily, or significant noncompliance with the requirements of this subpart, SAMHSA shall withdraw approval of that accreditation body.

(1) In the event of a major deficiency, SAMHSA shall notify the accreditation body of the agency's action and the grounds on which the approval was withdrawn.

(2) An accreditation body that has lost its approval shall notify each OTP that has been accredited or is seeking accreditation that the accreditation body's approval has been withdrawn. Such notification shall be made within a time period and in a manner approved by SAMHSA.

(b) *Minor deficiencies.* If SAMHSA determines that the accreditation body has minor deficiencies in the performance of an accreditation function, that are less serious or more limited than the types of deficiencies described in paragraph (a) of this section, SAMHSA will notify the body that it has 90 days to submit to SAMHSA a plan of corrective action. The plan must include a summary of corrective actions and a schedule for their implementation. SAMHSA may place the body on probationary status for a period of time determined by SAMHSA, or may withdraw approval of the body if corrective action is not taken.

(1) If SAMHSA places an accreditation body on probationary status, the body shall notify all OTPs that have been accredited, or that are seeking accreditation, of the accreditation body's probationary status within a time period and in a manner approved by SAMHSA.

(2) Probationary status will remain in effect until such time as the body can demonstrate to the satisfaction of SAMHSA that it has successfully implemented or is implementing the corrective action plan within the established schedule, and the corrective actions taken have substantially eliminated all identified problems.

(3) If SAMHSA determines that an accreditation body that has been placed on probationary status is not implementing corrective actions satisfactorily or within the established schedule, SAMHSA may withdraw approval of the accreditation body. The accreditation body shall notify all OTPs that have been accredited, or are seeking accreditation, of the accreditation body's loss of SAMHSA approval within a time period and in a manner approved by SAMHSA.

(c) *Reapplication.* (1) An accreditation body that has had its approval withdrawn may submit a new application for approval if the body can provide information to SAMHSA to establish that the problems that were grounds for withdrawal of approval have been resolved.

(2) If SAMHSA determines that the new application demonstrates that the body satisfactorily has addressed the causes of its previous unacceptable performance, SAMHSA may reinstate approval of the accreditation body.

(3) SAMHSA may request additional information or establish additional conditions that must be met before SAMHSA approves the reapplication.

(4) SAMHSA may refuse to accept an application from a former accreditation body whose approval was withdrawn because of fraud, material false statement, or willful disregard of public health.

(d) *Hearings.* An opportunity to challenge an adverse action taken regarding withdrawal of approval of an accreditation body shall be addressed through the relevant procedures set forth in subpart C of this part, except that the procedures in § 8.28 for expedited review of an immediate suspension would not apply to an accreditation body that has been notified under paragraph (a) or (b) of this section of the withdrawal of its approval.

Subpart B—Certification and Treatment Standards

§ 8.11 Opioid treatment program certification.

(a) *General.* (1) An OTP must be the subject of a current, valid certification from SAMHSA to be considered qualified by the Secretary under section 303(g)(1) of the Controlled Substances Act (21 U.S.C. 823(g)(1)) to dispense opioid drugs in the treatment of opioid addiction. An OTP must be determined to be qualified under section 303(g)(1) of the Controlled Substances Act, and must be determined to be qualified by the Attorney General under section 303(g)(1), to be registered by the

Attorney General to dispense opioid agonist treatment medications to individuals for treatment of opioid addiction.

(2) To obtain certification from SAMHSA, an OTP must meet the Federal opioid treatment standards in § 8.12, must be the subject of a current, valid accreditation by an accreditation body or other entity designated by SAMHSA, and must comply with any other conditions for certification established by SAMHSA.

(3) Certification shall be granted for a term not to exceed 3 years, except that certification may be extended during the third year if an application for accreditation is pending.

(b) *Application for certification.* Three copies of an application for certification must be submitted by the OTP to the address identified in § 8.3(b). SAMHSA will consider and accept the electronic submission of these materials when electronic submission systems are developed and available. The application for certification shall include:

(1) A description of the current accreditation status of the OTP;

(2) A description of the organizational structure of the OTP;

(3) The names of the persons responsible for the OTP;

(4) The addresses of the OTP and of each medication unit or other facility under the control of the OTP;

(5) The sources of funding for the OTP and the name and address of each governmental entity that provides such funding; and

(6) A statement that the OTP will comply with the conditions of certification set forth in paragraph (f) of this section.

(7) The application shall be signed by the program sponsor who shall certify that the information submitted in the application is truthful and accurate.

(c) *Action on application.* (1) Following SAMHSA's receipt of an application for certification of an OTP, and after consultation with the appropriate State authority regarding the qualifications of the applicant, SAMHSA may grant the application for certification, or renew an existing certification, if SAMHSA determines that the OTP has satisfied the requirements for certification or renewal of certification.

(2) SAMHSA may deny the application if SAMHSA determines that:

(i) The application for certification is deficient in any respect;

(ii) The OTP will not be operated in accordance with the Federal opioid treatment standards established under § 8.12;

(iii) The OTP will not permit an inspection or a survey to proceed, or will not permit in a timely manner access to relevant records or information; or

(iv) The OTP has made misrepresentations in obtaining accreditation or in applying for certification.

(3) Within 5 days after it reaches a final determination that an OTP meets the requirements for certification, SAMHSA will notify the Drug Enforcement Administration (DEA) that the OTP has been determined to be qualified to provide opioid treatment under section 303(g)(1) of the Controlled Substances Act.

(d) *Transitional certification.* OTPs that before March 19, 2001 were the subject of a current, valid approval by FDA under 21 CFR, part 291 (contained in the 21 CFR Parts 200 to 299 edition, revised as of July 1, 2000), are deemed to be the subject of a current valid certification for purposes of paragraph (a)(11) of this section. Such 'transitional certification' will expire on June 18, 2001 unless the OTP submits the information required by paragraph (b) of this section to SAMHSA on or before June 18, 2001. In addition to this application, OTPs must certify with a written statement signed by the program sponsor, that they will apply for accreditation within 90 days of the date SAMHSA approves the second accreditation body. Transitional certification, in that case, will expire on March 19, 2003. SAMHSA may extend the transitional certification of an OTP for up to one additional year provided the OTP demonstrates that it has applied for accreditation, that an accreditation survey has taken place or is scheduled to take place, and that an accreditation decision is expected within a reasonable period of time (e.g., within 90 days from the date of survey). Transitional certification under this section may be suspended or revoked in accordance with § 8.14.

(e) *Provisional certification.* (1) OTPs that have no current certification from SAMHSA, but have applied for accreditation with an accreditation body, are eligible to receive a provisional certification for up to 1 year. To receive a provisional certification, an OTP shall submit the information required by paragraph (b) of this section to SAMHSA along with a statement identifying the accreditation body to which the OTP has applied for accreditation, the date on which the OTP applied for accreditation, the dates of any accreditation surveys that have taken place or are expected to take place, and the expected schedule for

completing the accreditation process. A provisional certification for up to 1 year will be granted, following receipt of the information described in this paragraph, unless SAMHSA determines that patient health would be adversely affected by the granting of provisional certification.

(2) An extension of provisional certification may be granted in extraordinary circumstances or otherwise to protect public health. To apply for a 90-day extension of provisional certification, an OTP shall submit to SAMHSA a statement explaining its efforts to obtain accreditation and a schedule for obtaining accreditation as expeditiously as possible.

(f) *Conditions for certification.* (1) OTPs shall comply with all pertinent State laws and regulations. Nothing in this part is intended to limit the authority of State and, as appropriate, local governmental entities to regulate the use of opioid drugs in the treatment of opioid addiction. The provisions of this section requiring compliance with requirements imposed by State law, or the submission of applications or reports required by the State authority, do not apply to OTPs operated directly by the Department of Veterans Affairs, the Indian Health Service, or any other department or agency of the United States. Federal agencies operating OTPs have agreed to cooperate voluntarily with State agencies by granting permission on an informal basis for designated State representatives to visit Federal OTPs and by furnishing a copy of Federal reports to the State authority, including the reports required under this section.

(2) OTPs shall allow, in accordance with Federal controlled substances laws and Federal confidentiality laws, inspections and surveys by duly authorized employees of SAMHSA, by accreditation bodies, by the DEA, and by authorized employees of any relevant State or Federal governmental authority.

(3) Disclosure of patient records maintained by an OTP is governed by the provisions of 42 CFR part 2, and every program must comply with that part. Records on the receipt, storage, and distribution of opioid agonist treatment medications are also subject to inspection under Federal controlled substances laws and under the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321 et seq.). Federally-sponsored treatment programs are subject to applicable Federal confidentiality statutes.

(4) A treatment program or medication unit or any part thereof, including any facility or any individual, shall permit a duly authorized employee

of SAMHSA to have access to and to copy all records on the use of opioid drugs in accordance with the provisions of 42 CFR part 2.

(5) OTPs shall notify SAMHSA within 3 weeks of any replacement or other change in the status of the program sponsor or medical director.

(6) OTPs shall comply with all regulations enforced by the DEA under 21 CFR chapter II, and must be registered by the DEA before administering or dispensing opioid agonist treatment medications.

(7) OTPs must operate in accordance with Federal opioid treatment standards and approved accreditation elements.

(g) *Conditions for interim maintenance treatment program approval.* (1) Before a public or nonprofit private OTP may provide interim maintenance treatment, the program must receive the approval of both SAMHSA and the chief public health officer of the State in which the OTP operates.

(2) Before SAMHSA may grant such approval, the OTP must provide SAMHSA with documentation from the chief public health officer of the State in which the OTP operates demonstrating that:

(i) Such officer does not object to the providing of interim maintenance treatment in the State;

(ii) The OTP seeking to provide such treatment is unable to place patients in a public or nonprofit private comprehensive treatment program within a reasonable geographic area within 14 days of the time patients seek admission to such programs;

(iii) The authorization of the OTP to provide interim maintenance treatment will not otherwise reduce the capacity of comprehensive maintenance treatment programs in the State to admit individuals (relative to the date on which such officer so certifies); and

(iv) The State certifies that each individual enrolled in interim maintenance treatment will be transferred to a comprehensive maintenance treatment program no later than 120 days from the date on which each individual first requested treatment, as provided in section 1923 of the Public Health Service Act (21 U.S.C. 300x-23).

(3) SAMHSA will provide notice to the OTP denying or approving the request to provide interim maintenance treatment. The OTP shall not provide such treatment until it has received such notice from SAMHSA.

(h) *Exemptions.* An OTP may, at the time of application for certification or any time thereafter, request from SAMHSA exemption from the

regulatory requirements set forth under this section and § 8.12. An example of a case in which an exemption might be granted would be for a private practitioner who wishes to treat a limited number of patients in a non-metropolitan area with few physicians and no rehabilitative services geographically accessible and requests exemption from some of the staffing and service standards. The OTP shall support the rationale for the exemption with thorough documentation, to be supplied in an appendix to the initial application for certification or in a separate submission. SAMHSA will approve or deny such exemptions at the time of application, or any time thereafter, if appropriate. SAMHSA shall consult with the appropriate State authority prior to taking action on an exemption request.

(i) *Medication units, long-term care facilities and hospitals.* (1) Certified OTPs may establish medication units that are authorized to dispense opioid agonist treatment medications for observed ingestion. Before establishing a medication unit, a certified OTP must notify SAMHSA by submitting form SMA-162. The OTP must also comply with the provisions of 21 CFR part 1300 before establishing a medication unit. Medication units shall comply with all pertinent state laws and regulations.

(2) Certification as an OTP under this part will not be required for the maintenance or detoxification treatment of a patient who is admitted to a hospital or long-term care facility for the treatment of medical conditions other than opiate addiction and who requires maintenance or detoxification treatment during the period of his or her stay in that hospital or long-term care facility. The terms "hospital" and "long-term care facility" as used in this section are to have the meaning that is assigned under the law of the State in which the treatment is being provided. Nothing in this section is intended to relieve hospitals and long-term care facilities from the obligation to obtain registration from the Attorney General, as appropriate, under section 303(g) of the Controlled Substances Act.

§ 8.12 Federal opioid treatment standards.

(a) *General.* OTPs must provide treatment in accordance with the standards in this section and must comply with these standards as a condition of certification.

(b) *Administrative and organizational structure.* An OTP's organizational structure and facilities shall be adequate to ensure quality patient care and to meet the requirements of all pertinent Federal, State, and local laws and

regulations. At a minimum, each OTP shall formally designate a program sponsor and medical director. The program sponsor shall agree on behalf of the OTP to adhere to all requirements set forth in this part and any regulations regarding the use of opioid agonist treatment medications in the treatment of opioid addiction which may be promulgated in the future. The medical director shall assume responsibility for administering all medical services performed by the OTP. In addition, the medical director shall be responsible for ensuring that the OTP is in compliance with all applicable Federal, State, and local laws and regulations.

(c) *Continuous quality improvement.* (1) An OTP must maintain current quality assurance and quality control plans that include, among other things, annual reviews of program policies and procedures and ongoing assessment of patient outcomes.

(2) An OTP must maintain a current "Diversion Control Plan" or "DCP" as part of its quality assurance program that contains specific measures to reduce the possibility of diversion of controlled substances from legitimate treatment use and that assigns specific responsibility to the medical and administrative staff of the OTP for carrying out the diversion control measures and functions described in the DCP.

(d) *Staff credentials.* Each person engaged in the treatment of opioid addiction must have sufficient education, training, and experience, or any combination thereof, to enable that person to perform the assigned functions. All physicians, nurses, and other licensed professional care providers, including addiction counselors, must comply with the credentialing requirements of their respective professions.

(e) *Patient admission criteria.*—(1) *Maintenance treatment.* An OTP shall maintain current procedures designed to ensure that patients are admitted to maintenance treatment by qualified personnel who have determined, using accepted medical criteria such as those listed in the Diagnostic and Statistical Manual for Mental Disorders (DSM-IV), that the person is currently addicted to an opioid drug, and that the person became addicted at least 1 year before admission for treatment. In addition, a program physician shall ensure that each patient voluntarily chooses maintenance treatment and that all relevant facts concerning the use of the opioid drug are clearly and adequately explained to the patient, and that each patient provides informed written consent to treatment.

(2) Maintenance treatment for persons under age 18. A person under 18 years of age is required to have had two documented unsuccessful attempts at short-term detoxification or drug-free treatment within a 12-month period to be eligible for maintenance treatment. No person under 18 years of age may be admitted to maintenance treatment unless a parent, legal guardian, or responsible adult designated by the relevant State authority consents in writing to such treatment.

(3) Maintenance treatment admission exceptions. If clinically appropriate, the program physician may waive the requirement of a 1-year history of addiction under paragraph (e)(1) of this section, for patients released from penal institutions (within 6 months after release), for pregnant patients (program physician must certify pregnancy), and for previously treated patients (up to 2 years after discharge).

(4) Detoxification treatment. An OTP shall maintain current procedures that are designed to ensure that patients are admitted to short- or long-term detoxification treatment by qualified personnel, such as a program physician, who determines that such treatment is appropriate for the specific patient by applying established diagnostic criteria. Patients with two or more unsuccessful detoxification episodes within a 12-month period must be assessed by the OTP physician for other forms of treatment. A program shall not admit a patient for more than two detoxification treatment episodes in one year.

(f) *Required services.*—(1) General. OTPs shall provide adequate medical, counseling, vocational, educational, and other assessment and treatment services. These services must be available at the primary facility, except where the program sponsor has entered into a formal, documented agreement with a private or public agency, organization, practitioner, or institution to provide these services to patients enrolled in the OTP. The program sponsor, in any event, must be able to document that these services are fully and reasonably available to patients.

(2) Initial medical examination services. OTPs shall require each patient to undergo a complete, fully documented physical evaluation by a program physician or a primary care physician, or an authorized healthcare professional under the supervision of a program physician, before admission to the OTP. The full medical examination, including the results of serology and other tests, must be completed within 14 days following admission.

(3) Special services for pregnant patients. OTPs must maintain current

policies and procedures that reflect the special needs of patients who are pregnant. Prenatal care and other gender specific services or pregnant patients must be provided either by the OTP or by referral to appropriate healthcare providers.

(4) Initial and periodic assessment services. Each patient accepted for treatment at an OTP shall be assessed initially and periodically by qualified personnel to determine the most appropriate combination of services and treatment. The initial assessment must include preparation of a treatment plan that includes the patient's short-term goals and the tasks the patient must perform to complete the short-term goals; the patient's requirements for education, vocational rehabilitation, and employment; and the medical, psychosocial, economic, legal, or other supportive services that a patient needs. The treatment plan also must identify the frequency with which these services are to be provided. The plan must be reviewed and updated to reflect that patient's personal history, his or her current needs for medical, social, and psychological services, and his or her current needs for education, vocational rehabilitation, and employment services.

(5) Counseling services. (i) OTPs must provide adequate substance abuse counseling to each patient as clinically necessary. This counseling shall be provided by a program counselor, qualified by education, training, or experience to assess the psychological and sociological background of patients, to contribute to the appropriate treatment plan for the patient and to monitor patient progress.

(ii) OTPs must provide counseling on preventing exposure to, and the transmission of, human immunodeficiency virus (HIV) disease for each patient admitted or readmitted to maintenance or detoxification treatment.

(iii) OTPs must provide directly, or through referral to adequate and reasonably accessible community resources, vocational rehabilitation, education, and employment services for patients who either request such services or who have been determined by the program staff to be in need of such services.

(6) Drug abuse testing services. OTPs must provide adequate testing or analysis for drugs of abuse, including at least eight random drug abuse tests per year, per patient in maintenance treatment, in accordance with generally accepted clinical practice. For patients in short-term detoxification treatment, the OTP shall perform at least one

initial drug abuse test. For patients receiving long-term detoxification treatment, the program shall perform initial and monthly random tests on each patient.

(g) *Recordkeeping and patient confidentiality.* (1) OTPs shall establish and maintain a recordkeeping system that is adequate to document and monitor patient care. This system is required to comply with all Federal and State reporting requirements relevant to opioid drugs approved for use in treatment of opioid addiction. All records are required to be kept confidential in accordance with all applicable Federal and State requirements.

(2) OTPs shall include, as an essential part of the recordkeeping system, documentation in each patient's record that the OTP made a good faith effort to review whether or not the patient is enrolled any other OTP. A patient enrolled in an OTP shall not be permitted to obtain treatment in any other OTP except in exceptional circumstances. If the medical director or program physician of the OTP in which the patient is enrolled determines that such exceptional circumstances exist, the patient may be granted permission to seek treatment at another OTP, provided the justification for finding exceptional circumstances is noted in the patient's record both at the OTP in which the patient is enrolled and at the OTP that will provide the treatment.

(h) *Medication administration, dispensing, and use.* (1) OTPs must ensure that opioid agonist treatment medications are administered or dispensed only by a practitioner licensed under the appropriate State law and registered under the appropriate State and Federal laws to administer or dispense opioid drugs, or by an agent of such a practitioner, supervised by and under the order of the licensed practitioner. This agent is required to be a pharmacist, registered nurse, or licensed practical nurse, or any other healthcare professional authorized by Federal and State law to administer or dispense opioid drugs.

(2) OTPs shall use only those opioid agonist treatment medications that are approved by the Food and Drug Administration under section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) for use in the treatment of opioid addiction. In addition, OTPs who are fully compliant with the protocol of an investigational use of a drug and other conditions set forth in the application may administer a drug that has been authorized by the Food and Drug Administration under an investigational new drug application

under section 505(i) of the Federal Food, Drug, and Cosmetic Act for investigational use in the treatment of opioid addiction. Currently the following opioid agonist treatment medications will be considered to be approved by the Food and Drug Administration for use in the treatment of opioid addiction:

(i) Methadone; and

(ii) Levomethadyl acetate (LAAM).

(3) OTPs shall maintain current procedures that are adequate to ensure that the following dosage form and initial dosing requirements are met:

(i) Methadone shall be administered or dispensed only in oral form and shall be formulated in such a way as to reduce its potential for parenteral abuse.

(ii) For each new patient enrolled in a program, the initial dose of methadone shall not exceed 30 milligrams and the total dose for the first day shall not exceed 40 milligrams, unless the program physician documents in the patient's record that 40 milligrams did not suppress opiate abstinence symptoms.

(4) OTPs shall maintain current procedures adequate to ensure that each opioid agonist treatment medication used by the program is administered and dispensed in accordance with its approved product labeling. Dosing and administration decisions shall be made by a program physician familiar with the most up-to-date product labeling. These procedures must ensure that any significant deviations from the approved labeling, including deviations with regard to dose, frequency, or the conditions of use described in the approved labeling, are specifically documented in the patient's record.

(i) Unsupervised or "take-home" use. To limit the potential for diversion of opioid agonist treatment medications to the illicit market, opioid agonist treatment medications dispensed to patients for unsupervised use shall be subject to the following requirements.

(1) Any patient in comprehensive maintenance treatment may receive a single take-home dose for a day that the clinic is closed for business, including Sundays and State and Federal holidays.

(2) Treatment program decisions on dispensing opioid treatment medications to patients for unsupervised use beyond that set forth in paragraph (i)(1) of this section, shall be determined by the medical director. In determining which patients may be permitted unsupervised use, the medical director shall consider the following take-home criteria in determining whether a patient is

responsible in handling opioid drugs for unsupervised use.

(i) Absence of recent abuse of drugs (opioid or nonnarcotic), including alcohol;

(ii) Regularity of clinic attendance;

(iii) Absence of serious behavioral problems at the clinic;

(iv) Absence of known recent criminal activity, e.g., drug dealing;

(v) Stability of the patient's home environment and social relationships;

(vi) Length of time in comprehensive maintenance treatment;

(vii) Assurance that take-home medication can be safely stored within the patient's home; and

(viii) Whether the rehabilitative benefit the patient derived from decreasing the frequency of clinic attendance outweighs the potential risks of diversion.

(3) Such determinations and the basis for such determinations consistent with the criteria outlined in paragraph (i)(2) of this section shall be documented in the patient's medical record. If it is determined that a patient is responsible in handling opioid drugs, the following restrictions apply:

(i) During the first 90 days of treatment, the take-home supply (beyond that of paragraph (i)(1) of this section) is limited to a single dose each week and the patient shall ingest all other doses under appropriate supervision as provided for under the regulations in this subpart.

(ii) In the second 90 days of treatment, the take-home supply (beyond that of paragraph (i)(1) of this section) is two doses per week.

(iii) In the third 90 days of treatment, the take-home supply (beyond that of paragraph (i)(1) of this section) is three doses per week.

(iv) In the remaining months of the first year, a patient may be given a maximum 6-day supply of take-home medication.

(v) After 1 year of continuous treatment, a patient may be given a maximum 2-week supply of take-home medication.

(vi) After 2 years of continuous treatment, a patient may be given a maximum one-month supply of take-home medication, but must make monthly visits.

(4) No medications shall be dispensed to patients in short-term detoxification treatment or interim maintenance treatment for unsupervised or take-home use.

(5) OTPs must maintain current procedures adequate to identify the theft or diversion of take-home medications, including labeling containers with the OTP's name, address, and telephone

number. Programs also must ensure that take-home supplies are packaged in a manner that is designed to reduce the risk of accidental ingestion, including child-proof containers (see Poison Prevention Packaging Act, Public Law 91-601 (15 U.S.C. 1471 *et seq.*)).

(j) *Interim maintenance treatment.* (1) The program sponsor of a public or nonprofit private OTP may place an individual, who is eligible for admission to comprehensive maintenance treatment, in interim maintenance treatment if the individual cannot be placed in a public or nonprofit private comprehensive program within a reasonable geographic area and within 14 days of the individual's application for admission to comprehensive maintenance treatment. An initial and at least two other urine screens shall be taken from interim patients during the maximum of 120 days permitted for such treatment. A program shall establish and follow reasonable criteria for establishing priorities for transferring patients from interim maintenance to comprehensive maintenance treatment. These transfer criteria shall be in writing and shall include, at a minimum, a preference for pregnant women in admitting patients to interim maintenance and in transferring patients from interim maintenance to comprehensive maintenance treatment. Interim maintenance shall be provided in a manner consistent with all applicable Federal and State laws, including sections 1923, 1927(a), and 1976 of the Public Health Service Act (21 U.S.C. 300x-23, 300x-27(a), and 300y-11).

(2) The program shall notify the State health officer when a patient begins interim maintenance treatment, when a patient leaves interim maintenance treatment, and before the date of mandatory transfer to a comprehensive program, and shall document such notifications.

(3) SAMHSA may revoke the interim maintenance authorization for programs that fail to comply with the provisions of this paragraph (j). Likewise, SAMHSA will consider revoking the interim maintenance authorization of a program if the State in which the program operates is not in compliance with the provisions of § 8.11(g).

(4) All requirements for comprehensive maintenance treatment apply to interim maintenance treatment with the following exceptions:

(i) The opioid agonist treatment medication is required to be administered daily under observation;

(ii) Unsupervised or "take-home" use is not allowed;

(iii) An initial treatment plan and periodic treatment plan evaluations are not required;

(iv) A primary counselor is not required to be assigned to the patient;

(v) Interim maintenance cannot be provided for longer than 120 days in any 12-month period; and

(vi) Rehabilitative, education, and other counseling services described in paragraphs (f)(4), (f)(5)(i), and (f)(5)(iii) of this section are not required to be provided to the patient.

§ 8.13 Revocation of accreditation and accreditation body approval.

(a) *SAMHSA action following revocation of accreditation.* If an accreditation body revokes an OTP's accreditation, SAMHSA may conduct an investigation into the reasons for the revocation. Following such investigation, SAMHSA may determine that the OTP's certification should no longer be in effect, at which time SAMHSA will initiate procedures to revoke the facility's certification in accordance with § 8.14. Alternatively, SAMHSA may determine that another action or combination of actions would better serve the public health, including the establishment and implementation of a corrective plan of action that will permit the certification to continue in effect while the OTP seeks reaccreditation.

(b) *Accreditation body approval.* (1) If SAMHSA withdraws the approval of an accreditation body under § 8.6, the certifications of OTPs accredited by such body shall remain in effect for a period of 1 year after the date of withdrawal of approval of the accreditation body, unless SAMHSA determines that to protect public health or safety, or because the accreditation body fraudulently accredited treatment programs, the certifications of some or all of the programs should be revoked or suspended or that a shorter time period should be established for the certifications to remain in effect. SAMHSA may extend the time in which a certification remains in effect under this paragraph on a case-by-case basis.

(2) Within 1 year from the date of withdrawal of approval of an accreditation body, or within any shorter period of time established by SAMHSA, OTPs currently accredited by the accreditation body must obtain accreditation from another accreditation body. SAMHSA may extend the time period for obtaining reaccreditation on a case-by-case basis.

§ 8.14 Suspension or revocation of certification.

(a) *Revocation.* Except as provided in paragraph (b) of this section, SAMHSA may revoke the certification of an OTP if SAMHSA finds, after providing the program sponsor with notice and an opportunity for a hearing in accordance with subpart C of this part, that the program sponsor, or any employee of the OTP:

(1) Has been found guilty of misrepresentation in obtaining the certification;

(2) Has failed to comply with the Federal opioid treatment standards in any respect;

(3) Has failed to comply with reasonable requests from SAMHSA or from an accreditation body for records, information, reports, or materials that are necessary to determine the continued eligibility of the OTP for certification or continued compliance with the Federal opioid treatment standards; or

(4) Has refused a reasonable request of a duly designated SAMHSA inspector, Drug Enforcement Administration (DEA) Inspector, State Inspector, or accreditation body representative for permission to inspect the program or the program's operations or its records.

(b) *Suspension.* Whenever SAMHSA has reason to believe that revocation may be required and that immediate action is necessary to protect public health or safety, SAMHSA may immediately suspend the certification of an OTP before holding a hearing under subpart C of this part. SAMHSA may immediately suspend as well as propose revocation of the certification of an OTP before holding a hearing under subpart C of this part if SAMHSA makes a finding described in paragraph (a) of this section and also determines that:

(1) The failure to comply with the Federal opioid treatment standards presents an imminent danger to the public health or safety;

(2) The refusal to permit inspection makes immediate suspension necessary; or

(3) There is reason to believe that the failure to comply with the Federal opioid treatment standards was intentional or was associated with fraud.

(c) *Written notification.* In the event that SAMHSA suspends the certification of an OTP in accordance with paragraph (b) of this section or proposes to revoke the certification of an OTP in accordance with paragraph (a) of this section, SAMHSA shall promptly provide the sponsor of the OTP with written notice of the suspension or proposed revocation by facsimile

transmission, personal service, commercial overnight delivery service, or certified mail, return receipt requested. Such notice shall state the reasons for the action and shall state that the OTP may seek review of the action in accordance with the procedures in subpart C of this part.

(d)(1) If SAMHSA suspends certification in accordance with paragraph (b) of this section:

(i) SAMHSA will immediately notify DEA that the OTP's registration should be suspended under 21 U.S.C. 824(d); and

(ii) SAMHSA will provide an opportunity for a hearing under subpart C of this part.

(2) Suspension of certification under paragraph (b) of this section shall remain in effect until the agency determines that:

(i) The basis for the suspension cannot be substantiated;

(ii) Violations of required standards have been corrected to the agency's satisfaction; or

(iii) The OTP's certification shall be revoked.

§ 8.15 Forms.

(a) SMA-162—Application for Certification to Use Opioid Agonist Treatment Medications for Opioid Treatment.

(b) SMA-163—Application for Becoming an Accreditation Body under § 8.3.

Subpart C—Procedures for Review of Suspension or Proposed Revocation of OTP Certification, and of Adverse Action Regarding Withdrawal of Approval of an Accreditation Body

§ 8.21 Applicability.

The procedures in this subpart apply when:

(a) SAMHSA has notified an OTP in writing that its certification under the regulations in subpart B of this part has been suspended or that SAMHSA proposes to revoke the certification; and

(b) The OTP has, within 30 days of the date of the notification or within 3 days of the date of the notification when seeking an expedited review of a suspension, requested in writing an opportunity for a review of the suspension or proposed revocation.

(c) SAMHSA has notified an accreditation body of an adverse action taken regarding withdrawal of approval of the accreditation body under the regulations in subpart A of this part; and

(d) The accreditation body has, within 30 days of the date of the notification, requested in writing an opportunity for a review of the adverse action.

§ 8.22 Definitions.

The following definitions apply to this subpart C.

(a) *Appellant* means:

(1) The treatment program which has been notified of its suspension or proposed revocation of its certification under the regulations of this part and has requested a review of the suspension or proposed revocation, or

(2) The accreditation body which has been notified of adverse action regarding withdrawal of approval under the regulations of this subpart and has requested a review of the adverse action.

(b) *Respondent* means SAMHSA.

(c) *Reviewing official* means the person or persons designated by the Secretary who will review the suspension or proposed revocation. The reviewing official may be assisted by one or more HHS officers or employees or consultants in assessing and weighing the scientific and technical evidence and other information submitted by the appellant and respondent on the reasons for the suspension and proposed revocation.

§ 8.23 Limitation on issues subject to review.

The scope of review shall be limited to the facts relevant to any suspension, or proposed revocation, or adverse action, the necessary interpretations of the facts the regulations, in the subpart, and other relevant law.

§ 8.24 Specifying who represents the parties.

The appellant's request for review shall specify the name, address, and phone number of the appellant's representative. In its first written submission to the reviewing official, the respondent shall specify the name, address, and phone number of the respondent's representative.

§ 8.25 Informal review and the reviewing official's response.

(a) *Request for review.* Within 30 days of the date of the notice of the suspension or proposed revocation, the appellant must submit a written request to the reviewing official seeking review, unless some other time period is agreed to by the parties. A copy must also be sent to the respondent. The request for review must include a copy of the notice of suspension, proposed revocation, or adverse action, a brief statement of why the decision to suspend, propose revocation, or take an adverse action is incorrect, and the appellant's request for an oral presentation, if desired.

(b) *Acknowledgment.* Within 5 days after receiving the request for review,

the reviewing official will send an acknowledgment and advise the appellant of the next steps. The reviewing official will also send a copy of the acknowledgment to the respondent.

§ 8.26 Preparation of the review file and written arguments.

The appellant and the respondent each participate in developing the file for the reviewing official and in submitting written arguments. The procedures for development of the review file and submission of written argument are:

(a) *Appellant's documents and brief.* Within 30 days after receiving the acknowledgment of the request for review, the appellant shall submit to the reviewing official the following (with a copy to the respondent):

(1) A review file containing the documents supporting appellant's argument, tabbed and organized chronologically, and accompanied by an index identifying each document. Only essential documents should be submitted to the reviewing official.

(2) A written statement, not to exceed 20 double-spaced pages, explaining why respondent's decision to suspend or propose revocation of appellant's certification or to take adverse action regarding withdrawal of approval of the accreditation body is incorrect (appellant's brief).

(b) *Respondent's documents and brief.* Within 30 days after receiving a copy of the acknowledgment of the request for review, the respondent shall submit to the reviewing official the following (with a copy to the appellant):

(1) A review file containing documents supporting respondent's decision to suspend or revoke appellant's certification, or approval as an accreditation body, tabbed and organized chronologically, and accompanied by an index identifying each document. Only essential documents should be submitted to the reviewing official.

(2) A written statement, not exceeding 20 double-spaced pages in length, explaining the basis for suspension, proposed revocation, or adverse action (respondent's brief).

(c) *Reply briefs.* Within 10 days after receiving the opposing party's submission, or 20 days after receiving acknowledgment of the request for review, whichever is later, each party may submit a short reply not to exceed 10 double-spaced pages.

(d) *Cooperative efforts.* Whenever feasible, the parties should attempt to develop a joint review file.

(e) *Excessive documentation.* The reviewing official may take any appropriate steps to reduce excessive documentation, including the return of or refusal to consider documentation found to be irrelevant, redundant, or unnecessary.

(f) *Discovery.* The use of interrogatories, depositions, and other forms of discovery shall not be allowed.

§ 8.27 Opportunity for oral presentation.

(a) *Electing oral presentation.* If an opportunity for an oral presentation is desired, the appellant shall request it at the time it submits its written request for review to the reviewing official. The reviewing official will grant the request if the official determines that the decisionmaking process will be substantially aided by oral presentations and arguments. The reviewing official may also provide for an oral presentation at the official's own initiative or at the request of the respondent.

(b) *Presiding official.* The reviewing official or designee will be the presiding official responsible for conducting the oral presentation.

(c) *Preliminary conference.* The presiding official may hold a prehearing conference (usually a telephone conference call) to consider any of the following: Simplifying and clarifying issues; stipulations and admissions; limitations on evidence and witnesses that will be presented at the hearing; time allotted for each witness and the hearing altogether; scheduling the hearing; and any other matter that will assist in the review process. Normally, this conference will be conducted informally and off the record; however, the presiding official may, at the presiding official's discretion, produce a written document summarizing the conference or transcribe the conference, either of which will be made a part of the record.

(d) *Time and place of oral presentation.* The presiding official will attempt to schedule the oral presentation within 45 days of the date appellant's request for review is received or within 15 days of submission of the last reply brief, whichever is later. The oral presentation will be held at a time and place determined by the presiding official following consultation with the parties.

(e) *Conduct of the oral presentation.*—
(1) General. The presiding official is responsible for conducting the oral presentation. The presiding official may be assisted by one or more HHS officers or employees or consultants in conducting the oral presentation and reviewing the evidence. While the oral

presentation will be kept as informal as possible, the presiding official may take all necessary steps to ensure an orderly proceeding.

(2) *Burden of proof/standard of proof.* In all cases, the respondent bears the burden of proving by a preponderance of the evidence that its decision to suspend, propose revocation, or take adverse action is appropriate. The appellant, however, has a responsibility to respond to the respondent's allegations with evidence and argument to show that the respondent is incorrect.

(3) *Admission of evidence.* The rules of evidence do not apply and the presiding official will generally admit all testimonial evidence unless it is clearly irrelevant, immaterial, or unduly repetitious. Each party may make an opening and closing statement, may present witnesses as agreed upon in the pre-hearing conference or otherwise, and may question the opposing party's witnesses. Since the parties have ample opportunity to prepare the review file, a party may introduce additional documentation during the oral presentation only with the permission of the presiding official. The presiding official may question witnesses directly and take such other steps necessary to ensure an effective and efficient consideration of the evidence, including setting time limitations on direct and cross-examinations.

(4) *Motions.* The presiding official may rule on motions including, for example, motions to exclude or strike redundant or immaterial evidence, motions to dismiss the case for insufficient evidence, or motions for summary judgment. Except for those made during the hearing, all motions and opposition to motions, including argument, must be in writing and be no more than 10 double-spaced pages in length. The presiding official will set a reasonable time for the party opposing the motion to reply.

(5) *Transcripts.* The presiding official shall have the oral presentation transcribed and the transcript shall be made a part of the record. Either party may request a copy of the transcript and the requesting party shall be responsible for paying for its copy of the transcript.

(f) *Obstruction of justice or making of false statements.* Obstruction of justice or the making of false statements by a witness or any other person may be the basis for a criminal prosecution under 18 U.S.C. 1001 or 1505.

(g) *Post-hearing procedures.* At the presiding official's discretion, the presiding official may require or permit the parties to submit post-hearing briefs or proposed findings and conclusions. Each party may submit comments on

any major prejudicial errors in the transcript.

§ 8.28 Expedited procedures for review of immediate suspension.

(a) *Applicability.* When the Secretary notifies a treatment program in writing that its certification has been immediately suspended, the appellant may request an expedited review of the suspension and any proposed revocation. The appellant must submit this request in writing to the reviewing official within 10 days of the date the OTP received notice of the suspension. The request for review must include a copy of the suspension and any proposed revocation, a brief statement of why the decision to suspend and propose revocation is incorrect, and the appellant's request for an oral presentation, if desired. A copy of the request for review must also be sent to the respondent.

(b) *Reviewing official's response.* As soon as practicable after the request for review is received, the reviewing official will send an acknowledgment with a copy to the respondent.

(c) *Review file and briefs.* Within 10 days of the date the request for review is received, but no later than 2 days before an oral presentation, each party shall submit to the reviewing official the following:

(1) A review file containing essential documents relevant to the review, tabbed, indexed, and organized chronologically; and

(2) A written statement, not to exceed 20 double-spaced pages, explaining the party's position concerning the suspension and any proposed revocation. No reply brief is permitted.

(d) *Oral presentation.* If an oral presentation is requested by the appellant or otherwise granted by the reviewing official in accordance with § 8.27(a), the presiding official will attempt to schedule the oral presentation within 20 to 30 days of the date of appellant's request for review at a time and place determined by the presiding official following consultation with the parties. The presiding official may hold a pre-hearing conference in accordance with § 8.27(c) and will conduct the oral presentation in accordance with the procedures of §§ 8.27(e), (f), and (g).

(e) *Written decision.* The reviewing official shall issue a written decision upholding or denying the suspension or proposed revocation and will attempt to issue the decision within 7 to 10 days of the date of the oral presentation or within 3 days of the date on which the transcript is received or the date of the last submission by either party,

whichever is later. All other provisions set forth in § 8.33 apply.

(f) *Transmission of written communications.* Because of the importance of timeliness for these expedited procedures, all written communications between the parties and between either party and the reviewing official shall be sent by facsimile transmission, personal service, or commercial overnight delivery service.

§ 8.29 Ex parte communications.

Except for routine administrative and procedural matters, a party shall not communicate with the reviewing or presiding official without notice to the other party.

§ 8.30 Transmission of written communications by reviewing official and calculation of deadlines.

(a) *Timely review.* Because of the importance of a timely review, the reviewing official should normally transmit written communications to either party by facsimile transmission, personal service, or commercial overnight delivery service, or certified mail, return receipt requested, in which case the date of transmission or day following mailing will be considered the date of receipt. In the case of communications sent by regular mail, the date of receipt will be considered 3 days after the date of mailing.

(b) *Due date.* In counting days, include Saturdays, Sundays, and holidays. However, if a due date falls on a Saturday, Sunday, or Federal holiday, then the due date is the next Federal working day.

§ 8.31 Authority and responsibilities of the reviewing official.

In addition to any other authority specified in this subpart C, the reviewing official and the presiding official, with respect to those authorities involving the oral presentation, shall have the authority to issue orders; examine witnesses; take all steps necessary for the conduct of an orderly hearing; rule on requests and motions; grant extensions of time for good reasons; dismiss for failure to meet deadlines or other requirements; order the parties to submit relevant information or witnesses; remand a case for further action by the respondent; waive or modify these procedures in a specific case, usually with notice to the parties; reconsider a decision of the reviewing official where a party promptly alleges a clear error of fact or law; and to take any other action necessary to resolve disputes in accordance with the objectives of the procedures in this subpart.

§ 8.32 Administrative record.

The administrative record of review consists of the review file; other submissions by the parties; transcripts or other records of any meetings, conference calls, or oral presentation; evidence submitted at the oral presentation; and orders and other documents issued by the reviewing and presiding officials.

§ 8.33 Written decision.

(a) *Issuance of decision.* The reviewing official shall issue a written decision upholding or denying the suspension, proposed revocation, or adverse action. The decision will set forth the reasons for the decision and describe the basis for that decision in the record. Furthermore, the reviewing official may remand the matter to the respondent for such further action as the reviewing official deems appropriate.

(b) *Date of decision.* The reviewing official will attempt to issue the

decision within 15 days of the date of the oral presentation, the date on which the transcript is received, or the date of the last submission by either party, whichever is later. If there is no oral presentation, the decision will normally be issued within 15 days of the date of receipt of the last reply brief. Once issued, the reviewing official will immediately communicate the decision to each party.

(c) *Public notice and communications to the Drug Enforcement Administration (DEA).* (1) If the suspension and proposed revocation of OTP certification are upheld, the revocation of certification will become effective immediately and the public will be notified by publication of a notice in the **Federal Register**. SAMHSA will notify DEA within 5 days that the OTP's registration should be revoked.

(2) If the suspension and proposed revocation of OTP certification are

denied, the revocation will not take effect and the suspension will be lifted immediately. Public notice will be given by publication in the **Federal Register**. SAMHSA will notify DEA within 5 days that the OTP's registration should be restored, if applicable.

§ 8.34 Court review of final administrative action; exhaustion of administrative remedies.

Before any legal action is filed in court challenging the suspension, proposed revocation, or adverse action, respondent shall exhaust administrative remedies provided under this subpart, unless otherwise provided by Federal law. The reviewing official's decision, under § 8.28(e) or § 8.33(a), constitutes final agency action as of the date of the decision.

Federal Railroad Administration

**49 CFR Parts 229, 231, and 232
Brake System Safety Standards for Freight
and Other Non-Passenger Trains and
Equipment; End-of-Train Devices; Final
Rule**

DEPARTMENT OF TRANSPORTATION**Federal Railroad Administration****49 CFR Parts 229, 231, and 232**

[FRA Docket No. PB-9; Notice No. 17]

RIN 2130-AB16

Brake System Safety Standards for Freight and Other Non-Passenger Trains and Equipment; End-of-Train Devices**AGENCY:** Federal Railroad Administration (FRA), DOT.**ACTION:** Final Rule.

SUMMARY: FRA is issuing revisions to the regulations governing the power braking systems and equipment used in freight and other non-passenger railroad train operations. The revisions are designed to achieve safety by better adapting the regulations to the needs of contemporary railroad operations and facilitating the use of advanced technologies. These revisions are being issued in order to comply with Federal legislation, to respond to petitions for rulemaking, and to address areas of concern derived from experience in the application of existing standards governing these operations.

EFFECTIVE DATE: April 1, 2001. The incorporation by reference of certain publications listed in the rule is approved by the Director of the Federal Register as of April 1, 2001.

ADDRESSES: Any petition for reconsideration should reference FRA Docket No. PB-9, Notice 17, and be submitted in triplicate to FRA Docket Clerk, Office of Chief Counsel, RCC-10, 1120 Vermont Avenue, Mail Stop 10, Washington, DC 20590.

FOR FURTHER INFORMATION, CONTACT: Leon Smith, Deputy Regional Administrator—Region 3, FRA Office of Safety, RRS-14, 1120 Vermont Avenue, Stop 25, Washington, DC 20590 (telephone 404-562-3800), or Thomas Herrmann, Trial Attorney, Office of the Chief Counsel, RCC-10, 1120 Vermont Avenue, Stop 10, Washington, DC 20590 (telephone 202-493-6053).

SUPPLEMENTARY INFORMATION:**I. Background**

In 1992, Congress amended the Federal rail safety laws by adding certain statutory mandates related to power brake safety. See 49 U.S.C. 20141. These amendments specifically address the revision of the power brake regulations by adding a new subsection which states:

(r) POWER BRAKE SAFETY.—(1) The Secretary shall conduct a review of the

Department of Transportation's rules with respect to railroad power brakes, and not later than December 31, 1993, shall revise such rules based on such safety data as may be presented during that review.

(2) In carrying out paragraph (1), the Secretary shall, where applicable, prescribe standards regarding dynamic brake equipment. * * *

Pub. L. 102-365, section 7; codified at 49 U.S.C. 20141, superseding 45 U.S.C. 431(r).

In response to the statutory mandate, the various recommendations and petitions for rulemaking, and due to its own determination that the power brake regulations were in need of revision, FRA published an Advance Notice of Proposed Rulemaking (ANPRM) on December 31, 1992 (57 FR 62546), and conducted a series of public workshops in early 1993. The ANPRM provided background information and presented questions on various subjects including the following: the use and design of end-of-train (EOT) telemetry devices; the air flow method of train brake testing; the additional testing of train air brakes during extremely cold weather; the training of employees to perform train brake tests and inspections; computer-assisted braking systems; the operation of dynamic brakes on locomotives; and other miscellaneous subjects relating to conventional brake systems as well as information regarding high speed passenger train brakes. The questions presented in the ANPRM on the various topics were intended as fact-finding tools and were meant to elicit the views of those persons outside FRA charged with ensuring compliance with the power brake regulations on a day-to-day basis.

Based on the comments and information received, FRA published a Notice of Proposed Rulemaking (1994 NPRM) regarding revisions to the power brake regulation. See 59 FR 47676 (September 16, 1994). In the 1994 NPRM, FRA proposed a comprehensive revision of the power brake regulations which attempted to preserve the useful elements of the current regulatory system in the framework of an entirely new document. FRA attempted to delineate the requirements for conventional freight braking systems from the more diverse systems for various categories of passenger service. In developing the NPRM, FRA engaged in a systems approach to the power brake regulations. FRA considered all aspects of a railroad operation and the effects that the entire operation had on the train and locomotive power braking systems. Therefore, the proposed requirements not only addressed specific brake equipment and inspection requirements, but also attempted to

encompass other aspects of a railroad's operation which directly affect the quality and performance of the braking system, such as personnel qualifications; maintenance requirements; written procedures governing operation, maintenance, and inspection; record keeping requirements; and the development and integration of new technologies.

Following publication of the 1994 NPRM in the **Federal Register**, FRA held a series of public hearings in 1994 to allow interested parties the opportunity to comment on specific issues addressed in the NPRM. Public hearings were held in Chicago, Illinois on November 1-2; in Newark, New Jersey on November 4; in Sacramento, California on November 9; and in Washington, DC on December 13-14, 1994. These hearings were attended by numerous railroads, organizations representing railroads, labor organizations, rail shippers, and State governmental agencies. Due to the strong objections raised by a large number of commenters at these public hearings, FRA announced by notice published on January 17, 1995 that it would defer action on the NPRM and permit the submission of additional comments prior to making a determination as to how it would proceed in this matter. See 60 FR 3375. Although the comment period officially closed April 1, 1995, FRA continued to receive comments on the NPRM as well as other suggested alternatives well into October 1995.

Furthermore, beginning in mid-1995, FRA internally committed to the process of establishing the Railroad Safety Advisory Committee (RSAC). The determination to develop the RSAC was based on FRA's belief that the continued use of ad hoc collaborative procedures for appropriate rulemakings was not the most effective means of accomplishing its goal of a more consensual regulatory program. FRA believed that the establishment of an advisory committee to address railroad safety issues would provide the best opportunity for creating a consensual regulatory program to benefit the Administrator in the conduct of her statutory responsibilities. FRA envisioned that the RSAC would allow representatives from management, labor, FRA, and other interested parties to cooperatively address safety problems by identifying the best solutions based on agreed-upon facts, and, where regulation appears necessary, by identifying regulatory options to implement these solutions. The process of establishing the RSAC was not complete until March 1, 1996, and on March 11, 1996, FRA published a notice

in the **Federal Register** that the Committee had been established. See 61 FR 9740.

In the interim, based on these considerations and after review of all the comments submitted, FRA published a notice in the **Federal Register** on February 21, 1996, stating that, in order to limit the number of issues to be examined and developed in any one proceeding, FRA would proceed with the revision of the power brake regulations via three separate processes. See 61 FR 6611. In light of the testimony and comments received on the 1994 NPRM, emphasizing the differences between passenger and freight operations and the brake equipment utilized by the two, FRA decided to separate passenger equipment power brake standards from freight equipment power brake standards. As passenger equipment power brake standards are a logical subset of passenger equipment safety standards, it was determined that the passenger equipment safety standards working group would assist FRA in developing a second NPRM covering passenger equipment power brake standards. See 49 U.S.C. 20133(c). In addition, in the interest of public safety and due to statutory as well as internal commitments, FRA determined that it would separate the issues related to two-way EOTs from both the passenger and freight issues, address them in a public regulatory conference, and issue a final rule on the subject as soon as practicable. A final rule on two-way EOTs was issued on December 27, 1996. See 62 FR 278 (January 2, 1997). Furthermore, it was announced that a second NPRM covering freight equipment power brake standards would be developed with the assistance of RSAC. At the Committee's inaugural meeting on April 1–2, 1996, the RSAC officially accepted the task of assisting FRA in development of revisions to the regulations governing power brake systems for freight equipment. See 61 FR 29164.

Members of RSAC nominated individuals to be members of the Freight Power Brake Working Group (Working Group) tasked with making recommendations regarding revision of the power regulations applicable to freight operations. The Working Group was comprised of thirty-one voting members as well as a number of alternates and technical support personnel. The following organizations were represented by a voting member and/or an alternate on the Working Group:

Association of American Railroads (AAR)
The American Short Line Railroad Association (ASLRA)
Brotherhood of Locomotive Engineers (BLE)
The Burlington Northern and Santa Fe Railway Company (BNSF)
Canadian National Railroads (CN)
Canadian Pacific Rail Systems (CP)
Consolidated Rail Corporation (CR)
CSX Transportation, Incorporated (CSX)
Illinois Central Railroad Company (IC)
International Association of Machinists & Aerospace Workers (IAMAW)
National Transportation Safety Board (NTSB)(Advisor)
National Association of Regulatory Commissioners (NARUC)
California Public Utilities Commission (CAPUC)
Norfolk Southern Corporation (NS)
Railway Progress Institute (RPI)
Sheet Metal Workers International Association (SMWIA)
Southern Pacific Lines (SP)
Transportation Communications International Union/Brotherhood of Railway Carmen (TCU/BRC)
Transport Workers Union of America (TWU)
Union Pacific Railroad Company (UP)
United Transportation Union (UTU)

The Working Group held seven multi-day sessions in which all members of the working group were invited. These sessions were held on the following dates:

May 15–17, 1996 in Washington D.C.;
June 11–13, 1996 in Chicago, Illinois;
July 31, 1996 in Chicago, Illinois;
August 21–23, 1996 in Annapolis, Maryland;
September 26–27, 1996 in Washington D.C.;
October 29–30, 1996 in Washington D.C.; and
December 4, 1996 in St. Louis, Missouri.

General minutes of each of these meetings are contained in FRA Docket PB–9 and are available for public inspection during the times and at the location noted previously. In addition to these meetings, there were numerous meetings conducted by smaller task force groups designated by the Working Group to further develop various issues. All of these smaller task forces were made up of various members of the Working Group or their representatives, with each task force being represented by management, labor, FRA, and other interested parties. The Working Group designated smaller task forces to address the following issues: Dry air; dynamic brakes; periodic maintenance and testing; electronically controlled

locomotive brakes; and inspection and testing requirements. These task forces were assigned the job of developing the issues related to the broad topics, presenting reports to the larger Working Group, and if possible making recommendations to the Working Group for addressing the issues.

Although the Working Group discussed, debated, and attempted to reach consensus on various issues related to freight power brakes, consensus could not be reached. However, the working group in conjunction with the various task forces developed a wealth of information on various issues and further clarified the parties' positions regarding how the issues could or should be addressed in any regulation. The major cluster of issues, upon which resolution of many of the other issues rested, were the requirements related to the inspection and testing of brake equipment. The inspection and testing task force met on numerous occasions and gathered and reviewed data, and the labor and rail management representatives to the task force drafted various proposals and options related to the inspection and testing of freight brake equipment. The Working Group discussed the proposals and investigated many of the costs and benefits related to the various proposals as well as the safety implications; however, the Working Group could not reach any type of consensus position. Consequently, FRA declared that an impasse had been reached and announced, at the December 4, 1996 meeting of the Working Group, that FRA would proceed unilaterally with the drafting of the NPRM.

Subsequent to December 4, 1996, several members of the Working Group, including representatives from both rail management and labor, continued informal discussions of some of the issues related to the inspection and testing of freight equipment. These representatives informed FRA that a consensus proposal might be possible, provided that the Working Group were permitted to continue deliberations. Consequently, FRA agreed to reconvene the Working Group, and in April 1997 three additional meetings were conducted on the following dates:

April 2–3 in Kansas City, Missouri;
April 10–11 in Phoenix, Arizona; and
April 23 in Jacksonville, Florida.

Representatives of both rail management and rail labor presented the Working Group with inspection and testing proposals for consideration and review both before and during this period. Although the proposals were discussed and deliberated, the Working Group was once again unsuccessful in

reaching consensus on any of the freight power brake inspection and testing issues. Consequently, by letter dated May 29, 1997, FRA informed the members of the Working Group that FRA would be withdrawing the freight power brake task from the Working Group at the next full RSAC meeting on June 24, 1997. FRA provided this notice to avoid any misunderstanding regarding the process by which the proposed rule would be drafted. FRA also informed the members of the Working Group that it would not invest further time in attempting to reach consensus unless all other members of the Working Group jointly indicated that they have reached consensus on a proposal and wanted to discuss it with FRA. FRA noted that if that were to occur prior to June 24, 1997, it would reconsider withdrawing the task from RSAC. As no consensus proposal was presented to FRA prior to June 24, 1997, FRA withdrew the task from the Working Group and informed the members of RSAC that FRA would proceed independently in the drafting of a freight power brake NPRM.

FRA carefully considered the information, data, and proposals developed by the Freight Power Brake Working Group as well as all the oral and written comments offered by various parties regarding the 1994 NPRM on power brakes when developing a revised power brake NPRM. On September 9, 1998, an NPRM (1998 NPRM) was published in the **Federal Register** proposing brake system safety standards for freight trains and equipment. See 63 FR 48294 (September 9, 1998).

As evidenced by the preceding discussion, FRA spent years developing the 1998 proposed power brake regulations. During that time, FRA instituted rulemakings to address passenger and commuter operations and equipment and two-way end-of-train devices, and developed a channel of communication to address tourist and excursion operational concerns. Consequently, the 1998 proposal focused solely on freight and other non-passenger operations. FRA did not, for the most part, attempt to include provisions related to the inspection and maintenance of locomotive braking systems or to the performance of other mechanical inspections that are currently addressed by other parts of the regulations. FRA believed that although those requirements are interrelated to the inspection, testing, and maintenance of freight power brakes, they are adequately addressed in other regulations and would only add to the complexity of the proposal, causing

confusion and misunderstanding by members of the regulated community.

When developing the 1998 NPRM, FRA determined that the proposal would closely track the existing requirements related to the inspection, testing, and maintenance of the braking systems used in freight operations. Although FRA recognized that the current regulatory scheme tended to create incentives to "overlook" defects or fail to conduct vigorous inspections, FRA also believed that the current regulatory scheme is an effective and proven method of ensuring safety and that many of the "negative incentives" could be greatly reduced by strict and aggressive enforcement coupled with moderate revisions to address specific concerns raised by interested parties. Furthermore, representatives of both rail labor and rail management indicated that if a consensus proposal could not be developed then FRA should proceed on its own with developing a proposal which tracks the current requirements, and that FRA should strictly enforce those requirements.

The 1998 NPRM proposed a moderate, although comprehensive, revision of the existing requirements related to the inspection, testing, and maintenance of brake equipment used in freight operations. The proposal attempted to balance the concerns of rail labor and management and increase the effectiveness of the regulation. In the 1998 NPRM, FRA attempted to reorganize, update, and clarify the existing regulations related to freight power brakes and eliminate potential loopholes created by the existing regulatory language. Furthermore, completely new requirements were proposed to address the qualifications of those individuals conducting brake inspections and tests. FRA also proposed requirements related to the movement of freight equipment with defective or inoperative brakes which were consistent with existing statutory requirements and other federal regulations addressing the movement of defective freight equipment. The 1998 NPRM also attempted to codify existing maintenance requirements related to the brake system and its components and prevent unilateral changes to those provisions by the very party to which they apply. Moreover, the proposal also contained specific requirements related to dynamic brakes and requirements aimed at increasing the quality of air introduced into brake systems by yard air sources.

In addition to the above, the 1998 proposal also contained various incentives to the railroads to encourage the performance of quality brake

inspections, particularly at locations where trains originate. These included incentives to use qualified mechanical forces to conduct brake system tests at major terminals where long-distance trains originate in order to move these trains greater distances between brake inspections than existing regulations permitted. Consequently, the 1998 proposal retained the basic inspection intervals and requirements contained in the existing regulations and preserved the useful elements of the existing system, but also proposed additions, clarifications, and modifications that FRA believed would increase the safety, effectiveness, and enforceability of the regulations.

Following publication of the 1998 NPRM, FRA held two public hearings and a public technical conference to allow interested parties the opportunity to comment on specific issues addressed in the NPRM. The public hearings were held in Kansas City, Missouri on October 26 and in Washington, DC on November 13, 1998. The public technical conference was conducted in Walnut Creek, California on November 23 and 24, 1998. The hearings and technical conference were attended by numerous railroads, organizations representing railroads, labor organizations, rail shippers, and State governmental agencies. During the hearings and technical conference a vast amount of oral information was presented, and a considerable number of issues were raised and discussed in detail.

Subsequent to conducting these public hearings and technical conference, FRA issued a notice extending the comment period on the NPRM from January 15, 1999 to March 1, 1999. See 64 FR 3273. This extension was provided based on the requests of several interested parties for more time in which to develop their responses. At the public hearings and technical conference conducted in relation to the NPRM and in written comments submitted subsequent to the public hearings and technical conference, concerns were raised regarding the data discussed by FRA in the NPRM. The comments raised concerns regarding FRA's collection of data related to FRA's inspection activity and the number of conditions not in compliance with Federal regulations found during that inspection activity. The comments and correspondence received alleged that there were substantial problems with FRA's database, that there had been substantial overreporting of the number of units inspected, and that there had been a systematic deflation of power brake defect ratios.

As the allegations and concerns raised were general in nature, FRA believed it prudent and necessary to allow interested parties to fully explain and discuss their concerns. Therefore, FRA conducted a public meeting on May 27, 1999 to permit the exchange of information and concerns regarding FRA's database and the information developed from that database. *See* 64 FR 23816 (May 4, 1999). The purpose of the meeting was to allow FRA to provide information regarding its internal review of the data and address some of the concerns raised as well as to allow interested parties to further develop and articulate the issues and concerns they had with regard to the data gathered and presented by FRA in the NPRM.

FRA has carefully considered all the information, data, and proposals submitted in relation to FRA Docket PB-9 when developing this final rule. This includes: the information, data and proposals developed by the RSAC Freight Power Brake Working Group; all oral and written comments submitted in relation to the 1994 NPRM on power brakes; and all oral and written comments submitted regarding the 1998 NPRM on freight power brakes. In addition to the preceding information, FRA's knowledge and experience with enforcing the existing power brake regulations were also relied upon when developing this final rule.

II. Overview of Comments and General FRA Conclusions

The following discussions are grouped by major themes and issues addressed in the 1998 NPRM and the oral and written comments submitted in relation to that document. In each of the major issue areas, FRA has attempted to outline the significant portions of the proposal, discuss the comments received on the proposal and any alternative approach recommended, and provide a general idea of how FRA has decided to address the issues or approaches.

A. Accident/Incident History and Defective Equipment

The 1998 NPRM contained a detailed discussion regarding the accident/incident data which FRA considered when developing the proposal. In that discussion, FRA noted that it considers a variety of factors in attempting to determine the relative condition of the industry as it relates to the safety of train power brake systems. Two of the factors considered when making this assessment are the number of recent brake-related incidents and the amount of defective brake equipment recently discovered operating over the railroad

system, both of which provide some indication as to the potential or likelihood of future brake-related incidents. Due to concerns raised in both written comments and at the public meeting conducted on May 27, 1999, regarding the accident/incident data and power brake defect ratio data discussed above, FRA believes it is necessary to further explain how these data were used in developing this final rule.

1. Accident/Incident Data

In order to determine the potential quantifiable safety benefits to be derived from the provisions proposed in the NPRM and either retained or modified in this final rule, FRA conducted a review of all accidents/incidents reported to FRA to determine which incidents/accidents could potentially have been prevented had the provisions of the rule been in place. For purposes of the NPRM, FRA identified a brake-related incident as being an incident reported to FRA as being caused by one of the following: brake rigging down or dragging; air hose uncoupled or burst; broken brake pipe or connections; other brake components damaged, worn, broken or disconnected; brake valve malfunction (undesired emergency); brake valve malfunction (stuck brake); hand brake broken or defective; hand brake linkage and/or connections broken or defective. For purposes of the NPRM, FRA did not consider brake pipe obstruction-related incidents because FRA believed they had been fully considered at the time that FRA promulgated the final rule relating to the use of two-way end-of-train devices.

In written comments and at the public meeting held in conjunction with the NPRM, several labor representatives raised concerns regarding FRA's reliance on accident/incident information which is essentially reported to FRA by the railroads. These representatives contend that railroads have an economic incentive to report accidents/incidents as being due to human factors rather than to mechanical problems or deficiencies. Thus, they contend that the potential safety benefits identified by FRA in the NPRM are inaccurate and underestimated because the data used to determine those benefits are developed by the railroads. FRA tends to agree with the concerns raised by these commenters and raised this concern in its discussion of the accident/incident data in the NPRM.

In the NPRM, FRA acknowledged that the presented brake-related incidents most likely did not accurately reflect the total number of incidents that were

potentially linked, in some part, to brake-related causes and did not provide a complete picture of the costs associated with the identified incidents. *See* 63 FR 48297. FRA recognized that the information on most incidents is provided by the railroads which generally identify the direct cause of an incident but may not sufficiently identify all of the contributory causes in a manner to permit FRA to conclude that the brake system played a part in the incident. Thus, FRA acknowledged that there may be numerous incidents which occurred in the industry which were at least partially due to brake-related problems, but which were ultimately more closely linked to human error or other mechanical problems and thus, were reported to FRA under different cause codes. However, as it is extremely difficult to identify those accidents/incidents that may have been in some part related to a brake problem, FRA elected to include only those accidents specifically identified as brake-related in its quantified safety benefits and included other potential incidents as qualitative safety benefits in the NPRM. FRA also recognized that the damage costs provided to FRA by the railroads for the incidents identified in the NPRM failed to consider all of the costs associated with an accident such as: loss of lading; wreck clearance; track delay; environmental clean-up; removal of damaged equipment; evacuations; or the impact on local traffic patterns. *See* 63 FR 48297. Thus, for purposes of the NPRM, the property damages reported by the railroads were multiplied by a factor of 1.5625 in an effort to capture these non-reported damages. *See* 63 FR 48297.

In calculating the potential quantifiable safety benefits to be derived from this final rule, FRA has slightly expanded the criteria for determining the accidents/incidents which are addressed by this final rule. Thus, for purposes of this final rule the quantified safety benefits include a percentage of certain types of accidents reported as being due to human error or other than a brake-related mechanical problem. The quantified safety benefits for this final rule also include a percentage of those incidents which are considered brake pipe obstruction-related. Although these accidents were considered in relation to the two-way EOT final rule, FRA believes that this final rule will prevent an additional percentage of those incidents that were not captured by the two-way EOT final rule.

Table 1 below contains a compilation of the relevant incidents that FRA

considers to be preventable that have been reported to FRA from 1994 through 1998. The incidents included in this table contain incidents reported to FRA as being caused by one of the following: Brake rigging down or dragging; air hose uncoupled or burst; broken brake pipe or connections; other brake components damaged, worn, broken or disconnected; brake valve malfunction (undesired emergency); brake valve malfunction (stuck brake); hand brake broken or defective; hand brake linkage and/or connections broken or defective. Table 1 also contains incidents reported as being related to brake pipe obstructions and certain brake-related human factor incidents which include: runaway cuts

of cars; train handling; and improper use of brakes. FRA believes that various provisions of this final rule have the potential of preventing a certain percentage of the incidents reported as being due to these causes. However, in developing the cost/benefit analysis for this final rule, FRA used a very conservative effectiveness rate of .2 for incidents with these reported causes. The Regulatory Impact Analysis prepared in connection with this final rule provides a detailed discussion of how certain human factor and brake pipe obstruction incidents were utilized when evaluating this rule.

It should be noted that the damage costs noted in Table 1 for the identified

incidents are based on the damage to railroad property or equipment. Thus, the damages presented fail to consider the costs associated with the injuries and fatalities involved. These costs are calculated in detail in the Regulatory Impact Analysis prepared in connection with this final rule. The costs presented in Table 1 also do not consider such things as: loss of lading; wreck clearance; track delay; environmental clean-up; removal of damaged equipment; evacuations; or the impact on local traffic patterns. Consequently, the railroad property damages have been multiplied by a factor of 1.5625 in an effort to capture some of these non-reported damages.¹

TABLE 1.—BRAKE-RELATED INCIDENTS

| Year | Number of accidents | Injuries | Fatalities | Damages * |
|-------------|---------------------|----------|------------|--------------|
| 1994 | 99 | 24 | 1 | \$11,414,346 |
| 1995 | 121 | 65 | 0 | 9,431,582 |
| 1996 | 112 | 44 | 3 | 20,637,986 |
| 1997 | 98 | 8 | 0 | 9,651,569 |
| 1998 | 121 | 3 | 0 | 10,791,626 |
| Total | 551 | 140 | 4 | 61,927,107 |

* Increased by 56.25% to reflect unreported damages.

2. Use of Power Brake Defect Data

A second factor that is considered by FRA, to some extent, in determining the relative condition of the industry in regard to the safety of power brake equipment is the percentage of equipment found with defective brakes during FRA inspections and special projects. As noted in the preceding discussions, the method for calculating and determining the percentage of equipment with defective brakes was a contentious subject within the RSAC Power Brake Working Group prior to the issuance of the NPRM and at the public hearings and meetings conducted subsequent to the issuance of the NPRM. In the NPRM, FRA provided a lengthy discussion regarding the data it had available regarding power brake defect ratios and the limitations regarding the use of such data. See 63 FR 48298. In that discussion, FRA explained that data on brake defects is collected by FRA inspectors as they do rail equipment inspections and during special projects conducted under the Safety Assurance and Compliance Program (SACP). The NPRM made clear that the data collected during these

activities is not suitable for use in any statistical analysis of brake defects.

In order to perform a statistically valid analysis, either all cars and locomotives must be inspected (prohibitively expensive), or a statistically valid sample must be collected. For the sample to be valid for the purpose of statistical analysis, the sample must be randomly selected so that it will represent the same characteristics as the universe of data. Random samples have several unique characteristics. They are unbiased, meaning that each unit has the same chance of being selected. Random samples are independent, or the selection of one unit has no influence on the selection of other units. Most statistical methods depend on independence and lack of bias. Without a randomized sample design there can be no dependable statistical analysis, and no way to measure sampling error, no matter how the data is modified. Random sampling "statistically guarantees" the accuracy of the results.

The sampling method used for regular FRA inspections is not random. It is more of a combination between a *judgement* sample and an opportunity sample. The opportunity sample

basically just takes the first sample population that comes along, while the judgement sample is based on "expert" opinion. The sampling method used for SACP inspections is also a judgement sample, where FRA is focusing its inspections on a specific safety concern. This method is extremely prone to bias, as FRA is typically investigating known problem areas. Furthermore, some SACP inspections are joint inspections with labor. Consequently, it is unknown whether the final reports reflect only FRA defects, as many of the joint inspections had both AAR and FRA defects recorded.

Neither the regular FRA inspections nor the SACP inspections were designed for random data collection. Although both are very useful to FRA, they were not designed for this purpose and the data should be used carefully. FRA believes that data collected during routine inspections are the most likely data to accurately reflect the condition of the fleet. However, both FRA inspection data and SACP data lack any measuring device, a defect is a defect and no distinction is made between a critical defect versus a minor defect. Furthermore, the estimated correlation coefficients between defects and

¹ AAR surveyed its members and reported that, on average, these other costs constitute an additional 56.25 percent of the reported damages.

accidents were not found to be statistically significant. This does not mean that defects cannot lead to collisions or derailments as the lack of correlation could easily be a result of non-random sampling. Therefore, the data collected both during routine FRA inspections and under SACP cannot be used as a proxy for data collected by means of a random sample for the purpose of statistical analysis. The sample is not random, so no dependable statistical analysis may be performed. Consequently, FRA did not and will not use the data regarding power brake defects for the purpose of conducting any type of statistical analysis.

In the NPRM, FRA provided brake defect ratio's for the years 1993 through 1997 based upon the data contained in its database. See 63 FR 48298, Table 2. The average brake defect ratio for this five year period was 3.84 percent. The NPRM also noted that the available SACP data (which focuses on known problem areas) indicated brake defect ratios as high as 35 percent at some locations. FRA stated that the SACP data in all likelihood indicates that there are localized areas of concern and that some railroads have particular yards or operations with persistent problems. The NPRM attempted to make clear that FRA believes that brake defects are in all likelihood higher than that indicated by FRA's database and that the reality of power brake defects lies somewhere between the 3.84 percent represented in FRA's database and the 35 percent found at certain locations. FRA noted that actual power brake defect ratios are probably closer to the percentage reflected in FRA's database because FRA examines almost 1/2 million freight cars and locomotives annually. Thus, contrary to the assertions of certain commenters, FRA did not assert or contend that the power brake defect ratios represented by its database were an accurate or precise reflection as to the relative condition of the industry. In fact, as evidenced by the preceding discussion, FRA attempted to point out the limited usefulness of the data contained in its database. Furthermore, review of the defect data submitted by the BRC at the technical conference in Walnut Creek, California, as discussed below, appears to support FRA's conclusions regarding power brake defect ratios.

The NPRM made clear that the power brake defect ratios indicated in FRA's database were specifically relied on only to calculate the cost of the requirement to conduct retests on cars found with brakes that are not applied during the performance of the various required brake tests. Power brake defect

ratios were not specifically relied on when developing any provision contained in the NPRM or in this final rule. Although power brake defect ratios were considered, they were not used as the basis for any of the provisions proposed in the NPRM or contained in this final rule. They were generally used to aid FRA in identifying problem areas, which in turn helped FRA identify brake issues and practices that needed to be addressed. For example, the existence of high power brake defect ratios at a particular location or on a particular railroad likely indicate the existence of certain practices or procedures that create or contribute to the high defect levels. As is evident from the discussions of the various requirements contained in both the NPRM and in this final rule, FRA considered a massive amount of information when developing this rule. These included accident/incident data; information and data provided in relation to the 1994 NPRM, the RSAC Power Brake Working Group, and the 1998 NPRM as well as FRA's experience in the enforcement of existing regulations and the expertise and knowledge of FRA's field inspectors.

Although the data regarding defect ratios contained in FRA's database has limited usefulness in the context of developing a regulation, the data is very useful to FRA in other ways. The data is useful in measuring a railroad's general compliance level and aids in identifying problem areas or locations. This information aids FRA in allocating its inspections forces and permits FRA to focus its enforcement on locations or issues which are in the greatest need of such scrutiny. By focusing its enforcement in this manner FRA is able to make the best use of its limited resources.

3. Discussion of Concerns Regarding FRA's Collection of Power Brake Defect Data

Although the NPRM and the preceding discussion detail the limitations of using the data collected by FRA regarding power brake defects when developing a regulation, FRA believes that a more detailed discussion of FRA's collection of power brake defect data is needed in order to address the issues raised by various commenters subsequent to the issuance of the NPRM. As noted above, FRA conducted a public meeting on May 27, 1999 in order to address general concerns raised by various parties regarding the accuracy of the brake defect data presented in the NPRM and to provide interested parties the opportunity to develop the issues they generally raised

in oral and written comments regarding that data. At this public meeting, representatives of several labor organizations raised issues regarding the accuracy and use of the power brake defect data compiled by FRA. These commenters generally allege that the method by which FRA collects defect data results in the underreporting of defects which in turn results in a systematic deflation of power brake defect ratios.

Specific issues raised at this public meeting and in subsequent written comments include: the overreporting of units inspected during FRA inspections; the calculation and deflation of the power brake defect ratio; the inspection procedures used by FRA that tend to exclude certain categories of power brake defects; potential discrepancies in the input data relative to the activity codes from FRA field inspection reports to FRA's database; the performance of power brake inspections by FRA inspectors on cars that are not properly charged or connected to a source of compressed air; FRA's reliance on the railroads for the total number of cars inspected; and the wide variance between FRA inspectors and FRA regions in the number of units inspected, the number of defects reported, and the resulting defect ratios.

In order to understand some of the issues raised, it is necessary to understand how inspection data developed by an FRA inspector are entered into FRA's database. FRA Motive Power & Equipment (MP&E) inspectors conduct inspections of railroad freight equipment pursuant to various parts of the Federal regulations contained in chapter 49 of the Code of Federal Regulations. Principally, these include inspections under the following: Part 215—Freight Car Safety Standards; part 229—Locomotive Safety Standards; part 231—Safety Appliance Standards; and part 232—Power Brakes and Drawbars. When performing an inspection under each of these parts, an FRA inspector will fill out the appropriate inspection form which indicates the number of units inspected under each part as well as the number of defective conditions found on those units. In the context of performing power brake inspections under part 232, an inspection of a car means a unit count of one. When this type of inspection is conducted, inspectors inspect various brake-related car components such as: Foundation brake rigging, air hoses, angle cocks, brake shoes, and, where possible, piston travel. When an inspector performs an inspection of a brake test required under part 232, the unit count for such a test

is the train consist, block of cars, or car being tested. For example, when an inspector observes the performance of an initial terminal brake test, the entire train would constitute one unit count.

Certain labor representatives raised various issues regarding FRA's calculation of power brake defect ratios. Several of these concerns involve the potential overreporting of the number of units inspected which then results in the deflation of power brake defect ratios. One concern addressed the practice of counting a single car or locomotive as a unit count under each of the MP&E regulations that it is inspected under. For example, a freight car could be considered a unit count under part 215, part 231, and part 232 if an FRA inspector were to inspect that freight car under each of those provisions. Thus, one freight car could

be represented as three unit counts. It is claimed that this practice inflates the number of units inspected and thus, deflates defect ratios. This concern would be valid if FRA were to attempt to express a defect ratio for combined parts of the CFR. For example, if FRA were to attempt to express an MP&E defect ratio (a combination of parts 215, 229, 231, and 232) then the method by which FRA collects data would result in an inflation of the number of units inspected and the resulting defect ratio would be skewed. For purposes of analysis, FRA's database is constructed so that defect ratios are expressed only in terms of each separate part of the CFR. Therefore, the power brake defect ratios discussed in the NPRM were calculated based solely on the units inspected by FRA under the provisions contained in part 232.

A second concern involves the potential of duplicate inspection reports being submitted by different FRA inspectors when engaged in team inspections. Certain labor representatives allege that FRA inspectors are significantly inflating the number of power brake units being inspected by submitting duplicate reports for the same inspection activity when groups of FRA inspectors perform inspections at the same location. In an effort to investigate this concern, FRA designed a computer program to search for potentially duplicate inspection reports submitted during the years of 1995 through 1998. Table 2 displays the figures regarding power brake inspections conducted by FRA for the years of 1995 through 1998 that is contained in FRA's database.

TABLE 2.—POWER BRAKE INSPECTIONS AND DEFECT RATIOS: 1995 THROUGH 1998*

| Calendar year | Power brake units | Power brake defective units | All railroads power brake defect ratios | Class I RRs power brake defect ratios |
|---------------|-------------------|-----------------------------|---|---------------------------------------|
| 1995 | 611,824 | 24,387 | .03986 | .0369 |
| 1996 | 646,140 | 28,795 | .04456 | .0419 |
| 1997 | 582,685 | 26,004 | .04463 | .045 |
| 1998 | 585,663 | 26,286 | .04488 | N/A |

*Note: Class I Railroads Power Brake Defect Ratios column information comes from the Regulatory Impact Analysis (RIA) for the 1998 NPRM on freight power brakes. No defect ratio was used in the report for calendar year 1998 because the RIA was finalized in August of 1998.

In order to identify potential duplicate reports the computer program identified inspection reports in which two or more FRA inspectors were in the same county, on the same day, on the same railroad, and in which at least one unit-count code matched. Table 3 displays the results of this search, showing the number of potential duplicate reports that were submitted from 1995 through 1998 and showing the potential number of over reported units.

TABLE 3.—POTENTIAL DUPLICATE POWER BRAKE INSPECTIONS 1995 THROUGH 1998

| Calendar year | Inspection reports with more than one matching unit | Units | Potential duplicate units (half of units) |
|---------------|---|--------|---|
| 1995 | 39 | 1,965 | 983 |
| 1996 | 154 | 12,646 | 6,323 |
| 1997 | 342 | 19,482 | 9,741 |
| 1998 | 182 | 8,692 | 4,346 |

Table 4 and Table 5 display the impact of the potential duplicate reports on the calculation of power brake defect ratios. FRA believes that the data contained in Tables 4 and Table 5 establish that the impact of potential duplicate reports on the defect ratios presented in the NPRM is insignificant when considered in the context of nationwide data.

TABLE 4.—REVISED POWER BRAKE DATA CONSIDERING POTENTIAL DUPLICATE REPORTS 1995 THROUGH 1998

| Calendar year | Power brake units | Potential duplicate units | Units minus potential duplicate units | Defective units | Defect ratios after adjusting for potential duplicate units |
|---------------|-------------------|---------------------------|---------------------------------------|-----------------|---|
| 1995 | 611,824 | 983 | 610,841 | 24,387 | .03992 |
| 1996 | 646,140 | 6,323 | 639,817 | 28,795 | .04501 |
| 1997 | 582,685 | 9,741 | 572,944 | 26,004 | .04539 |
| 1998 | 585,663 | 4,346 | 581,317 | 26,286 | .04522 |

TABLE 5.—AFFECT OF POTENTIAL DUPLICATE REPORTS ON POWER BRAKE DEFECT RATIOS 1995 THROUGH 1998

| Calendar year | Defect ratios before adjustment | Defect ratios after adjustment | Difference |
|---------------|---------------------------------|--------------------------------|------------|
| 1995 | .03986 | .03992 | .00006 |
| 1996 | .04456 | .04501 | .00045 |
| 1997 | .04463 | .04539 | .00076 |
| 1998 | .04488 | .04522 | .00034 |

It should be noted that the numbers presented in Tables 3 through Table 5 overstate the actual impact of potential duplicate inspection reports. For the year 1998, FRA conducted an in-depth analysis of the potential duplicate reports found by the computer program. The computer program identified 393 potential duplicate inspection reports for the year 1998. However, included in this grouping were unique inbound inspection reports, outbound inspection reports and split inspection reports. In addition, there were inspection reports from inspectors who worked in the same county, but at different locations. Each of these reports was removed from the 393 potentially duplicate inspection reports identified by the computer program based on a report-by-report analysis of each of the reports by FRA MP&E specialists. This analysis left 182 potential duplicate reports for 1998, which were used to calculate the figures presented in Tables 3 through 5 for 1998. Although these tables note 182 potential duplicate inspection reports involving 8,692 units (4,346 duplicates), a further analysis of the reports by FRA found that only 54 of the inspection reports were actually found to be duplicative. These 54 duplicate inspection reports involved the over-reporting of just 3,073 units rather than the 4,346 units identified in Table 4. As an in-depth analysis was not performed on the potential duplicate inspection reports identified by the computer program for the years of 1995 through 1997, the figures provided for those years in all likelihood greatly overstate the actual number of duplicate claims submitted in each of those years. Thus, the actual impact of duplicate inspection reports is even less than the small percentages indicated in Table 5 above.

Although the impact of duplicate inspection reports is insignificant, FRA believes that a brief discussion of how these duplicate inspection reports happened is necessary in order to assure interested parties that such occurrences are rare and that FRA has taken steps to avoid these inaccuracies. In 1994, FRA had four inspection forms for the Agency's five inspection disciplines.

The Operating Practices and Hazardous Materials disciplines shared the same form. FRA also had a Quality Improvement Plan (QIP) daily activity report form to help the Agency track resource allocations, including the amount of time required to perform certain inspections. When "team inspections" occurred, one inspector completed the inspection report for the entire team. However, each inspector on the team was also required to complete a separate QIP report to receive credit for the inspection. On January 1, 1995, a newly developed single inspection form (FRA 6180.96) for all disciplines became operational. Furthermore, in May of 1995, FRA discontinued the collection of QIP-time data based on FRA's conclusion that it had adequate information from previous QIP reports regarding the time it takes to conduct various inspections. In addition, the new inspection form incorporated many of the previous QIP codes. In August 1995, FRA converted to a data collection system using personal computers.

After conducting the analysis discussed above, it was determined that 26 FRA MP&E inspectors inadvertently prepared all of the involved duplicate inspection reports. Furthermore, FRA was not aware that the new computer system did not filter out duplicate inspection reports. After becoming aware of these problems based on reports from its field personnel, FRA specifically addressed the issue of inspection reporting at FRA's multi-regional conference conducted in 1998. At this conference, FRA's Office of Safety management provided specific guidance on preparing reports that would eliminate potential duplicate reporting. During this same period, FRA also changed its computer software to give inspectors credit for inspections while at the same time preventing potential duplicate reporting. Furthermore, on March 5, 1999, FRA re-issued reporting procedures designed to prevent duplicate inspection reports when team inspections are conducted. These procedures were issued to all Federal and State inspection personnel and to all FRA Regional Administrators and Deputy Regional Administrators.

Subsequent to the public meeting conducted in May of 1999, FRA made two modifications to the summary data produced by its database in order to clarify the meaning of the data and to avoid misunderstanding by outside parties. The first modification relates to safety appliance inspections conducted under 49 CFR part 231. The summary data previously contained the heading "SA & PB (cars and locomotives)." This heading may have caused some confusion because the heading suggests that it applies to both safety appliance and power brake inspections when in reality the data captured under this heading only concerns safety appliance inspections under part 231. This heading has been modified to read "SA (cars and locomotives)" to more accurately reflect the information contained under this heading. FRA has also modified the summary data by eliminating the calculation of an MP&E defect ratio. As discussed above, FRA believes that the calculation of a composite MP&E defect ratio is inappropriate based on the way FRA collects the information contained in its database and would result in a deflation of MP&E defect ratios. Therefore, defect ratios will only be presented for each separate MP&E CFR part.

In response to the issue raised regarding FRA's practice of conducting brake inspections under part 232 while cars are not connected to a source of compressed air or not completely charged with air, FRA has developed a separate reporting code for brake inspections conducted in this manner. This reporting code will become effective in mid-2000 and will indicate when brake inspections are conducted on cars or trains that are not charged with compressed air. Although FRA agrees that the most thorough brake inspection is performed when a car or train is charged, a large majority of the brake components on a car can be inspected for abnormalities without the actual application of the air brakes. For example, cut-out air brakes, brake connection pins missing, brake rigging down or dragging, brake shoes worn to the extent that the backing plate comes in contact with the tread of the wheel,

angle cocks missing or broken, retainer valves broken or missing, and air brake piping bent or broken can all be discovered regardless of whether a car or train is charged with air. When FRA inspectors conduct train air brake tests, they inspect all of the components noted above as well as the operation of the train air brakes while under the required air pressures. FRA has conducted inspections of brake equipment in this manner for decades and will continue to conduct brake inspections under part 232 on equipment that is both on and off a source of compressed air. FRA believes that the addition of a code to identify those inspections conducted while equipment is not connected to a source of compressed air will provide a more accurate assessment of defective brake system components.

Two other issues raised by various individuals at the May 27, 1999, public meeting concerned FRA's reliance on railroads to determine the number of cars inspected and the wide disparity between FRA inspectors and regions with regard to the number of units inspected and defects reported. FRA acknowledges that FRA inspectors frequently rely on information provided by the railroad regarding car counts when initially conducting an inspection, which is sometimes higher than the actual number of cars being inspected. However, in most instances FRA inspectors request a copy of the consist prior to finalizing their inspection reports to ensure a proper unit count. FRA has issued guidance to its inspectors to ensure that the unit counts on all inspections are accurate.

Although FRA acknowledges that the number of brake inspections conducted varies somewhat from inspector to inspector and from region to region, FRA contends that these variances are the result of competing priorities and varying workloads within each region. FRA makes every effort to standardize

its inspection activities by providing substantial training to each of its inspectors. This training is comprised of both classroom and on-the-job training. Classroom training conducted at least once a year at the Regional or Multi-Regional conferences, and through training provided by General Electric, General Motors-EMD, and Westinghouse Air Brake Company. Many regions also conduct discipline specific conferences with training on new regulations and issues provided by various subject matter experts. On-the-job training is provided through Regional Specialists and journeyman inspectors. These individuals will work one-on-one with the inspectors on the various types of inspections that the inspector is required to conduct. FRA also frequently issues enforcement guidance to its inspectors in the form of technical bulletins in order to ensure consistent enforcement of the regulations.

4. Review of Defect Data Submitted by the Brotherhood of Railway Carmen (BRC)

After issuance of the 1998 NPRM, FRA conducted a technical conference in Walnut Creek, California, on November 23 and 24, 1998. At this technical conference individuals representing the BRC submitted a vast amount of data collected either by its members at various locations or through joint labor and FRA inspection activities conducted at various locations. The data provided by BRC representatives addressed defective equipment found in various trains at seven different locations across the country during various time periods from October of 1997 to November of 1998. The BRC submitted this data in order to establish that the power brake defect ratios developed based on the information contained in FRA's database were inaccurate.

FRA conducted an in-depth review of the data submitted by BRC representatives. Although the BRC

attempted to summarize the data for many of the locations addressed, FRA's review of the data discovered that the BRC's summaries counted defects that were not power brake defects, failed to summarize all the data for all the trains covered by the supporting documentation, and double counted some brake defects when calculating the number of defective cars. It should also be noted that approximately 80–90 percent of the defective conditions noted on the supporting documentation merely listed the defective condition as being "brake shoes." This notation does not make clear whether the defective brake shoe was defective under the federal regulations or defective under AAR industry standards. However, in order to assess the data in a manner that is most favorable to the party submitting the data, FRA assumed that all defects noted as "brake shoes" were defective under Federal requirements. In conducting its analysis of the data submitted, FRA only considered power brake defects, whereas, BRC's summary data appear to consider other mechanical and safety appliance defects which are not the subject of this proceeding.

Table 6 contains a summary of FRA's in-depth analysis of the data submitted. FRA's analysis determined that the data submitted by the BRC establish a power brake defect ratio of approximately 4.96 percent, which is less than 1 percent higher than the power brake defect ratios developed based on the information contained in FRA's database for the years of 1996 and 1997, discussed in the 1998 NPRM. See 63 FR 48298. The analysis of the data submitted by the BRC indicates that some locations and some trains have power brake defect ratios in excess of 11 and 12 percent, which is consistent with the findings made and reported by FRA during various SACP inspections as noted in the preceding discussion and in the 1998 NPRM.

TABLE 6.—ANALYSIS OF DEFECT DATA SUBMITTED BY THE BRC

| Location | Total trains inspected | Total cars inspected | Cars with power brake defect | Power brake defect ratio (percent) |
|--|------------------------|----------------------|------------------------------|------------------------------------|
| North Platte, Nebraska | 1,625 | 150,926 | 8,136 | 5.39 |
| Hinkle Yard, Oregon | 151 | 13,455 | 425 | 3.15 |
| Oak Island-Newark, New Jersey | 13 | 618 | 72 | 11.65 |
| Kansas City, Missouri | 180 | 11,917 | 159 | 1.33 |
| Clovis, Alliance, Temple Yards—Texas | 16 | 1,419 | 41 | 2.88 |
| Sparks Yard—Sacramento, California | 8 | 781 | 30 | 3.84 |
| Various Locations, Mississippi | 4 | 296 | 37 | 12.5 |
| Totals | 1,997 | 179,412 | 8,900 | 4.96 |

B. Inspection and Testing Requirements

As noted in the preceding discussions and in the 1998 NPRM, the issues related to the inspection and testing of the brake equipment on freight trains are some of the most complex and sensitive issues with which FRA deals on a daily basis. Consequently, the requirements related to the inspection and testing of freight power brakes must be viewed as the foundation on which the rest of the requirement contained in this final rule are based.

1. Brake Inspections—General

In the 1998 NPRM, FRA fully discussed the information and proposals submitted in response to the 1994 NPRM, as well as the proposals developed as part of the RSAC process. See 63 FR 48298–304 (September 9, 1998). Based on its review of that information and those proposals and based upon its experience in the enforcement of the current power brake regulations, FRA provided a detailed discussion as to why those alternatives were not viable models upon which a revision of the freight power brake requirements could be based. See 63 FR 48301–304. Rather than reiterate those discussions, FRA refers interested parties to the discussions contained in the 1998 NPRM noted above. In developing the inspection requirements contained in the NPRM, FRA determined that the proposed requirements should closely track the existing inspection requirements and intervals as they have proven themselves effective in ensuring the safety of railroad operations. FRA believed that moderate modifications to the existing requirements were necessary to ensure clarity, eliminate potential loopholes, incorporate current best practices of the industry, and enhance enforcement while providing some flexibility to the railroads to utilize new technologies and recognize contemporary railroad operations.

The current regulations are primarily designed around the following four different types of brake system inspections: Initial terminal; 1,000-mile; intermediate terminal; and brake pipe continuity check. See 49 CFR 232.12 and 232.13. These brake system inspections differ in complexity and detail based on the location of the train or on some event that affects the composition of the train. Each of the inspection provisions details specific actions that are to be performed and identifies the items that are to be observed by the person performing the inspection.

The initial terminal inspection described in § 232.12(c)–(j) is intended to be a comprehensive inspection of the brake equipment and is primarily required to be performed at the location where a train is originally assembled. This inspection requires the performance of a leakage test and an in-depth inspection of the brake equipment to ensure that it is properly secure and does not bind or foul. Piston travel must be checked during these inspections and must be adjusted to a specified length if found not to be within a certain range of movement. The brakes must also be inspected to ensure that they apply and release in response to a specified brake pipe reduction and increase. FRA recently issued enforcement guidance to its field inspectors clarifying that both sides of a car must be observed sometime during the inspection process in order to verify the condition of the brake equipment as required when performing an initial terminal inspection.

The current regulations require an intermediate brake inspection at points not more than 1,000 miles apart. These inspections are far more limited than the currently required initial terminal inspections in that the railroad is required only to determine that brake pipe leakage is not excessive, the brakes apply on each car, and the brake rigging is secure and does not bind or foul. See 49 CFR 232.12(b). In the 1982 revisions to the power brake rules, FRA extended the distance between these inspections from 500 miles to 1,000 miles.

The existing regulations also mandate the performance of an intermediate terminal brake inspection on all cars added to a train after it leaves its initial terminal, en route to its destination, unless they have been previously given an initial terminal inspection. This inspection requires the performance of a leakage test and verification that the brakes on each car added to the train and the rear car of the train apply and release. See 49 CFR 232.13(d). Railroads are permitted to use a gauge or device at the rear of the train to verify changes in brake pipe pressure in lieu of performing an application and release on the rear car. The current regulations also require that if cars that are given an intermediate terminal brake inspection and have not previously been provided an initial terminal inspection and are then added to a train, then the added cars must be given an initial terminal inspection at the next location where facilities are available for performing such an inspection.

The current regulations also require the performance of a brake pipe continuity test whenever minor changes

to a train consist occur. This inspection requires that a brake pipe reduction be made and verification that the brakes on the rear car apply and release. Railroads are permitted to use a gauge or device at the rear of the train to verify changes in brake pipe pressure in lieu of visually verifying the rear car application and release. This inspection is to be performed when a locomotive or caboose is changed, when one or more consecutive cars are removed from the train, and when previously tested cars are added to a train.

In the 1998 NPRM, FRA noted that in its opinion railroads have not conducted the excellent initial terminal inspections that were contemplated in 1982, when FRA extended the 500-mile inspection interval to 1,000 miles. FRA also contended that many initial terminal brake inspections are being performed by individuals who are not sufficiently qualified or trained to perform the task. FRA recognized that since 1982 new technology and improved equipment have been developed that allow trains to operate for longer distances with fewer defects. However, the key to achieving this improved capability is to ensure the proper operation and condition of the equipment at the location where the train is initially assembled.

Although FRA agreed that many of the initial terminal inspections conducted by train crews are not of the quality anticipated in 1982 when the inspection interval was increased from 500 miles to 1,000 miles, FRA also conceded that properly trained and qualified train crew personnel can perform certain brake inspections and have been performing such inspections for many years. FRA stated that it did not believe that a reversion to a 500-mile inspection interval restriction on trains inspected by train crews, as sought by some commenters, would adequately address the concerns regarding the safety of those trains and would impose an economic burden on the railroads that could not be justified. In FRA's view, two of the major factors in ensuring the quality of brake inspections are the proper training of the persons performing the inspections and adequate enforcement of the requirements. Therefore, FRA proposed that the current 1,000-mile inspection interval be retained but that general training requirements for persons conducting brake inspections be established. The proposed training requirements included general provisions requiring both classroom and "hands-on" training, general testing requirements, and annual refresher training provisions. FRA also proposed that various training records be

maintained by the railroads in order for FRA to determine the basis for a railroad's determination that a particular person is qualified to perform a brake inspection, test, or repair. FRA believed that the proposed general training and recordkeeping requirements would provide some assurances that qualified people were conducting brake system inspections and tests. (See discussion below titled "Training and Qualification of Personnel.")

In addition to proposing general training requirements, FRA also noted its intent to enhance and increase its enforcement activities with regard to the performance of the brake inspections and tests eventually finalized in this rule, particularly those performed by train crews. FRA made clear that it would make a concerted effort to focus on the qualifications of train crew members and would strictly scrutinize the method and length of time spent by these individuals in the performance of the required inspections. FRA also committed to focus its inspection activities to ensure that train crews are provided the proper equipment necessary to perform many of the required inspections.

In addition to focusing its enforcement and to aid in that initiative, FRA proposed various clarifications, modernizations, and modifications of the current inspection requirements in order to close what are perceived to be existing loopholes and to incorporate what FRA believed to be the best practices existing in the industry while updating the requirements to recognize existing technology. FRA believed, and many representatives of rail labor and management agreed, that the current inspection requirements are very good for the most part and are sufficient to ensure a high level of safety, but that they need to be strictly enforced, clarified, and updated to recognize existing and new technology. Therefore, as noted above, FRA did not propose an extensive revision of the basic brake inspection intervals or requirements. Rather, FRA proposed a moderate revision of the requirements, with the intent of tightening, expanding, or clarifying those inspection or testing requirements that have created enforcement problems or inconsistencies in the past. FRA recognized some of the technological improvements made in the industry such as the use of two-way EOTs during the brake tests and use of the air flow method of qualifying train air brake systems. FRA also recognized that some trains are capable of moving extended distances between inspections provided

that comprehensive inspections are performed at the locations where the trains are originated. (See discussion below titled "Extended Haul Trains.")

In order to clarify the requirements regarding where and when various brake inspections and tests were to be performed, FRA proposed modification of the terminology related to the power brake inspection and testing requirements contained in the current regulations, which is generally based on the locations where the inspections and tests must be performed (e.g., "initial terminal" and "intermediate terminal"). Instead, FRA proposed various "classes" of inspections based on the duties and type of inspection required, such as: Class I; Class IA; and Class II. This is similar to the approach taken by FRA in the 1994 NPRM and in the final rule on passenger equipment safety standards. See 64 FR 25682–83. FRA believed that this type of classification system would avoid some of the confusion that currently arises regarding when and where a certain brake inspection must be performed.

Currently, the brake system inspection and testing requirements are interspersed within §§ 232.12 and 232.13 and are not clearly delineated. Therefore, FRA proposed a reorganization of the major types of brake inspections into separate and distinct sections in order to provide the regulated community with a better understanding as to when and where each inspection or test would be required. Although FRA proposed a change in the terminology used to describe the various power brake inspections and tests, the requirements of these inspections and tests mirrored the current requirements and were not intended to change or modify any of the voluminous case law that had been developed over the years regarding the inspections. Consequently, FRA proposed four different types of brake inspections that were to be performed by freight railroads some time during the operation of the equipment. FRA proposed the terms "Class I," "Class IA," "Class II," and "Class III" to identify the four major types of brake inspections required by this proposal.

The proposed Class I brake test, currently known as the "initial terminal" test, generally contained the requirements currently contained in § 232.12(a) and (c)–(j). See 63 FR 48362–63. The requirements were reorganized to clearly delineate when and how the inspection was to be performed based on current interpretations and comments received since the 1994 NPRM. The requirements were also modified to require written notification

that the test was performed and that the notification was to be retained in the train until it reached its destination. The proposed revisions also acknowledged the use of the air flow method for qualifying train brake systems and permitted the use of end-of-train devices in the performance of the test. The proposal also provided some latitude to trains received in interchange that had a pre-tested car or solid block of cars added at the interchange point or that were to be moved less than 20 miles after being received in interchange by permitting these types of trains to continue without the performance of a comprehensive Class I brake test.

The proposed Class IA brake test clarified the requirements for performing 1,000-mile brake inspections currently contained in § 232.12(b). See 63 FR 48363. The proposal made clear that the most restrictive car or block of cars in the train would determine when the inspection was to be performed on the entire train. FRA also proposed that railroads designate the locations where these inspections would be conducted and did not permit a change in those designations without 30-day notice to FRA or the occurrence of an emergency situation. The proposed Class II and Class III brake tests essentially clarified the intermediate terminal inspection requirements currently contained in § 232.13(c) and (d) regarding the performance of brake system inspections when cars were added to the train en route or when the train consist was slightly altered en route. See 63 FR 48364.

In addition to the modifications and clarifications proposed with regard to the four major types of brake system inspections, FRA's proposal also retained, with clarification and elaboration, the basic inspection requirements related to transfer trains currently contained at § 232.13(e) as well as the requirements for performing brake system inspections using yard air sources currently contained at § 232.12(i). See 63 FR 48365. The proposal also retained the requirements related to the inspection and testing of locomotives when used in double heading and helper service currently contained at § 232.15 and proposed additional inspection requirements of locomotives when used in helper service or in distributed power operations to ensure the proper functioning of the brakes on these locomotives as these types of inspections are not adequately addressed in the existing regulation. See 63 FR 48365. Furthermore, the proposal recognized that trains, if properly inspected, could safely travel greater

than 1,000 miles between brake inspections. (See discussion below titled "Extended Haul Trains.")

FRA received numerous comments in response to the 1998 NPRM from representatives of rail labor and rail management, various private car owners, the NTSB, manufacturers of rail equipment, and one state public utility commission relating to these proposed provisions. These individuals and representatives submitted comments addressing the qualifications of individuals conducting the proposed inspections, the methods by which the proposed inspections are to be conducted, the frequency with which the proposed inspections should be required, and various other specific aspects of the language used in the proposed inspection requirements.

Several labor representatives objected to the proposed change in the names of the specific required inspections. These commenters believe that the proposed new terminology of Class I, Class IA, Class II, and Class III would result in a number of problems including confusion among those individuals responsible for performing the inspections as the existing terminology has been used for decades, imposition of additional training costs on the railroads as workers will need to be reeducated, and the risk of upsetting years of case law dealing with the various inspections.

Certain labor representatives also objected to the language used in connection to the proposed inspections that would permit a qualified person to perform many of the required inspections. Various labor organizations and their representatives reiterated their concerns that such an approach would continue to allow untrained and unqualified train crew personnel to perform the required inspections. These commenters continued to assert that FRA should mandate that carmen, or persons similarly trained and experienced, perform all of the required brake inspections except for the cursory train line continuity inspections covered by the proposed Class III brake test. It is their belief that only carmen possess the necessary training, skill, and experience to properly perform the other brake inspections contained in the proposal. These commenters contend that FRA is ignoring the commitment made by rail management in 1982, when the regulations were revised to permit trains to travel up to 1,000 miles between brake inspections, to conduct high quality inspections at a train's initial terminal. They contend that the 1982 revisions were intended to require that these brake inspections be

performed only by carmen. Several labor representatives also contend that since the railroads have failed to live up to the commitment made in 1982, to conduct high quality initial terminal inspections, that FRA should reconsider its proposals to permit trains to travel 1,000 miles or more between brake inspections. These commenters recommended that FRA reduce the inspection interval to 500 miles.

Conversely, representatives of rail management and private car owners suggest that FRA failed to adequately consider the industry's safety record in proposing the inspection requirements. Several of these commenters recommended that FRA reconsider performance standards similar to those provided by the AAR in response to the 1994 NPRM. See 63 FR 48300. These individuals assert that based upon the industry's excellent safety record there is no need for the command and control type of regulations proposed in the 1998 NPRM. Several railroad representatives also commented that the proposed training requirements for designating an individual as a qualified person are onerous and not justified in light of the industry's safety record. They contend that the industry's safety record is evidence of the sufficiency of the training currently provided to its inspection forces. (See discussion below regarding the "Training and Qualification of Personnel.")

Many railroad and private car owner representatives also contend that there is no justification for continuance of the 1,000-mile inspection requirement. They contend that if a car is properly inspected at its point of origin it can be safely moved to destination and that very few cars are found defective at 1000-mile inspections. As support for these contentions, they cite to various studies, which included: a 1994 study conducted by the Illinois Institute of Technology Research Institute, which concluded that brake shoes could last up to 4,000 miles; a 1993 study conducted by BNSF at Havre, Montana, which found that less than 1/3 of 1 percent of the cars inspected at 1,000 miles had any kind of brake defect; and data submitted in 1985 by the AAR related to cars operating 3,000 miles between brake inspections. These commenters also rely on the fact that Canada eliminated its intermediate brake inspection requirement in 1994. Consequently, these commenters contend that the 1,000-mile inspection serves no useful purpose from a safety standpoint, creates unnecessary delays, and should be eliminated.

Commenters representing certain labor organizations also recommended

that FRA establish step-by-step procedures for conducting the proposed inspections which specifically include a requirement that both sides of a train be given a walking inspection during both the set and the release of the brakes. These commenters contend that the language proposed in the 1998 NPRM regarding the inspection of both sides of a train is unclear and creates uncertainty as to how a proper inspection is to be conducted. They further recommend that roll-by inspections of the brake release not be permitted and that a walking inspection of the release be required. They also object to the proposed requirement permitting the use of an end-of-train device in lieu of a visual inspection of the pressure at the rear car in the train or in lieu of a set and release on such car as such a practice does not ensure actual application and release of that rear car.

Representatives of railroads and private car owners also believe that FRA should clarify the method by which certain inspections are to be performed. However, these commenters seek to clarify that both sides of the equipment do not have to be inspected during either the application or release of the brakes when conducting a Class I brake test and that both sides of the equipment do not have to be inspected when conducting Class IA brake tests. They contend that there is no reason to observe both sides of the equipment during either the set or release as long as the brake rigging and equipment is inspected to ensure it is in proper condition prior to or at the same time that the application or release of the brakes is conducted. If the brakes are applied or released on one side of the equipment then, due to the design of the equipment, the brakes on the other side of the equipment will be similarly applied or released in virtually every instance. Therefore, it is contended that there is no justification to require observation of the set and release from each side of the equipment. These commenters also contend that FRA needs to clarify that both sides of the equipment do not need to be observed during the performance of a Class IA inspection. They assert that such a requirement would be contrary to the current 1,000-mile inspection requirements and would increase the burden on railroads when conducting this inspection.

The CAPUC submitted comments on the proposed inspection requirements recommending that each side of the car be inspected during both the application and release of the brakes. This commenter also recommend that FRA

require the proposed Class I brake tests to be performed by individuals designated as "qualified mechanical inspectors" pursuant to the proposal. The CAPUC believes that only these individuals possess sufficient knowledge and ability to adequately perform the inspection. The NTSB also submitted comments on the proposed inspection requirements suggesting that FRA modify the requirements regarding the pressure at which trains are tested to require that trains be tested at the pressure at which they will be operated. The NTSB believes that such a requirement would preclude attempts to qualify trains that have excessive leakage by testing them at a pressure that is lower than the train's operating pressure and thus, lower the amount of leakage that exists on the train.

Some labor commenters again objected to FRA's inclusion of the air flow method as an alternative to the leakage test when qualifying a train's brake system. They contend that the air flow method disguises serious leaks and allows greater leakage in a train's brake system than the currently required leakage test. The AAR and other railroad representatives endorsed the allowance of the air flow method as an alternative to the leakage test for qualifying a train's brake system. They believe that the air flow method is superior to the leakage test and is an appropriate alternative for all trains, regardless of length, provided the 15 psi brake pipe gradient is maintained.

Certain labor representatives expressed concern over the proposed provision permitting yard air tests to be conducted at a pressure that is lower than the operating pressure of the train. These commenters suggested that such a practice could permit trains to depart with excess leakage since the required leakage test would be performed at the lower pressure and thus, mask the potential leakage of the train. The AAR and some of its member railroads also expressed concern regarding the proposed requirements related to the performance of brake tests using yard air. These commenters objected to the requirement that brake tests performed with yard air be performed at 80 psi. They recommended that such test be permitted to be performed at 60 psi as currently required because the proposal permits yard and transfer trains to operate at such pressure and that to test at higher pressure creates the potential for overcharge conditions. They also argue the practical difficulties of an 80 psi requirement in that many older yard plants and rental compressors are not capable of supplying 80 psi of air pressure. These commenters further

contend that FRA should permit yard air to be connected to other than the front of the consist provided that procedures are taken to prevent overcharge conditions. The commenters also provided recommended language to clarify the calibration requirements for devices and gauges used to conduct yard air brake tests.

Several labor representatives also commented on the proposed written notification requirement related to the performance of Class I brake tests. These commenters supported the written notification requirement and recommended that the information remain with the train if the motive power is changed. One labor organization also recommended that the proposed requirements related to the designation of 1,000-mile inspections are insufficient. This commenter recommended that the designation be filed with FRA and that the designations specifically identify the trains that will be inspected at each location. Representatives of rail management objected to the proposed requirement that locomotive engineers be notified in writing by a person performing the test as to the successful completion of a Class I brake test. These commenters did not object to notifying the locomotive engineer of the results of the test but believe that the notification could be provided orally or electronically by a person with knowledge of the test as long as the locomotive engineer made a record of the notification and necessary information. These commenters also sought clarification of the proposed requirements regarding the designation of locations where 1,000-mile inspections would be conducted. These commenters did not object to the designation requirement provided that it is not required on a train by train basis. They contend that to require that specific trains have 1,000-mile inspections performed at specific locations would create substantial burdens and would eliminate flexibility needed to operate trains in a timely and efficient manner.

The AAR and other railroad commenters also raised concern over the requirement that trains in captive service be required to receive a Class I brake test every 3,000 miles. They recommended that a train of this type that travels in excess of 3,000 miles between cycles be permitted to complete its cycle prior to receiving a Class I brake test. They contend that to require a Class I brake test on these types of cycle trains on a 3,000 mile basis will require the reallocation of manpower and equipment to locations

not currently equipped to perform such inspections.

Several railroad representatives also objected to the definition of "solid block of cars" contained in the proposal. This definition is important because FRA proposed that if more than a solid block of cars is removed from or added to a train, the entire train would have to receive a Class I brake test. As the proposed definition limits a "solid block of cars" to a group of cars that are removed from only one other train and that remain coupled together, these commenters contend that the definition is much more restrictive than the current interpretation of the language and would significantly increase the need to perform Class I brake tests. These commenters contend that the current interpretation of the language permits a "solid block of cars" to be made up of cars from several different trains provided the block of cars is added to a train as one unit without triggering the requirement to perform a new initial terminal brake test on the entire train. These commenters also noted that a literal reading of the proposed provisions for when a Class I brake test would be required does not allow a railroad to remove defective equipment without triggering a Class I brake test on the entire train. They contend that this authority needs to be recognized and is currently permitted.

FRA Conclusions. After consideration of the comments submitted and based upon its experience in the enforcement of the current power brake regulations, FRA continues to believe that the general approach to brake inspections contained in the 1998 NPRM represents the most effective method of ensuring the continued safety and proper operation of brake systems currently used in the railroad industry without creating an unnecessary burden to the railroads. Therefore, the final rule is a moderate revision of the current inspection requirements, similar to that proposed, with certain minor changes made to address the comments and recommendations submitted on the NPRM.

The final rule adopts the proposed classifications identifying the various types of brake inspections based on the duties and tasks that are required to be performed. These include: Class I; Class IA; Class II; and Class III brake tests. Contrary to the contentions of some commenters, FRA does not believe that this classification of the brake inspections in any way impacts previous case law regarding the various inspections. Although the final rule changes the terminology used to describe the various brake inspections,

the underlying inspection requirements have remained generally consistent with the existing requirements, and the final rule is not intended to change or modify any of the voluminous case law that has developed over the years regarding the inspections. Furthermore, the final rule retains the monikers that have traditionally been attached to the various inspections so as to limit any confusion that may exist. For example, the section containing the requirements for conducting Class I brake tests is entitled, "Class I brake test-initial terminal inspection." FRA believes that the classifications proposed in the NPRM and retained in this final rule clearly delineate what is required at each inspection, better clarify when each inspection is to be performed, and avoid the potential confusion caused by the terminology used in the present regulations.

As discussed in detail in the 1998 NPRM, FRA continues to believe that the performance standard recommended by the AAR in response to the 1994 NPRM and suggested again by some commenters does not provide a viable method for establishing the frequency of brake inspections. *See* 63 FR 48301-02. The performance standard proposed by the AAR is based upon the number of mechanically-caused accidents per million train miles. Therefore, the standard is based upon the rate of occurrence of accidents—accident history—rather than on a factor that could measure a railroad's performance prior to an accident occurring. The suggested performance standard would also be very difficult to calculate on a railroad-by-railroad basis, and the standard itself is a very subjective factor as many accidents are due to a variety of causes only a part of which may be a mechanical or brake-related cause. Thus, the determination of what constitutes a mechanically-caused accident would be difficult if not impossible to make in some circumstances and would be a determination made by the railroad; thus, opening the potential for data manipulation. FRA also notes that the AAR's performance standard contains certain provisions that are contrary to existing statutory requirements regarding the movement of defective equipment.

The final rule retains the requirement to perform 1,000-mile brake inspections as proposed with a few minor revisions discussed below and in the section-by-section analysis of that section. Although FRA agrees that many of the initial terminal brake inspections currently conducted by train crews and other personnel are not of the quality

anticipated in 1982, when the inspection interval was increased from 500 miles to 1,000 miles, FRA continues to believe that properly trained and qualified train crew personnel can perform most of the inspections required by this final rule and have been performing such inspections for many years. Furthermore, FRA continues to believe that a reversion to a 500-mile inspection interval on trains inspected by train crews, as suggested by some commenters, does not address the concerns regarding the safety of these trains and would impose an economic burden on the railroads that cannot be justified. Rather than simply increasing the frequency at which inspections are performed, FRA believes that the proper approach is to enhance the quality of the inspections being performed in order to further improve safety. FRA believes that the training and designation requirements contained in this final rule will increase the quality of the brake inspections being performed by ensuring that those individuals responsible for conducting the inspections are provided adequate and continuing training to properly perform the task. The final rule contains general training provisions which include: classroom and experiential "hands-on" training; general testing requirements; and periodic refresher training. The final rule also mandates that training records be maintained by the railroads in order for FRA to ascertain the basis for a railroad's determination that a particular person is considered qualified to perform the inspection or test he or she is assigned. FRA believes these training requirements will provide the necessary assurances that the people conducting the required inspections and tests are qualified.

FRA recognizes that since 1982 new technologies and improved equipment have been developed that allow trains to operate longer distances with fewer defects. The data submitted by AAR, noted above, appears to support this assertion, and FRA does not dispute the potential capability of certain equipment to travel distances in excess of 1,000 miles without becoming defective. However, the capability of the equipment to travel extended distances is contingent on the condition of the equipment when it begins operation and on the nature of the operation in which it is to be engaged. FRA believes that in order for brake equipment to travel extended distances between brake inspections, the condition and planned operation of the equipment must be thoroughly assessed at the beginning of

a train's journey through high quality inspections. As noted above, FRA believes that railroads are not conducting high quality initial terminal inspections at many locations because the railroads are utilizing employees who are not sufficiently qualified or trained to perform the inspections. Therefore, FRA believes that the 1,000-mile brake inspection interval continues to be necessary and important to ensure the safe operation of trains inspected by qualified personnel pursuant to this final rule. Furthermore, no trains operated in the United States are currently permitted to travel greater than 1,000 miles between brake inspections. Consequently, FRA is not willing to permit trains to travel in excess of 1,000 miles between brake inspections, except in the limited, controlled situations where data on the equipment can be gathered. (See discussion below titled "Extended Haul Trains.") FRA notes that Canada eliminated intermediate inspections in 1994. However, Canada has different inspection requirements than those contained in this final rule and vastly different operating conditions and environments than those prevalent on most American railroads, operating conditions and environments that are more conducive to the inspection regimen imposed by that country.

The final rule also generally retains the proposed provisions detailing the items that must be inspected during the various inspections and the minimum procedures for performing the inspections. Contrary to the assertions of some commenters, FRA believes that the proposed methods of inspection sufficiently detailed how the various inspections were to be performed while providing flexibility for railroads to conduct the inspections in a manner most conducive to their operations. The methods of inspection proposed in the 1998 NPRM incorporated current practices and technical guidance previously issued by FRA. To require that all inspections be performed by walking the train would impose a huge financial and operational burden on the railroads and would ignore the various different methods by which inspections are currently performed and have been performed for years. FRA does not intend to mandate specific methods for how the various inspections are to be performed. FRA believes that each railroad is in the best position to determine the method of inspection that best suits its operations at different locations. FRA has never mandated specific step-by-step procedures for conducting brake inspections but

merely requires that, whichever method is used, it must ensure that all of the components required to be inspected will be so inspected.

The proposed rule made clear that when performing a Class I brake test of a train the inspector must take positions on each side of each car in the train sometime during the inspection process. This provision is retained in the final rule. This is intended to mean that at a minimum both sides of the equipment must be inspected. The provision does not require that both sides be observed during the application or during the release of the brakes. However, at a minimum at least one side of the car must be inspected while the brakes on the car are applied or if the brakes do not apply, while an effort is made to apply the brakes on the car. FRA continues to believe that if the various brake components are inspected to ensure they are properly secure and in proper condition then, due to the design of the equipment, if an application or release is observed from one side it can be assumed that in virtually every case there is an application or release of the brake occurring on the other side of the equipment. The final rule also retains the proposed requirement that the piston travel on each piece of the equipment must be inspected while the brakes are applied. Furthermore, the final rule retains the provision that permits a roll-by inspection of the release of the brake but prohibits the roll-by inspection from being considered an inspection of that side of the equipment.

FRA also finds the comments of AAR and other railroad representatives contending that both sides of the equipment should not be required to be inspected at Class IA brake tests to be lacking. The Class IA brake test basically incorporates the current 1,000-mile brake inspection, which FRA believes requires an inspection of both sides of the equipment during the inspection process. The current 1,000-mile inspection requires that brake rigging be inspected to ensure it is properly secure and does not bind or foul and that the brakes apply on each car in the train. *See* 49 CFR 232.12(b). In order to make these inspections properly, FRA believes that both sides of the equipment must be observed sometime during the inspection process and, to FRA's knowledge, railroads currently conduct these inspections in this manner. Thus, the NPRM and the final rule merely clarify what is required to be performed under the current regulations to properly perform a 1,000-mile inspection. Therefore, contrary to the contentions of certain commenters,

retention of this current requirement does not impose any additional burden on the railroads.

The final rule retains the provisions granting railroads the ability to utilize the air flow method (AFM) to qualify a train's brake system in lieu of the traditional leakage test. FRA believes that if a train contains a locomotive equipped with 26L freight locomotive brake equipment and the train is equipped with an EOT device, that train should be allowed to be qualified using the AFM. The AFM of qualifying train air brake systems has been allowed in Canada as an alternative to the leakage test since 1984. In addition, several railroads in the United States have been using the AFM since 1989 when FRA granted the AAR's petition for a waiver of compliance to permit the AFM as an alternative to the leakage test. FRA recognizes the concerns of several labor organization commenters opposing the adoption of the AFM; however, FRA believes these commenters' apprehension is based on their unfamiliarity with the method. As FRA pointed out in the ANPRM, the 1994 NPRM, and the 1998 NPRM, the AFM is a much more comprehensive test than the leakage test. *See* 57 FR 62551, 59 FR 47682–47683, 63 FR 48305–06. The AFM tests the entire brake system just as it is used, with the pressure-maintaining feature cut in. FRA believes the AFM is an effective and reliable alternative method of qualifying train brakes. In the 1998 NPRM, FRA expressed some concern regarding the use of the AFM on short trains. However, based on consideration of the comments received and FRA's experiences in observing the use of the AFM, FRA agrees that the AFM should be permitted as an alternative on any train provided the 15 psi gradient is maintained on the train.

The final rule changes some of the provisions related to the conduct of brake tests utilizing yard air sources that were proposed in the NPRM. Rather than requiring yard air tests to be performed at 80 psi as was proposed, the final rule reduces the required pressure to 60 psi at the end of the consist as is currently required. FRA recognizes that many yard air sources and rental compressors are not capable of producing 80 psi of air pressure. However, to address the concerns raised regarding the inadequacy of conducting a leakage or air flow test at this lower pressure, the final rule includes provisions to require those tests to be conducted at the operating pressure of the train. Thus, if the yard air is not capable of producing the pressure that the final rule requires, then the leakage

or air flow test is to be conducted when the locomotives are attached. The final rule also permits the yard air test device to be connected at other than the end of the consist nearest the controlling locomotive, provided that the railroad adopts and complies with written procedures to ensure that overcharge conditions do not occur. Many yards across the country currently conduct the test in this manner, and FRA believes it is necessary to acknowledge the viability of these operations.

The final rule also modifies the notification requirement related to Class I brake tests from that proposed in the NPRM. In the NPRM, FRA proposed that the engineer be informed in writing of the successful completion of the Class I brake test. The intent of this requirement was to ensure that the locomotive engineer was adequately informed of the results of the inspection; however, FRA recognizes that a requirement to provide the information in writing ignores technological advances and operational efficiencies. Consequently, the final rule will permit the notification in whatever format the railroad deems appropriate; provided that the notification contains the proper information and a record of the notification and the requisite information is maintained in the cab of the controlling locomotive. FRA believes these changes are consistent with the intent and purpose of the proposed requirement for written notification and ensure necessary information is relayed to the operator of the train.

FRA also realizes that the proposed requirement for designating locations where Class IA inspections will be performed was somewhat unclear and may have caused confusion. The intent of the requirement was to ensure that FRA was informed of those locations where a railroad intends to perform Class IA brake inspections and that FRA had the information with which to hold the railroad responsible for conducting the inspections at those locations. FRA was not intending to require that a railroad separately identify a specific Class IA inspection location for each train it operates. Consequently, the final rule makes clear that the designation required is for locations where such inspections will be performed and permits deviance from those locations only in emergency situations.

The final rule retains the proposed requirement that unit or cycle trains receive a Class I brake test every 3,000 miles. FRA has added a definition of "unit train" and "cycle train" to the final rule in order to clarify the applicability of the requirement.

Historically, these trains operate for extended periods of time with only a series of brake inspections similar to Class IA brake inspections. FRA believes that the proposed 3,000-mile limitation is appropriate as it represents the approximate distance that a train would cover when traveling from coast to coast. In addition the 3,000 mile requirement is consistent with the interval for performing Class IA brake tests and would equate to every third inspection being a Class I brake test rather than a Class IA brake test. Furthermore, AAR does not seek a moderate extension of a couple hundred miles so a few trains could complete their cycle, but seeks to extend the distance to more than 4,500 miles in many instances. FRA is not willing to modify the proposed requirement to that extent and believes that the 3,000-mile interval for these types of trains provides sufficient flexibility to the railroads to perform periodic Class I brake tests on these trains in a cost-efficient manner.

The definition of "solid block of cars" has been modified from that proposed in the NPRM. Although FRA believes the definition it proposed is consistent with current interpretations and enforcement of the requirement, FRA agrees with some of the commenters that the definition may have been too narrow and does not directly address FRA's primary concern, the block of cars itself. FRA's primary concern is the condition of the block of cars being added to the train especially when the block of cars is made up of cars from more than one train. Thus, the final rule will permit a solid block of cars to be added to a train without triggering a requirement to perform a Class I brake test on the entire train. However, depending on the make-up of that block of cars, certain inspections will have to be performed on that block of cars at the location where it is added to the train.

FRA believes that limits have to be placed on the addition of blocks of cars being added to a train in order to ensure that cars are being inspected in a timely manner and in accordance with the intent of the regulations. Some commenters suggest that a block of cars should be permitted to be added to a train with no inspection other than a continuity test regardless of the number of different trains the cars making up the block came from provided all the cars received a Class I brake test at their point of origin. Other commenters suggest that any number of blocks of cars should be permitted to be added to a train at a single location. FRA believes that to accept either of these positions would be tantamount to eliminating

initial terminal and intermediate inspections and would drastically reduce the safety of freight trains being operated across the country. In FRA's view, both of the positions noted above are merely means to circumvent inspections and are akin to a practice known as "block swapping" in the mechanical inspection context, a practice that FRA does not permit. In FRA's opinion, the ability to add multiple blocks of cars to a train at one location or add a single block of cars to a train that is composed of cars from numerous different trains without inspecting the cars in those blocks, would essentially allow railroads to assemble new trains without performing any direct inspection of any of the cars in the train. Furthermore, if cars are permitted to be moved in and out of trains at will, the ability to track when and where Class IA brake tests are to be performed on trains will be impossible.

Based on a review of the comments submitted, two other minor modifications to the proposed inspection requirements have been made in this final rule. The final rule contains an additional caveat that will permit the removal of defective equipment at locations where other cars are added or removed without triggering the requirement to perform a Class I brake test on the entire train. FRA currently permits this practice, and it is consistent with the requirements aimed at having defective equipment repaired as quickly as possible. The final rule also modifies the language used in the proposed provisions related to the air pressure at which the brake tests are to be conducted based on a comment submitted by the NTSB. The NTSB noted that the language used by FRA in the NPRM to describe the air pressure settings for conducting the required brake tests would permit some road trains to be tested at a lower pressure than that at which the train would be operated. The NTSB contends that although most road freight trains operate at 90 psi, some road freight trains are operated at 100 psi and the proposal would permit them to be tested at 90 psi. FRA agrees with NTSB's suggestion that a train's brake system should be tested at the pressure at which the train will operate and has modified the language of the final rule accordingly.

2. Extended Haul Trains

In developing the provisions regarding extended haul trains proposed in the 1998 NPRM, FRA relied on several basic beliefs developed from the information and comments submitted and upon its experience in enforcing the

current regulations. FRA believed that if a train was properly and thoroughly inspected, with as many defective conditions being eliminated as possible, then the train would be capable of traveling much more than 1,000 miles between brake inspections. By this, FRA contended that not only must the brake system be in quality condition but that the mechanical components of the equipment must be in equally prime condition. FRA believed that as the distance a train is allowed to travel increases, the mechanical condition of the equipment is a key factor in ensuring the proper and safe operation of the train brake system throughout the entire trip. FRA also stated that the best place to ensure the proper conduct of these inspections and to ensure that the train's brake system and mechanical components are in the best condition possible is at a train's point of origin (initial terminal).

In the 1994 NPRM, FRA proposed a set of requirements that had to be met by a railroad in order to move a train up to 1,500 miles without performing additional brake inspections. The requirements included such features as low defect ratios, maintenance programs, and the performance of quality brake and mechanical inspections at a train's point of origin. See 59 FR 47735. In the 1998 NPRM, FRA agreed with several commenters that some of the 1994 proposed requirements were overly burdensome and were partially predicated on potentially subjective standards. However, FRA continued to believe that many of the inspection requirements and movement restrictions proposed in 1994 were valid conditions that should be met in order to operate trains for extended distances between brake inspections. These included: the performance of a quality, in-depth brake inspection by a highly qualified inspector; the performance of a quality mechanical inspection by a person qualified under 49 CFR 215.11; and a restriction on the number of set-outs and pick-ups occurring en route. FRA also believed that these extended haul trains had to be closely monitored to ensure that both the brake system and mechanical components remain safely intact throughout the train's journey.

In the 1998 NPRM, FRA proposed that certain designated trains be permitted to move up to 1,500 miles between brake and mechanical inspections provided the railroad met various inspection and monitoring requirements. See 63 FR 48343, 48364-65. As no trains were currently permitted to travel in excess of 1,000 miles between inspections, FRA was not willing to propose more than

1,500 miles between such inspections until appropriate data is developed that establish that equipment moved under the proposed criteria remains in proper condition throughout the train's trip. FRA believed that the proposed provision requiring the performance of an inbound inspection at destination or at 1,500 miles and the requirement that carriers maintain records of all defective conditions discovered on these trains would create the bases for developing such data.

In order to ensure the accuracy of the data as well as ensure the proper and safe operation of these extended haul trains, FRA also proposed that the trains have 100 percent operative brakes and contain no cars with mechanical defects at their initial terminal point and at the time of departure from the 1,500-mile point, if moving an additional 1,500 miles from that location between brake inspections. FRA further proposed that these trains not conduct any pick-ups or set-outs en route, except for the removal of defective equipment, in order to minimize the disruptions made to the integrity of the train's brake system and reduce mechanical damage that might occur during switching operations. In addition, as there was no reliable tracking system currently available to FRA to ensure that cars added to the train en route have been inspected in accordance with the proposed requirements, FRA believed that the number of cars added to these trains had to be limited.

As noted earlier in the discussion, FRA believed that in order for a train to be permitted to travel 1,500 miles between inspections, the train must receive inspections that ensure the optimum condition of both the brake system and the mechanical components at the location where the train originates. In order to ensure that quality inspections were performed, FRA proposed that they be performed by highly qualified and experienced inspectors. As FRA intended that the proposed Class I brake test performed on these trains at their initial terminal be as in-depth and comprehensive as possible, FRA believed that the inspections should be performed by individuals possessing the knowledge not only to identify and detect a defective condition in all of the brake equipment required to be inspected, but also to possess the basic knowledge to recognize the interrelational workings of the equipment and the ability to troubleshoot and repair the equipment. Therefore, FRA proposed the term "qualified mechanical inspector" to identify and describe those individuals it believed would possess the necessary

knowledge and experience to perform the proposed Class I brake tests on these extended haul trains.

In the 1998 NPRM, a "qualified mechanical inspector" was defined as a person with training or instruction in the troubleshooting, inspection, testing, maintenance, or repair of the specific train brake systems the person is assigned responsibility and whose primary responsibilities include work generally consistent with those functions. (See § 232.5 of the section-by-section analysis for a more detailed discussion of "qualified mechanical inspector.") FRA also proposed that these same highly qualified inspectors be the type of individuals performing the proposed inbound inspection on these extended haul trains in order to ensure that all defective conditions are identified at the train's destination or 1,500-mile location. Similarly, FRA proposed that all of the mechanical inspections required to be performed on these trains be conducted by inspectors designated pursuant to 49 CFR 215.11 in order to ensure that all mechanical components are in proper condition prior to the train's departure.

The AAR and various private car owners submitted a number of comments objecting to the proposed requirements regarding extended haul trains contained in the 1998 NPRM. These commenters believe that the 1,500-mile limitation on the movement of these trains between brake inspections is insufficient considering the restrictions placed on the trains. They recommend that these trains be permitted to operate to its destination or at a minimum be permitted 2,000 miles between brake inspections. They contend that the 1,500-mile limitation results in little or no benefit to the railroads because in order to take advantage of the flexibility provided, railroads would have to establish new facilities and add more manpower at 1,500-mile points to conduct the more stringent inspections required at those locations. They contend that a limitation at the 2,000-mile point would be logically consistent with existing inspection requirements, based on 1,000-mile increments, and would allow a greater number of trains to utilize the provisions because railroads could use existing facilities and manpower. They recommend that FRA reconsider the estimates provided regarding the benefits derived from the extended haul train provisions, claiming that the benefits estimated in the NPRM's Regulatory Impact Analysis are overstated. Several private car owners also suggested that even if FRA were not to extend the proposed distance for the

entire industry, it should allow certain private car owners greater distances due to their superior safety record and maintenance practices.

Many of these same commenters also object to the proposed requirement that extended haul trains not be permitted to make any pick-ups or set-outs en route. These commenters contend that this restriction severely limits the actual flexibility of the proposal. They assert that the prohibition on pick-ups and set-outs would eliminate nearly one-half of the trains that could potentially be operated under the proposed provisions. Several commenters also objected to the proposed notification requirements for extended haul trains. These commenters state that the proposed provision requiring advance notification to FRA of the trains to be operated under the extended haul provision would seriously limit the number of trains utilizing the provisions as many trains are unscheduled with unknown train symbols and would be excluded. They recommend that the notification requirements be reduced in some manner to allow unscheduled trains to be identified as extended haul trains. One commenter also objects to the proposed requirement that extended haul trains not depart their initial terminals with any part 215 defects entrained. This commenter asserts that there was no rationale for this restriction and that it merely creates an additional burden for railroads.

Several rail labor representatives also object to the proposed provisions permitting trains to be operated as extended haul trains; however, these commenters oppose allowing any train to operate more than 1,000 miles between brake inspections. These commenters contend that when the distance between intermediate brake inspections was increased in 1982, the railroads made a commitment to conduct quality initial terminal brake inspections in exchange for the increased mileage, but that has not occurred and FRA should not provide the railroads with an increase in mileage when the previous agreement has not been honored. They contend that the proposed extension would merely allow defective equipment to be moved further distances without repair. They further contend that the proposed increase in distance between brake tests is not justified from a safety standpoint and, thus, violates 49 U.S.C. 20302(d)(2), which permits a change in the existing power brake regulations "only for the purpose of achieving safety." These commenters oppose any extension in the distance between brake inspections unless stringent

requirements are placed on the trains, one such requirement being that carmen or similarly trained individuals perform all the inspections and tests required to be performed on the trains. They also contend that the proposed standard for revoking a railroad's ability to designate extended haul trains is too high.

FRA Conclusions. FRA continues to believe that if a train is properly and thoroughly inspected, with as many defective conditions being eliminated as possible, then the train is capable of traveling much greater than 1,000 miles between brake inspections. Therefore, the final rule retains the provisions permitting railroads to designate trains as extended haul trains and allowing such trains to be operated up to 1,500 miles between brake inspections. Although FRA recognizes that retention of the 1,500-mile limitation may limit the utility of the provision on some railroads, FRA is not willing to increase the proposed mileage restriction at this time. Currently, no train is permitted to travel more than 1,000 miles without receiving an intermediate brake inspection. Therefore, FRA does not believe it would be prudent to immediately double or triple the currently allowed distance without evaluating the safety and operational effects of an incremental increase in the distance. Consequently, until sufficient information and data are collected on trains operating under the provisions proposed in the NPRM and retained in this final rule, FRA is not willing to permit trains to travel the distances suggested by some commenters without additional brake inspections. FRA continues to believe that the requirement for performing inbound inspections and the requirement to maintain records of all defective conditions discovered on these trains provides the basis for developing the information and data necessary to determine the viability of allowing greater distances between brake inspections.

After consideration of the comments submitted, FRA agrees that the benefits estimated in the NPRM in association with the extended haul provisions may have been overstated. FRA realizes that the retention of the 1,500-mile limitation may eliminate certain trains from being operated pursuant to the extended haul provisions and reduce the benefits estimated at the NPRM stage of the proceeding. (See detailed discussion in the Regulatory Impact Analysis portion of the preamble below.) However, in order to increase the viability of the extended haul provisions, the final rule provides some flexibility for designating extended haul

trains and allows for the limited pick-up and set-out of equipment.

Several commenters noted that the proposed provisions regarding the advance designation of extended haul trains would prohibit certain unscheduled trains from being operated as extended haul trains. In an effort to provide some flexibility in this area, the final rule has been modified to allow railroads to designate certain locations as locations where extended haul trains will be initiated and requires railroads to describe those trains that will be so operated rather than requiring specific identification of every train. FRA believes this modification will allow railroads to capture some of their unscheduled trains by identifying the trains by the locations where they are initiated.

The final rule will also permit extended haul trains to set out cars at one location or to pick up cars, or both, at the same or another location. This modification will provide railroads the flexibility to set-out a block of cars at one location and pick up a block of cars at another location. FRA believes that this limited ability provides the railroads with some flexibility to move equipment efficiently while minimizing the disruptions made to the train's brake system and ensuring that cars added to such trains can be adequately tracked and inspected. The final rule makes clear that any cars added to extended haul trains must be inspected in the same manner as the cars at the train's initial terminal. The final rule also makes clear that any car removed from the train must be inspected in the same manner as a car at the train's point of destination or 1,500-mile location.

Certain commenters have portrayed the provisions related to extended haul trains as merely being an extension of the current intermediate inspection distances. FRA objects to such a characterization. In FRA's view, the extended haul provisions contained in the NPRM and retained in this final rule constitute a completely new inspection regimen. The provisions related to the operation of extended haul trains contain stringent inspection requirements, both brake and mechanical, by highly qualified inspectors and establish stringent requirements whenever cars are added to or removed from such trains. The extended haul train requirements also contain a means to assess the safety of such operations by requiring that records be maintained of the defective conditions that develop on these trains while en route. Consequently, FRA believes that the requirements related to extended haul trains not only ensure the

safe operation of the trains operated under them, but actually increase the safety of such operations over that which is provided in the current regulations.

3. Charging of Air Brake System

Present regulations for air brake testing basically require that cars that have previously been tested in accordance with the regulations either "be kept charged until road motive power is attached" or be retested. See 49 CFR 232.12(i). The current regulations also require the performance of an initial terminal brake test "where the train consist is changed other than by adding or removing a solid block of cars, and the train brake system remains charged. * * *" See 49 CFR 232.12(a)(ii). Based on longstanding administrative interpretation and practice, FRA currently presumes that a brake system is no longer adequately charged if disconnected from the charging device (supply of pressurized air) for more than two hours before coupling or recoupling of locomotives; otherwise, retesting is required.

In the 1994 NPRM, FRA proposed to permit trains to be removed from a continuous source of compressed air for up to four hours without requiring the re-performance of a comprehensive brake inspection. FRA received very few comments that directly addressed the safety implications of this proposal; thus, FRA proposed the four-hour time limitation in the 1998 NPRM. In the 1998 NPRM, FRA agreed that its longstanding administrative interpretation, that requires the retesting of cars disconnected from a charging device for longer than two hours, was established prior to the development of new equipment that has greatly reduced leakage problems, such as welded brake piping and fittings and ferrule-clamped air hoses. However, contrary to several railroads' assertions, FRA did not believe that cars should be allowed to be off air for extended periods of time without being retested. FRA believed that the longer cars sit without air attached, the greater the chances were that the integrity of the brake system would be compromised. Consequently, based on today's equipment, operating practices, and overriding safety concerns, FRA proposed that cars should not be disconnected from a continuous supply of pressurized air for longer than four hours without being retested. FRA also proposed that the source of compressed air must be sufficient to maintain the integrity of the brake system. Consequently, FRA proposed that the source of compressed

air be maintained at a minimum level of 60 psi.

The AAR and several other parties commented that there is no reason to assume that once a train is charged and tested and then left standing without being provided with a source of compressed air that the brake system would become defective. These commenters assert that leaving equipment connected to a source of compressed air does nothing to ensure proper performance of the brake system, does not prevent vandalism, and does not prevent leakage due to adverse weather conditions. These parties suggest that leakage on standing trains has been greatly reduced through the use of welded brake piping and fittings and ferrule-clamped air hoses. These commenters believe that FRA's current interpretation of allowing trains to sit without air for only two hours is from an era when this new equipment was not used. They also contend that FRA's current interpretation and the proposed four-hour limitation costs the industry money, fuel, and time and creates pollution because trains must either be reinspected or left with a locomotive attached and idling in order to avoid performing a full Class I brake test. They further contend that the proposed four-hour rule exposes employees to various safety hazards due to the employees being required to perform inspections at locations that are not designed or equipped for such activity.

The AAR recommends that the proposed four-hour limitation be eliminated for the reasons noted above. They also noted that the Canadian rules do not contain an off-air requirement and that in Canada if cars are off air for any length of time, only a set-and-release continuity test is required. As an alternative to eliminating the off-air requirement completely, the AAR suggests that FRA adopt requirements which would allow cars to be removed from a source of compressed air for up to 48 hours without a car-by-car reinspection. They recommend that cars only be required to receive a continuity test when they have been off a source of compressed air for more than four hours but less than 48 hours and that no retesting occur if equipment is off air for less than four hours.

Representatives of rail labor objected to the proposed increase in the amount of time that equipment could be removed from a source of compressed air. These commenters believe that the existing two-hour limitation is reasonable. Most of these commenters expressed concern for the integrity of the brake system if a consist were left standing for longer than two hours.

These concerns were aimed at the effect that climate might have on the equipment and the increased possibility of vandalism to the equipment if consists or equipment were left off air for longer periods.

FRA Conclusions. The final rule retains the proposed requirement that equipment removed from a source of compressed air for longer than four hours be reinspected. FRA believes that this requirement is necessary to ensure not only the integrity of the brake system on equipment but to ensure that inspections are performed on equipment in a timely and predictable manner. FRA tends to agree that the amount of time equipment is left off a source of compressed air is not directly related to the operation of the brake system on that equipment. However, FRA does believe that in certain circumstances the length of time that equipment is removed from a source of compressed air can impact the integrity and operation of the brake system on a vehicle or train. Particularly in cold weather situations where freeze-ups in train brake systems can occur or in areas where the potential for vandalism is high due to the location where equipment is left standing. Moreover, FRA believes that the four-hour limitation is consistent with the intent of the existing regulations and is intended to ensure that equipment is regularly inspected.

The commenters objecting to the four-hour limitation proposed in the NPRM and retained in this final rule have ignored the intent and purpose of the existing two-hour allowance permitted by longstanding administrative interpretation. As discussed above, the existing power brake regulations, adopted by Congress in 1958, are based on the premise that if a train or equipment does not remain charged the equipment is to be retested. There is no provision in the existing regulations for allowing equipment to be removed from a source of compressed air for any length of time, such allowance was granted only through administrative interpretation. The original intent of the currently existing two-hour interpretation, which permits equipment to remain off-air for up to two-hours without being retested, was to allow trains to pick up or remove cars from their consists while en route without requiring a retest of the entire train. The two-hour limit was based on the amount of time it would take a train to make a switching move while en route. Thus, the current application of the two-hour rule to any and all equipment left off a source of compressed air is somewhat counter to

the original intent of the interpretation when it was provided.

Although FRA recognizes that it has acquiesced and endorsed the expansion of the two-hour rule to all equipment, FRA believes that the underlying intent of the existing regulations must be recognized and maintained. The doubling of the existing two-hour interpretation to four hours is based on the fact that the average time needed for many trains to perform the switching they conduct while en route has increased. Thus, FRA's intent when proposing an expansion of the two-hour rule was not to alter the basic tenet that equipment should be retested when it is removed from a source of compressed air for any lengthy period of time. FRA believes that the four-hour allowance provided by this final rule gives the railroads flexibility to perform switching operations while trains are en route and provides flexibility to efficiently move cars from one train to another when necessary, yet retains the concept that equipment be retested when left disconnected from a source of compressed air for longer periods of time.

FRA further believes that a limitation on the amount of time that equipment may be off air is necessary for ensuring that equipment is inspected in a timely and predictable manner. If no time limit were imposed or if 48 hours were permitted, as suggested by some commenters, equipment could lawfully sit for days at various locations while en route to its destination and be switched in and out of numerous trains without ever being reinspected. Such an approach would drastically reduce the number of times that the brake systems on such equipment would ever be given a visual inspection from what is currently required and, in FRA's view, would seriously degrade the safety of the trains operating with such equipment in its consist. Furthermore, if equipment were allowed to be off-air for an excessive amount of time, it would be virtually impossible for FRA to ensure that equipment is being properly retested as it would be extremely difficult for FRA to determine how long a particular piece of equipment was disconnected from a source of compressed air. In order to make such a determination, FRA would have to maintain observation of the equipment for days at a time. Consequently, the final rule retains the proposed four-hour limit on the amount of time equipment can be disconnected from a source of compressed air as it maintains current levels of safety and provides an enforceable and verifiable time limit that FRA believes provides the railroads

some additional benefit over what is currently required both in terms of operational efficiency and cost savings.

4. Retesting of Brakes

In the 1998 NPRM, FRA attempted to clarify language contained in the current regulation which requires that the brakes "apply." See 49 CFR 232.12(b), 232.12(d), 232.13(d), and 232.13(e). The current language has been misinterpreted by some to mean that if the piston applies in response to a command from a controlling locomotive or yard test device, and releases before the release signal is given, the brake system on that car is in compliance with the regulation because the brake simply applied. The intent of the regulation has always been that the brakes apply and remain applied until the release signal is initiated from the controlling locomotive or yard test device. Therefore, clarifying language was added to the proposed inspection requirements to eliminate all doubt as to what is required. In the 1998 NPRM, FRA made clear that the brakes on a car must remain applied until the appropriate release signal is given. The proposal required that cars with brakes that fail to remain applied either be removed from the train or repaired in the train and retested, and the proposal provided specific requirements for performing a retest on such equipment.

FRA recognized that some defective train air brake conditions found when performing a train air brake test, which may cause insufficient application of the brakes on a piece of equipment, are of such a nature that they can be quickly repaired in the train. For example, a brake connection pin might be missing, a slack adjuster might be disconnected, or some other minor part of the brake system might be defective. FRA realized that to mandate that equipment with these types of obvious defective conditions be removed from the train would potentially impose a tremendous burden on the railroads. Therefore, FRA sought to provide some relief to railroads by permitting cars with obvious brake defects to be repaired and retested while remaining in the train. However, FRA also believed that some consistency and guidance had to be provided regarding the performance of a retest on a car's brake system. Consequently, FRA proposed that the retesting of a car had to be conducted from the controlling locomotive or head end of the consist if a car is repaired in a train. Furthermore, FRA proposed that if a retest is conducted the brakes on the retested car must remain applied for a minimum of five (5) minutes. The proposed five-minute requirement was

based on the leakage parameters established for locomotives contained at § 229.59(c).

The AAR and several other commenters object to the parameters contained in the proposed retesting provisions. Specifically, these commenters object to three of the requirements contained in the proposed retest provision, these include: the requirement that only cars with an obvious defect be retested, the requirement that the brakes remain applied for five minutes, and the requirement that the retest be conducted from the controlling locomotive or the head of the consist. These commenters contend that there is no reason to limit the retest provision to cars with readily identifiable defects. They claim that there are a number of conditions which might cause a car's brakes not to apply that are not readily identifiable thus, the retest may identify the problem and allow it to be repaired, or the reason for a no-set is unknown but the brakes operate properly upon being retested.

These commenters also believe that the proposed requirement to have the brakes remain applied for five minutes is impractical and unnecessary. They assert that it is only necessary to have the brakes remain applied for the period of time it takes an inspector to perform an inspection of the brakes and that it is impractical to require an employee to watch each retested car for five minutes. They also contend that FRA's reliance on the five-minute requirement related to the testing of locomotive brake cylinder leakage contained in § 229.59 is misplaced. They assert that there is no parallel between determining the brake cylinder leakage on a locomotive and the testing of the brakes on a freight car. One commenter suggests that a one-minute application is a sufficient period to ensure the proper operation of a car's brakes.

These commenters also object to the proposed requirement that the retest be conducted from the controlling locomotive or the head end of the consist. They contend that there is no safety hazard in performing the test with a test device positioned at one end of the car being retested. They assert that such a procedure would replicate the natural gradient of the train and, thus, avoid the possibility of overcharging the brake system, and would better facilitate retesting.

Representatives of rail labor generally supported the proposed retest provisions. These commenters did assert that any retest should be conducted from the head end of the consist or from the controlling locomotive. They claim that to perform

the test from other than that location would provide no assurance that the brakes would apply in response to a brake pipe reduction from the controlling locomotive.

FRA Conclusions. FRA agrees that the proposed provisions regarding the retesting of cars may have been overly restrictive and is modifying the final rule based on FRA's review of the comments and recommendations submitted. The final rule has been modified to permit the retesting of any car the brakes of which were found not to be applied during a required inspection. FRA agrees that there are several circumstances that could occur where the reason for the failure of the brakes to apply is not readily apparent. FRA believes that permitting a retest on any car found not applying will not adversely affect safety since the car will be required to pass the retest in order to remain in the train or be handled for necessary repair.

The final rule also modifies the proposed provision that requires a retested car's brakes to remain applied for five minutes. FRA agrees that its reliance on the five-minute requirement applicable to the testing of locomotive brake cylinder leakage is not appropriate. However, rather than insert a subjective requirement for how long the brakes should remain applied, as suggested by some commenters, FRA believes that a definite time period should be established to ensure consistency in the performance of these retests. Thus, the final rule requires that the brakes on a retested car remain applied for at least three minutes. FRA believes that three minutes is consistent with the amount of time that it would take an individual to conduct a complete inspection of the retested car's brakes. The three minutes is based on the generally accepted period of one and one-half minutes it would take to perform a walking inspection on each side of an average size freight car. Requiring the brakes to remain applied for a period of at least three minutes also provides FRA with sufficient assurances that the brakes are operating properly and will remain applied for the duration of any brake application required during the train's journey.

The final rule also modifies the proposed requirement that the retest be conducted from the controlling locomotive or the head of the consist by permitting the retest to be conducted with a suitable test device positioned at one end of the car or cars being retested. FRA agrees that there is little or no safety rationale for requiring the retest to be performed from the controlling locomotive or head of the consist. Some

commenters argue that if the retest is not conducted from the controlling locomotive, then there are no assurances that the brakes will apply in response to a brake reduction from the controlling locomotive. FRA finds that this argument ignores the various methods by which cars may be tested and assembled when air brake tests are conducted using yard air sources. FRA currently allows and this final rule continues to allow cars to be tested with yard test plants and allows such cars to be added to trains without requiring that each car be inspected to ensure it operates in response to the controlling locomotive.

One potential safety hazard with allowing cars to be retested with a device at the car is the potential for injury to the employees responsible for separating the train line between the charged cars. The train line between the car being retested and the car it is coupled to would have to be separated to perform the retest with a device. In many cases this train line will be under pressure at the time of the separation and could cause injury to the person separating the train line if caution is not used. The final rule recognizes this potential safety concern and requires that the compressed air in a car to be retested must be depleted prior to separating the air hoses and conducting the retest.

C. Movement of Equipment With Defective Brakes

The current regulations do not contain requirements pertaining to the movement of equipment with defective power brakes. The movement of equipment with these types of defects is currently controlled by a specific statutory provision originally enacted in 1910, and later amended which states:

(a) GENERAL.—A vehicle that is equipped in compliance with this chapter whose equipment becomes defective or insecure nevertheless may be moved when necessary to make repairs, without a penalty being imposed under section 21302 of this title, from the place at which the defect or insecurity was first discovered to the *nearest available place at which the repairs can be made*—

(1) On the railroad line on which the defect or insecurity was discovered; or

(2) At the option of a connecting railroad carrier, on the railroad line of the connecting carrier, if not farther than the place of repair described in clause (1) of this subsection.

49 U.S.C. 20303(a) (emphasis added).

Although there is no limit contained in 49 U.S.C. 20303 as to the number of cars with defective equipment that may be hauled in a train, FRA has a longstanding interpretation which

requires that, at a minimum, 85 percent of the cars in a train have operative brakes. FRA bases this interpretation on another statutory requirement which permits a railroad to use a train only if “at least 50 percent of the vehicles in the train are equipped with power or train brakes and the engineer is using the power or train brakes on those vehicles and on all other vehicles equipped with them that are associated with those vehicles in a train.” 49 U.S.C. 20302(a)(5)(B). As originally enacted in 1903, section 20302 also granted the Interstate Commerce Commission (ICC) the authority to increase this percentage, and in 1910 the ICC issued an order increasing the minimum percentage to 85 percent. *See* 49 CFR 232.1, which codified the ICC order.

As virtually all freight cars are presently equipped with power brakes and are operated on an associated train line, the statutory requirement is in essence a requirement that 100 percent of the cars in a train have operative power brakes, unless being hauled for repairs pursuant to 49 U.S.C. 20303. Consequently, FRA currently requires that equipment with defective or inoperative air brakes makeup no more than 15 percent of the train and that if it is necessary to move the equipment from where the railroad first discovered it to be defective, the defective equipment be moved no farther than the nearest place on the railroad’s line where the necessary repairs can be made or, at the option of the receiving carrier, to a location that is no farther than the location where the repairs could have been performed on the delivering line.

In addition to the general requirements relating to the movement of equipment with defective safety appliances, FRA currently requires 100-percent operative brakes on a train departing its initial terminal. The requirement for 100 percent at the initial terminal has been a standard by which the railroad industry has operated for decades and one which FRA and its predecessor agency, the Interstate Commerce Commission, have endorsed since the adoption of the power brake regulations. The requirement is founded on Congress’ mandate that the ICC incorporate into the federal rail safety regulations the AAR’s rules, standards, and instructions as of April 11, 1958, regarding the installation, inspection, maintenance, and repair of train brakes. In 1958, Congress amended a provision of the Safety Appliance Acts, then codified at 45 U.S.C. 9, by incorporating the inspection requirements of the AAR into

the statute and permitting their change only for the purpose of achieving safety.³ Based on a review of the legislative history surrounding that amendment, FRA believes it is clear that Congress interpreted the AAR standards as requiring 100 percent operative brakes on all trains prior to departure from an initial terminal. As the current regulations regarding the performance of an initial terminal inspection contained at 49 CFR 232.12(c)-(j) were basically an adoption of the AAR inspection and testing standards as they existed in 1958, FRA believes that the current regulations are intended and do require 100 percent operative brakes at initial terminals.

In developing the 1998 NPRM, FRA considered the various proposals discussed in the RSAC Working Group and the numerous comments provided subsequent to the issuance of the 1994 NPRM. A discussion of those comments and proposals was provided in the 1998 NPRM and will not be reiterated here. *See* 63 FR 48308–310. It is clear from that discussion that many of the proposals received by FRA since the issuance of the 1994 NPRM were in direct conflict with various statutory requirements related to the movement of equipment with defective brakes. As the RSAC Working Group was unable to reach a consensus on the inspection, testing, and maintenance requirements for freight train brake systems, FRA was not willing or able to propose provisions regarding the movement of equipment with defective brakes that would be contrary to existing statutory mandates. The 1998 NPRM contained proposals regarding the tagging of defective equipment, the placement of defective equipment in a train, and a method for consistently calculating the percentage of operative brakes on a train. Therefore, in addition to being consistent with the statutory requirements, the proposed requirements ensured the safe and proper movement of defective equipment and clarified the duties imposed on a railroad when moving such equipment.

FRA proposed that all cars or locomotives found with defective or inoperative brake equipment be tagged as bad ordered with a designation of the location where the necessary repairs

³ In 1994, Congress revised, recodified, and enacted without substantive change, the federal railroad safety laws. Simultaneously, the then existing general and permanent federal railroad safety laws were repealed. 45 U.S.C. 9 of the Safety Appliance Acts is currently codified at 49 U.S.C. 20301 and 20302. The reference to the AAR rules, standards, and instructions was removed during the recodification as executed. *See* Pub. L. 103–272 (July 5, 1994) and H.R. Rep. No. 103–180, at 94 (1993).

would be effectuated. FRA attempted to expressly clarify the requirement that equipment with defective brakes not depart from, or be moved beyond, a location where the necessary repairs to the equipment could be performed. The 1998 proposal made clear that if a car or locomotive is found with defective brakes during any of the proposed brake inspections or while the piece of equipment is en route and the location where the defective equipment is discovered is a place where repairs of the type needed can be performed, then that car or locomotive may not be moved from that location until the necessary repairs are effectuated. However, if repairs to the defective condition cannot be performed at the location where the defect is discovered, or should have been discovered, the proposal made clear that the railroad is permitted to move the equipment with the defective condition only to the nearest location where the necessary repairs can be performed.

The preamble to the 1998 NPRM contained a lengthy discussion regarding FRA's views as to what constitutes the nearest location where the necessary repairs can be performed. *See* 63 FR 48309. In that discussion, FRA noted that its previous proposals regarding the use of mobile repair trucks and when locations serviced by those trucks would be considered locations where necessary repairs could be effectuated did not sufficiently address the issue and might lead to undesired consequences. Rather than attempt to develop a standard applicable to all situations, which FRA did not believe could be accomplished at the time, FRA intended to approach the issue of what constitutes the nearest location where necessary repairs could be made based on a case-by-case analysis of each situation. FRA noted that in making these determinations both the railroad as well as FRA's inspectors must conduct a multi-factor analysis based on the facts of each case. In the preamble, FRA provided a broad discussion, based on existing case law, setting out general guidelines and factors that should be considered when determining whether a particular location is a location where necessary repairs can be made or whether a location is the nearest location where the necessary repairs can be effectuated. *See* 63 FR 48309.

FRA also proposed continuation of the requirement to have 100 percent operative brakes on a train at its point of origin (initial terminal). FRA noted that this has been a requirement in the railroad industry for decades and that it was not only wise from a safety standpoint, as it ensures the proper

operation of a train's brake system at least once during its life, but it also sets the proper tone for what FRA expects to be accomplished at these locations. Furthermore, requiring 100 percent operative brakes on a train at its inception provides the railroads with a margin for failure of some brakes while the train is in transit (up to 15 percent) and tends to ensure that defective equipment is being repaired in a timely fashion. In addition, FRA stated that the 100-percent requirement is consistent not only with Congress' understanding of the AAR inspection standards that were adopted in 1958, but also with the intent of FRA, rail management, and rail labor as to what was to occur at initial terminals when the inspection interval was increased from 500 miles to 1,000 miles in 1982. At that time, carrier representatives committed to the performance of quality initial terminal inspections in exchange for an extension in the inspection interval, for which FRA intended to hold them accountable. Moreover, FRA believed that retention of the 100-percent requirement is consistent with the statutory requirements regarding the movement of defective equipment because a majority of the locations where trains are initiated have the capability of conducting virtually any brake system repair, and thus, under 49 U.S.C. 20303(a) the defective equipment may not be moved from those locations anyway.

In the preamble to the 1998 NPRM, FRA recognized that the 100-percent requirement at points of origin tends to be somewhat burdensome for some railroads at certain locations. *See* 63 FR 48309–10. However, FRA noted that the number of locations where the requirement is quite burdensome appears to be fairly low as FRA had made clear that railroads are free to petition for a waiver of this requirement, but as of the issuance of the NPRM no railroad had filed such a petition. Although FRA recognized that the requirement creates somewhat illogical scenarios at some locations, FRA was not willing to propose provisions permitting trains to depart locations with less than 100 percent operative brakes without fully considering the safety hazards or potential abuses which may accompany such an approach. Therefore, FRA sought comment from interested parties regarding the potential for permitting very limited flexibility in moving defective equipment from outlying initial terminals which lack the capability of effectuating brake system repairs. FRA also discussed various alternative approaches, with attendant

restrictions, which might provide some flexibility at these outlying locations and sought comment on those approaches as well. *See* 63 FR 48310.

The AAR and several other railroad representative submitted a number of comments on the proposed requirements regarding the movement of defective equipment. The majority of the comments received from these parties addressed the proposed requirements regarding 100 percent operative brakes at a train's initial terminal, the identification of locations where brake repairs should be required, and the tagging of defective equipment.

These commenters recommend that FRA permit trains to operate from any location with a minimum percentage of its brakes inoperative. At a minimum, they recommend that this flexibility be provided at locations where repairs can not be performed. They suggest adoption of a 95-percent minimum operative brake requirement from such locations. They contend that the 100-percent requirement at initial terminals is outdated and does not take into consideration the numerous technological improvements made to brake systems over the last several decades. They also contend that it makes no sense to require 100-percent operative brakes on trains originating at a location yet allow a train originating at another location to pick-up defective equipment at the same location and haul it to the same place that it could have been hauled by the originating train. They further contend that the 100-percent requirement results in the unnecessary switching of cars and exposes employees to greater safety risks than if the equipment were permitted to depart in originating trains. Several commenters note that Canada has permitted trains to operate to destination with 95 percent operative brakes since June of 1994 and has experienced no compromise in safety. The AAR commented that railroads could live with a 95-percent operative brake requirement out of initial terminals provided that there were no mileage restrictions placed on the movement of such defective equipment as discussed in the NPRM. *See* 63 FR 48310. The ASLRA sought clarification as to the applicability of the 100-percent requirement to transfer trains. They contend that the language used in the NPRM suggests that all transfer trains must have 100-percent operative brakes from their initial terminal which is not what is required under the current regulations and would have a huge impact on small railroads.

A number of railroad representatives also provided comments and

recommendations on how FRA addressed the issue of what constitutes a location where brake repairs are required to be performed. These commenters recommend that FRA clarify what constitutes the nearest location where repairs can be made. These parties do not believe that this determination should be left to the discretion of individual FRA inspectors. They claim that such an approach creates inconsistent enforcement from one region to another and makes it very difficult for railroads to comply as FRA is continually second guessing their good faith determinations.

The AAR and other commenters contend that Congress intended that only fixed repair facilities be considered locations where brake system repairs must be conducted and that such facilities provide safer working conditions than those encountered when using a mobile repair truck. They further contend that it is not in the public interest to require repair trucks to make repairs at every location where they can be moved. The AAR and several railroads recommend that FRA permit railroads to designate repair locations to FRA and permit modification of those designations each quarter.

The AAR and its member railroads also objected to some of the proposed tagging requirements associated with the movement of equipment with defective brakes. They objected to the requirement that any automated tracking system be approved by FRA prior to its implementation. These commenters suggested that such review and approval process would be very time consuming and that FRA would not easily grant the use of such systems. They also objected to the proposed requirement that the tag or card be retained for 90 days, contending that the requirement was merely to aid in FRA's enforcement and served no other purpose.

The AAR also recommended that FRA modify the proposed requirement regarding the placement of equipment with defective brakes. The AAR contends that FRA should permit the use of multi-unit articulated equipment provided that it has no more than two consecutive control valves cut out or inoperative rather than the proposed limitation prohibiting the use of such equipment with consecutive inoperative or cut-out control valves. They contend this is the current practice of many railroads in the United States and is currently allowed on trains operated in Canada.

A number of rail labor representatives also provided comments on the

proposed provisions regarding the movement of equipment with defective brakes. These commenters as well as the CAPUC support the requirement that trains have 100-percent operative brakes at their initial terminals. They believe that any flexibility granted to railroads in this regard would reduce the incentive to conduct quality inspections and would result in railroads eliminating even more personnel at other outlying locations. These commenters also suggest that any inability of railroads to conduct repairs at outlying locations is due to their own actions in eliminating repair equipment and personnel from these locations. They also contend that properly equipped mobile repair trucks have the capability of conducting any repair that would be required at virtually any of the outlying locations operated by a railroad.

Several labor representatives also object to granting the railroads the ability to designate locations where brake system repairs will be conducted. They contend that this is merely an attempt by the railroads to eliminate existing locations where repairs can be conducted. They further object to the AAR's contention that only fixed repair facilities should be considered in determining where brake system repairs must be conducted. They claim that such an approach would lead to the closure of even more fixed repair shops so that railroads could further circumvent the requirement to make timely repairs at the nearest location. They assert that allowing railroads to designate locations where repairs will be made would violate 49 U.S.C. 20303(a) which requires repairs to be conducted at the nearest location where the necessary repairs can be made.

Parties representing rail labor generally support the proposed tagging requirements for moving defective equipment but noted their objection to the use of an automated tracking system. These commenters believe that an automated tracking system reduces the awareness of ground inspection forces as to the presence of defective equipment and would not ensure proper handling of such equipment. The required tag provides carmen and yard crews with the ability to visually identify defective equipment and take appropriate action. Furthermore, it is contended that automated tracking systems lack ready accessibility and do not provide sufficient accountability or security to prevent potential abuse by the railroads. Many of these commenters also recommend that the tags be retained for a period of at least one year rather than the proposed 90 days and

that they be made available to FRA immediately rather than within the proposed 15 days. Allowing railroads 15 days to produce the document would merely frustrate FRA enforcement activity due to information delay.

Several labor commenters as well as the CAPUC also recommend that FRA modify the proposed requirements regarding the person responsible for making the determinations regarding the movement of defective brake equipment. They suggest that the rule require the person to be a carman or at a minimum a person meeting the proposed definition of a qualified mechanical inspector. They contend that only these individuals have the experience and knowledge to adequately assess the impact that a defective piece of equipment might have on a train's operation.

Several labor representatives also raised concerns regarding the proposed method for calculating the percentage of operative brakes. These commenters along with the NTSB recommend that the proposed method for calculating the percentage of operative brakes, based on the number of cut-out control valves, be modified because a control valve can be cut in but the brakes which it controls can be inoperative. Thus, the proposed method does not provide an accurate count of the number of defective brakes. Some labor representatives suggest that the computation be based on car count as it provides a much more simple, reliable, and enforceable method than the proposed control-valve method. Certain labor representatives also object to the proposed list of conditions that would not be considered an inoperative brake for purposes of calculating the percentage of operative brakes. They contend that cars containing any of the listed conditions should be considered to have inoperative brakes.

FRA Conclusions. The final rule generally retains the requirements regarding the movement of defective equipment proposed in the 1998 NPRM with minor modification in response to the comments submitted. The final rule modifies the language used in the proposed general provisions to accurately reflect the language contained in the existing statutory provisions pertaining to the movement of equipment with defective brakes. The final rule replaces the term "repair location" with the phrase "location where necessary repairs can be performed." FRA agrees that the proposed language could have been interpreted as being somewhat contrary to the language used in the existing statute, which was not FRA's intent.

The final rule also clarifies that the person required to make the determinations regarding the safe movement of defective equipment is to be a "qualified person" as defined in the final rule. The intent of FRA when issuing the NPRM was to require the determinations to be made by these individuals. FRA believes that the training requirements contained in the final rule for designating a person qualified to perform a specific task will ensure that the individual possesses the appropriate knowledge and skills to perform the assigned task. The determinations that are required to be made in the final rule are currently made by individuals which FRA believes will be trained and designated under the final rule as qualified persons.

The final rule also modifies the proposed method for calculating the percentage of operative brakes. The final rule retains the general method of calculating the percentage based on a control-valve basis. FRA believes that basing the calculation on control valves provides a much more accurate measurement than using a car basis because many types of freight equipment in use today can have the brakes cut out on a per-truck basis, and FRA expects this trend to continue as the technology is applied to new equipment. Thus, the method retained in this final rule more accurately reflects the true braking ability of a train as a whole and recognizes existing technology. However, FRA agrees with the comments of the NTSB and certain labor representatives that the method proposed in the NPRM did not take into consideration the possibility of a control valve being cut in when the brakes it controls are inoperative. Consequently, the final rule clarifies that a control valve will not be considered cut in if the brakes controlled by that valve are inoperative.

The final rule also retains the proposed list of conditions that are not to be considered inoperative power brakes for purposes of calculating the percentage of operative brakes. Contrary to the assertions of some commenters, the conditions listed do not render the brakes inoperative nor are the listed conditions ones that are outside the scope of the movement-for-repair provisions. Furthermore, many of the listed conditions are of such a nature that if found, they would constitute a violation under other provisions contained in the final rule and separate penalties are provided.

The final rule also modifies the proposed requirement regarding the placement of multi-unit articulated equipment with inoperative brakes. The

final rule requires that such equipment shall not be placed in a train if it has more than two consecutive individual control valves cut out or if the brakes controlled by the valve are inoperative. FRA recognizes that the proposed requirement prohibiting the placement of such equipment with consecutive control valves cut out is more restrictive than current practice on many railroads. When proposing the requirement in the NPRM, FRA believed that the current practice on most railroads was to prohibit the placement of such equipment if it had consecutive control valves cut-out. Based on the comments received, it appears that the standard practice on most railroads prohibits placement of this equipment only if more than two consecutive control valves are cut-out. As it was FRA's intent to incorporate the current practices of railroads with regard to the placement of this equipment, the final rule has been modified accordingly.

The final rule retains FRA's position on the use of automated tracking systems in lieu of the required tagging of defective equipment. As an adequate automated system for tracking defective equipment does not currently exist on most railroads, FRA is not willing to permit the implementation of such a system without its approval. Furthermore, FRA does not believe it is prudent, from a safety perspective, to allow implementation of a tracking system for which FRA would not have a prior opportunity to assess to ensure the system's accessibility, security, and accuracy. Moreover, FRA agrees that the physical tagging of defective equipment provides a railroad's ground and operational forces the ability to visually locate and identify defective equipment at the time they see it rather than referring to an electronic database for such information. It should be noted that FRA is not intending to discourage the development of a viable automated tracking system, but believes that FRA must be provided the ability to review and approve any such system prior to its implementation. In fact, the final rule contains some new language regarding FRA's oversight of any automated tracking system that is approved by FRA to ensure the agency's ability to monitor such systems and potentially prohibit the use of the system if it is found deficient.

The final rule also retains the proposed requirement that a record or copy of each tag removed from a defective piece of equipment be retained for 90 days and made available to FRA within 15 days of request. FRA does not believe that the proposed time frames need to be expanded as suggested by

some commenters. The provisions are identical to those contained in part 215 regarding freight car defects, and they have proven to be sufficient to meet the needs of FRA. FRA admits that the record keeping requirements are intended to aid FRA in its enforcement of the regulations. However, as the agency is able to inspect and oversee only a small portion of the railroad operations taking place across the country at any one time, the need for railroads to maintain records is essential for FRA carry out its mission of ensuring that all railroads are operating in the safest possible manner and comply with those regulatory provisions designed to ensure that safety.

After consideration of the comments provided, FRA believes it is essential to further clarify to the regulated community its position for determining whether a location is a place where brake repairs can be made. FRA does not agree that railroads should be permitted to unilaterally determine the locations FRA will consider capable of making brake system repairs. History shows that many railroads and FRA have widely different views on what should be considered a location where brake repairs can and should be effectuated. Furthermore, it is apparent to FRA that some railroads attempt to minimize or circumvent the requirements for conducting repairs for convenience or efficiency. However, FRA also recognizes that the emergence of mobile repair trucks creates an ability to perform repairs that did not exist when Congress enacted the statutory requirements related to the movement of defective equipment. FRA acknowledges that every location where a mobile repair truck is capable of making repairs should not be considered a location where repairs must be conducted. However, FRA also disagrees with the contentions of some commenters that Congress intended for only fixed repair facilities to be considered when determining locations where brake repairs are to be performed and that mobile repair trucks should not be considered. FRA is aware of numerous locations where mobile repair trucks are being used in lieu of a fixed facility or where a fixed facility was eliminated and the same repairs, that were being performed by the fixed facility, are now being performed at the same location by a fully equipped repair truck. Thus, FRA believes that locations where repair trucks are used in the same manner as a fixed facility should be considered when determining where the necessary repairs can be made.

As noted in the NPRM, the determination as to what constitutes the

nearest location where necessary repairs can be performed is an issue that FRA has grappled with for decades. FRA continues to believe that the determination must be made on a case-by-case basis after conducting a multi-factor analysis. However, in an effort to better detail the items that will be considered by FRA in making a determination, the final rule contains general guidelines that FRA will consider when determining whether a location is one where at least some brake system repairs must be made. FRA would expect railroads to consider the guidance contained in the final rule when making their decisions on where equipment containing brake defects will be repaired. The guidance contained in the final rule is based upon the voluminous case law that establishes the guiding principles for determining whether a location constitutes the nearest location where the necessary repairs can be made, previous enforcement actions taken, and guidance provided by FRA regarding identification of repair locations. The final rule guidance incorporates the principles contained in the following discussion previously set out in the NPRM.

In determining whether a particular location is a location where necessary repairs can be made or whether a location is the nearest repair location, the accessibility of the location and the ability to safely make the repairs at that location are the two overriding factors that must be considered in any analysis. These two factors have a multitude of sub-factors which must be considered, such as: the type of repair required; the safety of employees responsible for conducting the repairs; the safety of employees responsible for getting the equipment to or from a particular location; the switching operations necessary to effectuate the move; the railroad's recent history and current practice of making repairs (brake and non-brake) at a particular location; and relevant weather conditions. Although the distance to a repair location is a key factor, distance alone is not the determining factor concerning whether a particular location is the nearest location for purposes of effectuating repairs and must be considered in conjunction with the factors noted above. Existing case law states that neither the congestion of work at a particular location or convenience to the railroad are to be considered when conducting this analysis.

Although FRA does not believe that railroads should be permitted to unilaterally designate locations where brake system repair will be conducted,

FRA does believe that safety could be served and disputes avoided if a railroad in cooperation with its employees could develop a plan, subject to FRA's approval, which designates locations where brake system repairs will be effectuated. FRA believes such a plan would have to be consistent with the guidelines discussed above and contained in this final rule and that such plans would have to be approved by FRA prior to being implemented. Such a plan could serve safety well by making clear to all where repairs are to be made and by assuring in advance that the criteria set forth in the final rule are appropriately applied. Consequently, the final rule permits railroads and representatives of their employees to submit a joint proposal containing a plan which designates locations where brake system repairs will be conducted. The final rule makes clear that such proposals would have to be approved by FRA prior to being implemented.

The final rule also retains the proposed and current requirement that a train have 100-percent operative brakes when departing from a location where an initial terminal brake test is required to be performed on the train. This has been a requirement in the railroad industry for decades, and FRA is not willing to provide an exception on an industry-wide basis at this time. Contrary to the assertions made by some commenters, FRA believes there is adequate justification for retaining the 100-percent requirement. In the NPRM and in the preceding discussion, FRA provided a number of reasons why it believes there is a need for the 100-percent requirement and will not reiterate them here. *See* 63 FR 48309. Some commenters suggested that FRA should permit any and all trains that have 95-percent operative brakes to operate from their points of origin to destination and that Canada currently allows such operation. FRA believes that such an approach would be completely contrary to, and would violate, the existing statutory mandate regarding the movement of equipment with defective brakes. The existing statutory provisions regarding the movement of equipment require that such equipment be repaired at the nearest location where the necessary repairs can be performed. *See* 49 U.S.C. 20303(a). Consequently, trains that originate at or that operate through locations where the necessary brake repairs can be effectuated clearly are required by the statute to have 100-percent operative brakes prior to departing those locations and may not haul a car with inoperative brakes under

the statutory hauling-for-repair provision.

Although FRA recognizes that the 100-percent requirement may be somewhat burdensome for some railroads at certain locations, FRA believes that the number of locations involved is relatively low and should be handled on a case-by-case basis through the existing waiver process. FRA agrees that many railroads have created their own problems by eliminating repair facilities and personnel at many of the outlying locations where the railroads now claim they lack the ability to make appropriate repairs. Furthermore, FRA believes that the best method of assessing the safety implications of permitting a location to operate trains with less than 100-percent operative brakes is for the railroad to provide information on how the railroad will handle the defective equipment based on the specific needs and operating characteristics of the railroad involved.

In the NPRM, FRA provided various approaches under which it would potentially consider allowing a railroad to operate a train from their initial terminal with less than 100-percent operative brakes. *See* 63 FR 48310. The methods suggested by FRA were rejected as being overly burdensome by several commenters noted in the preceding discussion. Therefore, FRA believes the burden falls on each railroad seeking relief from the 100-percent requirement at certain outlying locations to provide FRA with an operating plan that will ensure the safe operation of such trains and provide for the timely and certain repair of any defective equipment moved from those locations. Consequently, FRA believes that there are a few existing locations that may be candidates for receiving a waiver from the 100-percent requirement, and FRA is willing to consider waivers for such locations, however; the railroads applying for such waivers must be able to establish a true need for the exemption and must be willing to provide alternative operating procedures that ensure the safety of the trains being operated from those locations.

The final rule also clarifies that the 100-percent operative brake requirement is not intended to apply to transfer trains that originate at location where the necessary brake repairs cannot be effectuated. FRA agrees that the 100-percent requirement does not currently apply to such trains, and it was not FRA's intention when issuing the NPRM to extend its application to such trains. However, it should be noted that if a transfer train originates at a location where repairs to the equipment

containing defective brakes can be effectuated, then the train would be required to have 100-percent operative brakes prior to departing that location.

D. Dynamic Brakes

The issue of dynamic brakes, and the extent to which FRA should impose regulatory requirements governing their use, if at all, is one which has prompted lengthy and animated debate among all affected parties since the issuance of the ANPRM in December 1992. Coincident with the drafting of the ANPRM, the Rail Safety Enforcement and Review Act amended section 202 of the Federal Railroad Safety Act of 1970 (recodified at 49 U.S.C. 20141), and mandated, in part, that FRA, "where applicable, prescribe regulations that establish standards on dynamic braking equipment." This specific mandate is derived largely from two NTSB recommendations to FRA concerning dynamic brakes following the Southern Pacific Transportation Company (SP) accident at San Bernardino, California on May 25, 1989.

In this accident, excessive tonnage and excessive speed cresting a 2.2-percent grade, complicated by the fact that the train crew had been provided erroneous information regarding available and operative dynamic brakes, led to a train that was out of control and was ultimately unable to stop before derailling. While the NTSB determined the primary cause of the accident to be the excessive weight of the train as compared to that reported to the train crew, a secondary cause was determined to be the fact that the engineer had far less operable dynamic braking available for use than expected. The combination of these two conditions likely led to flawed decision making by the train crew in developing train handling strategies for negotiating the grade safely. In its final report, the Safety Board issued the following recommendations to the FRA regarding dynamic brakes:

1. Study, in conjunction with the AAR, the feasibility of developing a positive method to indicate to the operating engineer in the cab of the controlling locomotive unit the condition of the dynamic brakes on all units in the train.
2. Revise regulations to require that if a locomotive unit is equipped with dynamic brakes that the dynamic brakes function. NTSB Recommendation R-90-24 (1990).

To reiterate the general explanation of the principles of dynamic braking, as provided in the ANPRM (57 FR 62546), the 1994 NPRM (59 FR 47676), and the 1998 NPRM (63 FR 48311), dynamic

brakes were developed as a "free" by-product of the diesel-electric drive train. By engaging the dynamic brake, the normally powered traction motors on each axle are changed to generators, and the power generated is dissipated through resistance grids. The effect is similar to that of shifting an automobile to a lower gear when descending a steep grade. The additional hardware needed to outfit a locomotive with dynamic brakes includes the grids and the controls and switches.

The primary selling point of dynamic brakes has been the ability to reduce freight car brake shoe wear. The dynamic brake is also useful in controlling train slack in lieu of using the locomotive independent brake. Furthermore, use of the dynamic brake in controlling train speed in lieu of power braking, where the train brake is applied with the locomotive under power, is a major factor in fuel savings. Due to these benefits, railroads currently emphasize and encourage the use of dynamic brakes as evidenced through examination of numerous carriers' operating rules which dictate the use of dynamic braking as the preferred method of slowing or controlling a train, or both, especially in heavy-grade territory. Historically, dynamic brakes have been applied to locomotives at the individual railroad's option, primarily based on economic considerations. It is important to note that, at present, the vast majority of new locomotives procured by the railroads are equipped with dynamic brakes.

A wealth of information was gathered regarding the operation, testing, and maintenance of dynamic brakes prior to the issuance of the 1998 NPRM. In the 1998 NPRM, FRA provided an in-depth discussion of the various proposals and comments related to the operation and maintenance of dynamic brakes as well as potential technologies for providing information to the locomotive engineer regarding the operational status of the dynamic brakes in a train consist. See 63 FR 48310-313. After consideration of all the information submitted and developed, FRA proposed a set of standards for dynamic brakes that it believed were consistent with the statutory mandate, took into consideration NTSB recommendations, promoted progressive improvements in dynamic brake information systems through the phased introduction of technology, while avoiding excessive regulation that might discourage the use of dynamic brakes.

In the 1998 NPRM, FRA noted that RSAC Working Group and task force deliberations provided no rationale to warrant a reconsideration of FRA's

stated position that dynamic brakes do not offer the technical capability to serve as a primary train braking system since: (i) They provide braking force only on powered locomotive axles and are incapable of controlling in-train forces in the same manner as the automatic braking system; (ii) they are effective only within a narrow speed range and have no capability to actually stop a train; (iii) they can fail without prior warning; and (iv) their failure mode is characterized by loss of braking force (as opposed to the automatic brake, which, properly employed, initiates an emergency brake application upon loss of system integrity and therefore is failsafe). Similarly, however, FRA asserted that the RSAC Working Group and task force deliberations reinforced FRA's belief that dynamic brakes have become, *de facto*, a second-order safety system where employed. Although from the point of view of logical priorities, dynamic brakes "back up" the automatic train brake system, in sequence of operational procedures the priority is reversed. Stated differently, either the proper functioning of these systems, or the provision of reliable information concerning degraded functioning of these systems, should prevent locomotive engineers from operating trains in a manner that might make recovery through use of the automatic brake impossible.

In considering all of the information available, FRA concluded that it was imperative for the locomotive engineer to be informed in writing as to the operational status of the dynamic brakes on all locomotives in the consist at the initial terminal or point of origin for a train or at other locations where a locomotive engineer first takes charge of a train. Therefore, FRA proposed that locomotive engineers be provided this information at these locations. This proposed provision directly addressed the foremost concern articulated by the NTSB following the San Bernardino accident. FRA also proposed provisions requiring visible identification of locomotive units with inoperative dynamic brakes. FRA also agreed that when locomotives are equipped with dynamic brakes, they should be in proper operating condition and be maintained on a regular basis. Therefore, FRA proposed that defective dynamic brakes be repaired within 30 days of being found defective or at the locomotive's next periodic inspection. FRA recognized that these maintenance requirements might be overly burdensome in some instances for railroads (primarily short lines) that do not utilize dynamic brakes in their

respective operations, but yet own and operate locomotives equipped with dynamic brakes. Consequently, FRA proposed provisions for deactivating a locomotive's dynamic brakes without physically removing the components.

In addition to the information and maintenance requirements, FRA also proposed the development of operating rules and training programs to ensure the proper and safe use of dynamic brakes. For example, FRA proposed that railroads operating trains with brake systems that include dynamic brakes, develop and implement written operating rules governing safe train handling procedures for using these dynamic brakes under all operating conditions that are tailored to the specific equipment and territory of the railroad. The NPRM also proposed that the railroads provide training to their locomotive engineers on the prescribed operating rules, that at a minimum includes classroom, hands-on, and annual refresher training. More importantly, FRA also proposed a requirement that a railroad's operating rules be *based on the ability of friction brakes alone to safely stop the train under all operating conditions*. FRA believed that the establishment of these comprehensive operating rules and training plans was the most effective means by which to minimize the possibility of future incidents caused by excessive reliance on dynamic brakes by a train crew.

In the ANPRM (57 FR 62555), the 1994 NPRM (59 FR 47687), and the 1998 NPRM (63 FR 48314), FRA requested comments from the industry on possible methods of providing information regarding the status of dynamic brakes to the engineer in the cab of the controlling locomotive. The 1998 NPRM also contained a detailed discussion of various technologies available for providing information on the status of the dynamic brakes to the locomotive engineer. See 63 FR 48312–13. Although FRA recognized that the technology for dynamic brake displays with the ability to provide the type of information sought by FRA in the 1994 NPRM was not readily available at the time the 1998 NPRM was issued, several commenters suggested that the technology was under development. Consequently, FRA was not ready or willing to require the use of such indicators at that time. However, FRA noted that the benefit of such an indicator would be to alert engineers that they have diminished or excessive dynamic braking capabilities, thus permitting the engineers to control the braking of their trains in the safest possible manner. FRA indicated that it

would continue to monitor the development of the technology and consider its application to locomotives used in the industry.

The AAR and its members, the NTSB, the CAPUC, and several representatives of rail labor provided numerous comments on the provisions related to dynamic brakes proposed in the 1998 NPRM. The AAR contends that the proposed requirement to provide written notification of the operational status of the dynamic brakes is overly burdensome. They recommend that the information be permitted to be transmitted in any manner, provided a record of the notification is maintained in the cab of the controlling locomotive. They also suggest that the notification only be required on an exception basis, when the dynamic brakes are inoperative. Conversely, representatives of rail labor contend that no locomotive with inoperative dynamic brakes should be permitted to be dispatched from a location with mechanical facilities capable of making the repairs. They further contend that if the locomotive's dynamic brakes cannot be repaired at the train's point of origin it should be allowed to be operated only as a trailing unit. These commenters support the requirement that the locomotive engineer be informed in writing as to the operational status of the dynamic brakes on all units in the consist and recommend that the lead locomotive of the consist be tagged to notify the engineer of the presence of a defective unit.

The AAR also objects to the proposed requirement that defective dynamic brakes be repaired within 30 days of being found defective. It claims that due to the reliability of dynamic brake systems they should be permitted to operate until the next periodic inspection. AAR asserts that a shorter repair cycle will reduce motive power availability and may result in shortages of motive power on some railroads. AAR also requests clarification of the term "ineffective" dynamic brake. The organization recommends that the term be eliminated, that the term "inoperative" dynamic brake be retained, and that a dynamic brake be considered "inoperative" when it is no longer capable of providing its designed retarding force on the train, similar to the proposed definition of "effective" brake.

Representatives of rail labor contend that locomotives with defective dynamic brakes should be required to be repaired within 15 days of being discovered. They contend that this is a more than sufficient time period for railroads to arrange for alternative

power and get the locomotive to a location where it can be repaired. These commenters also recommend that a record of the repairs made to a locomotive's dynamic brakes be retained for a period of one year rather than the 92 days proposed in the NPRM. These commenters also recommend that provisions be added to ensure that all dynamic brakes operate as intended and that the equipment not be altered or cut back in any manner.

The AAR also seeks clarification of the proposed training requirements contending that they should not be included in this rule unless FRA is willing to specify the knowledge, skills, and ability criteria needed pursuant to part 240. They also contend that the proposed requirement regarding the development of operating rules is unclear and should be eliminated if not clarified. The BLE asserted that the problem is not in the training of engineers on the use of dynamic brakes but in the prohibition on the use of the automatic brake in normal train operation, not just when the dynamic brakes fail. They assert that locomotive engineers should be permitted to use the automatic brake to control the train on a periodic basis to become familiar with its operation.

The AAR also objects to the requirement to stencil locomotives operating with deactivated dynamic brakes. The AAR asserts that defacing such locomotives is unnecessary and that a less intrusive means of identification should be used. The organization recommends that a locomotive with a deactivated dynamic brake should be treated no differently than a locomotive with an inoperative dynamic brake, in that the locomotive engineer should be notified of its presence. The AAR also recommends that railroads be permitted to use existing tags to identify locomotives with inoperative dynamic brakes.

The AAR and several locomotive manufacturers provided comments on the availability and use of dynamic brake indicators. These commenters make clear that there is currently no easy method of providing the available dynamic brake retarding force to the locomotive engineer. They also contend that the technology does not exist to show dynamic brake performance on distributed power units and that they should, therefore, be excluded from any indicator requirements. These commenters indicated that technology is not available to have most existing locomotives retrofitted with an indicator of some sort. They also assert that it is impossible to develop a device that will tell an engineer whether the dynamic

brakes will operate prior to the engineer actually applying the brakes due to the unknown risk of failure. The AAR also recommends that if FRA adopts an indicator requirement then the proposed requirements related to the notification of the locomotive engineer of dynamic brake status and for repairing inoperative dynamic brakes should not be adopted since real-time information will be available to the locomotive engineer.

Numerous labor representatives, the NTSB, and the CAPUC contend that the technology does exist, at least for new locomotives, to provide locomotive engineers with real-time indicators of the operating status of the dynamic brakes on trailing units. These commenters believe that the information these indicators provide to an engineer is extremely important and would allow engineers to control and operate their trains in the safest manner possible. All of these commenters appear to support a requirement to require these indicators in new locomotives, and some recommend some sort of retrofit requirement for existing equipment.

Several parties responded to FRA's request regarding technical reasons for prohibiting a locomotive with inoperative dynamic brakes from functioning as the lead or controlling locomotive in a locomotive consist. The AAR responded that it found no technical reason to prohibit such use, provided the locomotive has the ability to control the dynamic brakes on trailing locomotives. The AAR contends that railroads currently operate in this manner and will use a non-equipped locomotive when the other locomotives in the consist are cabless. Several labor representatives asserted that a locomotive with inoperative dynamic brakes should not be permitted to operate as the controlling locomotive regardless of whether it can operate the dynamic brakes on trailing units. These commenters contend that the engineer is better able to feel the dynamic brakes operate if the controlling unit has operative dynamic brakes and that the engineer will at least know whether that unit has operable dynamic brakes. The CAPUC cites similar human factor reasons for contending that a locomotive with inoperative dynamic brakes should not be used as a controlling unit. Several labor representatives also contended that if a defective locomotive were in the controlling position, then the speed of the train should be limited to 30 mph and the train should not be permitted to operate over grades of one percent or greater until a locomotive with operative dynamic brakes is placed in the lead position.

The NTSB and the CAPUC recommend that FRA include a "mile-per-hour-overspeed-stop" rule into the final rule to ensure that the speed of a train does not exceed its braking capacity. Such a rule would require a train that exceeds an established speed limit by a specified amount to be placed in emergency. The NTSB recommends that the overspeed limit be 5 mph or less over the designated speed limit. The CAPUC claims that California uses a 5 mph rule but that the limit may vary for different operations and should be established through validated simulations that include brake fade and field tests and must be related to a safe base speed. Both commenters contend that although the overspeed rule is simple, it accomplishes a critical safety function and reduces the chances of a runaway occurring as it removes any discretion from the operator. The CAPUC also recommends that railroads be required to validate their operating rules to ensure that friction brakes alone are sufficient to stop a train on all grades operated by the railroad. The CAPUC recommends that this be accomplished through validated simulations and field test that take into account brake heat-fade.

FRA Conclusions. The intent of the proposed requirement to notify the locomotive engineer in writing as to the operational status of the dynamic brakes on the locomotives in a train's consist was to ensure that the engineer had timely information on the condition of the locomotives so he could operate the train in the safest possible manner based upon that information. Thus, the manner in which the information is provided to the engineer is not a major concern to FRA, provided the information is accurate and up-to-date. Therefore, the final rule will allow railroads to provide locomotive engineers with the required information by any means they deem appropriate. However, the final rule will require that a written or electronic record of the information provided be maintained in the cab of the controlling locomotive. This will ensure that on-coming engineers will have the information provided to the previous operator of the train. The final rule also clarifies that the information is to be provided to the locomotive engineer at the train's initial terminal and at other locations where an engineer "first begins operation" of the train rather than where the engineer "takes charge of the train." This clarification is in response to certain labor commenters to prevent possible misinterpretation or abuse of the requirement.

The final rule retains the proposed requirement to repair locomotives with inoperative dynamic brakes within 30 days of being found inoperative or at the locomotive's next periodic inspection, whichever occurs first. Due to the industry's reliance on these braking systems, as noted in the discussion above, FRA continues to believe they should be repaired as soon as possible after being found inoperative. FRA believes that a period of 30 days provides the railroads with sufficient time to get a locomotive to a location where the dynamic brakes can be repaired and allows for the reallocation of motive power when necessary so as to cause minimal disruption to a railroad's operation. FRA is not willing to decrease the time period allowed to make repairs, as recommended by some commenters, because such a reduction could jeopardize a railroad's access to available motive power and could cause delay in the movement of freight which may create safety hazards themselves.

The final rule also eliminates the use of the term "ineffective" dynamic brakes and uses the term "inoperative" dynamic brake to include any dynamic brake that no longer provides its designed retarding force on the train, for whatever reason. FRA agrees that the use of only this term clarifies the applicability of the requirements related to dynamic brakes and prevents potential misunderstandings. The final rule also retains the proposed requirements related to the tagging of a locomotive found with inoperative dynamic brakes. Contrary to the comments of some parties, FRA does not believe that the tagging provisions require the development of new tags. The rule would allow the use of any type of tag, provided it is placed in a conspicuous location and contains the required information. The final rule also eliminates the requirement to stencil the outside of a locomotive declared to have deactivated dynamic brakes. FRA agrees that defacing the exterior of the locomotive is unnecessary and would do little to inform the locomotive engineer of the presence of the locomotive. FRA believes that the requirements to notify the locomotive engineer of the operational status of the locomotives and to have the cab of the locomotive clearly marked that the locomotive's dynamic brakes are deactivated provide sufficient notice to the locomotive engineer as to the status of that locomotive.

The final rule contains a requirement that an electronic or written record of repairs made to a locomotive's dynamic brakes be maintained and retained for a period of 92 days. Although this

requirement was not proposed in the NPRM, FRA believes these records fall within the scope of the notice and are necessary to ensure that necessary repairs are conducted on a locomotive's dynamic brakes in a timely fashion. FRA also believes that such a record will provide a railroad with information regarding the operation of the dynamic brakes and will potentially permit railroads to identify a repeated problem with a locomotive's dynamic brakes to prevent future reoccurrences and, thus, increase the utilization of a locomotive's dynamic brakes.

The final rule also contains specific requirements related to the use of a locomotive with inoperative or deactivated dynamic brakes as a controlling locomotive. These requirements are based on FRA's review of the comments submitted in response to FRA's request regarding the positioning of such a locomotive made in the NPRM. See 63 FR 48314. FRA tends to agree that there are no technical reasons why a locomotive with inoperative dynamic brakes cannot function as the controlling locomotive provided it can control the dynamic brakes on trailing units in the locomotive consist. However, FRA also agrees that a locomotive engineer loses the physical sensation of the operation of the dynamic brakes when the unit where the engineer is riding loses dynamic brake capability, which, if present, provides the engineer with at least some assurance that the dynamic brakes on some of the units in the consist are operating. Thus, in addition to requiring that locomotives with inoperative or deactivated dynamic brakes have the capability of controlling the dynamic brakes on trailing units when operating as the controlling locomotive, the final rule also requires that such locomotives also have the capability of displaying to the locomotive engineer the deceleration rate of the train or the total train dynamic brake retarding force. This requirement will ensure that locomotive engineers have at least some information as to the operation of the dynamic brakes in the locomotive consist they are controlling. FRA intends that the information required by this provision be provided either by a device known as an "accelerometer" or a similar device or by a dynamic brake indicator capable of providing total train dynamic brake retarding force to the locomotive engineer.

The final rule also contains provisions requiring new and rebuilt locomotives to be equipped with some sort of dynamic brake indicator. Although FRA agrees that the technology does not

currently exist to equip existing locomotives with dynamic brake indicators economically, FRA does believe that the technology exists or is sufficiently developed to provide new locomotives with the ability to test the electrical integrity of the dynamic brakes at rest and to display the total train dynamic brake retarding force at various speed increments in the cab of the controlling locomotive. FRA recognizes that the industry will require a little time to incorporate the existing technology into new locomotives. Therefore, the requirements related to dynamic brake indicators will only apply to locomotives ordered one and one-half years after the issuance of this final rule and to locomotives placed in service for the first time three years after the effective date of the final rule. FRA also recognizes that not all locomotives being rebuilt are designed, or have the capability of being redesigned, to have the capability to display the total train dynamic brake retarding force in the cab of the controlling locomotive. Thus, the final rule allows rebuilt locomotives to be designed to display the train deceleration rate (i.e., equipped with an accelerometer or similar device as discussed above) in lieu of being equipped with the dynamic brake indicator required on new locomotives. FRA believes that the information provided by these indicators is extremely useful to an engineer and will provide locomotive engineers with ready access to real-time information on the operation of the dynamic brakes in a locomotive consist and permit engineers to control and operate trains in the safest manner possible.

FRA also acknowledges that the information provided by dynamic brake indicators would eliminate the need to provide the locomotive engineers with information regarding the operational status of the dynamic brakes when the engineer first begins operation of a train. As the indicators would provide real-time information to the engineer on the operation of the dynamic brakes brake in the train consist, the information received by the engine when beginning operation would be unnecessary. Therefore, the final rule alleviates the need to inform locomotive engineers of the status of the dynamic brakes when all of the locomotives in the lead consist are equipped with dynamic brake indicators required for new locomotives. FRA believes that this allowance makes sense from a practical perspective but also provides some incentive for railroads to equip existing equipment with such indicators when the technology for doing so becomes

economically feasible. It should be noted that there is no requirement that the dynamic brake status of distributed power units be provided in order to eliminate the need to provide dynamic brake information to the engineer. FRA agrees that the technology for transmitting that information to the engineer is not currently available in a cost effective and reliable manner.

The final rule retains the proposed provisions requiring railroads to develop and implement written operating rules governing the use of dynamic brakes and to incorporate training on those operating rules into the locomotive engineer certification program pursuant to 49 CFR part 240. Contrary to the assertions of some commenters, FRA does not believe these requirements are unclear. FRA intends for each railroad to develop appropriate operating rules regarding train handling procedures when utilizing dynamic brakes that cover the equipment and territory operated by the railroad. Many railroads already have these procedures in place and already provide training to their employees that adequately cover the requirements. FRA continues to believe that training on proper train handling procedures is essential to ensuring that locomotive engineers can properly handle their trains with or without dynamic brakes and in the event that these brake systems fail while the train is being operated. FRA also disagrees that the agency should specify the knowledge, skill, and ability criteria that a railroad must incorporate in its training program. FRA believes that each railroad is in the best position to determine what these criteria should be, given the railroad's equipment, physical characteristics and operating rules, and what training is necessary to provide that knowledge, skill, and ability to its employees.

The final rule also requires that the operating rules developed by railroads include a "miles-per-hour-overspeed-stop" requirement that requires a train to be immediately stopped if it exceeds the maximum authorized speed by more than 5 mph when descending a grade of one percent or greater. FRA agrees with both the NTSB and the CAPUC that this requirement accomplishes a critical safety function and reduces the potential for a runaway train as it establishes a clear rule for stopping a train and removes any discretion from the operator to continue operation of a train. FRA believes that the five-mph limitation is a good base limitation that should be reduced if so indicated by validated research and should be increased only with FRA approval. Moreover, the operating rules of most

Class I railroads already include a five-mph-overspeed-stop provision; thus, FRA's inclusion of the requirement in this final rule should impose little or no burden on the operations of most railroads.

E. Training and Qualifications of Personnel

Currently, the regulations contain no specific training requirements or standards for personnel who conduct brake system inspections. The regulations merely require that a "qualified person" perform certain inspections or tasks. See 49 CFR 232.12(a). Furthermore, the current regulations do not require that a railroad maintain any type of records or information regarding the training or instruction it provides to its employees to ensure that they are capable of performing the brake inspections or tests for which they are assigned responsibility. In several cases, FRA has found that a railroad's list of "qualified persons" is merely a roster of all of its operating and mechanical forces.

In the 1994 NPRM, FRA proposed a series of broad qualification standards addressing various types of personnel engaged in the inspection, testing, and maintenance of brake equipment. See 59 FR 47731-47732. These broad qualifications were separated into distinct subgroups that identified various types of personnel based on the type of work those individuals would be required to perform under the proposal. These included supervisors, train crew members, mechanical inspectors, and electronic inspectors. Although not proposed in the rule text of the 1994 NPRM, the preamble contained various guidelines regarding specific hours of classroom and "hands-on" training as well as guidelines regard the level of experience each of these types of employees would be required to possess or be provided. See 59 FR 47702-47703. The proposal also contained various requirements regarding the development and retention of records and information used by a railroad in determining the qualifications of such employees. See 59 FR 47732.

In the 1998 NPRM, FRA acknowledged that many railroads continue to improve the training they provide to individuals charged with performing brake system inspections, tests, and maintenance; however, FRA also acknowledged that it continued to believe that this training could be greatly improved and enhanced. The agency noted that although there had been a decline in the number of train incidents, derailments, fatalities, and injuries over the previous ten years,

FRA believed that the number of these incidents could be further reduced if maintenance, inspections, and tests of the brake system were performed by individuals who have received proper training specifically targeting the activities for which the individual is assigned responsibility. FRA believed that one of the major factors in ensuring the quality of brake inspections and the proper operation of that equipment is the adequate training of those persons responsible for inspecting and maintaining that equipment.

In the 1998 NPRM, FRA proposed broad performance-based training and qualification requirements that would permit a railroad to develop programs specifically tailored to the type of equipment it operates and the employees designated by the railroad to perform the inspection, testing, and maintenance duties required in this proposal. FRA agreed that there is no reason for an individual who solely performs pre-departure air brake tests and inspections to be as highly trained as a carman since a carman performs many other duties which involve the maintenance and repair of equipment in addition to brake inspections. Therefore, FRA proposed training and qualification requirements which permit a railroad to tailor its training programs to ensure the capability of its employees to perform the tasks to which they are assigned. FRA also made clear that the proposed training and qualification requirements applied not only to railroad personnel but also to the personnel of railroad contractors and personnel in plants that build cars and locomotives that are responsible for brake system inspections, maintenance, or tests covered by this part.

Contrary to the 1994 NPRM, FRA did not issue specific guidelines on experience, classroom training, or "hands-on" training. FRA agreed that many of the guidelines contained in the preamble to that proposal were overly restrictive and might have impeded the implementation of certain training protocols capable of achieving similar results with less emphasis on solely the time spent in the training process. Furthermore, the 1994 proposed guidelines failed to consider the potentially narrow scope of training that might be required for some employees, particularly some train crew personnel, that perform very limited inspection functions on very limited types of equipment. Consequently, although the training and qualification requirements proposed in the 1998 NPRM continued to require that any training provided include classroom and "hands-on" training as well as verbal or written

examinations and "hands-on" proficiency, they did not mandate a specific number of hours that the training must encompass as FRA realized that the time period should vary depending on the employee or employees involved. The 1998 proposal also contained provisions for conducting periodic refresher training and supervisor oversight of an employee's performance once training is provided.

FRA believed that the recordkeeping and notification requirements contained in the 1998 proposal were the cornerstone of the training and qualification provisions. As FRA was not proposing specific training curricula or specific experience thresholds, FRA believed that the recordkeeping provisions were vital to ensuring that proper training was being provided to railroad personnel. FRA intended the record keeping requirements to provide the means by which FRA would judge the effectiveness and appropriateness of a railroad's training and qualification program. The proposed recordkeeping provisions also provided FRA with the ability to independently assess whether the training provided to a specific individual adequately addresses the tasks that the individual is deemed capable of performing. Finally the proposed training mandates seemed most likely to prevent railroads from using insufficiently trained individuals to perform the necessary inspections, tests, and maintenance required by the proposal.

In the 1998 NPRM, FRA proposed to require that railroads maintain specific personnel qualification records for all personnel (including their contractors' personnel) responsible for the inspection, testing, and maintenance of train brake systems. FRA proposed that the records contain detailed information regarding the training provided as well as detailed information on the types of equipment the individual is qualified to inspect, test, or maintain and the duties the individual is qualified to perform. As an additional means of ensuring that only properly qualified individuals are performing only those tasks for which they are qualified, FRA proposed that railroads be required to promptly notify personnel of changes in their qualification status and specifically identify the date that the employee's qualification ends unless refresher training is provided.

FRA recognized that some railroads would be forced to place a greater emphasis on training and qualifications than they had in the past, and as a result would incur additional costs. However, FRA believed that the proposed rule

allowed railroads the flexibility to provide only the training that an employee needs in order to perform a specific job. The 1998 proposed rule did not require an employee who performs only brake inspections while the train is en route (*i.e.*, Class II brake tests) to receive the intensive training needed for an employee who performs Class I brake tests or one who is charged with the maintenance or repair of the equipment. The training might be tailored to the specific needs of the railroad. Across the industry as a whole, the 1998 proposal would not have required extensive changes in the way most railroads currently operate, but it would have required some railroads to invest more time in the training of their personnel.

FRA recognized that the costs of the proposed training requirements were fairly substantial; however, FRA believed that most Class I railroads had already invested in training, routinely scheduled training for their employees, and offered training to other interested parties. On the other hand, FRA noted that most railroads did not engage in the "hands-on" training and testing contained in the proposal nor did most railroads maintain the records required in the proposal. FRA noted that many Class I railroads have participated in initiatives under the Safety Assurance and Compliance Program (SACP) with FRA and labor and that many of the proposed training requirements would already be met by those railroads that have completed the training required under the SACP.

In the 1998 NPRM, FRA recognized that the proposed training requirements would likely cause some impact to smaller railroads but believed that the impact of the requirements on these smaller operations would be somewhat reduced due to the training already provided by the railroads and due to the nature of the operations themselves. FRA noted that many smaller railroads, particularly Class II railroads, send their employees to other railroads for training, participate in ASLRA and FRA training, and have some form of on-the-job training. Furthermore, Class III railroad employees are not likely to require extensive training on different types of brake equipment since most of the equipment used by Class III railroads have only one type of brake valve. Furthermore, the employees of these small railroads would likely not be required to receive any training in the areas of EPIC brakes, dynamic brakes, two-way EOT devices, or on some of the brake tests and maintenance mandated in the proposal due to the limited distances traveled by these trains, the low tonnages hauled, and

because many of the maintenance functions are contracted out to larger railroads.

The AAR and its members, the ASLRA, and various private car owners submitted numerous comments regarding the proposed training requirements. Generally, these commenters believe that the significant costs being imposed by the proposed training requirements are not justified based on the industry's safety record over the last two decades. They contend that the industry's safety record is evidence that the current training provided by the railroads is sufficient. At a minimum, these commenters recommend that railroads be provided three years to implement any training requirements imposed. Such an approach would be consistent with the proposed three-year refresher training requirements and would prevent manpower shortages and ease the financial impact.

Several railroad representatives recommend that railroads not be responsible for the training of the contract personnel they employ as was proposed. They contend that railroads do not maintain records of the training or experience of these individuals and that the contractor should bear the burden of training its own employees. These commenters admit that railroads would work with contractors to help them train their employees but that the contractor should be held responsible for providing the necessary training. They assert that the contractor is in the best position to determine the training needs of its employees and that the proposed approach potentially intrudes and alters the employment relationship of contractors and railroads.

Representatives of various railroads also object to some of the administrative burdens imposed by the proposed training requirements. They contend that the requirement to identify all tasks related to the inspection, testing, and maintenance of brake systems and develop procedures for performing each task, is overly burdensome and unnecessary. They also object to the proposed requirement that the railroad's Chief Mechanical or Chief Operating Officer sign a statement for each employee attesting that the employee meets the minimum requirements. They contend that the requirement would inhibit the use of electronic records and that there is no benefit obtained by requiring such a signature. These commenters further object to the requirement that railroads implement formal internal audit programs, contending that these programs would waste scarce resources and that the

effectiveness of a training program can be assessed through efficiency tests, supervisory spot checks, and other less burdensome methods.

The AAR also objects to the potential requirement that all existing employees be completely retrained. The AAR recommends that existing employees not be required to receive any new training because it is unnecessary and there has been no showing that current training is inadequate. They also suggest that there is no need for refresher training of these employees unless a new brake system is introduced. At a minimum, they recommend that the "hands-on" refresher training be eliminated as virtually every railroad conducts periodic efficiency testing or audits of its employees to ensure "hands-on" proficiency of personnel. They also contend that refresher training should only be required for those employees that repeatedly demonstrate a failure to properly perform their required duties.

Several railroad representatives also object to the proposed requirement that employees receive training and testing on each task they will be required to perform and that they be trained and tested on each type of equipment operated by the railroad. These commenters contend that these proposed requirements would be cost-prohibitive and time-consuming. They claim that it is impossible for a railroad to have every type of vehicle it operates available to train all of its employees. They recommend that the training be limited to the different brake systems operated by the railroad and that the training be required to impart the necessary skills and abilities to perform the required tasks.

The AAR and the ASLRA also object to the proposed record keeping provisions, claiming they are overly detailed and unnecessary. These commenters recommend that the record keeping burdens be reduced and that FRA should only require a list of qualified employees, the training courses completed by an employee, and the date that training was completed. They contend that each railroad is in the best position to determine the level of detail that their records should contain and that the level of detail proposed by FRA will have a significant cost burden on railroads.

Representatives of rail labor reiterate that the need for any training provisions could be greatly reduced if FRA would simply require many of the proposed inspections and tests to be conducted by qualified carmen. At a minimum, these commenters contend that any training provisions must include a requirement

for FRA approval. They assert that any training program developed by a railroad should be approved by FRA. Several labor representatives also contend that the proposed training requirements fail to adequately address supervisors charged with oversight and training instructors. They believe that specific qualifications of both supervisors and instructors should be included in any final rule developed. They further contend that the proposed requirements do not include a dispute resolution procedure which they believe is necessary to avoid potential abuses by railroads when designating qualified employees. Certain labor representatives recommend that the proposed language regarding the training on new equipment needs to be clarified to ensure that the training is provided before the new equipment is placed in service.

FRA Conclusions. FRA recognizes that there has been a significant decline in the number of brake-related derailments and other train accidents and incidents, and resulting property damage, fatalities, and injuries over the last ten years; however, FRA continues to believe these numbers can be even further reduced if the inspections and tests of brake systems are performed by individuals who have received training that specifically targets the activities which the individual is assigned responsibility to perform. FRA's experience in enforcing the existing power brake regulations supports the conclusion that the better trained a person is on how to perform a brake inspection the better that person can perform the inspection when required to do so. Many FRA field inspectors have discovered equipment with brake conditions having the potential of causing a derailment or accident that are not identified by railroad personnel because those persons responsible for finding the conditions are not sufficiently trained or equipped to conduct the inspections they are required to perform. FRA's field forces consistently find that the most comprehensive brake inspections are performed by those individuals who have received detailed training specifically related to the inspection being performed and who conduct such inspections on a consistent basis. Based on this experience, FRA believes that the training required in this final rule will enhance the quality of brake inspections, which will increase the discovery of brake conditions that have the potential of causing a derailment or other accident. Because an increased number of brake conditions having the

potential of causing a derailment or other accident will be discovered prior to being used in a train, FRA expects that the training required by this rule will reduce the number of incidents caused by brake-related problems.

Furthermore, as discussed in the 1998 NPRM, railroads continue to consolidate mechanical work to fewer and fewer locations on their systems. This trend places an increasing premium on the ability of mechanical and operating forces to conduct meaningful inspections and tests of the power brake system. Increases in train speeds and increased pressure on operating personnel due to growing traffic density will continue to make it critical for operating and mechanical forces to discharge their duties with respect to the power brake system both diligently and effectively even under the most optimistic of scenarios. Technological change presents an additional reason for placing a strong emphasis on the training and qualifications of inspection personnel. Both operating and mechanical personnel are confronted with an increasing variety of power brake arrangements and features. Consequently, these trends and changes make the training required in this final rule a necessity in order to ensure and enhance the quality of brake inspections.

In addition to the safety benefits, both quantified and non-quantified, there are certain operational benefits derived from the training required by this final rule. This final rule allows an increase in the distance some trains may travel between brake inspections. These increases are premised on the condition that all of the inspection functions performed on these trains are conducted by highly trained and qualified personnel. The latitude provided to these trains will result in fewer inspections per miles traveled and will reduce the number of opportunities that exist for a serious defect to be found before it could result in a train incident. It is imperative, therefore, that each inspection performed on these trains be of uniformly high quality. FRA believes that the training required by this final rule is a key factor for ensuring such high quality inspections. FRA also believes that certain non-quantifiable operational benefits will be derived from the training required by this final rule, particularly in the areas of equipment utilization, reduced train delays, and repair costs.

FRA agrees that railroads have made significant improvements in the quality of training provided to their employees but believes that this training can be further improved. Furthermore, FRA

believes that a number of railroads participating in the SACP process have already developed, or are in the process of developing, comprehensive training programs that meet many of the requirements proposed in the NPRM. Therefore, the final rule retains the basic structure and concepts that were proposed in the NPRM regarding the training of individuals responsible for conducting the inspections and tests required by the final rule. The proposed training requirements have been slightly revised in this final rule in order to clarify FRA's intent, to recognize existing training, and to reduce any unnecessary burden that may have been inadvertently created by the proposed requirements.

The final rule modifies the proposed provision that required a railroad to provide training to the personnel of a contractor to the railroad whom the railroad uses to perform the various tasks required by the rule. The final rule makes clear that the contractor is responsible for providing appropriate training to its employees. FRA agrees that railroads should not bear the burden of training the employees of a contractor. However, FRA notes that this change does not relieve the railroad from potential civil penalties for, *e.g.*, failure to perform a proper Class I brake test, if the employees of a contractor were found not to be qualified to perform the task for which they are assigned responsibility. As a contractor's employees are acting as an agent for the railroad when performing a task required by this regulation, both the railroad and the contractor would remain liable for potential civil penalties if the employees used to perform a particular task were not trained and qualified in accordance with the training requirements contained in this final rule.

The final rule retains the proposed requirement that railroads and contractors identify the tasks related to the inspection, testing, and maintenance of the brake system required to be performed by the railroad or contractor and identify the skills and knowledge necessary to perform each task. FRA believes that it is essential to developing a comprehensive training program for a railroad or contractor to go through the process of identifying the tasks they will be required to perform and determining the skills and knowledge that must be provided to perform those tasks. FRA believes that most railroads have already engaged in this activity and would merely need to revise existing data with changes made to existing requirements by this final rule. The final rule eliminates the requirement to

develop written procedures for performing each task identified. Although FRA believes that each railroad or contractor should and will develop such procedures, FRA does not believe it is necessary to require their development as FRA believes they will either be developed in the required training curricula or are sufficiently detailed in the regulation itself.

The final rule also clarifies that the required training is intended to provide employees with the skills and knowledge necessary to perform the tasks required by this final rule. FRA does not believe it is necessary to train an employee on every different type of equipment that a railroad operates or on each and every task an employee will be required to perform. FRA's intent when issuing the NPRM was to ensure that the training received by an employee provided that individual with the knowledge and skills needed to perform the tasks he or she was assigned on the various types of equipment the railroad operated. Therefore, the final rule clarifies this intent by specifically stating that the training curriculum, the examinations, and the "hands-on" capability should address the skills and knowledge needed to perform the various required tasks rather than focusing strictly on the tasks themselves or on the specific types of equipment operated by the railroad. The final rule also clarifies that the training that an employee is required to receive need only address the specific skills and knowledge related to the tasks that the person will be required to perform under this part. Thus, a railroad or contractor may tailor its training programs to the needs of each of its employees based on the tasks that each of its employee will be required to perform. FRA tends to agree with several commenters that there is no reason for an individual who performs strictly brake inspections and tests to be as highly trained as a carman since carmen perform many other duties related to the maintenance and repair of equipment in addition to brake inspections.

The final rule also clarifies that previous training and testing received by an employee may be considered by the railroad. FRA did not intend to require the complete retraining of every employee performing a task required in this final rule. When proposing the training requirements, FRA intended for railroads to incorporate existing training regimens and curricula into the proposed training programs. Therefore, in order to clarify this intent, the final rule contains a specific provision which permits railroads to consider previous

training and testing received by an employee when determining whether an employee is qualified to perform a particular task. However, the final rule also makes clear that any previous training or testing considered by a railroad or contractor must be documented as required in the final rule. Thus, previous training or testing which has not been properly documented cannot be considered. The final rule also makes clear that employees must be trained on the specific regulatory requirements contained in this final rule related to the tasks that the employee will be required to perform. Therefore, all employees performing tasks covered by this part will require at least some training which covers the specific requirements detailed in this final rule.

The final rule retains the proposed requirement regarding the performance of periodic refresher training and testing. The final rule retains the requirement that refresher training be provided at least once every three years and that it include both classroom and experiential "hands-on" training and testing. FRA continues to believe that periodic refresher training is essential to ensuring the continued ability of an employee to perform a particular task. FRA does not intend for such training to be as lengthy or as formal as the initial training originally provided, but believes that the training should reemphasize key elements of various tasks and focus on items or tasks that have been identified as being problematic or of poor quality by the railroad, contractor, or its employees through the periodic assessment of the training program. The final rule also makes clear that a railroad or contractor may use efficiency testing to meet the hands-on portion of the required refresher training provided such testing is properly documented. FRA agrees that such testing provides the necessary assurances that the individual continues to have the knowledge and skills necessary to perform the task for which the employee is being tested.

The final rule also modifies the proposed requirement that railroads develop an internal audit process to evaluate the effectiveness of their training. Although FRA agrees that a formal audit process may not be necessary, FRA continues to believe that railroads and contractors should periodically assess the effectiveness of their training programs. However, rather than require a formal internal audit, FRA believes that periodic assessments may be conducted through a number of different means and each railroad or contractor may have a need to conduct

the assessment in a different manner. The final rule requires that a railroad or contractor develop a plan to periodically assess its training program and, as suggested by some commenters, permits the use of efficiency tests or periodic review of employee performance as methods for conducting such review. FRA agrees that many railroads, due to their small size, are capable of assessing the quality of the training their employees receive by conducting periodic supervisory spot checks or efficiency tests of their employees' performance.

The final rule also retains the record keeping requirements proposed in the NPRM with slight modification for consistency with the changes noted above regarding the application of the skills and knowledge necessary to perform a particular task. FRA continues to believe that the record keeping and designation requirements contained in this final rule are the cornerstone of the training requirements. Contrary to the views of some commenters, FRA believes that something more than mere lists of qualified employees is needed. Because the rule allows each railroad and contractor the flexibility to develop a training program that best fits its operation and does not impose specific curriculum or experience requirements, FRA continues to believe it is vital for railroads and contractors to maintain detailed records on the training they do provide. Such documentation will allow FRA to judge the effectiveness of the training provided and will provide FRA with the ability to independently assess whether the training provided to a specific individual adequately addresses the skills and knowledge required to perform the tasks that the person is deemed qualified to perform. Moreover, requiring these records will prevent railroads and contractors from circumventing the training requirements and prevent them from attempting to utilize insufficiently trained personnel to perform the inspections and tests required by this rule.

The final rule makes clear that the required records may be maintained either electronically or in writing. Many railroads currently maintain their training records in an electronic format, and FRA sees no reason not to permit such a practice if as the information can be provided to FRA in a timely manner upon request. The proposed provision requiring the railroad's chief mechanical or chief operating officer to sign a statement regarding each employee's qualifications has been modified in the final rule to merely require identification of the person or persons

making the determination that the employee has completed the necessary training. This modification will permit the information to be maintained electronically and will still provide the accountability which FRA intended by the provision in the NPRM. FRA believes it is absolutely essential that those individuals making the determinations regarding an employee's qualification be identified in order to ensure the integrity of the training programs developed and prevent potential abuses by a railroad or contractor.

FRA also objects to the portrayal by some commenters that the records required to be maintained are overly burdensome. Virtually all of the items required to be recorded are currently maintained by most railroads in some fashion or another. Contrary to the concerns raised by some commenters, the rule does not require that the contents of each training program be maintained in each employee's file. Railroads are free to develop whatever type of cross-referencing system they desire, provided the contents of the training program are maintained in some fashion and can be readily retrieved. Furthermore, railroads currently maintain lists of individuals they deem to be qualified persons and inform those individuals as to their status to perform particular tasks. FRA believes this is a good practice and is necessary to ensure that individual employees do not attempt to perform, or are not asked to perform, tasks for which they have not been trained.

The final rule contains two provisions that were not specifically included in the NPRM but which were intended by FRA to be covered by the established training programs. The final rule requires that new brake systems be added to training programs prior to their introduction into revenue service. FRA believes this requirement is only logical and makes sense. FRA believes that prior to the introduction of any new brake system the employees responsible for inspecting and maintaining the equipment need to be specifically trained on the systems in order to adequately perform their required tasks. The final rule also requires railroads that operate trains under conditions that require their employees to set retaining valves to develop training programs which specifically address the use of retainers and provide such training to those employees responsible for using or setting retainers. This provision has been added in response to an NTSB recommendation which FRA supports. See NTSB Recommendation R-98-7.

FRA has not included provisions requiring FRA approval of the training programs developed by railroads or contractors as suggested by some commenters. FRA does not have the resources to implement such an approval process and does not believe such approval is necessary, given the records that will be required to be maintained. Furthermore, FRA believes that such a process would slow the implementation of training programs and, thus, slow the implementation of this final rule. An approval process would also seriously impede the ability of a railroad or contractor to make necessary and timely changes to its training program, which is necessary to ensure its currency. The final rule also does not contain a dispute-resolution provision regarding such programs. FRA believes that such matters are within the province of employee-employer relationships and are better addressed by established processes. The final rule also does not specifically address the training that must be provided to supervisors. Although some commenters recommended specific requirements, FRA believes that supervisors are sufficiently covered by the final rule requirements. FRA believes that in order for a supervisor to properly exercise oversight of an employee's work, the supervisor must be qualified to perform the tasks for which they have oversight responsibilities.

FRA realizes that many railroads will need time to bring their existing training programs up to the level required by this final rule. FRA also recognizes that the cost of the proposed training requirements is somewhat substantial and may prevent railroads from completing the necessary training in a short period of time. Moreover, FRA recognizes that railroads need time to provide the necessary training to their employees without causing manpower shortages in their operations. Therefore, the final rule allows railroads three years in which to develop and complete the required training. This period is consistent with the time requested by the AAR and other railroad commenters. It is also consistent with the requirement to provide refresher training at least every three years and will allow a railroad to have one-third of its inspection forces receive the necessary refresher training each year after the initial training is complete.

F. Air Source Requirements

In the 1998 NPRM, FRA again proposed a ban on the use of anti-freeze chemicals in train air brake systems, reiterating the position stated in the

1994 NPRM, in order to prevent untimely damage and wear to brake system components. See 59 FR 47728. At that time, FRA had not received any adverse comments on this issue in response to the 1994 NPRM, in which a similar requirement was proposed. Furthermore, statements and discussions provided at various RSAC Working Group meetings appeared to establish that both rail labor and rail management representatives believed that such a provision would be acceptable.

Based on information gathered throughout the RSAC process, previous comments by industry parties, and agency experience, FRA firmly believes that the presence of moisture in the train air brake system poses potential safety, operational, and maintenance issues that require attention in this rulemaking. After completion of detailed, instrumented testing on both locomotives and yard test plants performed as part of the task force activities, FRA determined that locomotives rarely contribute to moisture in the trainline. Consequently, FRA did not propose that air dryers be installed on new locomotives, as was proposed in the 1994 NPRM (59 FR 47729). A detailed discussion of the testing conducted by the RSAC Working Group members and recommendations regarding air dryers appears in the preamble of the 1998 NPRM. See 63 FR 48317-19.

In contrast, the results of the same testing clearly indicated to FRA that yard air plants often provide unacceptably high levels of moisture while charging the train air brake system due to the age of the system, improper design, inadequate maintenance, or a combination thereof. Working Group task force efforts also estimated that upwards of 80 percent of train air brake systems are charged using yard/ground air plants. However, FRA did not believe that simply requiring yard air sources to be equipped with air dryers would solve or address the problem. In order for air dryers to be effective on yard air sources, the air dryers must be properly placed to sufficiently condition the air source. FRA determined that many yard air sources are configured such that a single air compressor services several branch lines used to charge train air brake systems; therefore, multiple air dryers would be required to eliminate the introduction of moisture into the brake system. Consequently, FRA determined that requiring yard air sources to be equipped with air dryers would impose a significant and unnecessary cost burden on the railroads.

Based on its determination that air dryers would not provide a cost effective or suitable solution, FRA considered other viable alternatives. In the 1998 NPRM, FRA proposed that each railroad develop and implement a system by which it would monitor all yard air sources to ensure that the air sources operate as intended and do not introduce contaminants into the brake system. FRA believed that the proposed monitoring program provided a method by which the industry might maximize the benefits to be realized through air dryer technology, which all parties acknowledge has been proven to reduce the level of moisture introduced into the trainline, at a cost that was commensurate with the potential benefits. The proposed monitoring program required railroads to take remedial action with respect to any yard air sources that were found not operating as intended, and established a retention requirement for records of the deficient units to facilitate the tracking and resolution of continuing problem areas. FRA also proposed that yard air reservoirs either be equipped with an operative automatic drain system or be manually drained at least once each day that the devices were used or when moisture was detected in the system. FRA believed that these proposed provisions, in concert with assurances that condensation is blown from the pipe or hose from which compressed air is taken prior to connecting the yard air line or motive power to the train, as currently prescribed in § 232.11(d), would significantly minimize the possibility of moisture being introduced into the train air brake system.

In the 1998 NPRM, FRA noted the recent issuance of a final rule mandating the incorporation of two-way end-of-train telemetry devices (two-way EOTs) on a variety of freight trains, specifically those operating at speeds of 30 mph or greater or in heavy grade territories. See 62 FR 278. Two-way EOTs provide locomotive engineers with the capability of initiating an emergency brake application that commences at the rear of the train in the event of a blockage or separation in the train's brake pipe that would prevent the pneumatic transmission of the emergency brake application throughout the entire train. FRA noted that the issuance of a final rule mandating the use of these devices was significant particularly in the context of air source requirements and air dryers. In the unlikely event that the proposed requirements regarding air sources fail to sufficiently eliminate moisture from the trainline, and a restriction or

obstruction in the form of ice forms as the result of the freezing of this moisture during cold weather operations, the two-way EOT device becomes a first order safety device and will initiate an emergency application of the brakes from the rear of train. Therefore, many of the concerns associated with moisture in the trainline freezing in cold weather operations have been alleviated through the incorporation of this technology in most freight operations, thus reducing the need or desire to specifically require air dryers on air sources.

The AAR and its member railroads submitted various comments related to the proposed air source requirements. Although various railroads had previously indicated support for a requirement banning the use of alcohol in train brake system and stated that their railroad no longer used alcohol in its operation, they now object to the proposed requirement prohibiting the use of the such chemicals. These commenters now assert that there are instances in the industry where alcohol is used to unfreeze frozen trainlines. They contend that railroads should be permitted to continue this practice in order to move trains in certain circumstances and that the need to use alcohol would be rare but necessary. The AAR contends that the use of the term "chemical" is inappropriate, and, unless there is an alternative, the requirement should be deleted. They contend that frozen trainlines are a reality and railroads must be provided some method to deal with such occurrences other than waiting for warm weather which could take months.

These commenters also discussed the proposed requirements related the development and implementation of monitoring plans for yard air sources. The AAR contends that the railroads would need at least five years to comply with the proposed requirements and would incur costs of \$41 million. These commenters object to the requirement for remedial action when a yard air source is found to have the "potential" of introducing contaminants into the equipment it services. They contend that such remedial action should be required only if the yard air source actually introduces such contaminants. These commenters also object to the requirement for a detailed assessment of the remedial actions taken as unnecessary and believe that the recordkeeping requirements merely increase a railroad's administrative burden and are merely included as enforcement traps.

Several representatives of rail labor and the NTSB support the proposed

prohibition on the use of alcohol and object to any allowance of its use. Some labor representatives suggested that, if FRA were to allow the use of alcohol, then it needed to reinstate the requirements to perform periodic clean, oil, test, and stencilling (COT&S). These commenters recommend that the prohibition be extended to any device providing air to a train's brake system. The BRC again asserts that FRA should require that locomotives and air sources be equipped with air dryers, contending that they are the only way to ensure that moisture is not introduced into a train's brake system. Labor representatives also object to the proposed yard air monitoring plan requirements, contending that the proposed requirements fail to specify the frequency with which yard air sources are to be inspected. They recommend that such inspections should be more frequent at locations in cold climates. They also suggest that the monitoring plans should be subject to FRA approval prior to implementation.

FRA Conclusions. The final rule retains the basic requirements regarding yard air sources and cold weather operations that were proposed in the 1998 NPRM. The final rule generally retains the proposed requirement prohibiting the use of chemicals in a train air brake system. However, FRA agrees that the proposed prohibition of all chemicals may have been somewhat overbroad and contrary to FRA's actual intent. In proposing the prohibition, FRA intended to eliminate the use of chemicals, such as alcohol, which are known to degrade the rubber of a train's brake system. FRA agrees that there are chemicals that are currently available or that are in the process of being developed that do not cause the problems associated with the use of alcohol. In fact, FRA believes there are products currently available that do not degrade a brake system's rubber components like alcohol does. FRA believes that several railroads are currently testing or using these chemical alternatives. Consequently, the final rule slightly modifies the prohibition on the use of chemicals by imposing the prohibition on chemicals that are known to degrade or harm brake system components, such as alcohol.

The final rule also modifies some of the requirements related to the proposed yard air source monitoring plans. FRA agrees that the proposed requirements did not establish a frequency with which inspections of yard air sources should be conducted. In proposing the requirement, FRA hoped that various commenters would recommend frequencies for conducting these

inspections. This did not occur. FRA agrees that a set frequency needs to be established that will ensure that yard air sources are inspected in a timely manner during various climatic conditions. Therefore, the final rule requires that yard air sources be inspected at least twice each calendar year and that two of the inspections be no less than five months apart. FRA intends for this requirement to result in yard air sources being inspected each year during two different seasonal periods.

The final rule also clarifies that remedial action under the monitoring plans is required only on those yard air sources that are not operating as intended or that are found introducing contaminants into brake systems. Thus, the final rule removes the word "potential" as FRA agrees that the proposed language was unclear and may have been over-inclusive. The final rule also eliminates the requirement for railroads to conduct a detailed assessment of the remedial actions taken. FRA agrees that this requirement is unnecessary because railroads will be conducting regular inspections of the yard air sources on which they have conducted repairs or taken other remedial action and will be able to determine if the repairs were effective through those inspections. The final rule retains the other proposed record keeping requirements related to yard air monitoring plans but clarifies that the records may be maintained either electronically or in writing. FRA continues to believe that these records are necessary to ensure that railroads are properly conducting the required inspections and are taking timely and appropriate remedial action when a problem air source is detected.

The final rule does not contain provisions requiring FRA approval of the yard air source monitoring plans prior to their implementation as suggested by some commenters. FRA does not have the manpower or resources to review and approve the plan of each railroad and does not believe such approval is necessary given the specific requirements contained in the final rule and the records that are required to be maintained. The final rule also does not contain requirements regarding the use of air dryers on either locomotives or yard air sources. For the reasons noted in the discussion above and in the NPRM, FRA believes that requiring the use of air dryers on either locomotives or yard air sources would impose a significant cost burden on railroads and would not necessarily address the problem sought to be resolved. See 63 FR 48317–19. It should

be noted that FRA advocates the use of air dryers when possible and agrees that they have proven effective in reducing the level of moisture introduced into the brake system; however, FRA believes that the railroad is in the best position to determine where these devices will provide the greatest benefit based on the railroad's operation.

FRA is somewhat skeptical of the AAR's contentions regarding both the time and the cost necessary to implement the required yard air source monitoring plans. FRA sees no reason why a railroad would need five years to implement a plan to inspect each of its yard air sources twice a year. These devices are used on a fairly regular, if not daily, basis and should not be that difficult to inspect. Therefore, FRA believes that railroads should easily be able to implement these monitoring plans within the three years allowed under the applicable date provided in this final rule.

G. Maintenance Requirements

Based on comments received in response to the 1994 NPRM, deliberations of the RSAC Working Group and task force, and field experience, FRA proposed a comprehensive set of maintenance requirements which were intended to be a codification of current best practices occurring within the industry. The preamble to the 1998 NPRM contains a detailed discussion of the issues raised, discussed, and considered prior to the issuance of the NPRM. See 63 FR 48320–22.

After consideration of all the information and comments submitted prior to the issuance of the 1998 NPRM, FRA remained confident that the "new" repair track test and single car test, which have been used industry-wide since January of 1992, are a much better and more comprehensive method of detecting and eliminating defective brake equipment and components than the old, time-based COT&S requirements. FRA continued to believe that performance of the repair track and single car test significantly reduces the number of defective components and dramatically increases the reliability of brake equipment. Accordingly, FRA proposed the incorporation of AAR Interchange Rule 3 and Chart A into the 1998 NPRM, thus codifying the repair track air test requirements per Chart A, such that a railroad would be required to perform a repair track brake test on freight cars in any of the following six circumstances: (i) When a freight car is removed from a train due to an air brake related defect; (ii) when a freight car has its brakes cut out when removed from

a train or when placed on a shop or repair track; (iii) when a freight car is on a repair or shop track for any reason and has not received a repair track brake test within the previous 12 month period; (iv) when a freight car is found with missing or incomplete repair track brake test information; (v) when the brake reservoir(s), the control valve mounting gasket, and the pipe bracket stud are removed, repaired, or replaced; or (vi) when a freight car is found with a wheel with a built-up tread, a slid flat, or a thermal crack. FRA also proposed that each freight car receive a repair track air test no less frequently than every 5 years, and not less than 8 years from the date the car was built or rebuilt. Similarly, it was proposed that the single car test requirements of Chart A be codified, such that a railroad would perform a single car test on a freight car when the service portion, the emergency portion, or the pipe bracket or a combination of such components is removed, repaired, or replaced.

In the 1998 NPRM, FRA recognized that circumstances arise where the proposed repair track brake tests or single car tests could not always be performed at the point where repairs can be made that necessitate performance of the test. To address these circumstances, FRA proposed that a car would be allowed to be moved to the next forward location where the test could be performed after the necessary repairs were conducted. FRA attempted to make clear that the inability to perform a repair track brake test or a single car test did not constitute an inability to effectuate the necessary repairs. At the same time, however, FRA recognized rail labor's contention that some carriers often attempt to circumvent the requirements for single car and repair track testing through the elimination of repair tracks, by moving cars to "expediter" tracks for repair, or simply by making the repairs in the field. As a means to curtail these practices, FRA decided to impose extensive tagging requirements on freight cars that, due to the nature of the defective condition(s) detected, require a repair track brake test or single car test but that are moved from the location where repairs are performed prior to receiving the required test. As an alternative to the tagging requirements, FRA proposed that railroads be permitted to utilize an automated tracking system to monitor these cars and ensure they receive the requisite tests provided the automated system has been approved by FRA. FRA also proposed to require stencilling of cars with the location and date of the last

repair track or single car test. Alternatively, FRA proposed that railroads could utilize an electronic record keeping system to accomplish this stencilling requirement, provided the system has been approved by FRA. FRA believed that the proposed tagging and stencilling requirements were necessary to ensure the timely performance of the tests. Without such information, there would be virtually no way for FRA to verify a railroad's compliance with the proposed repair track and single car test requirements.

FRA also proposed various requirements related to the testing of the devices used to perform the single car tests. Similar to the 1994 NPRM, the 1998 NPRM again proposed that single car testing devices be tested at least once a day and receive routine maintenance at least every 92 days. FRA also proposed that the mechanical and electronic test devices be regularly calibrated.

In the 1998 NPRM, FRA determined that any changes to the AAR standards incorporated into regulation should be reviewed and approved by all affected parties, including FRA and rail labor. Consequently, FRA proposed a special approval process, whereby the AAR would be required to submit any proposed changes to the FRA. FRA would review the proposed change to determine whether the change is "safety-critical." Such proposed changes include, but are not limited to the following: (i) Any changes to Chart A, (ii) changes to established maintenance intervals, and (iii) changes to UMLER reporting requirements. If the proposed change was deemed by FRA to be "non safety-critical," FRA would permit the change to be implemented immediately. If the proposed change was deemed "safety-critical," FRA would be required to publish a **Federal Register** notice, conduct a public hearing if necessary, and act based on the information developed and submitted in regard to these proceedings.

FRA proposed the special approval process in response to comments from several railroads and manufacturers that FRA needed to devise some sort of quick approval process in order to permit the industry to make modifications to existing standards or equipment based on the development of new technology. Thus, FRA attempted to propose an approval process it believed would speed the process for taking advantage of new technologies over that which is currently available under the waiver process. However, in order to provide an opportunity for all interested parties to provide input for

use by FRA in its decision-making process as required by the Administrative Procedure Act, FRA determined that any special approval provision must, at a minimum, provide proper notice to the public of any significant change or action being considered by the agency with regard to existing regulations.
